Lecture 30 - Normal Forms

Lecture 31 - Programming Languages

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Monomorphism

Lecture 33 - Polymorphism

Lecture 34 - Type Checking

Lecture 35 - Contexts

Lecture 36 - Abstracts

Lecture 37 - Procedures

Lecture 38 - Meanings

Lecture 39 - Parameters

Lecture 40 - The Future

NPTEL : Parallel Computing (Computer Science and Engineering)

Co-ordinators : Dr. Subodh Kumar

Lecture 1 - Introduction

Lecture 2 - Parallel Programming Paradigms

Lecture 3 - Parallel Architecture

Lecture 4 - Parallel Architecture (case studies)

Lecture 5 - Open MP

Lecture 6 - Open MP (Continued.)

Lecture 7 - Open MP (Continued..)

Lecture 8 - Open MP & PRAM Model of Computation

Lecture 9 - PRAM

Lecture 10 - Models of Parallel Computation, Complexity

Lecture 11 - Memory Consistency

Lecture 12 - Memory Consistency & Performance Issues

Lecture 13 - Parallel Program Design

Lecture 14 - Shared Memory & Message Passing

Lecture 15 - MPI

Lecture 16 - MPI (Continued.)

Lecture 17 - MPI (Continued..)

Lecture 18 - Algorithmic Techniques

Lecture 19 - Algorithmic Techniques (Continued.)

Lecture 20 - Algorithmic Techniques (Continued..)

Lecture 21 - CUDA

Lecture 22 - CUDA (Continued.)

Lecture 23 - CUDA (Continued..)

Lecture 24 - CUDA (Continued...)

Lecture 25 - CUDA (Continued....)

Lecture 26 - CUDA (Continued.....)

Lecture 27 - CUDA (Continued.....)

Lecture 28 - Algorithms, Merging & Sorting

Lecture 29 - Algorithms, Merging & Sorting (Continued.)

Lecture 30 - Algorithms, Merging & Sorting (Continued..)

Lecture 31 - Algorithms, Merging & Sorting (Continued...)

Lecture 32 - Algorithms, Merging & Sorting (Continued....)

Lecture 33 - Lower Bounds Lock Free Synchronization, Load Stealing

Lecture 34 - Lock Free Synchronization, Graph Algorithms

NPTEL : Operating Systems (Computer Science and Engineering)

Co-ordinators : Prof. Sorav Bansal

Lecture 1 - Introduction to UNIX System Calls - Part 1

Lecture 2 - Introduction to UNIX System Calls - Part 2

Lecture 3 - Threads, Address Spaces, Filesystem Devices

Lecture 4 - PC Architecture

Lecture 5 - x86 Instruction Set, GCC Calling Conventions

Lecture 6 - Physical Memory Map, I/O, Segmentation

Lecture 7 - Segmentation, Trap Handling

Lecture 8 - Traps, Trap Handlers

Lecture 9 - Kernel Data Structures, Memory Management

Lecture 10 - Segmentation Review, Introduction to Paging

Lecture 11 - Paging

Lecture 12 - Process Address Spaces Using Paging

Lecture 13 - Translation Lookaside Buffer, Large Pages, Boot Sector

Lecture 14 - Loading the kernel, Initializing the Page table

Lecture 15 - Setting up page tables for user processes

Lecture 16 - Processes in action

Lecture 17 - Process structure, Context Switching

Lecture 18 - Process Kernel stack, Scheduler, Fork,Context-Switch, Process Control Block, Trap Entry and Return

Lecture 19 - Creating the first process

Lecture 20 - Handling User Pointers, Concurrency

Lecture 21 - Locking

Lecture 22 - Fine-grained Locking and its challenges

Lecture 23 - Locking variations

Lecture 24 - Condition variables

Lecture 25 - Multiple producer, multiple consumer queue; semaphores; monitors

Lecture 26 - Transcations and lock-free primitives read/write locks

Lecture 27 - Synchronization in xv6: acquire/release, sleep/wakeup, exit/wait

Lecture 28 - More synchronization in xv6: kill, IDE device driver; introducion to Demand Paging

Lecture 29 - Demand Paging; Introduction to Page Replacement

Lecture 30 - Page Replacement, Thrashing

Lecture 31 - Storage Devices, Filesystem Intrerfaces

Lecture 32 - File System Implementation

Lecture 33 - File System Operation

Lecture 34 - Cash Recovery and Logging

Lecture 35 - Logging in Linux ext3 filesystem

Lecture 36 - Protection and Security

Lecture 37 - Scheduling Policies

Lecture 38 - Lock-free multiprocessor coordination, Read-Copy-Update

Lecture 39 - Microkernel, Exokernel, Multikernel

Lecture 40 - Virtualization, Cloud Computing, Technology Trends

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Computer Architecture (2017) (Computer Science and Engineering)

Co-ordinators : Prof. Smruti R.Sarangi

Lecture 1 - Introduction to Computer Architecture

Lecture 2 - The Language of Bits - Part-I

Lecture 3 - The Language of Bits - Part-II

Lecture 4 - The Language of Bits - Part-III

Lecture 5 - Assembly Language - Part-I

Lecture 6 - Assembly Language - Part-II

Lecture 7 - Assembly Language - Part-III

Lecture 8 - ARM Assembly Language - Part-I

Lecture 9 - ARM Assembly Language - Part-II

Lecture 10 - x86 Assembly Language - Part-I

Lecture 11 - x86 Assembly Language - Part-II

Lecture 12 - x86 Assembly Language - Part-III

Lecture 13 - x86 Assembly Language - Part-IV

Lecture 14 - A Primer on Digital Logic - Part-I

Lecture 15 - A Primer on Digital Logic - Part-II

Lecture 16 - A Primer on Digital Logic - Part-III

Lecture 17 - Computer Arithmetic - Part-I

Lecture 18 - Computer Arithmetic - Part-II

Lecture 19 - Computer Arithmetic - Part-III

Lecture 20 - Computer Arithmetic - Part-IV

Lecture 21 - Computer Arithmetic - Part-V

Lecture 22 - Computer Arithmetic - Part-VI

Lecture 23 - Processor Design - Part-I

Lecture 24 - Processor Design - Part-II

Lecture 25 - Processor Design - Part-III

Lecture 26 - Principles of Pipelining - Part-I

Lecture 27 - Principles of Pipelining - Part-II

Lecture 28 - Principles of Pipelining - Part-III

Lecture 29 - Principles of Pipelining - Part-IV

Lecture 30 - The Memory Systems - Part-I

Lecture 31 - The Memory Systems - Part-II

Lecture 32 - The Memory Systems - Part-III

Lecture 33 - The Memory Systems - Part-IV

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Parallel Programming in OpenMP (Computer Science and Engineering)

Co-ordinators : Dr. Yogish Sabharwal

Lecture 1 - Introduction to Parallel Programming

Lecture 2 - Parallel Architectures and Programming Models

Lecture 3 - Pipelining

Lecture 4 - Superpipelining and VLIW

Lecture 5 - Memory Latency

Lecture 6 - Cache and Temporal Locality

Lecture 7 - Cache, Memory bandwidth and Spatial Locality

Lecture 8 - Intuition for Shared and Distributed Memory architectures

Lecture 9 - Shared and Distributed Memory architectures

Lecture 10 - Interconnection networks in Distributed Memory architectures

Lecture 11 - OpenMP: A parallel Hello World Program

Lecture 12 - Program with Single thread

Lecture 13 - Program Memory with Multiple threads and Multi-tasking

Lecture 14 - Context Switching

Lecture 15 - OpenMP: Basic thread functions

Lecture 16 - OpenMP: About OpenMP

Lecture 17 - Shared Memory Consistency Models and the Sequential Consistency Model

Lecture 18 - Race Conditions

Lecture 19 - OpenMP: Scoping variables and some race conditions

Lecture 20 - OpenMP: thread private variables and more constructs

Lecture 21 - Computing sum: first attempt at parallelization

Lecture 22 - Manual distribution of work and critical sections

Lecture 23 - Distributing for loops and reduction

Lecture 24 - Vector-Vector operations (Dot product)

Lecture 25 - Matrix-Vector operations (Matrix-Vector Multiply)

Lecture 26 - Matrix-Matrix operations (Matrix-Matrix Multiply)

Lecture 27 - Introduction to tasks

Lecture 28 - Task queues and task execution

Lecture 29 - Accessing variables in tasks

Lecture 30 - Completion of tasks and scoping variables in tasks

Lecture 31 - Recursive task spawning and pitfalls

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Understanding LU Factorization

Lecture 33 - Parallel LU Factorization

Lecture 34 - Locks

Lecture 35 - Advanced Task handling

Lecture 36 - Matrix Multiplication using tasks

Lecture 37 - The OpenMP Shared Memory Consistency Model

Lecture 38 - Applications finite element method

Lecture 39 - Applications deep learning

Lecture 40 - Introduction to MPI and basic calls

Lecture 41 - MPI calls to send and receive data

Lecture 42 - MPI calls for broadcasting data

Lecture 43 - MPI non blocking calls

Lecture 44 - Application distributed histogram updation

Lecture 45 - MPI collectives and MPI broadcast

Lecture 46 - MPI gathering and scattering collectives

Lecture 47 - MPI reduction and alltoall collectives

Lecture 48 - Discussion on MPI collectives design

Lecture 49 - Characteriziation of interconnects

Lecture 50 - Linear arrays 2D mesh and torus

Lecture 51 - d dimensional torus

Lecture 52 - Hypercube

Lecture 53 - Trees and cliques

Lecture 54 - Hockney model

Lecture 55 - Broadcast and Reduce with recursive doubling

Lecture 56 - Scatter and Gather with recursive doubling

Lecture 57 - Reduce scatter and All gather with recursive doubling

Lecture 58 - Discussion of message sizes in analysis

Lecture 59 - Revisiting Reduce scatter on 2D mesh

Lecture 60 - Reduce scatter and Allreduce on the Hypercube

Lecture 61 - Alltoall on the Hypercube

Lecture 62 - Lower bounds

Lecture 63 - Pipeline based algorithm for Allreduce

Lecture 64 - An improved algorithm for Alltoall on the Hypercube using E-cube routing

Lecture 65 - Pipeline based algorithm for Broadcast

Lecture 66 - Introduction to parallel graph algorithms

Lecture 67 - Breadth First Search BFS using matrix algebra

Lecture 68 - BFS Shared memory parallelization using OpenMP

Lecture 69 - Distributed memory settings and data distribution

Lecture 70 - Distributed BFS algorithm

Lecture 71 - Performance considerations

Lecture 72 - Prims Algorithm

Lecture 73 - OpenMP based shared memory parallelization for MST

Lecture 74 - MPI based distributed memory parallelization for MST

Lecture 75 - Sequential Algorithm Adaptation from Prims

Lecture 76 - Parallelization Strategy for Prims algorithm

Lecture 77 - Dry run with the parallel strategy

Lecture 78 - Johnsons algorithm with 1D data distribution

Lecture 79 - Speedup analysis on a grid graph

Lecture 80 - Floyds algorithm for all pair shortest paths

Lecture 81 - Floyds algorithm with 2D data distribution

Lecture 82 - Adaptation to transitive closures

Lecture 83 - Parallelization strategy for connected components

Lecture 84 - Analysis for parallel connected components

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Synthesis of Digital Systems (Computer Science and Engineering)

Co-ordinators : Prof. Preeti Ranjan Panda

Lecture 1 - Outline - What is Synthesis?

Lecture 2 - Chip Design Flow and Hardware Modelling

Lecture 3 - VHDL: Introduction to Hardware Description Languages and VHDL Basics

Lecture 4 - VHDL: Modelling Timing - Events and Transactions

Lecture 5 - VHDL: Specifying Hardware Behaviour with Processes

Lecture 6 - VHDL: Specifying Structure, Test Benches, Parameterisation, and Libraries

Lecture 7 - Introduction to High-level Synthesis

Lecture 8 - Language front-end Design Representation

Lecture 9 - Compiler Transformation in High Level Synthesis: Constant Folding, Dead Code Elimination, Constant Propagation, and Strength Reduction

Lecture 10 - Memory Modelling and Compiler Transformation in High Level Synthesis: Common Sub-expression Elimination and Loop Invariant Code Motion

Lecture 11 - Compiler Transformations in High Level Synthesis: Loop Unrolling and Function Inlining

Lecture 12 - Hardware Transformations and ASAP / ALAP Scheduling

Lecture 13 - Scheduling in High Level Synthesis: List Scheduling and Time-constrained Scheduling

Lecture 14 - Force Directed Scheduling and Register Allocation

Lecture 15 - High Level Synthesis and Timing Issues

Lecture 16 - Finite State Machine Synthesis: Introduction to FSM Encoding

Lecture 17 - Finite State Machine Synthesis: Identifying Common Cubes and Graph Embeding

Lecture 18 - The Retiming Problem

Lecture 19 - Efficient Solution to Retiming and Introduction to Logic Synthesis

Lecture 20 - Binary Decision Diagrams

Lecture 21 - Introduction to Logic Synthesis

Lecture 22 - Two-level Logic Optimisation

Lecture 23 - Multi-Level Logic Optimisation

Lecture 24 - Multi-level Logic Synthesis: Technology Mapping

Lecture 25 - Introduction to Timing Analysis

Lecture 26 - Timing Analysis and Critical Paths

NPTEL : NOC:An Introduction to Artificial Intelligence (Computer Science and Engineering)

Co-ordinators : Prof. Mausam

Lecture 1 - Introduction: What to Expect from AI

Lecture 2 - Introduction: History of AI from 40s - 90s

Lecture 3 - Introduction: History of AI in the 90s

Lecture 4 - Introduction: History of AI in NASA and DARPA (2000s)

Lecture 5 - Introduction: The Present State of AI

Lecture 6 - Introduction: Definition of AI Dictionary Meaning

Lecture 7 - Introduction: Definition of AI Thinking VS Acting and Humanly VS Rationally

Lecture 8 - Introduction: Definition of AI Rational Agent View of AI

Lecture 9 - Introduction: Examples Tasks, Phases of AI and Course Plan

Lecture 10 - Uniform Search: Notion of a State

Lecture 11 - Uniformed Search: Search Problem and Examples - Part 2

Lecture 12 - Uniformed Search: Basic Search Strategies - Part 3

Lecture 13 - Uniformed Search: Iterative Deepening DFS - Part 4

Lecture 14 - Uniformed Search: Bidirectional Search - Part 5

Lecture 15 - Informed Search: Best First Search - Part 1

Lecture 16 - Informed Search: Greedy Best First Search and A* Search - Part 2

Lecture 17 - Informed Search: Analysis of A* Algorithm - Part 3

Lecture 18 - Informed Search Proof of optimality of A* - Part 4

Lecture 19 - Informed Search: Iterative Deepening A* and Depth First Branch and Bound - Part 5

Lecture 20 - Informed Search: Admissible Heuristics and Domain Relaxation - Part 6

Lecture 21 - Informed Search: Pattern Database Heuristics - Part 7

Lecture 22 - Local Search: Satisfaction Vs Optimization - Part 1

Lecture 23 - Local Search: The Example of N-Queens - Part 2

Lecture 24 - Local Search: Hill Climbing - Part 3

Lecture 25 - Local Search: Drawbacks of Hill Climbing - Part 4

Lecture 26 - Local Search: of Hill Climbing With random Walk and Random Restart - Part 5

Lecture 27 - Local Search: Hill Climbing With Simulated Anealing - Part 6

Lecture 28 - Local Search: Local Beam Search and Genetic Algorithms - Part 7

Lecture 29 - Adversarial Search: Minimax Algorithm for two player games

Lecture 30 - Adversarial Search: An Example of Minimax Search

Lecture 31 - Adversarial Search: Alpha Beta Pruning

Lecture 32 - Adversarial Search: Analysis of Alpha Beta Pruning

Lecture 33 - Adversarial Search: Analysis of Alpha Beta Pruning (Continued...)

Lecture 34 - Adversarial Search: Horizon Effect, Game Databases and Other Ideas

Lecture 35 - Adversarial Search: Summary and Other Games

Lecture 36 - Constraint Satisfaction Problems: Representation of the atomic state

Lecture 37 - Constraint Satisfaction Problems: Map coloring and other examples of CSP

Lecture 38 - Constraint Satisfaction Problems: Backtracking Search

Lecture 39 - Constraint Satisfaction Problems: Variable and Value Ordering in Backtracking Search

Lecture 40 - Constraint Satisfaction Problems: Inference for detecting failures early

Lecture 41 - Constraint Satisfaction Problems: Exploiting problem structure

Lecture 42 - Logic in AI : Different Knowledge Representation systems - Part 1

Lecture 43 - Logic in AI : Syntax - Part 2

Lecture 44 - Logic in AI : Semantics - Part 3

Lecture 45 - Logic in AI : Forward Chaining - Part 4

Lecture 46 - Logic in AI : Resolution - Part 5

Lecture 47 - Logic in AI : Reduction to Satisfiability Problems - Part 6

Lecture 48 - Logic in AI : SAT Solvers: DPLL Algorithm - Part 7

Lecture 49 - Logic in AI : Sat Solvers: WalkSAT Algorithm - Part 8

Lecture 50 - Uncertainty in AI: Motivation

Lecture 51 - Uncertainty in AI: Basics of Probability

Lecture 52 - Uncertainty in AI: Conditional Independence and Bayes Rule

Lecture 53 - Bayesian Networks: Syntax

Lecture 54 - Bayesian Networks: Factoriziation

Lecture 55 - Bayesian Networks: Conditional Independences and d-Separation

Lecture 56 - Bayesian Networks: Inference using Variable Elimination

Lecture 57 - Bayesian Networks: Reducing 3-SAT to Bayes Net

Lecture 58 - Bayesian Networks: Rejection Sampling

Lecture 59 - Bayesian Networks: Likelihood Weighting

Lecture 60 - Bayesian Networks: MCMC with Gibbs Sampling

Lecture 61 - Bayesian Networks: Maximum Likelihood Learning

Lecture 62 - Bayesian Networks: Maximum a-Posteriori LearningÂ

Lecture 63 - Bayesian Networks: Bayesian Learning

Lecture 64 - Bayesian Networks: Structure Learning and Expectation Maximization

Lecture 65 - Introduction, Part 10: Agents and Environments

Lecture 66 - Decision Theory: Steps in Decision Theory

Lecture 67 - Decision Theory: Non Deterministic Uncertainty

Lecture 68 - Probabilistic Uncertainty and Value of perfect information

Lecture 69 - Expected Utility vs Expected Value

Lecture 70 - Markov Decision Processes: Definition

Lecture 71 - Markov Decision Processes: An example of a Policy

Lecture 72 - Markov Decision Processes: Policy Evaluation using system of linear equations

Lecture 73 - Markov Decision Processes: Iterative Policy Evaluation

Lecture 74 - Markov Decision Processes: Value Iteration

Lecture 75 - Markov Decision Processes: Policy Iteration and Applications and Extensions of MDPs

Lecture 76 - Reinforcement Learning: Background

Lecture 77 - Reinforcement Learning: Model-based Learning for policy evaluation (Passive Learning)

Lecture 78 - Reinforcement Learning: Model-free Learning for policy evaluation (Passive Learning)

Lecture 79 - Reinforcement Learning: TD Learning

Lecture 80 - Reinforcement Learning: TD Learning and Computational Neuroscience

Lecture 81 - Reinforcement Learning: Q Learning

Lecture 82 - Reinforcement Learning: Exploration vs Exploitation Tradeoff

Lecture 83 - Reinforcement Learning: Generalization in RL

Lecture 84 - Deep Learning: Perceptrons and Activation functions

Lecture 85 - Deep Learning: Example of Handwritten digit recognition

Lecture 86 - Deep Learning: Neural Layer as matrix operations

Lecture 87 - Deep Learning: Differentiable loss function

Lecture 88 - Deep Learning: Backpropagation through a computational graph

Lecture 89 - Deep Learning: Thin Deep Vs Fat Shallow Networks

Lecture 90 - Deep Learning: Convolutional Neural Networks

Lecture 91 - Deep Learning: Deep Reinforcement Learning

Lecture 92 - Ethics of AI: Humans vs Robots

Lecture 93 - Ethics of AI: Robustness and Transparency of AI systems

Lecture 94 - Ethics of AI: Data Bias and Fairness of AI systems

Lecture 95 - Ethics of AI: Accountability, privacy and Human-AI interaction

Lecture 96 - Wrapup

NPTEL : NOC : Introduction to programming in C (Computer Science and Engineering)

Co-ordinators : Prof. Satyadev Nandakumar

Lecture 1 - Intro - Process of programming

Lecture 2 - Intro - GCD

Lecture 3 - Intro - Programming cycle

Lecture 4 - Intro - Tracing a simple program

Lecture 5 - Intro - Variables

Lecture 6 - Intro - Operators

Lecture 7 - Loops - While

Lecture 8 - Loops - While example

Lecture 9 - Loops - While GCD example

Lecture 10 - Loops - Longest 1

Lecture 11 - Loops - Longest 2

Lecture 12 - Loops - Longest 3

Lecture 13 - Loops - Do-while

Lecture 14 - Loops - Matrix using nested loops

Lecture 15 - Loops - For

Lecture 16 - Loops - Matrix using nested for loops

Lecture 17 - Loops - Break statement

Lecture 18 - Loops - Continue statement

Lecture 19 - Loops - Continue statement example

Lecture 20 - Data types in C

Lecture 21 - ASCII code

Lecture 22 - Operators Expressions Associativity

Lecture 23 - Precedence of operators

Lecture 24 - Expression evaluation

Lecture 25 - Functions - Introduction

Lecture 26 - Functions - How functions are executed

Lecture 27 - Functions - Examples - 1

Lecture 28 - Functions - Examples - 2

Lecture 29 - Arrays in C

Lecture 30 - Initializing arrays

Lecture 31 - Initializing character arrays

Lecture 32 - Pointers in C

Lecture 33 - Pointer arithmetic

Lecture 34 - Function with pointer arguments

Lecture 35 - Example - copy a subarray

Lecture 36 - Programming using arrays and pointers

Lecture 37 - Sizeof operator

Lecture 38 - Returning pointers from functions

Lecture 39 - Example - return duplicate of a string

Lecture 40 - Recursion - Linear Recursion

Lecture 41 - Recursion - Linear Recursion - 2

Lecture 42 - Recursion - Two-way Recursion

Lecture 43 - Multidimensional Arrays

Lecture 44 - Multidimensional Arrays and Pointers

Lecture 45 - Multidimensional Arrays and Pointers - continued (2)

Lecture 46 - Multidimensional Arrays and Pointers - continued (3)

Lecture 47 - File Handling

Lecture 48 - Some other file-handling functions

Lecture 49 - Structures in C - 1

Lecture 50 - Structures in C - 2

Lecture 51 - Singly Linked Lists

Lecture 52 - Doubly Linked Lists - introduction

Lecture 53 - Organizing code into multiple files - 1

Lecture 54 - Organizing code into multiple files - 2

Lecture 55 - Pre and post increment

Lecture 56 - Doubly Linked Lists - Introduction

Lecture 57 - Organizing code into multiple files - 1

Lecture 58 - Organizing code into multiple files - 2

Lecture 59 - Pre and post increment operators

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fundamentals of Database Systems (Computer Science and Engineering)

Co-ordinators : Dr. Arnab Bhattacharya

Lecture 1 - Introduction to Databases

Lecture 2 - Relational Data Model

Lecture 3 - Relational Algebra Basic Operators

Lecture 4 - Relational Algebra Composition of Operators

Lecture 5 - Relational Algebra Additional Operators

Lecture 6 - Relational Algebra Extended Relational Algebra

Lecture 7 - Relational Algebra: Database Modifications

Lecture 8 - SQL: Introduction and Data Definition

Lecture 9 - SQL: Basic Queries

Lecture 10 - SQL: Advanced Queries

Lecture 11 - SQL: Updates, Joins, Views and Triggers

Lecture 12 - Normalization Theory: Motivation

Lecture 13 - Normalization Theory: 1 NF and 2NF

Lecture 14 - Normalization Theory: 3NF

Lecture 15 - Normalization Theory: BCNF

Lecture 16 - Normalization Theory: MVD

Lecture 17 - Physical Design

Lecture 18 - Database Indexing: Hashing

Lecture 19 - Database Indexing: Tree-based Indexing

Lecture 20 - Query Processing: Selection

Lecture 21 - Query Processing: Sorting

Lecture 22 - Query Processing: Nested-Loop joins and Merge join

Lecture 23 - Query Processing: Hash join and other Operations

Lecture 24 - Query Optimization: Equivalent Expressions and Simple Equivalance Rules

Lecture 25 - Query Optimization: Complex Equivalence Rules

Lecture 26 - Query Optimization: Join Order

Lecture 27 - Query Optimization: Heuristics and Sizes

Lecture 28 - Database Transactions: Properties and Failures

Lecture 29 - Database Transactions: States and Systems

Lecture 30 - Recovery Systems: Deferred Database Modification

Lecture 31 - Recovery Systems: Immediate Database Modification.

Lecture 32 - Recovery Systems: Checkpointing and Shadow Paging

Lecture 33 - Schedules: Introduction

Lecture 34 - Schedules: Conflict Serializability

Lecture 35 - Schedules: View Serializability

Lecture 36 - Schedules: Result Equivalence and Testing for Serializability

Lecture 37 - Schedules: Recoverability

Lecture 38 - Concurrency Control: Locks

Lecture 39 - Concurrency Control: Two-phase Locking Protocol

Lecture 40 - Concurrency Control: Timestamp Ordering Protocol

Lecture 41 - Concurrency Control: Validation-based Protocol

Lecture 42 - Concurrency Control: Multiple Granularity for Locks

Lecture 43 - Concurrency Control: Deadlock Prevention and Deadlock Detection

Lecture 44 - Concurrency Control: Deadlock Recovery and Update Operations

Lecture 45 - NoSQL: Introduction and Properties

Lecture 46 - NoSQL: Columnar Families

Lecture 47 - NoSQL: Different NoSQL Systems

Lecture 48 - Big Data

NPTEL : NOC:Theory of Computation (Computer Science and Engineering)

Co-ordinators : Prof. Raghunath Tewari

Lecture 1 - Introduction to Finite Automata

Lecture 2 - Basic Notation and Convention, DFA Edit Lesson

Lecture 3 - Example of DFAs

Lecture 4 - Computation by DFA and Regular operation

Lecture 5 - Introduction to Nondeterminism

Lecture 6 - NFA, definition and examples

Lecture 7 - Equivalence of NFA and DFA, Closure properties

Lecture 8 - Regular expressions

Lecture 9 - Algebraic properties, RE to NFA conversion

Lecture 10 - GNFA to RE conversion

Lecture 11 - More closure properties of regular languages

Lecture 12 - Non-regular languages and pumping lemma

Lecture 13 - Examples of non-regular languages

Lecture 14 - DFA minimization

Lecture 15 - Introduction to CFGs

Lecture 16 - Examples of CFGs, Reg subset of CFL

Lecture 17 - Parse tree, derivation, ambiguity

Lecture 18 - Normal forms, Chomsky normal form

Lecture 19 - Non-CFLs, pumping lemma

Lecture 20 - Examples of non- CFLs

Lecture 21 - Pushdown Automata

Lecture 22 - Pushdown Automata - Definition and Example

Lecture 23 - Pushdown Automata - Examples and Relation with CFGs

Lecture 24 - Closure Properties of CFLs

Lecture 25 - Deterministic Context Free Languages

Lecture 26 - Turing Machine

Lecture 27 - More on Turing Machine

Lecture 28 - Non deterministic Turing Machine Edit Lesson

Lecture 29 - Configuration Graphs

Lecture 30 - Closure Properties of Decidable and Turing recognizable languages

Lecture 31 - Decidability properties of Regular and Context Free Languages

Lecture 32 - Undecidability

Lecture 33 - More on Undecidability

Lecture 34 - Reduction

Lecture 35 - Applications of Reduction

Lecture 36 - Rice's theorem

Lecture 37 - Introduction to Computational Complexity Theory

Lecture 38 - More on the class NP

Lecture 39 - NP-Completeness

Lecture 40 - More on NP-Completeness

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 12 - Interface in Propositional Logic

Lecture 13 - First Order Logic

Lecture 14 - Reasoning Using First Order Logic

Lecture 15 - Resolution in FOPL

Lecture 16 - Rule Based System

Lecture 17 - Rule Based Systems II

Lecture 18 - Semantic Net

Lecture 19 - Reasoning in Semantic Net

Lecture 20 - Frames

Lecture 21 - Planning - 1

Lecture 22 - Planning - 2

Lecture 23 - Planning - 3

Lecture 24 - Planning - 4

Lecture 25 - Rule Based Expert System

Lecture 26 - Reasoning with Uncertainty - I

Lecture 27 - Reasoning with Uncertainty - II

Lecture 28 - Reasoning with Uncertainty - III

Lecture 29 - Reasoning with Uncertainty - IV

Lecture 30 - Fuzzy Reasoning - I

Lecture 31 - Fuzzy Reasoning - II

Lecture 32 - Introduction to Learning - I

Lecture 33 - Introduction to Learning - II

Lecture 34 - Rule Induction and Decision Trees - I

Lecture 35 - Rule Induction and Decision Trees - II

Lecture 36 - Learning Using neural Networks - I

Lecture 37 - Learning Using Neural Networks - II

Lecture 38 - Probabilistic Learning

Lecture 39 - Natural Language Processing - I

Lecture 40 - Natural Language Processing - II

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Artificial Intelligence (Prof. P. Dasgupta) (Computer Science and Engineering)

Co-ordinators : Prof. P. Dasgupta

Lecture 1 - Introduction to Artificial Intelligence

Lecture 2 - Problem Solving by Search

Lecture 3 - Searching with Costs

Lecture 4 - Informed State Space Search

Lecture 5 - Heuristic Search: A* and Beyond

Lecture 6 - Problem Reduction Search: AND/OR Graphs

Lecture 7 - Searching Game Trees

Lecture 8 - Knowledge Based Systems: Logic and Deduction

Lecture 9 - First Order Logic

Lecture 10 - Inference in First Order Logic

Lecture 11 - Resolution - Refutation Proofs

Lecture 12 - Resolution Refutation Proofs

Lecture 13 - Logic Programming : Prolog

Lecture 14 - Prolog Programming

Lecture 15 - Prolog: Exercising Control

Lecture 16 - Additional Topics

Lecture 17 - Introduction to Planning

Lecture 18 - Partial Order Planning

Lecture 19 - GraphPLAN and SATPlan

Lecture 20 - SATPlan

Lecture 21 - Reasoning under uncertainty

Lecture 22 - Bayesian Networks

Lecture 23 - Reasoning with Bayes Networks

Lecture 24 - Reasoning with Bayes networks (Contd.)

Lecture 25 - Reasoning under uncertainty: Issues

Lecture 26 - Learning : Decision Trees

Lecture 27 - Learning : Neural Networks

Lecture 28 - Back Propagation Learning

Lecture 32 - Factoring Use Cases

Lecture 33 - Overview of Class diagram

Lecture 34 - Inheritance relationship

Lecture 35 - Association relationship

Lecture 36 - Aggregation/ Composition and dependency relations

Lecture 37 - Interation Modelling

Lecture 38 - Development of Sequence diagrams

Lecture 39 - State-Machine diagram

Lecture 40 - An Object-Oriented design process

Lecture 41 - Domain Analysis

Lecture 42 - Examples of object-oriented design

Lecture 43 - Basic concepts in Testing - I

Lecture 44 - Basic concepts in Testing - II

Lecture 45 - Basic concepts in Testing - III

Lecture 46 - Unit testing strategies - I

Lecture 47 - Unit testing strategies - II

Lecture 48 - Equivalance Class Testing - I

Lecture 49 - Equivalance Class Testing - II

Lecture 50 - Special Value Testing

Lecture 51 - Combinatorial Testing

Lecture 52 - Decision Table Testing

Lecture 53 - Cause effect graphing

Lecture 54 - Pairwise Testing

Lecture 55 - White box Testing

Lecture 56 - Condition Testing

Lecture 57 - MC/DC Coverage

Lecture 58 - MC/DC Testing

Lecture 59 - Path Testing

Lecture 60 - Dataflow and Mutation Testing

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Computer Networks and Internet Protocol (Computer Science and Engineering)

Co-ordinators : Prof. Sandip Chakraborty, Prof. Soumya Kanti Ghosh

Lecture 1 - Introduction to Computer Networks - A brief history

Lecture 2 - Data Networks - from Circuit Switching Network to Packet Switching Network

Lecture 3 - Network Protocol Stack

Lecture 4 - Services at the Different Layers of the Protocol Stack

Lecture 5 - Application Layer I - Different Protocols at the Application Layer

Lecture 6 - Application Layer II - Domain Name Systems

Lecture 7 - Application Layer III - The Web

Lecture 8 - Application Layer III - Hypertext Transfer Protocol

Lecture 9 - Application Layer III - Internet Mail Transfer

Lecture 10 - Application Layer IV - File Transfer (FTP)

Lecture 11 - Transport Layer I - Services

Lecture 12 - Transport Layer II - Connection

Lecture 13 - Transport Layer II - Connection (Continued...)

Lecture 14 - Transport Layer IV - Reliability

Lecture 15 - Transport Layer V - Sliding Window Protocols

Lecture 16 - Transport Layer Performance

Lecture 17 - Buffer Management and Congestion Control

Lecture 18 - Transport Layer Primitives

Lecture 19 - Transmission Control Protocol I - Basics

Lecture 20 - Transmission Control Protocol II - Connections

Lecture 21 - Transmission Control Protocol III - Flow Control

Lecture 22 - Transmission Control Protocol IV - Congestion Control

Lecture 23 - User Datagram Protocol

Lecture 24 - Socket Programming - I

Lecture 25 - Socket Programming - II

Lecture 26 - Network Layer I - Introduction

Lecture 27 - IP Addressing (IPv4) I - Classful addressing

Lecture 28 - IP Addressing (IPv4) II - CIDR

Lecture 29 - IP Addressing (IPv4) III - Network Address Translation (NAT)

Lecture 30 - IPv6 Addressing

Lecture 31 - Internet QoS - I (What is QoS)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Internet QoS - II (Basic QoS Architecture)

Lecture 33 - Internet QoS - III (Traffic Policing and Traffic Shaping)

Lecture 34 - Internet QoS - IV (Traffic Scheduling)

Lecture 35 - Internet QoS - V (Integrated and Differentiated Service Architecture)

Lecture 36 - IP Routing Table

Lecture 37 - Routing in the Internet I - Intra-domain routing

Lecture 38 - Routing in the Internet II - Routing protocols

Lecture 39 - Routing in the Internet III - Inter-domain Routing

Lecture 40 - Routing in the Internet IV - Border Gateway Protocol

Lecture 41 - IP Routers

Lecture 42 - IP Routers Demo

Lecture 43 - Software Defined Networking - I (Basics)

Lecture 44 - Software Defined Networking - II (Open Flow)

Lecture 45 - Software Defined Networking - III (Demo)

Lecture 46 - Data Link Layer - Overview

Lecture 47 - Data Link Layer - Basic Concepts

Lecture 48 - Data Link Layer - Ethernet

Lecture 49 - Data Link Layer - Ethernet (Continued...)

Lecture 50 - Data Link Layer - Flow and Error Control

Lecture 51 - ARP-RAPP-BOOTP-DHCP

Lecture 52 - ARP-RAPP-BOOTP-DHCP (Continued...)

Lecture 53

Lecture 54 - Wireless LANs

Lecture 55 - Layer 1: Physical Layer

Lecture 56 - Layer 1: Physical Layer - II

Lecture 57 - Layer 1: Physical Layer - III

Lecture 58 - Network Security - Overview

Lecture 59 - Network Security - II

Lecture 60 - Network Security - III [TCP/IP Security]

NPTEL : NOC:Blockchain Architecture Design and Use Cases (Computer Science and Engineering)

Co-ordinators : Praveen Jayachandran, Prof. Sandip Chakraborty

Lecture 1 - Introduction to Blockchain - I (Basics)

Lecture 2 - Introduction to Blockchain - II (History)

Lecture 3 - Introduction to Blockchain - III (Architecture)

Lecture 4 - Introduction to Blockchain - IV (Conceptualization)

Lecture 5 - Basic Crypto Primitives - I

Lecture 6 - Basic Crypto Primitives - II

Lecture 7 - Bitcoin Basics - I

Lecture 8 - Bitcoin Basics - II

Lecture 9 - Bitcoin Basics - III

Lecture 10 - Distributed Consensus

Lecture 11 - Consensus in Bitcoin - I (The Basics)

Lecture 12 - Consensus in Bitcoin - II (PoW and Beyond)

Lecture 13 - Consensus in Bitcoin - III (The Miners)

Lecture 14 - Permissioned Blockchain - I (Basics)

Lecture 15 - Permissioned Blockchain - II (Consensus)

Lecture 16 - Permissioned Blockchain - III (RAFT Consensus)

Lecture 17 - Permissioned Blockchain - IV (Byzantine General Problem)

Lecture 18 - Permissioned Blockchain - V (Practical Byzantine Fault Tolerance)

Lecture 19 - Blockchain for Enterprise - Overview

Lecture 20 - Blockchain Components and Concepts

Lecture 21 - Hyperledger Fabric - Transaction Flow

Lecture 22 - Hyperledger Fabric Details

Lecture 23 - Fabric - Membership and Identity Management

Lecture 24 - Hyperledger Fabric Network Setup

Lecture 25 - Fabric Demo on IBM Blockchain Cloud - I

Lecture 26 - Fabric Demo on IBM Blockchain Cloud - II

Lecture 27 - Fabric Demo, deploy from scratch - III

Lecture 28 - Hyperledger Composer - Application Development

Lecture 29 - Hyperledger Composer - Network Administration

Lecture 30 - Blockchain Use Cases

Lecture 31 - Blockchain in Financial Service - I (Payments and Secure Trading)

Lecture 32 - Blockchain in Financial Service - II (Compliance and Mortgage)

Lecture 33 - Blockchain in Financial Service - III (Financial Trade)

Lecture 34 - Revolutionizing Global Trade

Lecture 35 - Blockchain in Supply Chain - I

Lecture 36 - Blockchain in Supply Chain - II

Lecture 37 - Blockchain in Other Industries

Lecture 38 - Blockchain in Government - I (Advantages)

Lecture 39 - Blockchain in Government - II (Use Cases)

Lecture 40 - Blockchain in Government - III (Digital Identity)

Lecture 41 - Blockchain in Government - IV (Hyperledger Indy)

Lecture 42 - Blockchain in Government - V (Tax Payments and Land Registry Records)

Lecture 43 - Blockchain Security - I (Overview)

Lecture 44 - Blockchain Security - II (Membership and Access control in Fabric)

Lecture 45 - Blockchain Security - III (Privacy in Fabric)

Lecture 46 - Blockchain Security - III (Fabric SideDB)

Lecture 47 - Research Aspects - I (Consensus Scalability)

Lecture 48 - Research Aspects - II (Bitcoin-NG)

Lecture 49 - Research Aspects - III (Collective Signing)

Lecture 50 - Research Aspects - IV (Byzcoin)

Lecture 51 - Research Aspects - V (Algorand)

Lecture 52 - Research Aspects - VI (Cross Fault Tolerance)

Lecture 53 - Research Aspects - VII (Secured Multi-Party Computation)

Lecture 54 - Blockchain for Science - I (Blockchain for Big Data)

Lecture 55 - Blockchain for Science - II (Blockchain and AI)

Lecture 56 - Comparing Ecosystems - Ethereum

Lecture 57 - Comparing Ecosystems - Ethereum development tools and Quorum

Lecture 58 - Comparing Ecosystems - Corda Part 1

Lecture 59 - Comparing Ecosystems - Corda Part 2

Lecture 60 - Concluding the course

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Switching Circuits and Logic Design (Computer Science and Engineering)

Co-ordinators : Prof. Indranil Sengupta

Lecture 1 - Introduction

Lecture 2 - Octal and Hexadecimal Number Systems

Lecture 3 - Signed and Unsigned Binary Number Representation

Lecture 4 - Binary Addition and Subtraction

Lecture 5 - BCD and Gray Code Representations

Lecture 6 - Error Detection and Correction

Lecture 7 - Logic Gates

Lecture 8 - Logic Families to Implement Gates

Lecture 9 - Emerging Technologies - Part I

Lecture 10 - Emerging Technologies - Part II

NPTEL : NOC:Scalable Data Science (Computer Science and Engineering)

Co-ordinators : Prof. Sourangshu Bhattacharya, Prof. Anirban Dasgupta

Lecture 1 - Background: Introduction

Lecture 2 - Probability: Concentration inequalities

Lecture 3 - Linear algebra: PCA, SVD

Lecture 4 - Optimization: Basics, Convex, GD

Lecture 5 - Machine Learning: Supervised, generalization, feature learning, clustering.

Lecture 6 - Memory-efficient data structures: Hash functions, universal / perfect hash families

Lecture 7 - Bloom filters

Lecture 8 - Sketches for distinct count

Lecture 9 - Sketches for distinct count (Continued...)

Lecture 10 - Misra-Gries sketch

Lecture 11 - Frequent Element: Space Saving and Count Min

Lecture 12 - Frequent Element: Count Sketch

Lecture 13 - Near Neighbors

Lecture 14 - Locality Sensitive Hashing

Lecture 15 - Building LSH Tables

Lecture 16 - Approximate near neighbors search: Extensions e.g. multi-probe, b-bit hashing, Data dependent variants

Lecture 17 - Approximate near neighbors search: Extensions e.g. multi-probe, b-bit hashing, Data dependent variants (Continued...)

Lecture 18 - Approximate near neighbors search: Extensions e.g. multi-probe, b-bit hashing, Data dependent variants (Continued...)

Lecture 19 - Randomized Numerical Linear Algebra: Random projection

Lecture 20 - Randomized Numerical Linear Algebra: Random projection (Continued...)

Lecture 21 - Randomized Numerical Linear Algebra: a) Matrix multiplication + QB decomposition

Lecture 22 - Randomized Numerical Linear Algebra: b) CUR+CX

Lecture 23 - Randomized Numerical Linear Algebra: a) L2 regression using RP

Lecture 24 - Randomized Numerical Linear Algebra: b) Leverage scores

Lecture 25 - Randomized Numerical Linear Algebra: c) Hash Kernels + Kitchen Sink

Lecture 26 - Map-reduce and Hadoop

Lecture 27 - Hadoop System

Lecture 28 - Hadoop System (Continued...)

Lecture 29 - Hadoop System (Continued...)

Lecture 30 - Spark

Lecture 31 - Spark (Continued...)

Lecture 32 - Spark (Continued...)

Lecture 33 - Distributed Machine Learning and Optimization: Introduction

Lecture 34 - SGD+Proof

Lecture 35 - SGD+Proof (Continued...)

Lecture 36 - Distributed Machine Learning and Optimization:ADMM + applications

Lecture 37 - Distributed Machine Learning and Optimization:ADMM + applications (Continued...)

Lecture 38 - Clustering

Lecture 39 - Clustering (Continued...)

Lecture 40 - Conclusion

NPTEL : NOC:Introduction to Industry 4.0 and Industrial Internet of Things (Computer Science and Engineering)

Co-ordinators : Prof. Sudip Misra

Lecture 1 - Introduction: Sensing and Actuation

Lecture 2 - Introduction: IoT Connectivity - Part 1

Lecture 3 - Introduction: IoT Connectivity - Part 2

Lecture 4 - Introduction: IoT Networking - Part 1

Lecture 5 - Introduction: IoT Networking - Part 2

Lecture 6 - Industry 4.0: The Fourth Revolution

Lecture 7 - Industry 4.0: Sustainability Assessment of Manufacturing Industry

Lecture 8 - Industry 4.0: Lean Production System

Lecture 9 - Industry 4.0: Smart and Connected Business Perspective

Lecture 10 - Industry 4.0: Smart Factories

Lecture 11 - Industry 4.0: Cyber-Physical Systems and Next-Generation Sensors

Lecture 12 - Industry 4.0: Collaboration Platform and Product Lifecycle Management

Lecture 13 - Industry 4.0: Augmented Reality and Virtual Reality

Lecture 14 - Industry 4.0: Artificial Intelligence

Lecture 15 - Industry 4.0: Big Data and Advanced Analysis

Lecture 16 - Industry 4.0: Cybersecurity

Lecture 17 - Basics of Industrial IoT: Introduction

Lecture 18 - Basics of Industrial IoT: Industrial Internet Systems

Lecture 19 - Basics of IIoT: Industrial Sensing and Actuation

Lecture 20 - Basics of Industrial IoT: Industrial Processes - Part 1

Lecture 21 - Basics of Industrial IoT: Industrial Processes - Part 2

Lecture 22 - Business Models and Reference Architecture for IIoT: Business Models - Part 1

Lecture 23 - Business Models and Reference Architecture for IIoT: Business Models - Part 2

Lecture 24 - Business Models and Reference Architecture for IIoT: Reference Architecture - Part 1

Lecture 25 - Business Models and Reference Architecture for IIoT: Reference Architecture - Part 2

Lecture 26 - Key Enablers of Industrial IoT: Sensing - Part 1

Lecture 27 - Key Enablers of Industrial IoT: Sensing - Part 2

Lecture 28 - Key Enablers of Industrial IoT: Connectivity - Part 1

Lecture 29 - Key Enablers of Industrial IoT: Connectivity - Part 2

Lecture 30 - Key Enablers of Industrial IoT: Connectivity - Part 3

Lecture 31 - Key Enablers of Industrial IoT: Connectivity - Part 4

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Key Enablers of Industrial IoT: Connectivity - Part 5

Lecture 33 - Key Enablers of Industrial IoT: Processing - Part 1

Lecture 34 - Key Enablers of Industrial IoT: Processing - Part 2

Lecture 35 - Key Enablers of Industrial IoT: Process Control

Lecture 36 - IIoT Analytics and Data Management: Introduction

Lecture 37 - IIoT Analytics and Data Management: Machine Learning and Data Science - Part 1

Lecture 38 - IIoT Analytics and Data Management: Machine Learning and Data Science - Part 2

Lecture 39 - IIoT Analytics and Data Management: Cloud Computing in IIoT - Part 1

Lecture 40 - IIoT Analytics and Data Management: Cloud Computing in IIoT - Part 2

Lecture 41 - Analytics and Data Management: Fog Computing in IIoT

Lecture 42 - IIoT Analytics and Data Management: Tutorial for R and Julia Programming

Lecture 43 - IIoT Analytics and Data Management: Data Management with Hadoop

Lecture 44 - IIoT Analytics and Data Management: Data Center Networks

Lecture 45 - Advanced Technologies: Software-Defined Networking (SDN) in IIoT - Part 1

Lecture 46 - Advanced Technologies: Software-Defined Networking (SDN) in IIoT - Part 2

Lecture 47 - Advanced Technologies: Security in IIoT - Part 1

Lecture 48 - Advanced Technologies: Security in IIoT - Part 2

Lecture 49 - IIoT Applications: Factories and Assembly Line

Lecture 50 - IIoT Applications: Food Industry

Lecture 51 - IIoT Applications: Inventory Management and Quality Control

Lecture 52 - IIoT Applications: Plant Security and Safety

Lecture 53 - IIoT Applications: Facility Management

Lecture 54 - IIoT Applications: Oil, Chemical and Pharmaceutical Industry

Lecture 55 - IIoT Applications: UAVs in Industries

Lecture 56 - IIoT Applications: Oil, Chemical and Pharmaceutical Industry

Lecture 57 - IIoT Applications: UAVs in Industries

Lecture 58 - Case Studies for Industry 4.0 and IIoT

Lecture 59 - Milk Processing and Packaging Industries

Lecture 60 - Manufacturing Industries - Part I

Lecture 61 - Manufacturing Industries - Part II

Lecture 62 - Student Projects - Part I

Lecture 63 - Student Projects - Part II

Lecture 64 - Virtual Reality Lab

Lecture 65 - Steel Technology Lab

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Automata, Languages and Computation (Computer Science and Engineering)

Co-ordinators : Prof. Sourav Mukhopadhyay

Lecture 1 - Deterministic Finite Automata (DFA)

Lecture 2 - Input alphabet

Lecture 3 - Extended transition function

Lecture 4 - Language of DFA

Lecture 5 - Building DFA

Lecture 6 - Building DFA (Continued...)

Lecture 7 - NFA (Nondeterministic Finite Automata)

Lecture 8 - Language of a NFA

Lecture 9 - Equivalence of DFAs and NFAs

Lecture 10 - Subset Construction

Lecture 11 - ÃÂμ-NFA

Lecture 12 - Extended transition function of NFA

Lecture 13 - Language of NFA

Lecture 14 - NFA to NFA

Lecture 15 - NFA to DFA

Lecture 16 - Regular expression

Lecture 17 - Regular expression (Continued...)

Lecture 18 - More on regular expression

Lecture 19 - Equivalence of NFA and regular expression

Lecture 20 - Equivalence of NFA and regular expression (Continued...)

Lecture 21 - DFA to Regular expression

Lecture 22 - DFA to Regular expression (Continued...)

Lecture 23 - Construction of regular expression from a DFA (example)

Lecture 24 - Closure properties of Regular Set

Lecture 25 - Closure properties of Regular Set (Continued...)

Lecture 26 - Substitution

Lecture 27 - Pumping Lemma

Lecture 28 - Application of the pumping lemma

Lecture 29 - More on Pumping lemma

Lecture 30 - Ardens Theorem

Lecture 31 - Minimization of FA

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Minimization of FA (Continued...)

Lecture 33 - Two way FA

Lecture 34 - Finite automata with output

Lecture 35 - Equivalence of Moore and Mealy machine

Lecture 36 - Context free grammars (CFG)

Lecture 37 - Context free language (CFL)

Lecture 38 - More example on CFL

Lecture 39 - More on CFG

Lecture 40 - Derivation Tree/Parse Tree

Lecture 41 - Leftmost and Rightmost derivations

Lecture 42 - Ambiguity in CFG

Lecture 43 - Simplification of CFG

Lecture 44 - Algorithms to construct reduced grammar

Lecture 45 - Elimination of Null and Unit productions

Lecture 46 - Chomsky Normal Form (CNF)

Lecture 47 - Greibach Normal Form (GNF)

Lecture 48 - Pushdown Automata (PDA)

Lecture 49 - Language accepted by PDA

Lecture 50 - Example of a language accepted by PDA

Lecture 51 - Deterministic PDA

Lecture 52 - Equivalence of language accepted

Lecture 53 - Equivalence PDA

Lecture 54 - Equivalence PDA and CFL

Lecture 55 - Equivalence PDA and CFL (Continued...)

Lecture 56 - Relationship between regular language and CFL

Lecture 57 - Pumping lemma for CFLs

Lecture 58 - Closer properties of CFLs

Lecture 59 - Turning Machine

Lecture 60 - Language accepted by a Turning machine

NPTEL : NOC:Operating System Fundamentals (Computer Science and Engineering)

Co-ordinators : Prof. Santanu Chattopadhyay

Lecture 51 - Introduction

Lecture 52 - Intro to Networking in the Cloud

Lecture 53 - Defining a Virtual Private Cloud

Lecture 54 - Public and Private IP Address Basics

Lecture 55 - Googles Network Architecture

Lecture 56 - Routes and Firewall Rules in the Cloud

Lecture 57 - Multiple VPC Networks

Lecture 58 - Building Hybrid Clouds

Lecture 59 - Different Options for Load Balancing

Lecture 60 - Recap Quiz

Lecture 61 - Summary

Lecture 62 - Introduction - Let Google keep an eye on things

Lecture 63 - Introduction to IaC

Lecture 64 - Cloud Deployment Manager

Lecture 65 - Monitoring and Managing Your Services, Apps, and Infra

Lecture 66 - Stackdriver

Lecture 67 - Recap Quiz - Let Google keep an eye on things

Lecture 68 - Summary - Let Google keep an eye on things

Lecture 69 - Introduction - You have the data, but what are you doing with it?

Lecture 70 - Intro to Big Data Managed Services in the Cloud

Lecture 71 - Leverage Big Data Operations with Cloud Dataproc

Lecture 72 - Build ETL Pipelines using Cloud Dataflow

Lecture 73 - BigQuery Googles Enterprise Data Warehouse

Lecture 74 - Recap Quiz - You have the data, but what are you doing with it?

Lecture 75 - Summary - You have the data, but what are you doing with it?

Lecture 76 - Introduction

Lecture 77 - Introduction to ML

Lecture 78 - ML and GCP

Lecture 79 - Building Bespoke ML models

Lecture 80 - Cloud AutoML

Lecture 81 - Googles Pre-trained ML APIs

Lecture 82 - Recap Quiz

Lecture 83 - Summary

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Object Oriented System Development using UML, Java and Patterns (Computer Science and Engineering)

Co-ordinators : Prof. Rajib Mall

Lecture 1 - Introduction

Lecture 2 - Basic Concepts in UML

Lecture 3 - Introduction to Use case Modelling

Lecture 4 - Factoring Use Cases

Lecture 5 - Use Case Examples

Lecture 6 - Use Case Guidelines

Lecture 7 - Class Diagram

Lecture 8 - Class Relations

Lecture 9 - Binary and Unary Associations

Lecture 10 - Implementation of Association Relation in Java

Lecture 11 - Implementation of Association in General Case

Lecture 12 - Association Class and Ternary Association

Lecture 13 - Qualified Association

Lecture 14 - Aggregation and Composition

Lecture 15 - Dependency Relation

Lecture 16 - Class Diagram Exercises

Lecture 17 - Interfaces, Packages and Abstract Classes

Lecture 18 - Polymorphism

Lecture 19 - State Machine Diagrams

Lecture 20 - State Charts Overview

Lecture 21 - Features of State Machine Model

Lecture 22 - Example of State Machine Modelling

Lecture 23 - Encoding a State Machine - I

Lecture 24 - Encoding a State Machine - II

Lecture 25 - Interaction Diagrams

Lecture 26 - Sequence Diagram - I

Lecture 27 - Sequence Diagram - II

Lecture 28 - Activity Diagram

Lecture 29 - Introduction to OOAD

Lecture 30 - OOAD - I

Lecture 31 - OOAD - II

Lecture 32 - Example Application of OOAD

Lecture 33 - CRD Cards

Lecture 34 - Open/Closed Principle

Lecture 35 - LSP, ISP Principles

Lecture 36 - DIP Principle

Lecture 37 - Introduction to Design Pattern

Lecture 38 - GRASP Pattern: Introduction

Lecture 39 - Expert and Creator Pattern

Lecture 40 - Pure Fabrication, Law of Demeter

Lecture 41 - Introduction to GOF Patterns

Lecture 42 - Facade Pattern

Lecture 43 - Observer Pattern - I

Lecture 44 - Observer Pattern - II

Lecture 45 - Singleton Pattern - I

Lecture 46 - Singleton Pattern - II

Lecture 47 - State Pattern - I

Lecture 48 - State Pattern - II

Lecture 49 - Composite Pattern - I

Lecture 50 - Composite Pattern - II

Lecture 51 - Adapter Pattern - I

Lecture 52 - Adapter Pattern - II

Lecture 53 - Bridge Pattern - I

Lecture 54 - Bridge Pattern - II

Lecture 55 - Proxy Pattern - I

Lecture 56 - Proxy Pattern - II

Lecture 57 - Decorator Pattern - I

Lecture 58 - Decorator Pattern - II

Lecture 59 - Decorator Pattern - III

Lecture 60 - Iterator Pattern

NPTEL : NOC:Data Structure and Algorithms using Java (Computer Science and Engineering)

Co-ordinators : Prof. Debasis Samanta

Lecture 1 - Introduction and Course Plan

Lecture 2 - Generic Methods

Lecture 3 - Basics of Generic Class

Lecture 4 - Parameterized Generic Class

Lecture 5 - Bounded Argument Generic Class

Lecture 6 - Basics of the Framework

Lecture 7 - Collection in JCF

Lecture 8 - Set of JCF

Lecture 9 - Map Framework

Lecture 10 - Java Legacy Classes

Lecture 11 - Array Data Structures

Lecture 12 - Programming for Arrays

Lecture 13 - Class ArrayList for Arrays

Lecture 14 - Arrays for Arrays

Lecture 15 - Vector Class for Arrays

Lecture 16 - Linked List Data Structure - Part I

Lecture 17 - Linked List Data Structure - Part II

Lecture 18 - Programming for Linked Lists - Part I

Lecture 19 - Programming for Linked Lists - Part II

Lecture 20 - Linked Lists Using JCF

Lecture 21 - Stack Data Structures

Lecture 22 - Programming for Stack

Lecture 23 - Stack Using JCF

Lecture 24 - Queue Data Structure

Lecture 25 - Programming for Queue

Lecture 26 - Queue Using JCF

Lecture 27 - Understanding Tree Data Structures

Lecture 28 - Operations on Binary Tree Data Structures

Lecture 29 - Binary Search Tree

Lecture 30 - Programming for Binary Search Tree

Lecture 31 - Height Balanced Binary Search Tree

Lecture 32 - Heap Tree

Lecture 33 - Programming for Heap Tree

Lecture 34 - Huffman Tree

Lecture 35 - Graph Structures

Lecture 36 - Graph Algorithms

Lecture 37 - Map Framework in Java

Lecture 38 - Applications of Map - Part I

Lecture 39 - Applications of Map - Part II

Lecture 40 - Collection Set

Lecture 41 - Operations on Set Collection

Lecture 42 - Introduction to java.io

Lecture 43 - IO with Byte Streams

Lecture 44 - IO with Character Streams

Lecture 45 - File Input-Output

Lecture 46 - Random Access File

Lecture 47 - Linear Searching Algorithms

Lecture 48 - Non-linear Searching Algorithms

Lecture 49 - Programs for Searching

Lecture 50 - Sorting Algorithms - Part I

Lecture 51 - Improved Sorting Algorithms

Lecture 52 - Advanced Sorting Algorithms

Lecture 53 - Programs for Sorting - Part I

Lecture 54 - Programs for Sorting - Part II

Lecture 55 - Sorting Using JCF

Lecture 56 - String Class

Lecture 57 - Applications of String

Lecture 58 - StringBuffer Class

Lecture 59 - Miscellaneous Utilities

Lecture 60 - Java Cursors

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Real-Time Systems (Computer Science and Engineering)

Co-ordinators : Prof. Rajib Mall

Lecture 1 - Introduction

Lecture 2 - Introduction

Lecture 3 - Characteristics of a real-time embedded system

Lecture 4 - Characteristics of a real-time embedded system

Lecture 5 - Types of real-time tasks

Lecture 6 - Events in a Real-Time System

Lecture 7 - Types of time constraints

Lecture 8 - Basics of Real-Time Task scheduling

Lecture 9 - Clock-driven schedulers

Lecture 10 - Basics of Cyclic schedulers

Lecture 11 - Cyclic Scheduler

Lecture 12 - Frame size constraints

Lecture 13 - Frame size selection: Examples

Lecture 14 - Event-driven scheduling

Lecture 15 - EDF scheduler

Lecture 16 - Variants of EDF and Rate Monotonic Scheduling

Lecture 17 - Rate Monotonic Schedulability Analysis

Lecture 18 - Rate Monotonic Schedulability Analysis

Lecture 19 - Rate Monotonic Scheduling: Miscellaneous issues

Lecture 20 - RMS Generalizations

Lecture 21 - RMS Generalizations

Lecture 22 - Handling aperiodic and sporadic tasks in rate monotonic scheduling

Lecture 23 - Handling aperiodic and sporadic tasks in rate monotonic scheduling

Lecture 24 - Coping up with Insufficient number of priorities

Lecture 25 - Handling task jitter and precedence ordering

Lecture 26 - Resource Sharing Among Real-Time Tasks

Lecture 27 - Basic priority inheritance protocol (PIP)

Lecture 28 - Highest Locker Protocol (HLP)

Lecture 29 - Priority Ceiling Protocol (PCP)

Lecture 30 - Working of Priority Ceiling Protocol

Lecture 31 - Analysis of Priority Ceiling Protocol

Lecture 44 - Multiway Splits

Lecture 45 - Missing Values, Imputation and Surrogate Splits

Lecture 46 - Instability, Smoothness and Repeated Subtrees

Lecture 47 - Tutorial

Lecture 48 - Evaluation Measures I

Lecture 49 - Bootstrapping and Cross Validation

Lecture 50 - 2 Class Evaluation Measures

Lecture 51 - The ROC Curve

Lecture 52 - Minimum Description Length and Exploratory Analysis

Lecture 53 - Introduction to Hypothesis Testing

Lecture 54 - Basic Concepts

Lecture 55 - Sampling Distributions and the Z Test

Lecture 56 - Student's t-test

Lecture 57 - The Two Sample and Paired Sample t-tests

Lecture 58 - Confidence Intervals

Lecture 59 - Bagging, Committee Machines and Stacking

Lecture 60 - Boosting

Lecture 61 - Gradient Boosting

Lecture 62 - Random Forest

Lecture 63 - Naive Bayes

Lecture 64 - Bayesian Networks

Lecture 65 - Undirected Graphical Models - Introduction

Lecture 66 - Undirected Graphical Models - Potential Functions

Lecture 67 - Hidden Markov Models

Lecture 68 - Variable Elimination

Lecture 69 - Belief Propagation

Lecture 70 - Partitional Clustering

Lecture 71 - Hierarchical Clustering

Lecture 72 - Threshold Graphs

Lecture 73 - The BIRCH Algorithm

Lecture 74 - The CURE Algorithm

Lecture 75 - Density Based Clustering

Lecture 76 - Gaussian Mixture Models

Lecture 77 - Expectation Maximization

Lecture 78 - Expectation Maximization (Continued...)

Lecture 79 - Spectral Clustering

Lecture 80 - Learning Theory

Lecture 81 - Frequent Itemset Mining

Lecture 82 - The Apriori Property

Lecture 83 - Introduction to Reinforcement Learning

Lecture 84 - RL Framework and TD Learning

Lecture 85 - Solution Methods and Applications

Lecture 86 - Multi-class Classification

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Artificial Intelligence: Knowledge Representation and Reasoning (Computer Science and Engineering)

Co-ordinators : Prof. Deepak Khemani

Lecture 1 - Introduction

Lecture 2 - Abductive Inferences and Expectations

Lecture 3 - On Machine Learning

Lecture 4 - A New Test of Intelligence?

Lecture 5 - The World According to Us

Lecture 6 - From Particles to Concepts

Lecture 7 - The Domains for Reasoning

Lecture 8 - Hierarchies in Representation

Lecture 9 - Logic and Representation: A Quick Tour

Lecture 10 - Symbols and Thought

Lecture 11 - From Gears to Symbols

Lecture 12 - Truth, Logic, and Provability

Lecture 13 - A Syntactic Machine

Lecture 14 - Entailment and Proof

Lecture 15 - The Languages of Logic

Lecture 16 - Patterns in Arguments

Lecture 17 - Rules of Inference

Lecture 18 - Propositional Logic

Lecture 19 - Propositional Logic: Syntax

Lecture 20 - Propositional Logic: Semantics

Lecture 21 - Proofs: Natural Deduction

Lecture 22 - The Deduction Theorem

Lecture 23 - Models

Lecture 24 - The Tableau Method

Lecture 25 - First Order Logic

Lecture 26 - First Order Logic: Syntax

Lecture 27 - FOL: Universal Instantiation

Lecture 28 - First Order Logic: Semantics

Lecture 29 - FOL: Truth Assignments

Lecture 30 - Modified Modus Ponens

Lecture 31 - The Unification Algorithm

Lecture 32 - Skolemization

Lecture 33 - Expert Systems

Lecture 34 - Backward Chaining Systems

Lecture 35 - Deductive Retrieval

Lecture 36 - The Resolution Refutation Method

Lecture 37 - Clause Form in FOL

Lecture 38 - Resolution Refutation in FOL

Lecture 39 - First Order Logic with Equality

Lecture 40 - Who was the surgeon?

Lecture 41 - Consistency vs. Completeness

Lecture 42 - Logic Programming

Lecture 43 - Arithmetic

Lecture 44 - Horn Clauses and Prolog

Lecture 45 - SLD Derivation = Backward Chaining

Lecture 46 - Programming in Logic

Lecture 47 - Prolog: Programming in Logic

Lecture 48 - Prolog: Procedural Interpretation

Lecture 49 - Prolog: Query Evaluation

Lecture 50 - Prolog: Unifying Terms

Lecture 51 - Prolog: Goal Order

Lecture 52 - Prolog: Tabling

Lecture 53 - Prolog: Negation by Failure

Lecture 54 - Prolog: The Cut Operator

Lecture 55 - Rule Based Expert Systems

Lecture 56 - The OPS5 Language

Lecture 57 - Match, Resolve, Execute

Lecture 58 - Conflict Resolution Strategies

Lecture 59 - The Rete Algorithm

Lecture 60 - The Rete Net

Lecture 61 - The Rete Net : Examples

Lecture 62 - Knowledge Representation

Lecture 63 - Synonyms, Antonyms, Hyponyms, Meronyms

Lecture 64 - Binary Relations

Lecture 65 - Describing Family Relations

Lecture 66 - Recursive Descriptions

Lecture 67 - Abstract Entities

Lecture 68 - Reification: Units of Measurement

Lecture 69 - Semantic Nets and Knowledge Graphs

Lecture 70 - DL: Description Logics

Lecture 71 - Defining New Concepts and Roles

Lecture 72 - The Sentences in DL

Lecture 73 - A Family of Logics

Lecture 74 - DL: Some Examples

Lecture 75 - ALC Tableau

Lecture 76 - Model Checking in ALC

Lecture 77 - ALC Tableau: Examples

Lecture 78 - Language Independent Represntation

Lecture 79 - Conceptual Dependency Theory

Lecture 80 - CD States

Lecture 81 - Inferences in MARGIE

Lecture 82 - CD: Actions

Lecture 83 - English to CD

Lecture 84 - Representing Complex Verbs

Lecture 85 - Semantic Parsing of Language

Lecture 86 - Knowledge Structures

Lecture 32 - Lab 3 : Virtual Memory

Lecture 33 - Locality of Reference, Demand paging

Lecture 34 - Page Replacement Algorithm

Lecture 35 - Multilevel Paging, Translational Lookaside Buffer

Lecture 36 - Multilevel Paging

Lecture 37 - Multilevel Paging - Part 1

Lecture 38 - Page Frame Allocation, Beledy's Anomaly

Lecture 39 - Paging, Cache

Lecture 40 - Cache

Lecture 41 - Cache Organisation

Lecture 42 - Cache - Cache Coherency, Dual Ported Cache

Lecture 43 - Multilevel Caching, Multitasking

Lecture 44 - Cache, Degree of Multiprogramming

Lecture 45 - Shared Memory Architecture

Lecture 46 - Shared Memory Architecture - Part I

Lecture 47 - Virtually Indexed - Virtually Tagged and Physically Tagged Caches

Lecture 48 - Lab 4 : Task Switching (Continued...)

Lecture 49 - Shared Memory Architecture, Cache Coherence

Lecture 50 - Concurrent Programming in Hardware - Part I

Lecture 51 - Concurrent Programming in Hardware - Part II

Lecture 52 - Conclusion : Recent Trends in Computer Organization and Architecture

NPTEL : NOC:Introduction to Wireless and Cellular Communications (Computer Science and Engineering)

Co-ordinators : Prof. David Kovil Pillai

Lecture 1 - Overview of Cellular Systems - Part 1

Lecture 2 - Overview of Cellular Systems - Part 2

Lecture 3 - Overview of Cellular Systems - Part 3

Lecture 4 - 5G and other Wireless Technologies

Lecture 5 - Basic Cellular Terminology

Lecture 6 - Introduction to Antennas and Propagation Models

Lecture 7 - Link budget, Fading margin, Outage

Lecture 8 - Cellular Concept

Lecture 9 - Cellular system design and analysis

Lecture 10 - Cellular Geometry and System Design

Lecture 11 - Cellular System Capacity, Trunking

Lecture 12 - Handoff and Mobility

Lecture 13 - Handoff Part 2, Classification of Signal Variation

Lecture 14 - Shadowing, Outage, Multipath

Lecture 15 - Rayleigh Fading and Statistical Characterization

Lecture 16 - Properties of Rayleigh Distribution

Lecture 17 - BER in Fading, Narrowband vs Wideband Channels

Lecture 18 - Characterization of Multipath Fading Channels

Lecture 19 - Choice of Modulation

Lecture 20 - Coherent versus Differential Detection

Lecture 21 - Review of Lecture 1-19

Lecture 22 - Coherent vs Differential Detection - Part II and BER in Fading

Lecture 23 - BER in Fading - Part II, Ricean Fading

Lecture 24 - Ricean and Nakagami Fading, Moment Generating Function (MGF)

Lecture 25 - MGF Part II, WSSUS Model

Lecture 26 - WSSUS Part II, Coherence Time, Doppler Spectrum

Lecture 27 - Doppler, Temporal Characteristics of Fading Channels

Lecture 28 - WSSUS-Characterization of Time Dispersive Fading Channels

Lecture 29 - WSSUS-Classification of Fading Channels

Lecture 30 - Practical Channel Models (ITU, COST), Computer generation of Rayleigh fading

Lecture 31 - Rayleigh Fading simulation - Clark and Gans Method, Jakesâ€™ Method

Lecture 32 - Jakesâ€™ Method properties

Lecture 33 - Introduction to Diversity, Antenna selection diversity

Lecture 34 - Statistical Characterization of Antenna Diversity, Optimal Diversity Combining

Lecture 35 - BER in fading, Equal Gain Combining

Lecture 36 - Array Gain, Diversity Gain, Alamouti Scheme

Lecture 37 - Alamouti Scheme - Part II, Channel Capacity

Lecture 38 - Capacity of fading Channels, Capacity with Outage

Lecture 39 - Channel State Information, Optimum Power Allocation

Lecture 1 - Introduction

Lecture 2 - Answer to the puzzle

Lecture 3 - Introduction to Python - 1

Lecture 4 - Introduction to Python - 2

Lecture 5 - Introduction to Networkx - 1

Lecture 6 - Introduction to Networkx - 2

Lecture 7 - Social Networks: The Challenge

Lecture 8 - Google Page Rank

Lecture 9 - Searching in a Network

Lecture 10 - Link Prediction

Lecture 11 - The Contagions

Lecture 12 - Importance of Acquaintances

Lecture 13 - Marketing on Social Networks

Lecture 14 - Introduction to Datasets

Lecture 15 - Ingredients Network

Lecture 16 - Synonymy Network

Lecture 17 - Web Graph

Lecture 18 - Social Network Datasets

Lecture 19 - Datasets : Different Formats

Lecture 20 - Datasets : How to Download?

Lecture 21 - Datasets : Analysing Using Networkx

Lecture 22 - Datasets : Analysing Using Gephi

Lecture 23 - Introduction : Emergence of Connectedness

Lecture 24 - Advanced Material : Emergence of Connectedness

Lecture 25 - Programming Illustration : Emergence of Connectedness

Lecture 26 - Summary to Datasets

Lecture 27 - Introduction

Lecture 28 - Granovetter's Strength of weak ties

Lecture 29 - Triads, clustering coefficient and neighborhood overlap

Lecture 30 - Structure of weak ties, bridges, and local bridges

Lecture 31 - Validation of Granovetter's experiment using cell phone data

Lecture 32 - Embededness

Lecture 33 - Structural Holes

Lecture 34 - Social Capital

Lecture 35 - Finding Communities in a graph (Brute Force Method)

Lecture 36 - Community Detection Using Girvan Newman Algorithm

Lecture 37 - Visualising Communities using Gephi

Lecture 38 - Tie Strength, Social Media and Passive Engagement

Lecture 39 - Betweenness Measures and Graph Partitioning

Lecture 40 - Strong and Weak Relationship - Summary

Lecture 41 - Introduction to Homophily - Should you watch your company ?

Lecture 42 - Selection and Social Influence

Lecture 43 - Interplay between Selection and Social Influence

Lecture 44 - Homophily - Definition and measurement

Lecture 45 - Foci Closure and Membership Closure

Lecture 46 - Introduction to Fatman Evolutionary model

Lecture 47 - Fatman Evolutionary Model - The Base Code (Adding people)

Lecture 48 - Fatman Evolutionary Model - The Base Code (Adding Social Foci)

Lecture 49 - Fatman Evolutionary Model - Implementing Homophily

Lecture 50 - Quantifying the Effect of Triadic Closure

Lecture 51 - Fatman Evolutionary Model - Implementing Closures

Lecture 52 - Fatman Evolutionary Model - Implementing Social Influence

Lecture 53 - Fatman Evolutionary Model - Storing and analyzing longitudnal data

Lecture 54 - Spatial Segregation : An Introduction

Lecture 55 - Spatial Segregation : Simulation of the Schelling Model

Lecture 56 - Spatial Segregation : Conclusion

Lecture 57 - Schelling Model Implementation - 1 (Introduction)

Lecture 58 - Schelling Model Implementation - 2 (Base Code)

Lecture 59 - Schelling Model Implementation - 3 (Visualization and Getting a list of boundary and internal nodes)

Lecture 60 - Schelling Model Implementation - 4 (Getting a list of unsatisfied nodes)

Lecture 61 - Schelling Model Implementation - 5 (Shifting the unsatisfied nodes and visualizing the final graph)

Lecture 62 - Chapter - 5 Positive and Negative Relationships (Introduction)

Lecture 63 - Structural Balance

Lecture 64 - Enemy'S Enemy is a Friend

Lecture 65 - Characterizing the Structure of Balanced Networks

Lecture 66 - Balance Theorem

Lecture 67 - Proof of Balance Theorem

Lecture 68 - Introduction to positive and negative edges

Lecture 69 - Outline of implemantation

Lecture 70 - Creating graph, displaying it and counting unstable triangles

Lecture 71 - Moving a network from an unstable to stable state

Lecture 72 - Forming two coalitions

Lecture 73 - Forming two coalitions (Continued...)

Lecture 74 - Visualizing coalitions and the evolution

Lecture 75 - The Web Graph

Lecture 76 - Collecting the Web Graph

Lecture 77 - Equal Coin Distribution

Lecture 78 - Random Coin Dropping

Lecture 79 - Google Page Ranking Using Web Graph

Lecture 80 - Implementing PageRank Using Points Distribution Method - 1

Lecture 81 - Implementing PageRank Using Points Distribution Method - 2

Lecture 82 - Implementing PageRank Using Points Distribution Method - 3

Lecture 83 - Implementing PageRank Using Points Distribution Method - 4

Lecture 84 - Implementing PageRank Using Random Walk Method - 1

Lecture 85 - Implementing PageRank Using Random Walk Method - 2

Lecture 86 - DegreeRank versus PageRank

Lecture 87 - We Follow

Lecture 88 - Why do we Follow?

Lecture 89 - Diffusion in Networks

Lecture 90 - Modeling Diffusion

Lecture 91 - Modeling Diffusion (Continued...)

Lecture 92 - Impact of Commmunities on Diffusion

Lecture 93 - Cascade and Clusters

Lecture 94 - Knowledge, Thresholds and the Collective Action

Lecture 95 - An Introduction to the Programming Screencast (Coding 4 major ideas)

Lecture 96 - The Base Code

Lecture 97 - Coding the First Big Idea - Increasing the Payoff

Lecture 98 - Coding the Second Big Idea - Key People

Lecture 99 - Coding the Third Big Idea - Impact of Communities on Cascades

Lecture 100 - Coding the Fourth Big Idea - Cascades and Clusters

Lecture 101 - Introduction to Hubs and Authorities (A Story)

Lecture 102 - Principle of Repeated Improvement (A story)

Lecture 103 - Principle of Repeated Improvement (An example)

Lecture 104 - Hubs and Authorities

Lecture 105 - PageRank Revisited - An example

Lecture 106 - PageRank Revisited - Convergence in the Example

Lecture 107 - PageRank Revisited - Conservation and Convergence

Lecture 108 - PageRank, conservation and convergence - Another example

Lecture 109 - Matrix Multiplication (Pre-requisite 1)

Lecture 110 - Convergence in Repeated Matrix Multiplication (Pre-requisite 1)

Lecture 111 - Addition of Two Vectors (Pre-requisite 2)

Lecture 112 - Convergence in Repeated Matrix Multiplication- The Details

Lecture 113 - PageRank as a Matrix Operation

Lecture 114 - PageRank Explained

Lecture 115 - Introduction to Powerlaw

Lecture 116 - Why do Normal Distributions Appear?

Lecture 117 - Power Law emerges in WWW graphs

Lecture 118 - Detecting the Presence of Powerlaw

Lecture 119 - Rich Get Richer Phenomenon

Lecture 120 - Summary So Far

Lecture 121 - Implementing Rich-getting-richer Phenomenon (Barabasi-Albert Model) - 1

Lecture 122 - Implementing Rich-getting-richer Phenomenon (Barabasi-Albert Model) - 2

Lecture 123 - Implementing a Random Graph (Erdos-Renyi Model) - 1

Lecture 124 - Implementing a Random Graph (Erdos-Renyi Model) - 2

Lecture 125 - Forced Versus Random Removal of Nodes (Attack Survivability)

Lecture 126 - Rich Get Richer - A Possible Reason

Lecture 127 - Rich Get Richer - The Long Tail

Lecture 128 - Epidemics- An Introduction

Lecture 129 - Introduction to epidemics (Continued...)

Lecture 130 - Simple Branching Process for Modeling Epidemics

Lecture 131 - Simple Branching Process for Modeling Epidemics (Continued...)

Lecture 132 - Basic Reproductive Number

Lecture 133 - Modeling epidemics on complex networks

Lecture 134 - SIR and SIS spreading models

Lecture 135 - Comparison between SIR and SIS spreading models

Lecture 136 - Basic Reproductive Number Revisited for Complex Networks

Lecture 137 - Percolation model

Lecture 138 - Analysis of basic reproductive number in branching model (The problem statement)

Lecture 139 - Analyzing basic reproductive number - 2

Lecture 140 - Analyzing basic reproductive number - 3

Lecture 141 - Analyzing basic reproductive number - 4

Lecture 142 - Analyzing basic reproductive number - 5

Lecture 143 - Small World Effect - An Introduction

Lecture 144 - Milgram's Experiment

Lecture 145 - The Reason

Lecture 146 - The Generative Model

Lecture 147 - Decentralized Search - I

Lecture 148 - Decentralized Search - II

Lecture 149 - Decentralized Search - III

Lecture 150 - Programming illustration- Small world networks : Introduction

Lecture 151 - Base code

Lecture 152 - Making homophily based edges

Lecture 153 - Adding weak ties

Lecture 154 - Plotting change in diameter

Lecture 155 - Programming illustration- Myopic Search : Introduction>

Lecture 156 - Myopic Search

Lecture 157 - Myopic Search comparision to optimal search

Lecture 158 - Time Taken by Myopic Search

Lecture 159 - PseudoCores : Introduction

Lecture 160 - How to be Viral

Lecture 161 - Who are the right key nodes?

Lecture 162 - finding the right key nodes (the core)

Lecture 163 - Coding K-Shell Decomposition

Lecture 164 - Coding cascading Model

Lecture 165 - Coding the importance of core nodes in cascading

Lecture 166 - Pseudo core

Lecture 415 - Example - Number of ways of climbing steps

Lecture 416 - Number of ways of climbing steps: Recurrence relation

Lecture 417 - Example - Rabbits on an island

Lecture 418 - Example - n-bit string

Lecture 419 - Example - n-bit string without consecutive zero

Lecture 420 - Solving Linear Recurrence Relations - A theorem

Lecture 421 - A note on the proof

Lecture 422 - Soving recurrence relation - Example 1

Lecture 423 - Soving recurrence relation - Example 2

Lecture 424 - Fibonacci Sequence

Lecture 425 - Introduction to Fibonacci sequence

Lecture 426 - Solution of Fibbonacci sequence

Lecture 427 - A basic introduction to 'complexity'

Lecture 428 - Intuition for 'complexity'

Lecture 429 - Visualizing complexity order as a graph

Lecture 430 - Tower of Hanoi

Lecture 431 - Reccurence relation of Tower of Hanoi

Lecture 432 - Solution for the recurrence relation of Tower of Hanoi

Lecture 433 - A searching technique

Lecture 434 - Recurrence relation for Binary search

Lecture 435 - Solution for the recurrence relation of Binary search

Lecture 436 - Example: Door knocks example

Lecture 437 - Example: Door knocks example solution

Lecture 438 - Door knock example and Merge sort

Lecture 439 - Introduction to Merge sort - 1

Lecture 440 - Recurrence relation for Merge sort

Lecture 441 - Intoduction to advanced topics

Lecture 442 - Introduction to Chromatic polynomial

Lecture 443 - Chromatic polynomial of complete graphs

Lecture 444 - Chromatic polynomial of cycle on 4 vertices - Part 1

Lecture 445 - Chromatic polynomial of cycle on 4 vertices - Part 2

Lecture 446 - Correspondence between partition and generating functions

Lecture 447 - Correspondence between partition and generating functions: In general

Lecture 448 - Distinct partitions and odd partitions

Lecture 449 - Distinct partitions and generating functions

Lecture 450 - Odd partitions and generating functions

Lecture 451 - Distinct partitions equals odd partitions: Observation

Lecture 452 - Distinct partitions equals odd partitions: Proof

Lecture 453 - Why 'partitions' to 'polynomial'?

Lecture 454 - Example: Picking 4 letters from the word 'INDIAN'

Lecture 455 - Motivation for exponential generating function

Lecture 456 - Recurrrence relation: The theorem and its proof

Lecture 457 - Introduction to Group Theory

Lecture 458 - Uniqueness of the identity element

Lecture 459 - Formal definition of a Group

Lecture 460 - Groups: Examples and non-examples

Lecture 461 - Groups: Special Examples - Part 1

Lecture 462 - Groups: Special Examples - Part 2

Lecture 463 - Subgroup: Defintion and examples

Lecture 464 - Lagrange's theorem

Lecture 465 - Summary

Lecture 466 - Conclusion

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Deep Learning (Computer Science and Engineering)

Co-ordinators : Prof.Mitesh Khapra

Lecture 1 - Biological Neuron

Lecture 2 - From Spring to Winter of AI

Lecture 3 - The Deep Revival

Lecture 4 - From Cats to Convolutional Neural Networks

Lecture 5 - Faster, higher, stronger

Lecture 6 - The Curious Case of Sequences

Lecture 7 - Beating humans at their own games (literally)

Lecture 8 - The Madness (2013)

Lecture 9 - (Need for) Sanity

Lecture 10 - Motivation from Biological Neurons

Lecture 11 - McCulloch Pitts Neuron, Thresholding Logic

Lecture 12 - Perceptrons

Lecture 13 - Error and Error Surfaces

Lecture 14 - Perceptron Learning Algorithm

Lecture 15 - Proof of Convergence of Perceptron Learning Algorithm

Lecture 16 - Deep Learning (CS7015): Linearly Separable Boolean Functions

Lecture 17 - Deep Learning (CS7015): Representation Power of a Network of Perceptrons

Lecture 18 - Deep Learning (CS7015): Sigmoid Neuron

Lecture 19 - Deep Learning (CS7015): A typical Supervised Machine Learning Setup

Lecture 20 - Deep Learning (CS7015): Learning Parameters: (Infeasible) guess work

Lecture 21 - Deep Learning (CS7015): Learning Parameters: Gradient Descent

Lecture 22 - Deep Learning (CS7015): Representation Power of Multilayer Network of Sigmoid Neurons

Lecture 23 - Feedforward Neural Networks (a.k.a multilayered network of neurons)

Lecture 24 - Learning Paramters of Feedforward Neural Networks (Intuition)

Lecture 25 - Output functions and Loss functions

Lecture 26 - Backpropagation (Intuition)

Lecture 27 - Backpropagation: Computing Gradients w.r.t. the Output Units

Lecture 28 - Backpropagation: Computing Gradients w.r.t. Hidden Units

Lecture 29 - Backpropagation: Computing Gradients w.r.t. Parameters

Lecture 30 - Backpropagation: Pseudo code

Lecture 31 - Derivative of the activation function

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Information content, Entropy and cross entropy

Lecture 33 - Recap: Learning Parameters: Guess Work, Gradient Descent

Lecture 34 - Contours Maps

Lecture 35 - Momentum based Gradient Descent

Lecture 36 - Nesterov Accelerated Gradient Descent

Lecture 37 - Stochastic And Mini-Batch Gradient Descent

Lecture 38 - Tips for Adjusting Learning Rate and Momentum

Lecture 39 - Line Search

Lecture 40 - Gradient Descent with Adaptive Learning Rate

Lecture 41 - Bias Correction in Adam

Lecture 42 - Eigenvalues and Eigenvectors

Lecture 43 - Linear Algebra : Basic Definitions

Lecture 44 - Eigenvalue Decompositon

Lecture 45 - Principal Component Analysis and its Interpretations

Lecture 46 - PCA: Interpretation 2

Lecture 47 - PCA: Interpretation 3

Lecture 48 - PCA: Interpretation 3 (Continued...)

Lecture 49 - PCA: Practical Example

Lecture 50 - Singular Value Decomposition

Lecture 51 - Introduction to Autoncoders

Lecture 52 - Link between PCA and Autoencoders

Lecture 53 - Regularization in autoencoders (Motivation)

Lecture 54 - Denoising Autoencoders

Lecture 55 - Sparse Autoencoders

Lecture 56 - Contractive Autoencoders

Lecture 57 - Bias and Variance

Lecture 58 - Train error vs Test error

Lecture 59 - Train error vs Test error (Recap)

Lecture 60 - True error and Model complexity

Lecture 61 - L2 regularization

Lecture 62 - Dataset augmentation

Lecture 63 - Parameter sharing and tying

Lecture 64 - Adding Noise to the inputs

Lecture 65 - Adding Noise to the outputs

Lecture 66 - Early stopping

Lecture 67 - Ensemble Methods

Lecture 68 - Dropout

Lecture 69 - A quick recap of training deep neural networks

Lecture 70 - Unsupervised pre-training

Lecture 71 - Better activation functions

Lecture 72 - Better initialization strategies

Lecture 73 - Batch Normalization

Lecture 74 - One-hot representations of words

Lecture 75 - Distributed Representations of words

Lecture 76 - SVD for learning word representations

Lecture 77 - SVD for learning word representations (Continued...)

Lecture 78 - Continuous bag of words model

Lecture 79 - Skip-gram model

Lecture 80 - Skip-gram model (Continued...)

Lecture 81 - Contrastive estimation

Lecture 82 - Hierarchical softmax

Lecture 83 - GloVe representations

Lecture 84 - Evaluating word representations

Lecture 85 - Relation between SVD and Word2Vec

Lecture 86 - The convolution operation

Lecture 87 - Relation between input size, output size and filter size

Lecture 88 - Convolutional Neural Networks

Lecture 89 - Convolutional Neural Networks (Continued...)

Lecture 90 - CNNs (success stories on ImageNet)

Lecture 91 - CNNs (success stories on ImageNet) (Continued...)

Lecture 92 - Image Classification continued (GoogLeNet and ResNet)

Lecture 93 - Visualizing patches which maximally activate a neuron

Lecture 94 - Visualizing filters of a CNN

Lecture 95 - Occlusion experiments

Lecture 96 - Finding influence of input pixels using backpropagation

Lecture 97 - Guided Backpropagation

Lecture 98 - Optimization over images

Lecture 99 - Create images from embeddings

Lecture 100 - Deep Dream

Lecture 101 - Deep Art

Lecture 102 - Fooling Deep Convolutional Neural Networks

Lecture 103 - Sequence Learning Problems

Lecture 104 - Recurrent Neural Networks

Lecture 105 - Backpropagation through time

Lecture 106 - The problem of Exploding and Vanishing Gradients

Lecture 107 - Some Gory Details

Lecture 108 - Selective Read, Selective Write, Selective Forget - The Whiteboard Analogy

Lecture 109 - Long Short Term Memory (LSTM) and Gated Recurrent Units (GRUs)

Lecture 110 - How LSTMs avoid the problem of vanishing gradients

Lecture 111 - How LSTMs avoid the problem of vanishing gradients (Continued...)

Lecture 112 - Introduction to Encoder Decoder Models

Lecture 113 - Applications of Encoder Decoder models

Lecture 114 - Attention Mechanism

Lecture 115 - Attention Mechanism (Continued...)

Lecture 116 - Attention over images

Lecture 117 - Hierarchical Attention

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Foundations to Computer Systems Design (Computer Science and Engineering)

Co-ordinators : Prof. V. Kamakoti

Lecture 1 - Introduction to the Course

Lecture 2 - CMOS Transistors and Gates

Lecture 3 - Basic Gates

Lecture 4 - Building Gates Using Simulator

Lecture 5 - Hierarchical Design and Verification

Lecture 6 - Building Blocks of a Digital Computer

Lecture 7 - Binary Number Systems

Lecture 8 - Signed Number Systems

Lecture 9 - Twos Complement Number System

Lecture 10 - Binary Adder Circuits

Lecture 11 - Building the ALU of HACK

Lecture 12 - HACK ALU Functionality

Lecture 13 - Tips for Project P1

Lecture 14 - Sequential Logic Design

Lecture 15 - Latches and Flipflops

Lecture 16 - The Memory Hierarchy

Lecture 17 - Design of Program Counter

Lecture 18 - Introduction to Computer Organization: The HACK Instruction Set Architecture (ISA)

Lecture 19 - Memory Mapped I/O

Lecture 20 - Tips for Projects P2 and P3

Lecture 21 - Tips for Project 4

Lecture 22 - Tips for Project 4

Lecture 23 - Introduction to Computer Architecture

Lecture 24 - The HACK Microarchitecture

Lecture 25 - The HACK CPU - A Deep Dive - Part 1

Lecture 26 - The HACK CPU - A Deep Dive - Part 2

Lecture 27 - The Data Memory

Lecture 28 - The HACK Computer

Lecture 29 - The Assembler Construction

Lecture 30 - Understanding the Working of Assembler

Lecture 31 - Assembler : Symbol Table Construction

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Assembler : Pass 1

Lecture 33 - Assembler : Pass 2

Lecture 34 - Project 6 : Demonstration

Lecture 35 - Virtual Machines - What and Why?

Lecture 36 - The VM Instruction Set Architecture

Lecture 37 - The execution of a VM Program

Lecture 38 - How powerful is the VM?

Lecture 39 - Project 7 : VM ISA to HACK Mnemonic Translation

Lecture 40 - Project 7 : Demo

Lecture 41 - Deep Understanding of VM ISA using VM Emulator

Lecture 42 - Virtual Machine II - Program flow commands and Introduction to Function Calls

Lecture 43 - Implementation of Function Call

Lecture 44 - Working of the Virtual Machine

Lecture 45 - Project 8 : Translation of Program Flow and Function Call to HACK Mnemonic

Lecture 46 - Handling Static Variables

Lecture 47 - Project 8 : Implementation tips in a Nut Shell

Lecture 48 - Introduction to The JACK Programming Language

Lecture 49 - Project 9 : Basic Steps

Lecture 50 - Understanding Syntax of JACK using Examples

Lecture 51 - Project 9 : More Examples

Lecture 52 - The JACK Syntax - Language Specification

Lecture 53 - Application Development using JACK

Lecture 54 - JACK Compiler: Lexical Analysis - Tokenization

Lecture 55 - Project 10 : Compiler for JACK - Part-1 Demo

Lecture 56 - The JACK Grammar

Lecture 57 - Compiler for JACK: Parsing the JACK Program

Lecture 58 - The Token Analyzer

Lecture 59 - Testing the Correctness

Lecture 60 - The Jack Compiler - Back-end Introduction

Lecture 61 - The Jack Compiler - Handling Variables

Lecture 62 - The Jack Compiler - Handling Expressions

Lecture 63 - The Jack Compiler - Handling Flow of Control

Lecture 64 - The Jack Compiler - Handling Objects

Lecture 65 - The Jack Compiler - Handling Arrays

Lecture 66 - The Jack Compiler Backend: An XML guided approach

Lecture 67 - The Jack Compiler Backend: Populating the Class and Subroutine Symbol tables.

Lecture 68 - The Jack Compiler Backend: Code Generation - 1

Lecture 69 - The Jack Compiler Backend: Code Generation - 2

Lecture 70 - The Jack Compiler Backend: Code Generation - 3

Lecture 71 - The Jack Compiler Backend: Code Generation - 4

Lecture 72 - Jack Compiler: Code Generation - 5

Lecture 73 - Jack Compiler: Code Generation - 6

Lecture 74 - Jack Compiler: Code Generation - 7

Lecture 75 - Understand the Operating System - Compiler Interactions

Lecture 76 - Project 12 - One sample journey from Jack to Hack

Lecture 77 - Concluding Remarks

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Machine Learning for Engineering and Science Applications (Computer Science and Engineering)

Co-ordinators : Prof. Ganapathy, Prof. Balaji Srinivasan

Lecture 37 - Gradient Descent

Lecture 38 - Feedforward and Backpropagation Neural Network

Lecture 39 - Why Word2Vec?

Lecture 40 - What are CBOW and Skip-Gram Models?

Lecture 41 - One word learning architecture

Lecture 42 - Forward pass for Word2Vec

Lecture 43 - Matrix Operations Explained

Lecture 44 - CBOW and Skip Gram Models

Lecture 45 - Building Skip-gram model using Python

Lecture 46 - Reduction of complexity - sub-sampling, negative sampling

Lecture 47 - Binay tree, Hierarchical softmax

Lecture 48 - Mapping the output layer to Softmax

Lecture 49 - Updating the weights using hierarchical softmax

Lecture 50 - Discussion on the results obtained from word2vec

Lecture 51 - Recap and Introduction

Lecture 52 - ANN as a LM and its limitations

Lecture 53 - Sequence Learning and its applications

Lecture 54 - Introuduction to Recurrent Neural Network

Lecture 55 - Unrolled RNN

Lecture 56 - RNN - Based Language Model

Lecture 57 - BPTT - Forward Pass

Lecture 58 - BPTT - Derivatives for W,V and U

Lecture 59 - BPTT - Exploding and vanishing gradient

Lecture 60 - LSTM

Lecture 61 - Truncated BPTT

Lecture 62 - GRU

Lecture 63 - Introduction and Historical Approaches to Machine Translation

Lecture 64 - What is SMT?

Lecture 65 - Noisy Channel Model, Bayes Rule, Language Model

Lecture 66 - Translation Model, Alignment Variables

Lecture 67 - Alignments again!

Lecture 68 - IBM Model 1

Lecture 69 - IBM Model 2

Lecture 70 - Introduction to Phrase-based translation

Lecture 71 - Symmetrization of alignments

Lecture 72 - Extraction of Phrases

Lecture 73 - Learning/estimating the phrase probabilities using another Symmetrization example

Lecture 74 - Introduction to evaluation of Machine Translation

Lecture 75 - BLEU - A short Discussion of the seminal paper

Lecture 76 - BLEU Demo using NLTK and other Metrics

Lecture 77 - Encoder-Decoder model for Neural Machine Translation

Lecture 78 - RNN Based Machine Translation

Lecture 79 - Recap and Connecting Bloom Taxonomy with Machine Learning

Lecture 80 - Introduction to Attention based Translation

Lecture 81 - Research Paper discussion on Neural machine translation by jointly learning to align and translate

Lecture 82 - Typical NMT architecture architecture and models for multi-language translation

Lecture 83 - Beam Search, Stochatic Gradient Descend, Mini Batch, Batch

Lecture 84 - Beam Search, Stochatic Gradient Descend, Mini Batch, Batch

Lecture 85 - Introduction to Conversation Modeling

Lecture 86 - A few examples in Conversation Modeling

Lecture 87 - Some ideas to Implement IR-based Conversation Modeling

Lecture 88 - Discussion of some ideas in Question Answering

Lecture 89 - Hyperspace Analogue to Language - HAL

Lecture 90 - Correlated Occurence Analogue to Lexical Semantic - COALS

Lecture 91 - Global Vectors - Glove

Lecture 92 - Evaluation of Word vectors

NPTEL : NOC:Python for Data Science (Computer Science and Engineering)

Co-ordinators : Prof. Ragunathan Rengasamy

Lecture 1 - Introduction to Python for Data Science

Lecture 56 - K-means Clustering

Lecture 57 - LLyod's Algorithms

Lecture 58 - Convergence and Initialization

Lecture 59 - Representation Learning

Lecture 60 - Orthogonal Projection

Lecture 61 - Covariance Matrix and Eigen direction

Lecture 62 - PCA and mean centering

NPTEL : Compiler Design (Prof. Rupesh Nasre) (Computer Science and Engineering)

Co-ordinators : Prof. Rupesh Nasre

Lecture 1 - Introduction - Part 1, Programming languages and compilers

Lecture 2 - Introduction - Part 2, Language translators

Lecture 3 - Introduction - Part 3, Phases of a compiler

Lecture 4 - Introduction - Part 4, Static vs Dynamic contexts,Parameter passing

Lecture 5 - Lexing - Part 1, Terminology, Regex, flex tool- Part 1

Lecture 6 - Lexing - Part 2, Lexical errors, Input buffering

Lecture 7 - flex tool- Part 2

Lecture 8 - Lexing - Part 3, Lookahead, KMP string matching

Lecture 9 - Lexing - Part 4, Regex to DFA conversion - Part 1

Lecture 10 - Lexing - Part 5, Regex to DFA conversion - Part 2, Prasing - Part 1

Lecture 11 - Parsing - Part 2, CFG, Parse tree, Precedence, Ambiguity

Lecture 12 - flex tool - Part 3

Lecture 13 - Parsing - Part 3, Sentinel forms, Error recovery, if-else ambiguity

Lecture 14 - Parsing - Part 4, Left recursion, Recursive descent parsing

Lecture 15 - Parsing - Part 5, First and Follow, Predicitive parsing table

Lecture 16 - Parsing - Part 6, Predictive parsing table, LL(1) grammars

Lecture 17 - Discussions and doubts clarification - Part 1

Lecture 18 - Parsing - Part 6, Bottom-up, Shift-reduce parsing, SLR parsing

Lecture 19 - Parsing - Part 6, LR(0) automaton, SLR parsing using automaton

Lecture 20 - Parsing - Part 7, SLR(1) parsing table, SLR(1) parsing algorithm

Lecture 21 - Parsing - Part 8, Viable prefixes, LR(1) parsing, LR(1) automaton

Lecture 22 - Parsing - Part 9, LALR parsing, SDT- Part 1, attributes

Lecture 23 - Syntax Directed Translation - Part 2, S- and L-attributed SDD

Lecture 24 - Syntax Directed Translation - Part 3, L-attributed SDD, Applications

Lecture 25 - Syntax Directed Translation - Part 4, Actions within productions

Lecture 26 - Discussions and doubts clarification - Part 2

Lecture 27 - Quiz-1 discussion, SDT - Part 5, Code generation for while loop

Lecture 28 - Intermdiate Code Generation - Part 1, Syntax trees and DAGs

Lecture 29 - Intermdiate Code Generation - Part 2, Three-address code

Lecture 30 - Discussions and doubts clarification Part 3

Lecture 31 - Intermdiate Code Generation - Part 3, Static single assignment

Lecture 32 - Intermdiate Code Generation - Part 4, IR for type expressions

Lecture 33 - Intermdiate Code Generation - Part 4, IR for array expressions

Lecture 34 - Intermdiate Code Generation - Part 4, IR for boolean expressions

Lecture 35 - Intermdiate Code Generation - Part 4, IR for break, continue, switch

Lecture 36 - Code Generator - Part 1, Introduction, IR and target code

Lecture 37 - Code Generator - Part 2, Instruction selection, ordering

Lecture 38 - Code Generator - Part 2, Basic blocks and CFG

Lecture 39 - x86 assembly code

Lecture 40 - Code optimizer - Part 1, Local optimizations within a basic block

Lecture 41 - Code optimizer - Part 2, Array references, Peephole optimization

Lecture 42 - Discussions and doubts clarification - Part 4

Lecture 43 - Code optimizer - Part 3, Register allocation, Liveness

Lecture 44 - Code optimizer - Part 4, Register allocation as graph coloring

Lecture 45 - Discussions and doubts clarification - Part 5

Lecture 46 - Code optimizer - Part 5, Data flow analysis, Reaching definitions

Lecture 47 - Discussions and doubts clarification - Part 6

Lecture 48 - Code optimizer - Part 6, DFA for reaching definitions,Live variables

Lecture 7 - Classes and Objects in Java and Solved problems

Lecture 8 - Constructors in C++ - Default and Parameterized

Lecture 9 - Constructors in C++ - Copy Constructor

Lecture 10 - Constructors in Java - Default and Parameterized

Lecture 11 - Access Specifiers in C++

Lecture 12 - Inheritance - Single Inheritance

Lecture 13 - Inheritance - Multilevel Inheritance

Lecture 14 - Inheritance - Multiple, Hierarchial, and Hybrid

Lecture 15 - Inheritance and Introduction to Friend Function

Lecture 16 - Polymorphism

Lecture 17 - Overloading - Operator and Constructor

Lecture 18 - this keyword in C++

Lecture 19 - Method Overloading

Lecture 20 - Method Overriding

Lecture 21 - Encapsulation - I

Lecture 22 - Encapsulation - II

Lecture 23 - Data Abstraction

Lecture 24 - Virtual Functions in C++ and Abstract Class

Lecture 25 - Interface in Java

Lecture 26 - Exception Handling in C++

Lecture 27 - Exception Handling - Solved Problems

Lecture 28 - Multiple Catch and Nested try Statements

Lecture 29 - 'throws' keyword in Java

Lecture 30 - 'finally' keyword in Java

Lecture 31 - Basics of File Handling

Lecture 32 - File Handling - Solved Problems

Lecture 33 - File Handling - Append and other Mathematical Operations

Lecture 34 - File Handling - Character, Line, and CSV File Reading

Lecture 35 - Serialization and Deserialization

Lecture 36 - Introduction to Templates and Generics

Lecture 37 - Template Class in C++

Lecture 38 - Generics in Java

Lecture 39 - Generics in Java (Continued...)

Lecture 40 - Generics in Python

Lecture 41 - Introduction to Standard Template Library

Lecture 42 - Associative Containers

Lecture 43 - Unordered Containers, Iterators

Lecture 44 - STL Algorithms

Lecture 45 - Case Studies - Library Management System, Real-Time Stock Tracker

Lecture 46 - Design Patterns

Lecture 47 - Singleton and Factory Pattern

Lecture 48 - Factory Pattern in Java

Lecture 49 - Observer Pattern

Lecture 50 - Structural Patterns

Lecture 51 - Advanced Topics - Multithreading and Concurrency

Lecture 52 - Deadlocks - Causes and Prevention

Lecture 53 - Introduction to Network Programming

Lecture 54 - Communication over HTTP and Related Protocols

Lecture 55 - GUI Development

Lecture 56 - Case Study - Mathematical Computation Framework C++

Lecture 57 - Case Study - Hotel reservation System C++

Lecture 58 - Case Study - Online Shopping Cart Java

Lecture 59 - Case Study - Employee Payroll System Java

Lecture 60 - Case Study - Image Classification Tool Python

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Combinatorics (Computer Science and Engineering)

Co-ordinators : Dr. L. Sunil Chandran

Lecture 1 - Pigeon hole principle - (Part 1)

Lecture 2 - Pigeon hole principle - (Part 2)

Lecture 3 - Pigeon hole principle - (Part 3)

Lecture 4 - Pigeon hole principle - (Part 4)

Lecture 5 - Elementary concepts and basic counting principles

Lecture 6 - Elementary concepts; Binomial theorem; Bijective proofs - Part (1)

Lecture 7 - Bijective proofs â€“ Part (2)

Lecture 8 - Bijective proofs - Part (3); Properties of binomial coefficients; Combinatorial identities - Part (1)

Lecture 9 - Combinatorial identities - Part (2); Permutations of multisets â€“ Part (1)

Lecture 10 - Permutations of multisets â€“ Part (2)

Lecture 11 - Multinomial Theorem, Combinations of Multisets â€“ Part (1)

Lecture 12 - Combinations of Multisets - Part (2)

Lecture 13 - Combinations of Multisets â€“ Part (3), Bounds for binomial coefficients

Lecture 14 - Sterlingâ€™s Formula, Generalization of Binomial coefficients - Part (1)

Lecture 15 - Generalization of Binomial coefficients - Part (2)

Lecture 16 - Generalization of Binomial coefficients - Part (3); Double counting - Part (1)

Lecture 17 - Double counting - Part (2)

Lecture 18 - Hallâ€™s Theorem for regular bipartite graphs; Inclusion exclusion principle - Part (1)

Lecture 19 - Inclusion exclusion principle - Part (2)

Lecture 20 - Inclusion exclusion principle - Part (3)

Lecture 21 - Inclusion exclusion principle - Part (4)

Lecture 22 - Inclusion exclusion principle - Part (5)

Lecture 23 - Recurrence Relations - Part (1)

Lecture 24 - Recurrence Relations - Part (2)

Lecture 25 - Recurrence Relations - Part (3)

Lecture 26 - Recurrence Relations - Part (4)

Lecture 27 - Recurrence Relations - Part (5)

Lecture 28 - Generating functions - Part (1)

Lecture 29 - Generating functions - Part (2)

Lecture 30 - Solving recurrence relations using generating functions - Part (1)

Lecture 31 - Solving recurrence relations using generating functions - Part (2)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Exponential generating functions - Part (1)

Lecture 33 - Exponential generating functions - Part (2), Partition Number - Part (1)

Lecture 34 - Partition Number - Part (2)

Lecture 35 - Partition Number - Part (3)

Lecture 36 - Partition Number - Part (4); Catalan Numbers - Part (1)

Lecture 37 - Catalans Numbers - Part (2)

Lecture 38 - Catalan Numbers - Part (3), Sterling numbers of the 2nd kind

Lecture 39 - Difference Sequences

Lecture 40 - Sterling Numbers

Lecture 41 - Summary

NPTEL : Compiler Design (Prof. Y.N. Srikanth) (Computer Science and Engineering)

Co-ordinators : Prof. Y.N. Srikanth

Lecture 1 - An Overview of a Compiler - Part 1

Lecture 2 - An Overview of a Compiler - Part 2 and Run-Time Environments - Part 1

Lecture 3 - An Overview of a Compiler - Part 2 and Run-Time Environments - Part 1

Lecture 4 - Run-Time Environments - Part 2

Lecture 5 - Run-Time Environments - Part 3 and Local Optimizations - Part 1

Lecture 6 - Run-Time Environments - Part 3 and Local Optimizations - Part 1

Lecture 7 - Local Optimizations - Part 2 and Code Generation - Part 1

Lecture 8 - Local Optimizations - Part 2 and Code Generation - Part 1

Lecture 9 - Code Generation - Part 1

Lecture 10 - Code Generation - Part 2

Lecture 11 - Code Generation - Part 3 and Global Register Allocation - Part 1

Lecture 12 - Code Generation - Part 3 and Global Register Allocation - Part 1

Lecture 13 - Global Register Allocation - Part 2

Lecture 14 - Global Register Allocation - Part 3 and Implementing Object-Oriented Languages - Part 1

Lecture 15 - Global Register Allocation - Part 3 and Implementing Object-Oriented Languages - Part 1

Lecture 16 - Implementing Object-Oriented Languages - Part 2 and Introduction to Machine-Independent Optimizations - Part 1

Lecture 17 - Implementing Object-Oriented Languages - Part 2 and Introduction to Machine-Independent Optimizations - Part 1

Lecture 18 - Introduction to Machine-Independent Optimizations - Part 2 and Data-Flow Analysis - Part 1

Lecture 19 - Introduction to Machine-Independent Optimizations - Part 2 and Data-Flow Analysis - Part 1

Lecture 20 - Data-Flow Analysis - Part 2

Lecture 21 - Data-Flow Analysis - Part 3 and Control-Flow Analysis - Part 1

Lecture 22 - Data-Flow Analysis - Part 3 and Control-Flow Analysis - Part 1

Lecture 23 - Control-Flow Analysis - Part 2

Lecture 24 - Machine-Independent Optimizations - Part 1

Lecture 25 - Machine-Independent Optimizations - Part 2

Lecture 26 - Machine-Independent Optimizations - Part 3 and Data-Flow Analysis: Theoretical Foundation - Part 1

Lecture 27 - Machine-Independent Optimizations - Part 3 and Data-Flow Analysis: Theoretical Foundation - Part 1

Lecture 28 - Data-Flow Analysis: Theoretical Foundation - Part 2 and Partial Redundancy Elimination - Part 1

Lecture 29 - Data-Flow Analysis: Theoretical Foundation - Part 2 and Partial Redundancy Elimination - Part 1

Lecture 30 - Partial Redundancy Elimination - Part 2

Lecture 31 - The Static Single Assignment Form: Construction and Application to Program Optimizations - Part 1

Lecture 32 - The Static Single Assignment Form: Construction and Application to Program Optimizations - Part 2

Lecture 33 - The Static Single Assignment Form: Construction and Application to Program Optimizations - Part 3

Lecture 34 - Automatic Parallelization - Part 1

Lecture 35 - Automatic Parallelization - Part 2

Lecture 36 - Automatic Parallelization - Part 3

Lecture 37 - Automatic Parallelization - Part 4

Lecture 38 - Instruction Scheduling - Part 1

Lecture 39 - Instruction Scheduling - Part 2

Lecture 40 - Instruction Scheduling - Part 3

Lecture 41 - Software Pipelining

Lecture 42 - Energy-Aware Software Systems - Part 1

Lecture 43 - Energy-Aware Software Systems - Part 2

Lecture 44 - Energy-Aware Software Systems - Part 3

Lecture 45 - Energy-Aware Software Systems - Part 4

Lecture 46 - Just-In-Time Compilation and Optimizations for .NET CLR

Lecture 47 - Garbage Collection

Lecture 48 - Interprocedural Data-Flow Analysis

Lecture 49 - Worst Case Execution Time - Part 1

Lecture 50 - Worst Case Execution Time - Part 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Graph Theory (Computer Science and Engineering)

Co-ordinators : Dr. L. Sunil Chandran

Lecture 1 - Introduction: Vertex cover and independent set

Lecture 2 - Matchings: Konigâ€™s theorem and Hallâ€™s theorem

Lecture 3 - More on Hallâ€™s theorem and some applications

Lecture 4 - Tutteâ€™s theorem on existence of a perfect matching

Lecture 5 - More on Tutteâ€™s theorem

Lecture 6 - More on Matchings

Lecture 7 - Dominating set, path cover

Lecture 8 - Gallai â€“ Millgram theorem, Dilworthâ€™s theorem

Lecture 9 - Connectivity: 2-connected and 3-connected graphs

Lecture 10 - Mengerâ€™s theorem

Lecture 11 - More on connectivity: k- linkedness

Lecture 12 - Minors, topological minors and more on k- linkedness

Lecture 13 - Vertex coloring: Brooks theorem

Lecture 14 - More on vertex coloring

Lecture 15 - Edge coloring: Vizingâ€™s theorem

Lecture 16 - Proof of Vizingâ€™s theorem, Introduction to planarity

Lecture 17 - 5- coloring planar graphs, Kuratowskyâ€™s theorem

Lecture 18 - Proof of Kuratowskyâ€™s theorem, List coloring

Lecture 19 - List chromatic index

Lecture 20 - Adjacency polynomial of a graph and combinatorial Nullstellensatz

Lecture 21 - Chromatic polynomial, k - critical graphs

Lecture 22 - Gallai-Roy theorem, Acyclic coloring, Hadwigerâ€™s conjecture

Lecture 23 - Perfect graphs: Examples

Lecture 24 - Interval graphs, chordal graphs

Lecture 25 - Proof of weak perfect graph theorem (WPGT)

Lecture 26 - Second proof of WPGT, Some non-perfect graph classes

Lecture 27 - More special classes of graphs

Lecture 28 - Boxicity,Sphericity, Hamiltonian circuits

Lecture 29 - More on Hamiltonicity: Chvatalâ€™s theorem

Lecture 30 - Chvatalâ€™s theorem, toughness, Hamiltonicity and 4-color conjecture

Lecture 31 - Network flows: Max flow mincut theorem

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - More on network flows: Circulations

Lecture 33 - Circulations and tensions

Lecture 34 - More on circulations and tensions, flow number and Tutteâ€™s flow conjectures

Lecture 35 - Random graphs and probabilistic method: Preliminaries

Lecture 36 - Probabilistic method: Markovâ€™s inequality, Ramsey number

Lecture 37 - Probabilistic method: Graphs of high girth and high chromatic number

Lecture 38 - Probabilistic method: Second moment method, Lovasz local lemma

Lecture 39 - Graph minors and Hadwigerâ€™s conjecture

Lecture 40 - More on graph minors, tree decompositions

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : High Performance Computing (Computer Science and Engineering)

Co-ordinators : Prof. Mathew Jacob

Lecture 64 - Butterworth filter Derivation And Analysis of butterworth system function

Lecture 65 - Chebychev filter Derivation

Lecture 66 - Midsem paper review discussion

Lecture 67 - The Chebyschev Approximation

Lecture 68 - Next step in design: Obtain poles

Lecture 69 - Introduction to Frequency Transformations in the Analog Domain

Lecture 70 - High pass transformation

Lecture 71 - Band pass transformation

Lecture 72 - Frequency Transformation

Lecture 73 - Different types of filters

Lecture 74 - Impulse invariant method and ideal impulse response

Lecture 75 - Design of FIR of length (2N+1) by the truncation method,Plotting the function V(w)

Lecture 76 - IIR filter using rectangular window, IIR filter using triangular window

Lecture 77 - Proof that frequency response of an fir filter using rectangular window function centred at 0 is real

Lecture 78 - Introduction to window functions

Lecture 79 - Examples of window functions

Lecture 80 - Explanation of Gibbâ€™s Phenomenon and itâ€™s application

Lecture 81 - Comparison of FIR And IIR Filterâ€™s

Lecture 82 - Comparison of FIR And IIR Filterâ€™s

Lecture 83 - Comparison of FIR And IIR Filterâ€™s

Lecture 84 - Introduction and approach to realization (causal rational system)

Lecture 85 - Comprehension of Signal Flow Graphs and Achievement of Pseudo Assembly Language Code

Lecture 86 - Introduction to IIR Filter Realization and Cascade Structure

Lecture 87 - Cascade Parallel Structure

Lecture 88 - Lattice Structure

Lecture 89 - Recap And Review of Lattice Structure, Realization of FIR Function

Lecture 90 - Backward recursion, Change in the recursive equation of lattice

Lecture 91 - Lattice structure for an arbitrary rational system

Lecture 92 - Example realization of lattice structure for rational system

Lecture 93 - Introductory Remarks of Discrete Fourier Transform and Frequency Domain Sampling

Lecture 94 - Principle of Duality, The Circular Convolution

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 10 - Basic Introduction to Power Devices

Lecture 11 - Introduction to Multilevel Converters

Lecture 12 - Cascaded H-bridge Multilevel Converters

Lecture 13 - Output Voltage Waveform Synthesis in CHB Converter and Basic of Asymmetrical CHB Converters

Lecture 14 - Cascaded H-Bridge Converters: Phase-Shifted PWM

Lecture 15 - Cascaded H-Bridge Converters: Level-Shifted PWM

Lecture 16 - Fault Tolerant Operation of Cascaded H-Bridge Converter - Part I

Lecture 17 - Fault Tolerant Operation of Cascaded H-Bridge Converter - Part II

Lecture 18 - Modular Multilevel Converter - Topology and Operation

Lecture 19 - Modular Multilevel Converter - Arm and Cell Voltage Ratings

Lecture 20 - Modular Multilevel Converter - Arm Currents

Lecture 21 - Modular Multilevel Converter - Arm Energy Balancing

Lecture 22 - Modular Multilevel Converter - Different Circuit Topologies

Lecture 23 - Modular Multilevel Converter - PWM Technique and Capacitor Voltage Balancing

Lecture 24 - Modular Multilevel Converter - Fault Tolerant Operation and Commercial Production

Lecture 25 - Design of Components in MMC

Lecture 26 - Neutral Point Clamped Converter - Circuit Topology - Part I

Lecture 27 - Neutral Point Clamped Converter - Circuit Topology - Part II

Lecture 28 - Neutral Point Clamped Converter - Space Vector Diagram

Lecture 29 - Neutral Point Clamped Converter - Space Vector PWM

Lecture 30 - NPC - Sinusoidal PWM and Space Vector PWM using Single Carrier Strategy

Lecture 31 - Neutral Point Clamped Converter - Mid-point Voltage Fluctuations

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Neutral Point Clamped Converter - Capacitor Voltage Balancing

Lecture 33 - Neutral Point Clamped Converter - Another Strategy of Capacitor Voltage Balancing

Lecture 34 - Other Topologies of NPC Converters - Higher Level NPC, TNPC and Active NPC

Lecture 35 - Multipulse Transformer - Part I

Lecture 36 - Multipulse Transformer - Part II

Lecture 37 - A Case Study on MMC and CHB

Lecture 38 - Basics of Gate Driver Circuits

Lecture 39 - Gate Driver Circuits - Turn-on and Turn-off Process

Lecture 40 - Gate Driver Circuits - Features of Gate Drivers and Basics of Bootstrap Functionality

Lecture 41 - Condition Monitoring of Converters

Lecture 42 - Other Converter Topologies

Lecture 43 - Summary of the Course

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Embedded System Design (Electrical Engineering)

Co-ordinators : Prof. Badri N Subudhi, Prof.Dhananjay V. Gadre

Lecture 1 - Introduction

Lecture 2 - Introduction continued with Project demos

Lecture 3 - Modular Approach to ESD

Lecture 4 - Modular Approach to ESD (Continued...)

Lecture 5 - Salient Features of Modern Microcontrollers

Lecture 6 - Salient Features of Modern Microcontrollers (Continued...)

Lecture 7 - Elements of Microcontroller Ecosystem

Lecture 8 - Elements of Microcontroller Ecosystem (Continued...)

Lecture 9 - Power Supply for Embedded Systems

Lecture 10 - Power Supply for Embedded Systems (Continued...)

Lecture 11 - Introduction to MSP430

Lecture 12 - MSP430 Architecture

Lecture 13 - MSP430 Architecture- (Continued...) And Introduction to Lunchbox

Lecture 14 - Programming Methods for MSP430

Lecture 15 - Physical Interfacing - 1

Lecture 16 - Physical Interfacing - 2

Lecture 17 - Physical Interfacing - 3

Lecture 18 - Physical Interfacing - 4

Lecture 19 - Physical Interfacing - 5

Lecture 20 - Physical Interfacing - 6

Lecture 21 - GIT, CCS Installation and Embedded C

Lecture 22 - MSP430 Digital I/O

Lecture 23 - MSP430 Digital I/O: Switch Interfacing

Lecture 24 - MSP430 Clock System and Reset

Lecture 25 - Interrupts in MSP430

Lecture 26 - Interrupts in MSP430 (Continued...)

Lecture 27 - Interfacing Seven Segment Displays with MSP430; Low Power Modes in MSP430

Lecture 28 - Interfacing Liquid Crystal Displays (LCD)

Lecture 29 - MSP430 Timer Module: Introduction and Timer Capture

Lecture 30 - Pulse Width Modulation, PWM using Timer Capture

Lecture 31 - Analog to Digital Converter in the MSP430

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - ADC and DAC using R2R Ladder and Random number generation using LFSR

Lecture 33 - Serial Communication Protocols, USCI Module in MSP430

Lecture 34 - MSP430 Timer in Capture Mode

Lecture 35 - Coding Ninja

Lecture 36 - Building an Electronics Project

Lecture 37 - Circuit Prototyping Techniques

Lecture 38 - Single Purpose Computers

Lecture 39 - Single Purpose Computers (Continued...)

Lecture 40 - Recap of Course Coverage and Project Demonstration from Concept to Final

NPTEL : NOC:Power Quality (Electrical Engineering)

Co-ordinators : Prof. Bhim Singh

Lecture 1 - Power Quality - An Introduction

Lecture 2 - Power Quality Standards and Monitoring

Lecture 3 - Power Quality Standards and Monitoring (Continued...)

Lecture 4 - Passive Shunt and Series Compensations

Lecture 5 - Passive Shunt and Series Compensations (Continued...)

Lecture 6 - Passive Shunt and Series Compensations (Continued...)

Lecture 7 - Active Shunt Compensation

Lecture 8 - Active Shunt Compensation (Continued...)

Lecture 9 - Active Shunt Compensation (Continued...)

Lecture 10 - Active Series Compensation

Lecture 11 - Active Series Compensation (Continued...)

Lecture 12 - Unified Power Quality Compensators

Lecture 13 - Unified Power Quality Compensators (Continued...)

Lecture 14 - Unified Power Quality Compensators (Continued...)

Lecture 15 - Loads Which Cause Power Quality Problems

Lecture 16 - Loads Which Cause Power Quality Problems (Continued...)

Lecture 17 - Passive Power Filters

Lecture 18 - Passive Power Filters (Continued...)

Lecture 19 - Passive Power Filters (Continued...)

Lecture 20 - Shunt Active Power Filters

Lecture 21 - Shunt Active Power Filters (Continued...)

Lecture 22 - Shunt Active Power Filters (Continued...)

Lecture 23 - Active Series Power Filters

Lecture 24 - Active Series Power Filters (Continued...)

Lecture 25 - Active Series Power Filters (Continued...)

Lecture 26 - Hybrid Power Filters

Lecture 27 - Hybrid Power Filters (Continued...)

Lecture 28 - Hybrid Power Filters (Continued...)

Lecture 29 - AC-DC Converters That Cause Power Quality

Lecture 30 - Improved Power Quality Converters - AC-DC Boost Converters

Lecture 31 - Improved Power Quality Converters - AC-DC Boost Converters (Continued...)

Lecture 32 - Improved Power Quality Converters - AC-DC Buck Converters

Lecture 33 - Improved Power Quality Converters - AC-DC Buck-Boost Converters

Lecture 34 - Improved Power Quality Converters - AC-DC Buck-Boost Converters (Continued...)

Lecture 35 - Improved Power Quality Converters - AC-DC Buck-Boost Converters (Continued...)

Lecture 36 - Three Phase AC-DC Improved Power Quality Converters

Lecture 37 - Multipulse Converters

Lecture 38 - Multipulse Converters (Continued...)

Lecture 39 - Multipulse Converters (Continued...)

Lecture 40 - Power Quality Improvement in Solar Energy Conversion System

Lecture 41 - Power Quality Improvement in Solar Energy Conversion System (Continued...)

Lecture 42 - Power Quality Improvement in Wind Energy Conversion System

Lecture 43 - Power Quality Improvement in Diesel Generator Set Based Power Supply System

Lecture 44 - Power Quality Improvement in Diesel Generator Set Based Power Supply System (Continued...)

Lecture 45 - Power Quality Improvement in Distributed Generation Sources Based Microgrids

Lecture 30 - Indirect Method for Generation of FM Signals - Generation of Narrowband FM Signal

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Indirect Method for Generation of FM Signals - Generation of Wideband FM Signal through Frequency Multiplication

Lecture 32 - Spectrum of Frequency Modulated (FM) Signals

Lecture 33 - Bandwidth of Frequency Modulated (FM) Signals - Carson's Rule

Lecture 34 - Demodulation of Frequency Modulated (FM) Signals, Condition of Envelope Detection

Lecture 35 - Analog to Digital Conversion of Signals and Introduction to Sampling

Lecture 36 - Spectrum of Sampled Signal, Aliasing and Nyquist Sampling Theorem

Lecture 37 - Ideal Impluse Train Sampling, Reconstruction of Original Signal from Samples, Sinc Interpolation

Lecture 38 - Introduction to Pulse Amplitude Modulation (PAM), Sample and Hold, Flat Top Sampling

Lecture 39 - Pulse Amplitude Modulation (PAM), Spectrum of PAM Signal , Reconstruction of Original Signal from PAM Signal, Equalization

Lecture 40 - Introduction to Quantization, Uniform Quantizer, Mid- Tread Quantizer

Lecture 41 - Quantization, Mid- Rise Quantizer, PDF and Power of Quantization Noise, Quantization Noise Power versus Quantizer Resolution

Lecture 42 - Introduction to Lloyd- Max Quantization Algorithm, Optimal Quantizer Design

Lecture 43 - Lloyd- Max Quantization Algorithm, Iterative Computation of Optimal Quantization Levels and Intervals

Lecture 44 - Companding for Non- Uniform Quantization, Mu-law Compressor, A- Law Compressor

Lecture 45 - Introduction to Delta Modulation, One-bit Quantizer

Lecture 46 - Signal Reconstruction in Delta Modulation, Schematic Diagrams, Slope Overload Distortion and Granular Noise

Lecture 47 - Differential Pulse Coded Modulation (DPCM), DPCM Signal Reconstruction and Schematic Diagram

Lecture 48 - Frequency Mixing and Translation in Communication Systems, Heterodyne and Super Heterodyne Receivers

Lecture 49 - Frequency Translation and Super Heterodyne Receivers, Problem of Image Frequency

Lecture 50 - Frequency Division Multiplexing (FDM), Carrier Spacing in FDM

Lecture 51 - Time Division Multiplexing (TDM), Operation of TDM, Sample Spacing in TDM

Lecture 52 - Bandwidth Requirements for Time Division Multiplexing (TDM), The T1 TDM System : A Case Study

NPTEL : NOC:An Introduction to Coding Theory (Electrical Engineering)

Co-ordinators : Dr. Adrish Banerjee

Lecture 1 - Introduction to Error Control Coding - I

Lecture 2 - Introduction to Error Control Coding - II

Lecture 3 - Introduction to Error Control Coding - III

Lecture 4 - Introduction to Linear Block Codes, Generator Matrix and Parity Check Matrix

Lecture 5 - Syndrome, Error Correction and Error Detection

Lecture 6 - Problem Solving Session - I

Lecture 7 - Decoding of Linear Block Codes

Lecture 8 - Distance Properties of Linear Block Codes - I

Lecture 9 - Distance Properties of Linear Block Codes - II

Lecture 10 - Problem Solving Session - II

Lecture 11 - Some Simple Linear Block Codes - I

Lecture 12 - Some Simple Linear Block Codes - II: Reed Muller Codes

Lecture 13 - Bounds on the Size of a Code

Lecture 14 - Problem Solving Session - III

Lecture 15 - Introduction to Convolutional Codes - I: Encoding

Lecture 16 - Introduction to Convolutional Codes - II: State Diagram, Trellis Diagram

Lecture 17 - Convolutional Codes: Classification, Realization

Lecture 18 - Convolutional Codes:Distance Properties

Lecture 19 - Decoding of Convolutional Codes - I: Viterbi Algorithm

Lecture 20 - Decoding of Convolutional Codes - II: BCJR Algorithm

Lecture 21 - Problem solving session - IV

Lecture 22 - Problem solving session - V

Lecture 23 - Performance Bounds for Convolutional Codes

Lecture 24 - Low Density Parity Check Codes

Lecture 25 - Decoding of Low Density Parity Check Codes - I

Lecture 26 - Decoding of Low Density Parity Check Codes - II: Belief Propagation Algorithm

Lecture 27 - Turbo Codes

Lecture 28 - Turbo Decoding

Lecture 29 - Problem Solving Sessions - VI

Lecture 30 - Distance Properties of Turbo Codes

Lecture 31 - Convergence of Turbo Codes

Lecture 32 - Automatic Repeat reQuest (ARQ) Schemes

Lecture 33 - Applications of Linear Codes

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Principles of Communication Systems - Part II (Electrical Engineering)

Co-ordinators : Prof. Aditya K. Jagannatham

Lecture 1 - Introduction to Digital Communication Systems

Lecture 2 - Spectrum of Transmitted Digital Communication Signal and Wide Sense Stationarity

Lecture 3 - Spectrum of Transmitted Digital Communication Signal, Autocorrelation Function and Power Spectral Density

Lecture 4 - Spectrum of Transmitted Digital Communication Signal, Relation to Energy Spectral Density and Introduction to AWGN Channel

Lecture 5 - Additive White Gaussian Noise (AWGN) Properties, Gaussian Noise and White Noise

Lecture 6 - Structure of Digital Communication Receiver, Receiver Filter and Signal-to-Noise Power Ratio (SNR)

Lecture 7 - Digital Communication Receiver, Noise Properties and Output Noise Power

Lecture 8 - Digital Communication Receiver, Optimal SNR and Matched Filter

Lecture 9 - Probability of Error in Digital Communication and Probability Density Functions of Output

Lecture 10 - Probability of Error in Digital Communication, Optimal Decison Rule and Gaussian Q function

Lecture 11 - Introduction to Binary Phase Shift Keying (BPSK) Modulation, Optimal Decision Rule and Probability of Bit-Error or Bit-Error Rate (BER)

Lecture 12 - Introduction to Amplitude Shift Keying (ASK) Modulation

Lecture 13 - Optimal Decision Rule for Amplitude Shift Keying (ASK), Bit Error Rate (BER) and Comparison with Binary Phase Shift Keying (BPSK) Modulation

Lecture 14 - Introduction to Signal Space Concept and Orthonormal Basis Signals

Lecture 15 - Introduction to Frequency Shift Keying (FSK)

Lecture 16 - Optimal Decision Rule for FSK, Bit Error Rate (BER) and Comparison with BPSK, ASK

Lecture 17 - Introduction to Quadrature Phase Shift Keying (QPSK)

Lecture 18 - Waveforms of Quadrature Phase Shift Keying (QPSK)

Lecture 19 - Matched Filtering, Bit Error Rate and Symbol Error Rate for Quadrature Phase Shift Keying (QPSK)

Lecture 20 - Introduction to M-ary PAM (Pulse Amplitude Modulation), Average Symbol Power and Decision rules

Lecture 21 - M-ary PAM (Pulse Amplitude Modulation) -Part-II, Optimal Decision Rule and Probability of Error

Lecture 22 - M-ary QAM (Quadrature Amplitude Modulation) Part-I, Introduction, Transmitted Waveform and Average Symbol Energy

Lecture 23 - M-ary QAM (Quadrature Amplitude Modulation) - Part-II, Optimal Decision Rule, Probability of Error and Contellation Diagram

Lecture 24 - M-ary PSK (Phase Shift Keying) Part-I, Introduction , Transmitted Waveform and Constellation Diagram

Lecture 25 - M-ary PSK (Phase Shift Keying) - Part-II, Optimal Decision Rule, Nearest Neighbor Criterion and Approximate Probability of Error

Lecture 26 - Introduction to Information Theory, Relevance of Information Theory and Characterization of Information

Lecture 27 - Definition of Entropy, Average of Information / Uncertainity of source and Properties of Entropy

Lecture 28 - Entropy Example- Binary Source Maximum and Minimum Entropy of Binary Source

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 29 - Maximum Entropy of Source with M-ary Alphabet, Concave/Convex Functions and Jensens Inequality

Lecture 30 - Joint Entropy , Definition of Joint Entropy of Two Sources and Simple Examples for Joint Entropy Computation

Lecture 31 - Properties of Joint Entropy and Relation between Joint Entropy and Marginal Entropies

Lecture 32 - Conditional Entropy, Example of Conditional Entropy and Properties of Conditional Entropy

Lecture 33 - Mutual Information, Diagrammatic Representation and Properties of Mutual Information

Lecture 34 - Simple Example of Mutual Information and Practical Example of Mutual Information-Binary Symmetric Channel

Lecture 35 - Channel Capacity, Implications of Channel Capacity, Claude E. Shannon- Father of Information Theory and Example of Capacity of Binary Symmetric Channel

Lecture 36 - Differential Entropy and Example for Uniform Probability Density function

Lecture 37 - Differential Entropy of Gaussian Source and Insights

Lecture 38 - Joint Conditional/ Differential Entropies and Mutual Information

Lecture 39 - Capacity of Gaussian channel - Part I

Lecture 40 - Capacity of Gaussian Channel - Part-II, Practical Implications and Maximum rate in bits\sec

Lecture 41 - Introduction to Source Coding and Data Compression, Variable Length codes and Unique Decodability

Lecture 42 - Uniquely Decodable Codes, Prefix-free code, Instantaneous Code and Average Code length

Lecture 43 - Binary Tree Representation of Code, Example and Kraft Inequality

Lecture 44 - Lower Bound on Average Code Length and Kullback-Leibler Divergence

Lecture 45 - Optimal Code length, Constrained Optimization and Morse Code Example

Lecture 46 - Approaching Lower Bound on Average code length and Block Coding

Lecture 47 - Huffman Code, Algorithm, Example and Average Code Length

Lecture 48 - Introduction to channel coding, Rate of Code, Repetition Code and Hamming Distance

Lecture 49 - Introduction to Convolutional Codes, Binary Field Arithmetic and Linear Codes

Lecture 50 - Example of Convolutional Code Output and Convolution Operation for Code generation

Lecture 51 - Matrix Representation of Convolutional Codes, Generator Matrix, Transform Domain Representation and Shift Register Architecture

Lecture 52 - State Diagram Representation of Convolutional Code, State transitions and Example of Code Generation using State transitions

Lecture 53 - Trellis Representation of Convolutional Code and Valid Code Words

Lecture 54 - Decoding of the Convolutional Code, Minimum Hamming distance and Maximum Likelihood Codeword Estimate

Lecture 55 - Principle of Decoding of Convolutional code

Lecture 56 - Viterbi Decoder for Maximum Likelihood Decoding of Convolutional Code Using Trellis Representation, Branch Metric Calculation, State Metric Calculation and Example

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Applied Engineering Electromagnetics (Electrical Engineering)

Co-ordinators : Dr. Pradeep Kumar K

Lecture 1 - Introduction to Applied Elecromagnetics

Lecture 2 - Introduction to Transmission lines

Lecture 3 - Sinusoidal waves on Transmission lines

Lecture 4 - Terminating T-lines: Reflection and Transmission coefficient

Lecture 5 - Circuit parameters of a T-line

Lecture 6 - Lossy Transmission lines and primary constants

Lecture 7 - When to apply T-line Theory?

Lecture 8 - Standing Waves on T-lines

Lecture 9 - Lumped equivalent circuits of T-lines

Lecture 10 - Impedance transformation and power flow on T-lines

Lecture 11 - Graphical aid: Smith Chart Derivation

Lecture 12 - Smith chart applications

Lecture 13 - Further applications of Smith chart - Part 1

Lecture 14 - Further applications of Smith chart - Part 2

Lecture 15 - Impedance matching techniques - Part 1

Lecture 16 - Impedance matching techniques - Part 2

Lecture 17 - Impedance matching techniques - Part 3

Lecture 18 - T-lines in time domain: Lattice diagrams

Lecture 19 - Further examples of use of lattice diagrams

Lecture 20 - High-speed digital signal propagation on T-lines

Lecture 21 - Transient analysis with reactive termination and Time-domain reflectometry

Lecture 22 - Fault detection using TDR

Lecture 23 - Why Electromagnetics?

Lecture 24 - Rectangular coordinate systems

Lecture 25 - Cylindrical coordinate systems

Lecture 26 - Review of vector fields and Gradient

Lecture 27 - Divergence, Curl, and Laplacian operations

Lecture 28 - Towards Maxwells equations - Part 1

Lecture 29 - Towards Maxwells equations - Part 2

Lecture 30 - Faradays law

Lecture 31 - Completing Maxwells equations and Boundary conditions

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Boundary conditions for Electromagnetic fields

Lecture 33 - Electrostatics-I: Laplace and Poissons equations

Lecture 34 - Electrostatics-II: Solving Laplaces equation in 1D

Lecture 35 - Electrostatics-III: Solving Laplaces equation in 2D

Lecture 36 - Electrostatics-IV: Finite Difference method for solving Laplaces equation

Lecture 37 - Magnetostatic fields-I: Biot-Savart Law

Lecture 38 - Magnetostatic fields-II: Calculation of magnetic fields

Lecture 39 - Inductance calculations

Lecture 40 - From Maxwells equations to uniform plane waves

Lecture 41 - Plane wave propagation in lossless dielectric media

Lecture 42 - Polarization of plane waves

Lecture 43 - Can an Ideal capacitor exist?

Lecture 44 - Skin effect in conductors

Lecture 45 - Skin effect in round wires

Lecture 46 - Finite difference method

Lecture 47 - Reflection of uniform plane waves

Lecture 48 - Application: Reflection from multiple media and anti-reflection coating.

Lecture 49 - Oblique incidence of plane waves

Lecture 50 - Total internal reflection

Lecture 51 - Application: Matrix analysis of reflection from multiple boundaries

Lecture 52 - Application: Fabry-Perot cavity and Multi-layer films

Lecture 53 - Introduction to waveguides

Lecture 54 - Rectangular waveguides

Lecture 55 - Attenuation and Dispersion in rectangular waveguides

Lecture 56 - Planar optical waveguides

Lecture 57 - Application: Optical Fibers

Lecture 58 - Application: WDM Optical Components

Lecture 59 - Mach-Zehnder Modulator

Lecture 60 - Wave Propagation in Anisotropic Medium

Lecture 61 - Wave Propagation in Ferrites

Lecture 62 - Magnetic Vector Potential - Part 1

Lecture 63 - Magnetic Vector Potential - Part 2

Lecture 64 - Fields of a Dipole Antenna

Lecture 65 - Antenna Parameters and Long wire Antenna

Lecture 66 - Friis Transmission Formula

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 38 - Hybrid Parameters

Lecture 39 - Transmission Parameters

Lecture 40 - Interconnection of Networks

Lecture 41 - Nodal and Mesh Analysis

Lecture 42 - Superposition Theorem and Source Transformation

Lecture 43 - Thevenin's, Norton's and, Maximum Power Transfer Theorem

Lecture 44 - Magnetically Coupled Circuits

Lecture 45 - Energy in Coupled Circuits and Ideal Transformer

Lecture 46 - Ideal Transformer and Introduction to Three-Phase Circuits

Lecture 47 - Balanced Three-Phase Connections

Lecture 48 - Balanced Wye-Delta and Delta-Delta Connections

Lecture 49 - Balanced Delta-Wye Connection and Power in Balanced Three-Phase System

Lecture 50 - Unbalanced Three-Phase System and Three-Phase Power Measurement

Lecture 51 - Introduction to Graphical Models

Lecture 52 - State Equations

Lecture 53 - State Diagram

Lecture 54 - State Transition Matrix

Lecture 55 - State Variable Method to Circuit Analysis

Lecture 56 - Characteristic Equation, Eigenvalues, and Eigenvectors-State Variable Analysis (Continued...)

Lecture 57 - Modeling of Mechanical Systems

Lecture 58 - Modeling of The Rotational Motion of Mechanical Systems

Lecture 59 - Modeling of Electrical Systems

Lecture 60 - Solving Analogous Systems

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fundamentals of Electric Drives (Electrical Engineering)

Co-ordinators : Prof. Shyama Prasad Das

Lecture 1 - Introduction to Electric Drives

Lecture 2 - Dynamics of Electric Drives, Four Quadrant Operation, Equivalent Drive Parameters

Lecture 3 - Equivalent Drive Parameters, Friction Components, Nature of Load Torque

Lecture 4 - Steady State Stability, Load Equalization

Lecture 5 - Load Equalization, Characteristics of DC Motor

Lecture 6 - Speed Torque Characteristics of Separately Excited DC Motor and Series DC Motor

Lecture 7 - Field Control of Series Motor, Motoring and Braking of Separately Excited and Series DC motors

Lecture 8 - Speed Control of Separately Excited DC Motor Using Controlled Rectifiers

Lecture 9 - Analysis of Single Phase Full Controlled Converter-fed Separately Excited DC Motor

Lecture 10 - Speed Torque Characteristics of Full Controlled Converter-fed Separately Excited DC Motor, Analysis of Single Phase Half Controlled Converter-fed Separately Excited DC Motor

Lecture 11 - Analysis of Single Phase Half Controlled Converter-fed Separately Excited DC Motor.

Lecture 12 - Three Phase Full Controlled Converter-fed Separately Excited DC Motor, Multi-quadrant Operation of DC Motor

Lecture 13 - Dual Converter-fed DC Motor, Multi-quadrant Operation Using Field Current Reversal

Lecture 14 - DC Chopper-fed Separately Excited DC Motor for Motoring and Braking

Lecture 15 - Two-quadrant DC Chopper, Four-quadrant DC Chopper

Lecture 16 - Dynamic Braking of DC Motor by Chopper Controlled Resistor, Closed-loop Operation of DC Drives, Induction Motor Drives

Lecture 17 - Speed Torque Characteristics of Induction Motor, Operation of Induction Motor from Non-sinusoidal Supply

Lecture 18 - Operation of Induction Motor from Non-sinusoidal Supply

Lecture 19 - Stator Current of Induction Motor with Non-sinusoidal Supply, Operation of Induction Motor with Unbalanced Voltage Supply

Lecture 20 - Single Phasing of Induction Motor, Braking of Induction Motor

Lecture 21 - Dynamic braking of induction motor, AC dynamic braking, DC dynamic braking

Lecture 22 - Analysis of DC dynamic braking of induction motor

Lecture 23 - Self-excited dynamic braking of induction motor, Speed control of induction motor using stator voltage regulator, Variable voltage variable frequency control

Lecture 24 - Variable voltage variable frequency control of induction motor, Open loop V/F control

Lecture 25 - Slip speed control of induction motor, Constant Volt/Hz control with slip speed regulation

Lecture 26 - Closed-loop Volt/Hz control of induction motor with slip speed regulation, Multi-quadrant operation of induction motor drive

Lecture 27 - Current Source Inverter (CSI) fed induction motor drive

Lecture 28 - Closed-loop operation of current source inverter (CSI) fed induction motor drive, Control of slip ring induction motor - Static rotor resistance control

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 29 - Closed-loop operation of slip ring induction motor with static rotor resistance control, Slip power recovery in slip ring induction motor - Static Kramer drive

Lecture 30 - Static Kramer drive and its closed-loop control, Introduction to synchronous motor

Lecture 31 - Various types of synchronous motors, Equivalent circuit and phasor diagram of cylindrical synchronous motor, Speed-torque characteristics of cylindrical synchronous motor

Lecture 32 - Phasor diagram of salient pole synchronous motor, Expression of power and torque for a salient pole synchronous motor, Synchronous reluctance motor, Open-loop V/f control of synchronous motor

Lecture 33 - Open-loop V/f control, Torque-speed characteristics, Self controlled synchronous motor drive employing load commutated thyristor inverter

Lecture 34 - Detailed analysis of commutation of load commutated thyrisor inverter, Derivation of overlap angle and margin angle, Closed-loop speed control scheme for load commutated inverter-fed synchronous motor drive

Lecture 35 - Low cost brushless DC motor (BLDCM), Trapezoidal permanent magnet AC motor

Lecture 36 - Trapezoidal permanent magnet AC motor, Derivation of power and torque, Closed-loop control of trapezoidal BLDC motor, Introduction to switched reluctance motor

Lecture 37 - Construction and operating principle of switched reluctance motor

Lecture 38 - Current/ voltage control for switched reluctance motor, operating modes of switched reluctance motor, Introduction to traction drives

Lecture 39 - Current collector for mainline trains, Nature of traction load, Duty cycle of traction drives

Lecture 40 - Duty cycle of traction drives, Distance between two stops, Calculation of total tractive effort and drive rating

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fuzzy Sets, Logic and Systems and Applications (Electrical Engineering)

Co-ordinators : Prof. Nishchal K Verma

Lecture 1 - Introduction: Fuzzy Sets, Logic and Systems and Applications

Lecture 2 - Introduction: Real Life Applications of Fuzzy Systems

Lecture 3 - Fuzzy Sets and Fuzzy Logic Toolbox in MATLAB - I

Lecture 4 - Fuzzy Sets and Fuzzy Logic Toolbox in MATLAB - II

Lecture 5 - Membership Functions - I

Lecture 6 - Membership Functions - II

Lecture 7 - Nomenclatures used in Fuzzy Set Theory - I

Lecture 8 - Nomenclatures used in Fuzzy Set Theory - II

Lecture 9 - Nomenclatures used in Fuzzy Set Theory - III

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Peer to Peer Networks (Electrical Engineering)

Co-ordinators : Prof. Yatindra N Singh

Lecture 1 - Introduction to Peer to Peer Networks

Lecture 2 - Peer to Peer Network in Telephony:Voice over Internet Telephony (VoIP) and Distributed Hash Table (DHT)

Lecture 3 - Building DHT Networks

Lecture 4 - Logarithmic Partitioning of Node ID Space and Index Entry Authenticity

Lecture 5 - Implementation of Voice over Internet Telephony in P2P Way

Lecture 6 - Leaf Nodes, Core Nodes and Type of Messages in DHT Networks

Lecture 7 - Static and Dynamic Partitioning of Node ID Space: Fixed and Floating Partitioning

Lecture 8 - PASTRY Protocol: The Efficient Use of Internet Infrastructure

Lecture 9 - Understanding the PASTRY Protocol through Example

Lecture 10 - Kademlia: A DHT Routing Protocol

Lecture 11 - Tapestry: An Evolution of Kademlia

Lecture 12 - Understanding the Tapestry Protocol through Example

Lecture 13 - Multi-dimensional Distributed Hash Table: Mapping of Peers into Multidimensional Space

Lecture 14 - Multi-Layer DHT: A Design for Multiple Services

Lecture 15 - Keeping Pairs at Correct Root Nodes

Lecture 16 - Abrupt and Graceful Exit of Root Node: Maintaining Pairs Alive

Lecture 17 - Resilience of Pairs

Lecture 18 - A P2P Distributed File System

Lecture 19 - Storage Space Problem and Incentives to Share Storage

Lecture 20 - P2P Nodes Communications Challenges in Heterogeneous Network Environments

Lecture 21 - P2P Overlaid Multicast: Basic Design

Lecture 22 - P2P Overlaid Multicast: Alternate Design

Lecture 23 - A Design of P2P Email System

Lecture 24 - P2P Mailing List Services: A Basic Design

Lecture 25 - P2P Mailing List Services: An Alternate Design

Lecture 26 - P2P Web: A Basic Design

Lecture 27 - P2P Web Search Engine: A Basic Design

Lecture 28 - P2P Internet: On Being Anonymous

Lecture 29 - P2P in Blockchain

Lecture 30 - P2P Anonymous Communication

Lecture 31 - The Anonymous Communication on the Internet through TOR Network

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - An Introduction To TOR Browser: The Anonymity Preserving Access of the Web Sites

Lecture 33 - Hidden Services on TOR Network

Lecture 34 - MOOC Wrap-Up : Summary of the Course

NPTEL : NOC:Applied Linear Algebra for Signal Processing, Data Analytics and Machine Learning (Electrical Engineering)

Co-ordinators : Prof. Aditya K. Jagannatham

Lecture 1 - Vector Properties: Addition, Linear Combination, Inner Product, Orthogonality, Norm

Lecture 2 - Vectors: Unit Norm Vector, Cauchy-Schwarz inequality, Radar Application

Lecture 3 - Inner Product Application: Beamforming in Wireless Communication Systems

Lecture 4 - Matrices, Definition, Addition and Multiplication of Matrices

Lecture 5 - Matrix: Column Space, Linear Independence, Rank of Matrix, Gaussian Elimination

Lecture 6 - Matrix: Determinant, Inverse Computation, Adjoint, Cofactor Concepts

Lecture 7 - Applications of Matrices: Solution of System of Linear equations, MIMO Wireless Technology

Lecture 8 - Applications of Matrices: Electric Circuits, Traffic flows

Lecture 9 - Applications of Matrices: Graph Theory, Social Networks, Dominance Directed Graph, Influential Node

Lecture 10 - Null Space of Matrix: Definition, Rank-Nullity Theorem, Application in Electric Circuits

Lecture 11 - Gram-Schmidt Orthogonalization

Lecture 12 - Gaussian Random Variable: Definition, Mean, Variance, Multivariate Gaussian, Covariance Matrix

Lecture 13 - Linear Transformation of Gaussian Random Vectors

Lecture 14 - Machine Learning Application: Gaussian Classification

Lecture 15 - Eigenvalue: Definition, Characteristic Equation, Eigenvalue Decomposition

Lecture 16 - Special Matrices: Rotation and Unitary Matrices, Application: Alamouti Code

Lecture 17 - Positive Semi-definite (PSD) Matrices: Definition, Properties, Eigenvalue Decomposition

Lecture 18 - Positive Semidefinite Matrix: Example and Illustration of Eigenvalue Decomposition

Lecture 19 - Machine Learning Application: Principle Component Analysis (PCA)

Lecture 20 - Computer Vision Application: Face Recognition, Eigenfaces

Lecture 21 - Least Squares (LS) Solution, Pseudo-Inverse Concept

Lecture 22 - Least Squares (LS) via Principle of Orthogonality, Projection Matrix, Properties

Lecture 23 - Application: Pseudo-Inverse and MIMO Zero Forcing (ZF) Receiver

Lecture 24 - Wireless Application: Multi-Antenna Channel Estimation

Lecture 25 - Machine Learning Application: Linear Regression

Lecture 26 - Computation Mathematics Application: Polynomial Fitting

Lecture 27 - Least Norm Solution

Lecture 28 - Wireless Application: Multi-user Beamforming

Lecture 29 - Singular Value Decomposition (SVD): Definition, Properties, Example

Lecture 30 - SVD Application in MIMO Wireless Technology: Spatial-Multiplexing and High Data Rates

Lecture 31 - SVD for MIMO wireless optimization, water-filling algorithm, optimal power allocation

Lecture 32 - SVD application for Machine Learning: Principal component analysis (PCA)

Lecture 33 - Multiple signal classification (MUSIC) algorithm: system model

Lecture 34 - MUSIC algorithm for Direction of Arrival (DoA) estimation

Lecture 35 - Linear minimum mean square error (LMMSE) principle

Lecture 36 - LMMSE estimate and error covariance matrix

Lecture 37 - LMMSE estimation in linear systems

Lecture 38 - LMMSE application: Wireless channel estimation and example

Lecture 39 - Time-series prediction via auto-regressive (AR) model

Lecture 40 - Recommender system: design and rating prediction

Lecture 41 - Recommender system: Illustration via movie rating prediction example

Lecture 42 - Fast Fourier transform (FFT) and Inverse fast Fourier transform (IFFT)

Lecture 43 - IFFT/ FFT application in Orthogonal Frequency Division Multiplexing (OFDM) wireless technology

Lecture 44 - OFDM system: Circulant matrices and properties

Lecture 45 - OFDM system model: Transmitter and receiver processing

Lecture 46 - Single-carrier frequency division for multiple access (SC-FDMA) technology

Lecture 47 - Linear dynamical systems: definition and solution via matrix exponential

Lecture 48 - Linear dynamical systems: matrix exponential via SVD

Lecture 49 - Machine Learning application: Support Vector Machines (SVM)

Lecture 50 - Support Vector Machines (SVM): Problem formulation via maximum hyperplane separation

Lecture 51 - Sparse regression: problem formulation and relation to Compressive Sensing (CS)

Lecture 52 - Sparse regression: solution via the Orthogonal Matching Pursuit (OMP) algorithm

Lecture 53 - OMP Example for Sparse Regression

Lecture 54 - Machine Learning Application: Clustering

Lecture 55 - K-Means Clustering algorithm

Lecture 56 - Introduction to Stochastic Processes and Markov Chains

Lecture 57 - Discrete Time Markov Chains and Transition Probability Matrix

Lecture 58 - Discrete Time Markov Chain Examples

Lecture 59 - m-STEP Transition Probabilities for Discrete Time Markov Chains

Lecture 60 - Limiting Behavior of Discrete Time Markov Chains

Lecture 61 - Least Squares Revisited: Rank Deficient Matrix

Lecture 62 - Least Squares using SVD

Lecture 63 - Weighted Least Squares

Lecture 64 - Weighted Least Squares Example

Lecture 65 - Woodbury Matrix Identity - Matrix Inversion Lemma

Lecture 66 - Woodbury Matrix Identity - Proof

Lecture 67 - Conditional Gaussian Density - Mean

Lecture 68 - Conditional Gaussian Density - Covariance

Lecture 69 - Scalar Linear Model for Gaussian Estimation

Lecture 70 - MMSE Estimate and Covariance for the Scalar Linear Model

Lecture 30 - Multiplier Architecture

Lecture 31 - Multiplier Architecture

Lecture 32 - Multiplier Architecture

Lecture 33 - Multiplier Architecture

Lecture 34 - Multiplier Architecture

Lecture 35 - Squaring Circuit Design

Lecture 36 - Reconfigurable Constant Multiplier Design

Lecture 37 - Reconfigurable Constant Multiplier Design

Lecture 38 - Reconfigurable Constant Multiplier Design

Lecture 39 - Fixed Point Number Representation

Lecture 40 - Fixed Point Number Representation

Lecture 41 - CORDIC Architecture

Lecture 42 - CORDIC Architecture

Lecture 43 - CORDIC Architecture

Lecture 44 - CORDIC Architecture

Lecture 45 - Timing Analysis

Lecture 46 - Timing Analysis

Lecture 47 - Timing Analysis

Lecture 48 - Logic Hazard

Lecture 49 - FFT Architecture

Lecture 50 - FFT Architecture (Continued...)

Lecture 51 - Timing analysis Basics

Lecture 52 - Timing analysis Basics (Continued...)

Lecture 53 - Timing analysis Basics (Continued...)

Lecture 54 - Timing Issuesin Digital IC Design

Lecture 55 - Timing Issuesin Digital IC Design (Continued...)

Lecture 56 - Timing Issuesin Digital IC Design (Continued...)

Lecture 57 - Timing Issuesin Digital IC Design (Continued...)

Lecture 58 - Architectural Design of Digital Integrated Circuits

Lecture 59 - Design Tips for Basic Circuits Design (Continued...)

Lecture 60 - Design Tips for Basic Circuits Design (Continued...)

Lecture 61 - Design Tips for Basic Circuits Design (Continued...)

Lecture 62 - Low Power Digital Design

Lecture 63 - Low Power Digital Design (Continued...)

Lecture 64 - Low Power Digital Design

Lecture 65 - Low Power Digital Design (Continued...)

Lecture 66 - Hardware for Machine Learning: Design Considerations Design Tips

Lecture 67 - Hardware for Machine Learning: Design Considerations Design Tips (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Electrical Machines-II (Electrical Engineering)

Co-ordinators : Prof.Tapas Kumar Bhattacharya

Lecture 1 - Inductance, Self and Mutual

Lecture 2 - Relationship of Inductances in Transformer

Lecture 3 - Equivalent Circuit from Circuit KVL Equations

Lecture 4 - Co-efficient of Coupling , Energy Stored in Coupled Coils

Lecture 5 - A Single Conductor Generator and Motor

Lecture 6 - Analysis of Single Conductor Generator and Motor

Lecture 7 - Analysis of Single Conductor Generator and Motor (Continued...)

Lecture 8 - Flux Density Distribution in Space and Nature emf

Lecture 9 - Flux Density Distribution in Space and Nature emf (Continued...)

Lecture 10 - From Linear to Rotating Machine

Lecture 11 - From Linear to Rotating Machine (Continued...)

Lecture 12 - Basic Underlying Principle of Operation of Rotating Machine

Lecture 13 - Basic Underlying Principle of Operation of Rotating Machine (Continued...)

Lecture 14 - Flux Density Distribution along the Air Gap

Lecture 15 - Flux Density Distribution along the Air Gap (Continued...)

Lecture 16 - Induced Voltage in a Coil in a Rotating Machine

Lecture 17 - Induced Voltage in a Coil in a Rotating Machine (Continued...)

Lecture 18 - Induced Voltage in a Coil in a Rotating Machine (Continued...)

Lecture 19 - Induced Voltage due to Fundamental and Harmonic Components of Flux Density Distribution

Lecture 20 - Distributed Coils Connected in Series Resultant Voltage

Lecture 21 - Distribution Factor

Lecture 22 - Pitch Factor and Winding Factor

Lecture 23 - How to decide about Short Pitch Angle ÃÂµ

Lecture 24 - Double Layer 3-phase Winding - An Introduction

Lecture 25 - Winding Table for 3-phase Distributed Winding

Lecture 26 - Winding Table for 3-phase Distributed Winding with Examples

Lecture 27 - Winding Table for 3-phase Distributed Winding with Examples (Continued...)

Lecture 28 - 120 degree Phase Spread Winding with Examples

Lecture 29 - Winding Table of 120 degree Phase Spread Coils and Group Connection

Lecture 30 - Introduction to Rotating Magnetic Field

Lecture 31 - Rotating Magnetic Field (Continued...), Mechanical and Electrical Speed

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Speed and Direction of Rotating Field

Lecture 33 - Synchronous Speed and How to Calculate Induced Voltage in a Coil

Lecture 34 - Introduction to Induction Motor

Lecture 35 - Introduction to Induction Motor (Continued...)

Lecture 36 - General Expression of Torque in Terms of Stator and Rotor Fields

Lecture 37 - Torque Angle and Torque Expression

Lecture 38 - How to Fix Up Positions of Net Field, Rotor Field and Stator Field

Lecture 39 - Slip: Its Importance and Range for Motor Operation

Lecture 40 - Equivalent Circuit of 3-Phase Induction Motor

Lecture 41 - Equivalent Circuit of 3-Phase Induction Motor (Continued...)

Lecture 42 - Equivalent Circuit of 3-Phase Induction Motor (Continued...)

Lecture 43 - Expression for Electromagnetic Torque in terms of Equivalent Circuit Parameters

Lecture 44 - Maximum Electromagnetic Torque and Slip at Which it Occurs

Lecture 45 - Typical Torque Slip Characteristic and Operating Point

Lecture 46 - Change in Torque-slip Characteristic as Supply Voltage and Rotor Resistance are Varied

Lecture 47 - Types of Induction Motor - Slip Ring Type

Lecture 48 - Introduction to Cage Induction Motor

Lecture 49 - Cage Motor Can Operate for Different Stator Poles

Lecture 50 - Core Loss in Induction Motor and Simplified Equivalent Circuit

Lecture 51 - Torque Expression from Simplified Equivalent Circuit and Introduction to Circle Diagram

Lecture 52 - Circle Diagram (Continued...)

Lecture 53 - Exact Power Flow Diagram and Circle Diagram

Lecture 54 - Circle Diagram (Continued...)

Lecture 55 - Circle Diagram: Slip Line

Lecture 56 - Circle Diagram from Test Data

Lecture 57 - Starting of 3 Phase Induction Motor - Introduction

Lecture 58 - DOL and Reactor Starting

Lecture 59 - DOL and Auto Transformer Starting

Lecture 60 - Introduction to Speed Control

Lecture 61 - Idea of VVVF Speed Control of Induction Motor

Lecture 62 - Speed Contro Using Two Motors

Lecture 63 - Electrical Braking of 3 Phase Induction Motor

Lecture 64 - Braking (Continued...)

Lecture 65 - Introduction to Single Phase Induction Motor - Sequence Currents

Lecture 66 - Development of Equivalent Circuit

Lecture 67 - Development of Equivalent Circuit (Continued...)

Lecture 68 - Torque-slip Ch. of 1 ph. I-M Running on Single Winding

Lecture 69 - Introduction to Starting of 1ph. Induction Motor

Lecture 70 - Expression for Starting Torque and Need for Phase Splitting

Lecture 71 - Resistor Split 1 ph. Induction Motor

Lecture 72 - Capacitor Split 1 ph Induction Motor

Lecture 73 - Starting of 1 ph. Induction Motor (Continued...)

Lecture 74 - Synchronous Machine Construction

Lecture 75 - Synchronous Generator - Introduction

Lecture 76 - Synchronisation

Lecture 77 - Expression for Induced Voltage and O.C. Phasor Diagram

Lecture 78 - Loaded Synchronous Generator - Resultant Field

Lecture 79 - Armature Reaction and Synchronous Reactance. Basic Phasor Diagram

Lecture 80 - General Mode of Operation - Rotro Field, Stator Field and Resultant Field

Lecture 81 - Complete Phasor Diagram and Expression for Complex Power

Lecture 82 - Synchronous Motor Operation, Phasor Diagram and Power Expression

Lecture 83 - Effect of Variation of Field Current in Generator

Lecture 84 - Effect of Variation Field Current in Synchronous Motor, Introduction to Salient Pole Machine

Lecture 85 - Analysis of Salient Pole Synchronous Machine

Lecture 86 - Phasor Diagram of Salient Pole Synchronous Machine for Generator and Motor Mode

Lecture 87 - Expression for Load Angle and Expression for Power

Lecture 88 - Phasor Diagrams of Salient Pole Synchronous Generator under Various Conditions

Lecture 89 - Phasor Diagrams of Salient Pole Synchronous Motor under Various Conditions

Lecture 90 - O.C and S.C Test on Synchronous Generator

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Digital Electronic Circuits (Electrical Engineering)

Co-ordinators : Prof. Goutam Saha

Lecture 1 - Introduction

Lecture 2 - Transistor as a switch

Lecture 3 - Performance Issues and Introduction to TTL

Lecture 4 - Transistor Transistor Logic (TTL)

Lecture 5 - CMOS Logic

Lecture 6 - Basic Gates and their representations

Lecture 7 - Fundamentals of Boolean Algebra

Lecture 8 - Boolean Function to Truth Table and Implementaion Issues

Lecture 9 - Truth Table to Boolean Function and Implementaion Issues

Lecture 10 - Karnugh Map and Digital Circuit Realization

Lecture 11 - Karnaugh Map to Entered Variable Map

Lecture 12 - Quine - McClusky (QM) Algorithm

Lecture 13 - Cost Criteria and Minimization of Multiple Output Functions

Lecture 14 - Static 1 Hazard

Lecture 15 - Static 0 Hazard and Dynamic Hazard

Lecture 16 - Multiplexer: Part I

Lecture 17 - Multiplexer: Part II

Lecture 18 - Demultiplexer / Decoder

Lecture 19 - Decoder with BCD Input and Encoder

Lecture 20 - Parity Generator and Checker

Lecture 21 - Number System

Lecture 22 - Negative Number and 2s Complement Arithmetic

Lecture 23 - Arithmetic Building Blocks - I

Lecture 24 - Arithmetic Building Blocks - II

Lecture 25 - Overflow Detection and BCD Arithmetic

Lecture 26 - Magnitude Comparator

Lecture 27 - Arithmetic Logic Unit (ALU)

Lecture 28 - Unweighted Code

Lecture 29 - Error Detection and Correction Code

Lecture 30 - Multiplication and Division

Lecture 31 - SR Latch and Introduction to Clocked Flip-Flop

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Edge-Triggered Flip-Flop

Lecture 33 - Representations of Flip-Flops

Lecture 34 - Analysis of Sequential Logic Circuit

Lecture 35 - Conversion of Flip-Flops and Flip-Flop Timing Parameters

Lecture 36 - Register and Shift Register: PIPO and SISO

Lecture 37 - Shift Register: SIPO, PISO and Universal Shift Register

Lecture 38 - Application of Shift Register

Lecture 39 - Linear Feedback Shift Register

Lecture 40 - Serial Addition, Multiplication and Division

Lecture 41 - Asynchronous Counter

Lecture 42 - Decoding Logic and Synchronous Counter

Lecture 43 - Cascading: Mod 2, 3, 5 to Mod 6, 10, 1000 Counter

Lecture 44 - Counter Design with Asynchronous Reset and Preset

Lecture 45 - Counter Design as Synthesis Problem and Few Other Uses of Counter

Lecture 46 - Synthesis of Sequential Logic Circuit: Moore Model and Mealy Model

Lecture 47 - Moore Model and Mealy Model: Realization of Digital Logic Circuit

Lecture 48 - Algorithmic State Machine (ASM) Chart and Synthesis of Sequential Logic Circuit

Lecture 49 - Circuit Realization from ASM Chart and State Minimization

Lecture 50 - State Minimization by Implication Table and Partitioning Method

Lecture 51 - Digital to Analog Conversion - I

Lecture 52 - Digital to Analog Conversion - II

Lecture 53 - Analog to Digital Conversion - I

Lecture 54 - Analog to Digital Conversion - II

Lecture 55 - Certain Performance Issue of ADC and DAC

Lecture 56 - Introduction to Memory

Lecture 57 - Static Random Access Memory (SRAM)

Lecture 58 - Dynamic RAM (DRAM) and Memory Expansion

Lecture 59 - Read Only Memory (ROM)

Lecture 60 - PAL, PLA, CPLD, FPGA

Lecture 30 - Small-Signal Model Validation using MATLAB and Time Domain Correlation

Lecture 31 - Small-signal Modeling with Closed Current Loop

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Impedance Analysis and Stability

Lecture 33 - Loop Gain Analysis and Understanding Model Limits using MATLAB

Lecture 34 - PID Control Design and Tuning under VMC with MATLAB Case Studies

Lecture 35 - Shaping Output Impedance of a Buck Converter under VMC

Lecture 36 - Design of VMC Boost Converter and MATLAB Design Case Studies

Lecture 37 - Accurate Small-signal Modelling under CMC and Verification using MATLAB

Lecture 38 - Design CMC in a Buck Converter and MATLAB based Model Validation

Lecture 39 - Design of CMC Boost Converter - Output and State Feedback Approaches

Lecture 40 - Loop Interactions in CMC and Design of Average CMC

Lecture 41 - Dynamics of SMPCs and Overview of Model-based Nonlinear Control

Lecture 42 - Dynamics of LTIs and Vector Field with MATLAB Demonstration

Lecture 43 - Geometric Perspectives of Eigenvalues and Eigenvectors in SMPCs

Lecture 44 - Small-signal and Large-signal Model based Nonlinear Control

Lecture 45 - Introduction to Sliding Mode Control in SMPCs

Lecture 46 - Sliding Mode Control Design in a Buck Converter

Lecture 47 - Boundary Control Techniques and Selection of Switching Surfaces

Lecture 48 - Time Optimal Control and Identifying Physical Limits in SMPCs

Lecture 49 - Linking Switching Boundary and PID Controller Structure in SMPCs

Lecture 50 - Large-Signal Controller Tuning in Buck Converter: Objectives and Derivations

Lecture 51 - Large-Signal Controller Tuning in Boost and Buck-Boost Converters

Lecture 52 - Large-Signal Controller Tuning in Fixed- and Variable-Frequency Control

Lecture 53 - Critical Performance Limits in Dynamic Voltage Scaling and Possible Solutions

Lecture 54 - Nonlinear Control vs. Large-Signal Tuning: Comparative Study using MATLAB

Lecture 55 - Small-Signal vs. Large-Signal Tuning: Comparison using MATLAB Simulation

Lecture 56 - Performance Improvement and Size Reduction using Large-Signal based Control

Lecture 57 - Digital Control in High Frequency SMPCs - Introduction and Motivations

Lecture 58 - Overview of Fixed and Variable Frequency Digital Control Architectures

Lecture 59 - Challenges and Opportunities in Digitally Controlled High Frequency SMPCs

Lecture 60 - Course Summary, Key Takeaways, Few Emerging Applications and Future Scopes

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 38 - Derivation of Discrete-Time Small-Signal Models - II

Lecture 39 - Discrete-Time Transfer Functions and Closed Loop Block Diagrams

Lecture 40 - Model Accuracy with MATLAB Case Studies - Comparative Study

Lecture 41 - Continuous-Time to Discrete-Time Conversion Methods - A Summary

Lecture 42 - Recap of Frequency Domain Design of Analog VMC and CMC

Lecture 43 - Design under Digital Voltage Mode Control - Frequency Domain Approaches

Lecture 44 - Design under Digital Current Mode Control - Frequency Domain Approaches

Lecture 45 - Design Case Study and MATLAB Simulation of Digital Voltage Mode Control

Lecture 46 - Design Case Study and MATLAB Simulation of Digital Current Mode Control

Lecture 47 - Time Optimal Control of a Buck Converter and Identifying Performance Limits

Lecture 48 - Trajectory based CMC Design for Proximate Time Optimal Recovery

Lecture 49 - Trajectory based Digital CMC Tuning and MATLAB Case Studies

Lecture 50 - Digital Pulse Skipping Control and MATLAB Simulation Case Studies

Lecture 51 - Selection of ADC and DAC in Digitally Controlled SMPCs

Lecture 52 - High Frequency Current Sensing Techniques in Digitally Controlled SMPCs

Lecture 53 - Current Sensing Techniques in Digitally Controlled High Power Converters

Lecture 54 - Signal Conditioning Circuits and PCB Design for Mixed-Signal Implementation

Lecture 55 - Reference Power Stage Design and Schematic for Buck and Boost Converters - I

Lecture 56 - Reference Power Stage Design and Schematic for Buck and Boost Converters - II

Lecture 57 - Step-by-Step Guidelines for Digital Control Implementation using FPGA

Lecture 58 - Test and Measurement of a Buck Converter using Digital Storage Oscilloscope

Lecture 59 - Functionalities in Mixed Signal Oscilloscope for Validating Digital Control

Lecture 60 - Power Spectrum Analysis of SMPCs using Mixed-Signal Oscilloscope

Lecture 61 - Introduction to Verilog Hardware Description Language (HDL)

Lecture 62 - Guidelines for Verilog HDL Programming - Some Key Rules

Lecture 63 - Structural and Dataflow Modeling in Verilog HDL for Combinational Logics

Lecture 64 - Behavioral Modeling in Verilog HDL for Sequential Digital Circuits

Lecture 65 - Simulation of Verilog-HDL based Design using Xilinx Webpack - I

Lecture 66 - Simulation of Verilog-HDL based Design using Xilinx Webpack - II

Lecture 67 - Fixed Point Implementation in Embedded Control System

Lecture 68 - Fixed Point Arithmetic and Concept of Q Format

Lecture 69 - Counter-based DPWM with Deadtime and Verilog HDL Programming

Lecture 70 - Simulating Counter-based DPWM with Deadtime using Xilinx ISE Simulator

Lecture 71 - Top Down Design Methodology in Digital Voltage Mode Control - I

Lecture 72 - Top Down Design Methodology in Digital Voltage Mode Control - II

Lecture 73 - Digital PID Control Implementation using Verilog HDL Programming

Lecture 74 - Digital PID Controller - Hardware Implementation and Experimental Results

Lecture 75 - Top Down Design Methodology in Mixed-Signal Current Mode Control

Lecture 76 - Top Down Design Method and Verilog HDL Programming of Mixed-Signal CMC

Lecture 77 - Verilog HDL based Digital PI Control Implementation of Mixed-Signal CMC

Lecture 78 - Hardware Implementation of Mixed-Signal CMC and Experimental Results

Lecture 79 - Voltage based Digital Pulse Skip Modulation and Top Down Design Method

Lecture 80 - Implementing Digital Pulse Skip Modulation and Experimental Results

Lecture 81 - STM32 Overview and STM32G4x ecosystem

Lecture 82 - Getting started with STM32CubeMX - Part I

Lecture 83 - Getting started with STM32CubeMX - Part II

Lecture 84 - Practical implementation of LLC converters - Part I

Lecture 85 - Practical implementation of LLC converters - Part II

Lecture 86 - Texas Instruments C2000 Real-time Microcontroller Devices

Lecture 24 - Application of Flow cytometry in Biology

Lecture 25 - Raman Assisted Flow cytometry

Lecture 26 - Genetic Code

Lecture 27 - Biosensing Background

Lecture 28 - Basics of Microarray Technology

Lecture 29 - DNA Microarray Technology

Lecture 30 - Protein Microarray Technology

Lecture 31 - Laser Principles and Operation

Lecture 32 - Nonlinear Optical Processes

Lecture 33 - In Vivo Photoexcitation

Lecture 34 - Light/Laser Activated Therapy

Lecture 35 - Laser Tissue Contouring

Lecture 36 - Metamaterials

Lecture 37 - Metamaterials as Biosensors

Lecture 38 - Biosensing with Optical Nano-Antennas

Lecture 39 - Nanoscale Chemical Imaging

Lecture 40 - Optical Tweezers

Lecture 41 - Introduction to Optogenetics

Lecture 42 - Controlling the Brain with Light

Lecture 43 - The Nervous System

Lecture 44 - The Neural Circuits

Lecture 45 - Optical Neuroimaging and Tomography

Lecture 46 - Functional Near-Infrared Spectroscopy (fNIRS) of the Brain

Lecture 47 - Neuro imaging with Light-Sheet Microscopy

Lecture 48 - Brain imaging with Two Photon Microscopy

Lecture 49 - Brain imaging with functional optoacoustic Imaging

Lecture 50 - Tomographic technique for Brain imaging

Lecture 51 - Optogenetic Modulation of Neural Circuits

Lecture 52 - Nanoparticles for Optical Modulation of Neuronal Behavior

Lecture 53 - Optical Stimulation of Neural Circuits in Freely Moving Animals

Lecture 54 - Higher Harmonic Generation Imaging for Neuropathology

Lecture 55 - Multi-Photon Nanosurgery

Lecture 56 - Bioinspired materials for photonics

Lecture 57 - Bioderived Materials

Lecture 58 - Bioinspired Materials

Lecture 59 - Biotemplates

Lecture 60 - Summary and Revisiting Few Topics

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:EMI-EMC and Signal Integrity: Principles, Techniques and Applications (Electrical Engineering)

Co-ordinators : Prof. Amitabha Bhattacharya

Lecture 1 - Introduction to Electromagnetic Environment

Lecture 2 - Introduction to Electromagnetic Compatibility

Lecture 3 - EMC Standards

Lecture 4 - EMC Units and Signal Spectrum

Lecture 5 - Single Sided Spectrum

Lecture 6 - Response of Linear Systems to Periodic Input Signals

Lecture 7 - Important Computational Techniques

Lecture 8 - Fourier Coefficient for Piecewise Linear Periodic Waveforms

Lecture 9 - Fourier Coefficient for Piecewise Linear Periodic Waveforms (Continued...)

Lecture 10 - Trapezoidal Clock

Lecture 11 - Spectral Bounds for Trapezoidal Clock

Lecture 12 - Spectral estimation of trapezoidal clock

Lecture 13 - Effect of Rise/Fall Time on Spectral Bound of a Clock

Lecture 14 - Effect of Ringing on Spectral Bounds

Lecture 15 - Spectral Bounds for Linear System Output

Lecture 16 - Resolution Bandwidth of a Spectrum Analyser

Lecture 17 - Detector of Spectrum Analyser

Lecture 18 - Radiated Emission Model Subproblem - I

Lecture 19 - Farfield Characteristics of Current Element: Some Discussion

Lecture 20 - Farfield of Dipole Antena

Lecture 21 - Farfield models of wire antenna and current models

Lecture 22 - Differential mode current emission model

Lecture 23 - Differential mode current emission model (Continued...)

Lecture 24 - Common Mode Current Emission Model

Lecture 25 - Current Measurement

Lecture 26 - Radiated Susceptibility Models

Lecture 27 - Determination of Per Unit Length Inductance (Continued...)

Lecture 28 - Per Unit Length Parameters of Various Two Wire Lines

Lecture 29 - Radiated Susceptibility Model

Lecture 30 - Radiated Susceptibility Model (Continued...)

Lecture 31 - Radiated Susceptibility Model (Continued...)

Lecture 33 - Autobalance Active Bridge Interfacing Circuit

Lecture 34 - Background of Miniaturization

Lecture 35 - Micromachining Technology for MEMS Devices

Lecture 36 - Bulk and Surface Micromachining and Fabrication Steps

Lecture 37 - MEMS Fabrication Process - Part 1

Lecture 38 - MEMS Fabrication Process - Part 2

Lecture 39 - MEMS Fabrication Process - Part 3

Lecture 40 - MEMS Fabrication Process - Part 4

Lecture 41 - MEMS-IC Integration Aspects and Miniaturized Sensor

Lecture 42 - MEMS Pressure Sensor and Interfacing Electronics

Lecture 43 - MEMS Accelerometer

Lecture 44 - MEMS Capacitive Accelerometer and Interfacing Electronics

Lecture 45 - Interfacing Electronics Details for MEMS Accelerometer

Lecture 46 - MEMS Gyroscope and Flow sensor

Lecture 47 - MEMS Actuator

Lecture 48 - MEMS Electrostatic Actuator Analysis

Lecture 49 - Background of Renewable Energy Harvesting

Lecture 50 - Various Transduction Mechanisms for Energy Harvester

Lecture 51 - Vibration Energy Harvester and its Interfacing Aspects

Lecture 52 - Interfacing Power Management Circuit for Vibration Energy Harvester

Lecture 53 - Demonstration of Energy Harvester Set-up and Self-powered Embedded System

Lecture 54 - Background of Embedded Sensors and Actuators in Automotives

Lecture 55 - Applications in Safety System of Automotive

Lecture 56 - Applications in Safety System and Engine Control System

Lecture 57 - Application in Cardiovascular Measurements

Lecture 58 - Applications in Remote Healthcare and Smart Medical Devices

Lecture 59 - Electronic Nose and its Applications in Disease Detection

Lecture 60 - Virtual Sensing, Research Scopes, Summary and Key Takeaways of the Course

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:A Basic Course on Electric and Magnetic Circuits (Electrical Engineering)

Co-ordinators : Prof. Ashok Kumar Pradhan

Lecture 1 - Electric systems

Lecture 2 - Resistive circuit connections

Lecture 3 - Nodal analysis

Lecture 4 - Mesh Analysis / Loop Analysis

Lecture 5 - Mixed sources - Meshand Nodal analysis

Lecture 6 - Superposition Theorem

Lecture 7 - Thevenin's Theorem and its applications

Lecture 8 - Norton's theorem and Maximum power transfer theorem

Lecture 9 - Review problems on DC circuits

Lecture 10 - Average and RMS values Phasor representation of sinusoids Reactance

Lecture 11 - Series AC circuits, R-L, R-C, R-L-C

Lecture 12 - KVL and KCL Series and parallel combination of impedance Star - delta transformations

Lecture 13 - Power Curves for AC circuits

Lecture 14 - Real and Reactive Power

Lecture 15 - Loop current method, nodal analysis and theorems

Lecture 16 - Theorem-examples, maximum power transfer theorem

Lecture 17 - Resonance

Lecture 18 - Power Factor Improvement

Lecture 19 - Review problems on AC circuits

Lecture 20 - Capacitor - properties series - parallel combinations

Lecture 21 - Inductor - properties series - parallel combinations

Lecture 22 - Source free RC and RL circuits

Lecture 23 - Step response of RC and RL circuits

Lecture 24 - Review Problems on RL and RC transients

Lecture 25 - Basics on three phase systems

Lecture 26 - Line and phase currents and voltages in star connected systems

Lecture 27 - Line and phase voltages and currents in delta connected systems

Lecture 28 - Three phase power

Lecture 29 - Three phase power and Power factor

Lecture 30 - Measurement of 3 - phase power

Lecture 31 - Magnetic flux, flux density, magnetic field strength

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Reluctance Equivalent magnetic circuit Solving Magnetic Circuits

Lecture 33 - Solving Magnetic Circuits

Lecture 34 - Hysteresis loop Hysteresis and Eddy Current loss

Lecture 35 - Self and Mutual inductances Dot Convention

Lecture 36 - Solving Magnetic Coupled Circuits

Lecture 37 - Magnetic Circuit applications

Lecture 38 - Transformer Basics, The emf equation

Lecture 39 - Ideal transformer, Impedance referred to primary

Lecture 40 - Practical transformer, Transformer equivalent circuit diagram

Lecture 41 - Voltage Drop and Voltage Regulation Calculation

Lecture 42 - Efficiency of Transformer

Lecture 43 - Transformer Tests, Transformer Applications

NPTEL : NOC:Deep Learning for Natural Language Processing (Electrical Engineering)

Co-ordinators : Prof. Pawan Goyal

Lecture 1 - Introduction to the Course

Lecture 2 - Text Processing Basics, Tokenization

Lecture 3 - N-gram Language Models - Part 1

Lecture 4 - N-gram Language Models - Part 2

Lecture 5 - NLP Tasks and Paradigms

Lecture 6 - Tutorial 1

Lecture 7 - Supervised Learning

Lecture 8 - Shallow Neural Networks

Lecture 9 - Deep Neural Networks

Lecture 10 - Backpropagation

Lecture 11 - Gradient Descent and Initialization

Lecture 12 - Tutorial 2

Lecture 13 - Word Representation

Lecture 14 - Learning Word Representation - Part I

Lecture 15 - Learning Word Representation - Part II

Lecture 16 - Word Vectors: Other Extensions

Lecture 17 - Cross-Lingual Representations

Lecture 18 - Tutorial 3

Lecture 19 - RNN Language Models

Lecture 20 - RNN Applications : Text Generation, Sequence Labeling, Text Classification

Lecture 21 - RNN for Sequence to Sequence

Lecture 22 - Decoding Strategies

Lecture 23 - Better RNN Units : GRU, LSTM

Lecture 24 - Tutorial 4

Lecture 25 - Introduction to Transformers

Lecture 26 - Transformers - Part 2

Lecture 27 - Transformers - Part 3

Lecture 28 - Transformers - Part 4

Lecture 29 - Efficient Transformers

Lecture 30 - Tutorial 5

Lecture 31 - Pretraining

Lecture 32 - Pretraining Transformer Encoder

Lecture 33 - Pretraining Transformer Encoder, Encoder-Decoder

Lecture 34 - Pretraining Transformer Decoder

Lecture 35 - More on Pretraining

Lecture 12 - Two port nonlinearity

Lecture 13 - Small signal equivalent of a two port network

Lecture 14 - Small signal equivalent circuit of a two port network

Lecture 15 - Gain of a two port network

Lecture 16 - Constraints on small signal parameters to maximize the gain

Lecture 17 - Constraints on large signal characteristics to maximize the gain

Lecture 18 - Implications of constraints in terms of the circuit equivalent

Lecture 19 - MOS transistor-description

Lecture 20 - MOS transistor large signal characteristics

Lecture 21 - MOS transistor large signal characteristics - graphical view

Lecture 22 - MOS transistor small signal characteristics

Lecture 23 - Linear (Triode) region of the MOS transistor

Lecture 24 - Small signal amplifier using the MOS transistor

Lecture 25 - Basic amplifier structure

Lecture 26 - Problems with the basic structure

Lecture 27 - Adding bias and signal-ac coupling

Lecture 28 - Common source amplifier with biasing

Lecture 29 - Common source amplifier: Small signal equivalent circuit

Lecture 30 - Common source amplifier analysis: Effect of biasing components

Lecture 31 - Constraint on the input coupling capacitor

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Constraint on the output coupling capacitor

Lecture 33 - Dependence of ID on VDS

Lecture 34 - Small signal output conductance of a MOS transistor

Lecture 35 - Effect of gds on a common source amplifier; Inherent gain limit of a transistor

Lecture 36 - Variation gm with transistor parameters

Lecture 37 - Variation of gm with constant VGS and constant drain current bias

Lecture 38 - Negative feedback control for constant drain current bias

Lecture 39 - Types of feedback for constant drain current bias

Lecture 40 - Sense at the drain and feedback to the gate-Drain feedback

Lecture 41 - Intuitive explanation of low sensitivity with drain feedback

Lecture 42 - Common source amplifier with drain feedback bias

Lecture 43 - Constraint on the gate bias resistor

Lecture 44 - Constraint on the input coupling capacitor

Lecture 45 - Constraint on the output coupling capacitor

Lecture 46 - Input and output resistances of the common source amplifier with constant VGS bias

Lecture 47 - Current mirror

Lecture 48 - Common souce amplifier with current mirror bias

Lecture 49 - Constraint on coupling capacitors and bias resistance

Lecture 50 - Diode connected transistor

Lecture 51 - Source feedback biasing

Lecture 52 - Common source amplifier with source feedback bias

Lecture 53 - Constraints on capacitor values

Lecture 54 - Sensing at the drain and feeding back to the source

Lecture 55 - Sensing at the source and feeding back to the gate

Lecture 56 - Ensuring that transistor is in saturation

Lecture 57 - Using a resistor instead of current source for biasing

Lecture 58 - Controlled sources using a MOS transistor-Introduction

Lecture 59 - Voltage controlled voltage source

Lecture 60 - VCVS using a MOS transistor

Lecture 61 - VCVS using a MOS transistor - Small signal picture

Lecture 62 - VCVS using a MOS transistor - Complete circuit

Lecture 63 - Source follower: Effect of output conductance; Constraints on coupling capacitors

Lecture 64 - VCCS using a MOS transistor

Lecture 65 - VCCS using a MOS transistor: Small signal picture

Lecture 66 - VCCS using a MOS transistor: Complete circuit

Lecture 67 - VCCS using a MOS transistor: AC coupling the output

Lecture 68 - Source degenrated CS amplifier

Lecture 69 - CCCS using a MOS transistor

Lecture 70 - CCCS using a MOS transistor: Small signal picture

Lecture 71 - CCCS using a MOS transistor: Complete circuit

Lecture 72 - CCVS using a MOS transistor

Lecture 73 - CCVS using a MOS transistor: Gain

Lecture 74 - CCVS using a MOS transistor: Input and output resistances

Lecture 75 - CCVS using a MOS transistor: Complete circuit

Lecture 76 - VCVS using an opamp

Lecture 77 - CCVS using an opamp

Lecture 78 - Negative feedback and virtual short in an opamp

Lecture 79 - Negative feedback and virtual short in a transistor

Lecture 80 - Constraints on controlled sources using opamps and transistors

Lecture 81 - Quick tour of amplifying devices

Lecture 82 - Signal swing limits in amplifiers

Lecture 83 - Swing limit due to transistor entering triode region

Lecture 84 - Swing limit due to transistor entering cutoff region

Lecture 85 - Swing limit calculation example

Lecture 86 - Swing limits-more calculations

Lecture 87 - pMOS transistor

Lecture 88 - Small signal model of the pMOS transistor

Lecture 89 - Common source amplifier using the pMOS transistor

Lecture 90 - Swing limits of the pMOS common source amplifier

Lecture 91 - Biasing a pMOS transistor at a constant current; pMOS current mirror

Lecture 92 - Converting nMOS transistor circuits to pMOS

Lecture 93 - Bias current generation

Lecture 94 - Examples of more than one transistor in feedback

Lecture 95 - Gain limitation in a common source amplifier with resistive load

Lecture 96 - nMOS active load for pMOS common source amplifier

Lecture 97 - CMOS inverter

Lecture 98 - Large signal characteristics of pMOS CS amplifier with nMOS active load

Lecture 99 - Large signal characteristics of nMOS CS amplifier with pMOS active load

Lecture 100 - Large signal characteristics of a CMOS inverter

Lecture 101 - Active load amplifiers as digital gates

Lecture 102 - Sensitivity of output bias to input bias in a CMOS inverter

Lecture 103 - Self biasing a CMOS inverter

Lecture 104 - An application of self biased inverters

Lecture 105 - Current consumption of a self-biased inverter; Current biasing

Lecture 106 - Amplifying a difference signal; Differential pair

Lecture 107 - Differential pair-small signal basics

Lecture 108 - Biasing a differential pair

Lecture 109 - Differential pair with differential excitation

Lecture 110 - Differential pair with a current mirror load

Lecture 111 - Differential pair with a current mirror load - operating point

Lecture 112 - Differential pair with a current mirror load - Norton equivalent current

Lecture 113 - Differential pair with a current mirror load - Norton equivalent resistance

Lecture 114 - Common mode gain

Lecture 115 - Single stage opamp

Lecture 116 - Single stage opamp: Input common mode swing limits

Lecture 117 - Single stage opamp: Output swing limits

Lecture 118 - Which transistor type to use for the second stage?

Lecture 119 - Small signal gain

Lecture 120 - DC negative feedback biasing of all stages

Lecture 121 - DC negative feedback biasing of all stages (Continued...)

Lecture 122 - Small signal model

Lecture 123 - Swing limits

Lecture 124 - Systematic offset; How to eliminate it

Lecture 125 - Bipolar junction transistor(BJT): Large signal model

Lecture 126 - BJT model for calculating operating points

Lecture 127 - BJT small signal model

Lecture 128 - Biasing a BJT

Lecture 129 - Biasing a BJT, (Continued...)

Lecture 130 - Amplifiers using BJTs

Lecture 131 - PNP transistor

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Non Linear Dynamics (Electrical Engineering)

Lecture 29 - Intentional Electromagnetic Interference or IEMI - 2

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Mapping Signal Processing Algorithms to Architectures (Electrical Engineering)

Co-ordinators : Prof. Nitin Chandrachoodan

Lecture 1 - Introduction: Objectives and Pre-requisites

Lecture 2 - Review of digital logic

Lecture 3 - Timing and Power in digital circuits

Lecture 4 - Implementation Costs and Metrics

Lecture 5 - Example: Audio processing

Lecture 6 - Example: AlexNet

Lecture 7 - Architecture cost components

Lecture 8 - Examples of Architectures

Lecture 9 - Multi-objective Optimization

Lecture 10 - Number representation

Lecture 11 - Scientific notation and Floating point

Lecture 12 - Basic FIR filter

Lecture 13 - Serial FIR filter architectures

Lecture 14 - Simple programmable architecture

Lecture 15 - Block diagrams and SFGs

Lecture 16 - Dataflow Graphs

Lecture 17 - Iteration period

Lecture 18 - FIR filter iteration period

Lecture 19 - IIR filter iteration period

Lecture 20 - Computation Model

Lecture 21 - Constraint analysis for IPB computation

Lecture 22 - Motivational examples for IPB

Lecture 23 - General IPB computation

Lecture 24 - Sample period calculation

Lecture 25 - Parallel architecture

Lecture 26 - Odd-even register reuse

Lecture 27 - Power consumption

Lecture 28 - Pipelining

Lecture 29 - Time-invariant systems

Lecture 30 - Valid pipelining examples

Lecture 31 - Feedforward cutsets

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Balanced pipeline

Lecture 33 - Retiming basic concept

Lecture 34 - Retiming basic concept

Lecture 35 - Example and uses of retiming

Lecture 36 - Resource sharing: adder example

Lecture 37 - Changing iteration period

Lecture 38 - Hardware assumptions and constraint analysis

Lecture 39 - Mathematical formulation

Lecture 40 - Examples with formulation

Lecture 41 - Example: Biquad filter

Lecture 42 - Hardware architecture

Lecture 43 - Review biquad folding sets

Lecture 44 - Complete biquad hardware

Lecture 45 - DEMO: FFT in Vivado HLS

Lecture 46 - DEMO: FFT synthesis

Lecture 47 - Obtaining a folding schedule

Lecture 48 - ASAP schedule

Lecture 49 - Utilization Efficiency

Lecture 50 - ALAP schedule

Lecture 51 - Iteration period bound and scheduling

Lecture 52 - Retiming for scheduling

Lecture 53 - Blocked schedules

Lecture 54 - Overlapped schedules

Lecture 55 - Improved blocked schedule

Lecture 56 - Allocation, Binding and Scheduling

Lecture 57 - DEMO: Analyze FFT implementation

Lecture 58 - DEMO: FFT interface

Lecture 59 - Scheduling: problem formulation

Lecture 60 - Example: differential equation solver

Lecture 61 - Heuristic approaches to scheduling

Lecture 62 - Mathematical formulation

Lecture 63 - ILP formulation

Lecture 64 - List scheduling

Lecture 65 - Hardware model

Lecture 66 - Force Directed Scheduling

Lecture 67 - DEMO: HLS on FFT

Lecture 68 - DEMO: FFT Simulation and Optimization

Lecture 69 - DEMO: CPU interfacing

Lecture 70 - Software Compilation

Lecture 71 - Optimization Examples

Lecture 72 - Loop optimizations - 1

Lecture 73 - Loop optimizations - 2

Lecture 74 - Loop optimizations - 3

Lecture 75 - Software pipelining - 1

Lecture 76 - Software pipelining - 2

Lecture 77 - FFT Optimization

Lecture 78 - Demo: Vivado setup

Lecture 79 - Background: CPUs and FPGAs

Lecture 80 - Demo: Vivado HLS FFT IP Export

Lecture 81 - Demo: Vivado ILA and VIO on hardware

Lecture 82 - Demo: FFT on FPGA board

Lecture 83 - Demo: Simulating SoC and SDK

Lecture 84 - Background: Understanding ELF files

Lecture 85 - On-chip communication basics

Lecture 86 - Many-to-Many communication

Lecture 87 - AXI bus handshaking

Lecture 88 - AXI bus (Continued...)

Lecture 89 - Demo: Microblaze processor on FPGA

Lecture 90 - Demo: Performance counter AXI peripheral

Lecture 91 - Demo: HW accelerator for FPGA

Lecture 92 - DMA and arbitration

Lecture 93 - Network-on-chip basics

Lecture 94 - NoC - Topologies and metrics

Lecture 95 - NoC - Routing

Lecture 96 - NoC - Switching and flow control

Lecture 97 - Systolic Arrays - Background

Lecture 98 - Systolic Arrays - Examples

Lecture 99 - CORDIC algorithm

Lecture 100 - Parallel implementation of FIR filters

Lecture 101 - Unfolding Transformation

Lecture 102 - Lookahead Transformation

Lecture 103 - Introduction to GPUs and Matrix multiplication

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Linear System Theory (Electrical Engineering)

Co-ordinators : Prof. Ramakrishna Pasumarthi

Lecture 1 - Introduction to Linear Systems

Lecture 2 - System Models

Lecture 3 - System Models - Part 1

Lecture 4 - System Models - Part 2

Lecture 5 - General Representation

Lecture 6 - Sets, Functions and Fields

Lecture 7 - Linear Algebra - Vector Spaces and Metric Spaces

Lecture 8 - Linear Algebra - Span, Basis and Subspaces

Lecture 9 - Linear Algebra - Linear Maps and Matrices

Lecture 10 - Linear Algebra - Fundamental Subspaces and Rank-Nullity

Lecture 11 - Tutorial 1 on Linear Algebra

Lecture 12 - Linear Algebra - Change of Basis and Similarity Transformation

Lecture 13 - Linear Algebra - Invariant Subspaces, Eigen Values and Eigen Vectors

Lecture 14 - Linear Algebra - Diagonalization and Jordan Forms

Lecture 15 - Linear Algebra - Eigen Decomposition and Singular Value Decomposition

Lecture 16 - Tutorial 2 on Linear Algebra

Lecture 17 - Solutions to LTI Systems

Lecture 18 - State Transition Matrix for LTI systems

Lecture 19 - Forced Reponse of Continuous and Discrete LTI system

Lecture 20 - State Transition Matrix and Solutions to LTV systems

Lecture 21 - Equilibrium Points

Lecture 22 - Limit Cycles and Linearisation

Lecture 23 - Stability Analysis and Types of Stability

Lecture 24 - Lyapunov Stability

Lecture 25 - Stability of Discrete Time Systems

Lecture 27 - Controllability and Reachability

Lecture 28 - Controllability Matrix and Controllable Systems

Lecture 29 - Controllability Tests

Lecture 30 - Controllability of Discrete Time Systems

Lecture 31 - Controllable Decomposition

Lecture 32 - Stabilizability

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 33 - Observability

Lecture 34 - Gramians and Duality

Lecture 35 - Observability for Discrete Time Systems and Observability Tests

Lecture 36 - Observable Decompositon and Detectability

Lecture 37 - Kalman Decomposition and Minimal Realisation

Lecture 38 - Canonical Forms and State Feedback Control

Lecture 39 - Control Design using Pole Placement

Lecture 40 - Tutorial for Modules 9 and 10

Lecture 41 - State Estimation and Output Feedback

Lecture 42 - Design of Observer and Observer based Controller

Lecture 43 - Optimal Control and Linear Quadratic Regulator (LQR)

Lecture 44 - Feedback Invariant and Algebraic Ricatti Equation

Lecture 45 - Tutorial for Module 11

Lecture 46 - Linear Matrix Inequalities

Lecture 47 - Properties of LMIs and Delay LMIs

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Digital Signal Processing (Electrical Engineering)

Co-ordinators : C. S. Ramalingam

Lecture 1 - Signal Definition and Classification

Lecture 2 - Affine Transform

Lecture 3 - Recap of Affine Transform

Lecture 4 - Even and Odd Parts of a Signal

Lecture 5 - The Unit Step Sequence

Lecture 6 - The Unit Impulse

Lecture 7 - The Unit Impulse (Continued...)

Lecture 8 - Exponential Signals and Sinusoids

Lecture 9 - Sinusoids (Continued...)

Lecture 10 - When are two sinusoids independent?

Lecture 11 - Another Difference Between CT and DT Sinusoids

Lecture 12 - System definition and properties (linearity)

Lecture 13 - Time-invariance, memory, causality, and stability

Lecture 14 - LTI systems, impulse response, and convolution

Lecture 15 - Properties of convolution, system interconnections

Lecture 16 - Java applet demo of convolution

Lecture 17 - Systems governed by LCCDE

Lecture 18 - FIR and IIR systems

Lecture 19 - Karplus-Strong algorithm

Lecture 20 - Z-transform definition and RoC

Lecture 21 - Z-transform (Continued...)

Lecture 22 - Poles and zeros

Lecture 23 - Recursive implementation of FIR filters

Lecture 24 - Convergence criterion

Lecture 25 - Properties of the RoC

Lecture 26 - DTFT definition and absolute summability

Lecture 27 - Linearity

Lecture 28 - Delay

Lecture 29 - Exponential multiplication

Lecture 30 - Complex conjugation

Lecture 31 - Time reversal

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Differentiation in the Z-domain

Lecture 33 - Convolution in the time domain

Lecture 34 - Relationship between x[n] and X(1)

Lecture 35 - Initial Value Theorem

Lecture 36 - Final Value Theorem

Lecture 37 - Multiplication in the time domain

Lecture 38 - Parseval's Theorem

Lecture 39 - Partial Fractions Method

Lecture 40 - Power series method

Lecture 41 - Contour Integral Method

Lecture 42 - Contour Integral Method (Continued...)

Lecture 43 - Inverse DTFT

Lecture 44 - DTFT of Sequences that are not absolutely summable

Lecture 45 - Response to cos(?_0 n+?)

Lecture 46 - Causality and Stability

Lecture 47 - Response to suddenly applied inputs

Lecture 48 - Introduction to frequency response

Lecture 49 - Magnitude response and its geometric interpretation

Lecture 50 - Magnitude Response (Continued...)

Lecture 51 - Response of a single complex zero/pole

Lecture 52 - Resonator and Improved Resonator

Lecture 53 - Notch filter

Lecture 54 - Moving Average Filter

Lecture 55 - Comb filter

Lecture 56 - Phase response of a single complex zero

Lecture 57 - Effect of crossing a unit circle zero, wrapped and unwrapped phase, resonator phase response

Lecture 58 - Allpass Filter

Lecture 59 - Group delay and its physical interpretation

Lecture 60 - Zero-phase filtering, effect on nonlinear phase on waveshape

Lecture 61 - Zero-Phase Filtering, Linear Phase - 1

Lecture 62 - Linear Phase - 2

Lecture 63 - Linear Phase - 3

Lecture 64 - Linear Phase - 3

Lecture 65 - Linear Phase - 3

Lecture 66 - Linear Phase - 4, Sampling - 1

Lecture 67 - Linear Phase - 4, Sampling - 1

Lecture 68 - Linear Phase - 4, Sampling - 1

Lecture 69 - Sampling - 2

Lecture 70 - Sampling - 3

Lecture 71 - Sampling - 4

Lecture 72 - Sampling - 4

Lecture 73 - Sampling - 4

Lecture 74 - The Discrete Fourier Transform - 1

Lecture 75 - The Discrete Fourier Transform - 1

Lecture 76 - The Discrete Fourier Transform - 2

Lecture 77 - The Discrete Fourier Transform - 3

Lecture 78 - The Discrete Fourier Transform - 3

Lecture 79 - The Discrete Fourier Transform - 3

Lecture 80 - The Discrete Fourier Transform - 4

Lecture 81 - The Discrete Fourier Transform - 4

Lecture 82 - The Discrete Fourier Transform - 4

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Computational Electromagnetics (Electrical Engineering)

Co-ordinators : Prof. Uday Khankhoje

Lecture 1 - Chain rule of differentiation

Lecture 2 - Gradient, Divergence, and Curl operators

Lecture 3 - Common theorems in vector calculus

Lecture 4 - Corollaries of these theorems

Lecture 5 - Mathematical History

Lecture 6 - Different regimes of Maxwell's equations

Lecture 7 - Different ways of solving them

Lecture 8 - Maxwell's Equations

Lecture 9 - Boundary Conditions

Lecture 10 - Uniqueness Theorem

Lecture 11 - Equivalence Theorem

Lecture 12 - Simple Numerical Integration

Lecture 13 - Interpolating a Function

Lecture 14 - Gauss Quadrature

Lecture 15 - Line Charge Problem

Lecture 16 - Solving the Integral Equation

Lecture 17 - Basis Functions

Lecture 18 - Helmholtz Equation

Lecture 19 - Solving Helmholtz Equation

Lecture 20 - Huygen's principle and the Extinction theorem

Lecture 21 - Formulating the integral equations

Lecture 22 - Conclusions of surface integral equations

Lecture 23 - Motivations for Green's functions

Lecture 24 - A one-dimensional example

Lecture 25 - 1-D example: alternate representation

Lecture 26 - 2-D wave example : finding solution

Lecture 27 - 2-D wave example : boundary conds

Lecture 28 - 2-D example : Evaluating Constants - Part 1

Lecture 29 - 2-D example : Evaluating Constants - Part 2

Lecture 30 - 3-D example

Lecture 31 - Motivation for MoM

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Linear Vector Spaces

Lecture 33 - Formulating Method of Moments

Lecture 34 - Surface Integral Equations: Recap

Lecture 35 - Surface Integral Equations: Evaluating the Integrals - Part 1

Lecture 36 - Surface Integral Equations: Evaluating the Integrals - Part 2

Lecture 37 - Surface Integral Equations: Conclusion

Lecture 38 - Volume Integral Equations:Setting Up

Lecture 39 - Volume Integral Equations:Solving - Part 1

Lecture 40 - Volume Integral Equations:Solving - Part 2

Lecture 41 - Volume Integral Equations:Summary

Lecture 42 - Surface integral equations for PEC

Lecture 43 - Surface v/s volume integral equations

Lecture 44 - Definition of radar cross-section

Lecture 45 - Computational Considerations

Lecture 46 - History and Overview of the FEM

Lecture 47 - Basic framework of FEM

Lecture 48 - 1D Basis Functions

Lecture 49 - 2D Basis Functions

Lecture 50 - Weak form of 1D-FEM - Part 1

Lecture 51 - Weak form of 1D-FEM - Part 2

Lecture 52 - Generating System of Equations for 1D FEM

Lecture 53 - 1D wave equation: Formulation

Lecture 54 - 1D Wave Equation: Boundary Conditions

Lecture 55 - 1D Wave Equation: Basis and testing functions

Lecture 56 - 1D Wave Equation: Matrix assembly

Lecture 57 - 2D FEM Shape Functions

Lecture 58 - Converting to Weak Form (2D FEM)

Lecture 59 - Radiation Boundary Condition

Lecture 60 - Total field formulation

Lecture 61 - Scattered field formulation

Lecture 62 - Comparing total and scattered field formulation

Lecture 63 - Matrix assembly - Part 1

Lecture 64 - Matrix assembly - Part 2

Lecture 65 - Computing Far Field

Lecture 66 - Numerical Aspects of 2D FEM

Lecture 67 - Summary of FEM Procedure

Lecture 68 - Introduction to FDTD

Lecture 69 - 2D FDTD Formulation : Stencil

Lecture 70 - 2D FDTD Formulation : Time Stepping

Lecture 71 - 2D FDTD Formulation : Divergence Conditions

Lecture 72 - Stability Criteria - Part 1

Lecture 73 - Stability Criteria - Part 2

Lecture 74 - Stability Criteria - Higher Dimensions

Lecture 75 - Accuracy Considerations - 1D

Lecture 76 - Accuracy Considerations - Higher Dimensions

Lecture 77 - Dealing with non-dispersive dielectric media

Lecture 78 - Dealing with dispersive dielectric media

Lecture 79 - Debye Model - Part 1

Lecture 80 - Debye Model - Part 2

Lecture 81 - Absorbing Boundary Conditions - 1D

Lecture 82 - Absorbing Boundary Conditions - 2D

Lecture 83 - Implementing ABC in FDTD

Lecture 84 - Failure of ABC

Lecture 85 - Perfectly Matched Layers (PML) - Introduction

Lecture 86 - Implementing PML using Coordinate Stretching

Lecture 87 - PML - Phase Matching

Lecture 88 - PML - Tangential Boundary Conditions

Lecture 89 - Perfectly Matched Interface

Lecture 90 - PML theory - Summary

Lecture 91 - Implementing PML into FDTD - Part 1

Lecture 92 - Implementing PML into FDTD - Part 2

Lecture 93 - Sources in FDTD - Currents

Lecture 94 - Sources in FDTD - Part 2

Lecture 95 - Summary of FDTD

Lecture 96 - MEEP : FDTD in action

Lecture 97 - Inverse Problems - Introduction

Lecture 98 - Inverse Problems - Mathematical Formulation

Lecture 99 - Inverse Problems - Challenges

Lecture 100 - Inverse Problems - Non-Linearity

Lecture 101 - Inverse Problems - Summary

Lecture 102 - Antennas - Potential formulation

Lecture 103 - Antennas - Hertz Dipole - Part 1

Lecture 104 - Antennas - Hertz Dipole - Part 2

Lecture 105 - Antennas - Radiation Patterns

Lecture 106 - Antennas - Motivation for CEM

Lecture 107 - Antennas - Pocklingtonâ€™s Integral Equation - Part 1

Lecture 108 - Antennas - Pocklingtonâ€™s Integral Equation - Part 2

Lecture 109 - Antennas - Source Modeling

Lecture 110 - Antennas - Circuit Model

Lecture 111 - Antennas - MoM details

Lecture 112 - Antennas - Mutual Coupling - Part 1

Lecture 113 - Antennas - Mutual Coupling - Part 2

Lecture 114 - Hybrid Methods - Motivation

Lecture 115 - Finite Element-Boundary Integral - Part 1

Lecture 116 - Finite Element-Boundary Integral - Part 2

Lecture 117 - Finite Element-Boundary Integral - Part 3

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Transmission Lines and Electromagnetic Waves (Electrical Engineering)

Co-ordinators : Dr. Ananth Krishnan

Lecture 1 - Transmission lines

Lecture 2 - LosslessTransmission lines: Wave Equations

Lecture 3 - Introduction to finite difference method

Lecture 4 - Octave simulation of wave equation

Lecture 5 - Octave simulation of Telegrapher's equation

Lecture 6 - Reflections and reflection coefficient

Lecture 7 - AC signals in loss-less transmission lines

Lecture 8 - Transmission lines with losses

Lecture 9 - Octave simulation of Transmission lines with losses

Lecture 10 - Voltage reflection coefficient and standing wave ratio

Lecture 11 - Graphical representation of reflection coefficient

Lecture 12 - Impedance matching using Smith chart

Lecture 13 - Demonstration of Impedance matching using VNA

Lecture 14 - Transmission Line Limitations and Maxwell's Equation

Lecture 15 - Maxwell's Curl Equation

Lecture 16 - Octave simulation of an Electromagnetic Wave Equation

Lecture 17 - Polarisation of an Electromagnetic Wave

Lecture 18 - Octave Simulation of different types of Polarisation

Lecture 19 - Electromagnetic Waves in a conductive Medium

Lecture 20 - Plane Waves

Lecture 21 - Plane Waves at normal incidence

Lecture 22 - Plane waves at Oblique Incidence - I

Lecture 23 - Plane waves at Oblique Incidence - II

Lecture 24 - Plane waves at Oblique Incidence - III

Lecture 25 - Octave simulation of perpendicular polarisation

Lecture 26 - Octave simulation of perpendicular polarisation (Continued...)

Lecture 27 - Dielectric-ideal conductor interface

Lecture 28 - Parallel plate waveguide

Lecture 29 - Rectangular Waveguide

Lecture 30 - Octave simulation of modes of a Rectangular Waveguide

Lecture 31 - Phase Velocity and Group velocity

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Octave simulation of Field pattern of a parellel plate waveguide

Lecture 33 - Cavity resonatorand Real life applications of waveguides and cavity

NPTEL : NOC:Digital IC Design (Electrical Engineering)

Co-ordinators : Prof. Janakiraman

Lecture 1 - Introduction - Digital IC Design

Lecture 2 - PN Junction

Lecture 3 - MOS Capacitor Threshold Voltage

Lecture 4 - MOS Transistor Current Expression

Lecture 5 - Body Effect and I-V Plots

Lecture 6 - Short Channel Transistors - Channel Length Modulation

Lecture 7 - Velocity Saturation and Level-1 SPICE Model

Lecture 8 - Drain Induced Barrier Lowering

Lecture 9 - Sub-Threshold Leakage

Lecture 10 - Substrate and Gate Leakage

Lecture 11 - The PMOS Transistor

Lecture 12 - Transistor Capacitance - 1

Lecture 13 - Transistor Capacitance - 2

Lecture 14 - CMOS Inverter Construction

Lecture 15 - Voltage Transfer Characteristics

Lecture 16 - Load Line Analysis

Lecture 17 - Trip Point for Short Channel Device Inverter

Lecture 18 - Trip Point for Long Channel Device Inverter

Lecture 19 - Noise Margin Analysis - 1

Lecture 20 - Noise Margin Analysis - 2

Lecture 21 - Noise Margin Analysis - 3

Lecture 22 - Noise Margin Analysis-Long Channel Device Inverter - 1

Lecture 23 - Noise Margin Analysis-Long Channel Device Inverter - 2

Lecture 24 - Pass Transistors

Lecture 25 - NMOS Transistor ON Resistance and Fall Delay

Lecture 26 - Elmore Delay Model

Lecture 27 - Inverter: Transient Response

Lecture 28 - Inverter: Dynamic Power

Lecture 29 - Inverter: Short Circuit Power

Lecture 30 - Inverter: Leakage Power and Transistor Stacks

Lecture 31 - Stacking Effect and Sleep Transistors

Lecture 32 - Ring Oscillators and Process Variations

Lecture 33 - Implementing Any Boolean Logic Function

Lecture 34 - Implementing Any Boolean Logic Function: Examples. Gate sizing

Lecture 35 - Gate Sizing

Lecture 36 - Logic Gate Capacitance

Lecture 37 - Gate Delay

Lecture 38 - Parasitic Delay

Lecture 39 - Gate Delay with a Load Capacitance

Lecture 40 - Logical Effort

Lecture 41 - Gate Delay

Lecture 42 - Path Delay Calculation and Optimization Formulation

Lecture 43 - Path Delay Optimization: Intuition

Lecture 44 - Path Delay Optimization: Example

Lecture 45 - Buffer Insertion

Lecture 46 - Input Ordering and Asymmetric Gates

Lecture 47 - Skewed Gates

Lecture 48 - Special Functions

Lecture 49 - Pseudo NMOS Logic

Lecture 50 - Pseudo NMOS Inverter

Lecture 51 - Pseudo NMOS Logical Effort and CVSL

Lecture 52 - Dynamic Circuits and Input Monotonicity

Lecture 53 - Domino Logic and Weak Keepers

Lecture 54 - Transmission Gate Logic

Lecture 55 - Gate Sizing for Large Circuits

Lecture 56 - Ripple Adder Introduction

Lecture 57 - Full Adder Circuit Implementation

Lecture 58 - Full Adder Optimization

Lecture 59 - Carry Skip Adder

Lecture 60 - Carry Select Adder

Lecture 61 - Linear and Square Root Carry Select Adder

Lecture 62 - Two's Complement Arithmetic

Lecture 63 - Two's Complement Sign Extension

Lecture 64 - Array Multiplier

Lecture 65 - Array Multiplier - Timing Analysis

Lecture 66 - Carry Save Multiplier

Lecture 67 - Carry Save Multiplier - Signed Multiplication

Lecture 68 - Introduction to Pipelining

Lecture 69 - Time Borrowing

Lecture 70 - Master Slave Flip Flop

Lecture 71 - Flop Timing Parameters

Lecture 72 - Alternate Circuit Implementations

Lecture 73 - Clock Overlap

Lecture 74 - C2MOS Flop

Lecture 75 - Flop Characterization

Lecture 76 - Max and Min Delay of Flop Based Systems

Lecture 77 - Flop Min Delay Constraint

Lecture 78 - Latch - Max and Min Delay Constraints

Lecture 79 - Latch - Timing Analysis with Skew

Lecture 80 - Time Borrowing

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Power Management Integrated Circuits (Electrical Engineering)

Co-ordinators : Prof. Qadeer Ahmad Khan

Lecture 1 - Introduction to PMIC - Part 1

Lecture 2 - Introduction to PMIC - Part 2

Lecture 3 - Linear versus Switching Regulators

Lecture 4 - Performance Parameters of Regulators

Lecture 5 - Local vs Remote Feedback, Point of Load Regulators

Lecture 6 - Kelvin Sensing, Droop Compensation

Lecture 7 - Current Regulator Applications, Introduction to Bandgap Voltage References, PTAT and CTAT voltage

Lecture 8 - Adding PTAT and CTAT Voltages

Lecture 9 - Bandgap Voltage Reference Circuit, Brokaw Bandgap Circuit

Lecture 10 - Sub-1-volt Bandgap Circuit

Lecture 11 - Generating Multiple Reference Voltages; Applications of Linear Regulators

Lecture 12 - Designing a Linear Regulator, Negative and Positive Feedback

Lecture 13 - First-Order Systems, Phase Margin

Lecture 14 - Closed-Loop Response of Second-Order Systems

Lecture 15 - Relationship between Damping Factor and Phase Margin, Frequency Compensation, MOS Parasitic Capacitances

Lecture 16 - Finding the Poles of the Error Amplifier - Part 1

Lecture 17 - Finding the Poles of the Error Amplifier - Part 2

Lecture 18 - Dominant Pole Frequency Compensation

Lecture 19 - Dominant Pole Compensation at No-Load

Lecture 20 - Dominant Pole Compensation using Miller Effect, RHP zero due to Miller Capacitor

Lecture 21 - Intuitive Method of Finding the Poles, Pole Splitting after Miller Compensation

Lecture 22 - Effect of RHP zero on Stability, Mitigating the Effect of RHP zero, LDO with NMOS Pass Element

Lecture 23 - Output Impedance of PMOS LDO

Lecture 24 - Line Regulation and PSRR of PMOS LDO

Lecture 25 - PSRR of PMOS versus PSRR of NMOS LDO

Lecture 26 - Sources of Error in Linear and Switching Regulators

Lecture 27 - Offset in Amplifiers; Real Life Analogy; Static Offset Cancellation

Lecture 28 - Dynamic Offset Cancellation Techniques (Chopping, Auto-zeroing)

Lecture 29 - Digital LDO, Technique to Avoid Limit Cycle Oscillations in Digital LDO

Lecture 30 - Hybrid LDO, Short-Circuit Protection

Lecture 31 - Hiccup Mode and Foldback Current Limit

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Introduction to Switching Regulators

Lecture 33 - volt-second Balance, Non-Idealities in the Power Stage of a Buck Converter

Lecture 34 - Transformer Model of a Buck Converter, Conduction Efficiency, Efficiency of an LDO versus Efficiency of a Switching Regulator

Lecture 35 - Synchronous versus Non-Synchronous Switching Regulators, PWM Control Techniques

Lecture 36 - Losses in Switching Regulators (Conduction Loss, Gate-Driver Switching Loss)

Lecture 37 - Dead-Time Switching Loss in DC-DC Converters

Lecture 38 - Hard Switching Loss in DC DC Converters

Lecture 39 - Magnetic Loss in DC-DC Converters, Relative Significance of Losses as a Function of the Load Current

Lecture 40 - Output Voltage Ripple of a Buck Converter

Lecture 41 - Choosing the Inductor and Capacitor for a Buck Converter

Lecture 42 - CCM Vs DCM Operation in DC DC Converters

Lecture 43 - CCM DCM Boundary Condition, Voltage Conversion Ratio in DCM

Lecture 44 - Concept of Pulse Frequency Modulation PFM

Lecture 45 - Classification of Pulse Width Modulators

Lecture 46 - DC - DC Converter Control Techniques, Stability Analysis of Voltage Mode Buck Converter - Part 1

Lecture 47 - Stability Analysis of Voltage Mode Buck Converter - Part 2

Lecture 48 - Stability Analysis of Voltage Mode Buck Converter - Part 3

Lecture 49 - Dominant Pole Compensation (Type-I with Gm-C Architecture)

Lecture 50 - Dominant Pole Compensation (Type-I with Op Amp-RC Architecture)

Lecture 51 - Introduction to Type-II Compensation

Lecture 52 - Type-II Compensator using Gm-C Architecture - Part 1

Lecture 53 - Type-II Compensator using Gm-C Architecture - Part 2

Lecture 54 - Type-II Compensator using Gm-C Architecture - Part 3

Lecture 55 - Type-II Compensator using Op Amp-RC Architecture

Lecture 56 - Introduction to Type-III Compensator

Lecture 57 - Type-III Compensator using Op Amp-RC Architecture

Lecture 58 - Simulation of DC-DC Converter with Type-III Compensator

Lecture 59 - Type-III Compensator using Gm-C Architecture

Lecture 60 - Feed-Forward Line Compensation, Loop Gain Compensation by Modulating Gm

Lecture 61 - Designing a Buck Converter, Power Loss Budgeting

Lecture 62 - Sizing Power MOSFETs

Lecture 63 - Estimating Switching Losses and Choosing the Switching Frequency

Lecture 64 - Choosing Inductance and Capacitance Values

Lecture 65 - Choosing 'C' Depending on Factors that Limit the Load Transient Response

Lecture 66 - Inductor and Capacitor Characteristics, Reducing the Effect of Capacitor ESL

Lecture 67 - Gate Buffer and Non-Overlap Clock Generator in Gate-Driver Circuit

Lecture 68 - Pulse-Width Modulator- Trailing Edge, Leading Edge and Dual Edge; Triangle Wave Generator

Lecture 69 - Average Ramp Voltage of Single-Edge PW Modulator,Design Considerations of EA

Lecture 70 - Delays Associated with PW Modulator, PFM and PSM Operation, DCM Operation using NMOS

Lecture 71 - Designing a Zero-Cross Comparator, Inverter-Based Auto-Zeroed Comparator, Simulation Demo

Lecture 72 - Current Mode Control- Peak, Valley, Emulated; VMC versus CMC; Sub-Harmonic Oscillation

Lecture 73 - Ramp-Adaptive Slope Compensation to Avoid Current Loop Instability

Lecture 74 - Non-Linear Control of DC-DC Converters, Phase-Shift between i_L and v_C

Lecture 75 - Stabilising a Voltage-Mode Hysteretic Converter using R_esr, Relation between F_sw and the Hysteresis Window

Lecture 76 - Hysteretic Converter - Simulation Demo

Lecture 77 - Current-Mode Hysteretic Converter, Using R-C as Ripple Generator

Lecture 78 - Controlling the Switching Frequency of a Hysteretic Converter, Delay in the Hysteretic Comparator

Lecture 79 - Frequency and Voltage Regulation Loops in a Fixed-Frequency Hysteretic Converter

Lecture 80 - Resetting the Capacitor Voltage in a Hysteretic Converter, Constant ON-Time Control

Lecture 81 - Introduction to Boost Converter, RHP Zero in a Boost Converter

Lecture 82 - Introduction to Buck-Boost Converter

Lecture 83 - Tri-Mode Buck-Boost Converter (Buck, Buck-Boost and Boost)

Lecture 84 - Boundary Conditions for Mode Transition in a Tri-Mode Buck-Boost Converter

Lecture 85 - Generating Buck and Boost Duty Cycles in a Tri-Mode Buck-Boost Converter

Lecture 86 - Introduction to Switched-Capacitor DC-DC Converters,Switched-Capacitor DC-DC Converter with V_o = 2*V_DD

Lecture 87 - Applications of Switched-Capacitor DC-DC Converters in Open-Loop, Regulating the Output using Feedback Control

Lecture 88 - H-Bridge Switched-Capacitor DC-DC Converter,SC DC-DC converter with Multiple Gain Settings

Lecture 89 - Current Sensing Techniques in DC-DC Converters

Lecture 90 - Analog Layout Techniques - Part 1

Lecture 91 - Analog Layout Techniques - Part 2

Lecture 92 - Digital Control of DC-DC Converters, ADC Architectures

Lecture 93 - Digital Pulse-Width Modulator Architectures, Adaptive Compensation

Lecture 94 - Limitations of Analog and Digital Controllers, Time-Based Controller for Buck Converter

Lecture 95 - Time-Based Controller for Buck Converter and for LDO, Issues with Time-Based Control

Lecture 96 - Multi-Phase DC-DC Converters

Lecture 97 - Dynamic Voltage and Frequency Scaling, Single Inductor Multiple Output (SIMO) DC-DC Converter

Lecture 98 - LCD/AMOLED Display Drivers - Part 1

Lecture 99 - LCD/AMOLED Display Drivers - Part 2

Lecture 100 - LCD/AMOLED Display Drivers - Part 3

Lecture 101 - LED Drivers for Camera Flash

Lecture 102 - Li-Ion Battery and its Charging Phases

Lecture 103 - Battery Charger IC

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:DC Power Transmission Systems (Electrical Engineering)

Co-ordinators : Prof. Krishna S

Lecture 1 - Course contents

Lecture 2 - Introduction

Lecture 3 - Historical developments

Lecture 4 - Power semiconductor devices

Lecture 5 - General converter configuration

Lecture 6 - Choice of converter configuration: Valve utilization factor

Lecture 7 - Choice of converter configuration: Transformer utilization factor

Lecture 8 - Converter configuration for pulse number equal to 6

Lecture 9 - Analysis of 6 pulse LCC neglecting inductance

Lecture 10 - Analysis of 6 pulse LCC neglecting inductance: Jumps in voltage across a valve

Lecture 11 - Analysis of 6 pulse LCC neglecting inductance: Average DC side voltage

Lecture 12 - Fourier series - Part 1

Lecture 13 - Fourier series - Part 2

Lecture 14 - Analysis of 6 pulse LCC neglecting inductance: DC side voltage harmonics

Lecture 15 - Analysis of 6 pulse LCC neglecting inductance: Fundamental and harmonic components of AC side current

Lecture 16 - Definitions: Delay angle, angle of advance, commutation margin angle

Lecture 17 - Commutation margin angle in a 6 pulse LCC neglecting inductance - Part 1

Lecture 18 - Commutation margin angle in a 6 pulse LCC neglecting inductance - Part 2

Lecture 19 - Instantaneous power on AC and DC sides in a 6 pulse LCC neglecting inductance

Lecture 20 - Average power on AC and DC sides in a 6 pulse LCC neglecting inductance

Lecture 21 - 6 pulse LCC with inductance

Lecture 22 - 2 and 3 valve conduction mode of 6 pulse LCC

Lecture 23 - 2 and 3 valve conduction mode of 6 pulse LCC: DC side voltage harmonics

Lecture 24 - 2 and 3 valve conduction mode of 6 pulse LCC: DC side voltage and voltage across a valve

Lecture 25 - 2 and 3 valve conduction mode of 6 pulse LCC: Fundamental and harmonic components of AC side current

Lecture 26 - Extinction angle

Lecture 27 - Extinction angle: Commutation margin angle for normal inverter operation of 6 pulse LCC

Lecture 28 - 3 and 4 valve conduction mode of 6 pulse LCC

Lecture 29 - Analysis of 3 and 4 valve conduction mode of 6 pulse LCC - Part 1

Lecture 30 - Analysis of 3 and 4 valve conduction mode of 6 pulse LCC - Part 2

Lecture 31 - Analysis of 3 and 4 valve conduction mode of 6 pulse LCC - Part 3

Lecture 32 - Fundamentals of Battery Pack Design

Lecture 33 - Mechanical Design - Part 1

Lecture 34 - Mechanical Design - Part 2

Lecture 35 - Mechanical Design - Part 3

Lecture 36 - Mechanical Design - Part 4

Lecture 37 - Thermal Design - Part 1

Lecture 38 - Thermal Design - Part 2

Lecture 39 - Thermal Design - Part 3

Lecture 40 - Thermal Design - Part 4

Lecture 41 - Electrical Design - Part 1

Lecture 42 - Electrical Design - Part 2

Lecture 43 - Electrical Design - Part 3

Lecture 44 - BMS Design of Electic Vehicle - Part 1

Lecture 45 - BMS Design of Electic Vehicle - Part 2

Lecture 46 - BMS Design of Electic Vehicle - Part 3

Lecture 47 - EV Motors and Controllers - Understanding Flow - Part 1

Lecture 48 - EV Motors and Controllers - Understanding Flow - Part 2

Lecture 49 - Power and Efficiency

Lecture 50 - Torque Production - Part 1

Lecture 51 - Torque Production - Part 2

Lecture 52 - Torque Production - Part 3

Lecture 53 - Speed and Back EMF

Lecture 54 - The d-q Equivalent circuit - Part 1

Lecture 55 - The d-q Equivalent circuit - Part 2

Lecture 56 - Field-oriented Control

Lecture 57 - Three phase AC - Part 1

Lecture 58 - Three phase AC - Part 2

Lecture 59 - Thermal Design - Part 1

Lecture 60 - Thermal Design - Part 2

Lecture 61 - Engineering Considerations - Part 1

Lecture 62 - Engineering Considerations - Part 2

Lecture 63 - Future Frontiers

Lecture 64 - EV Chargers: Introduction

Lecture 65 - EV Chargers: Slow or Fast - Part 1

Lecture 66 - EV Chargers: Slow or Fast - Part 2

Lecture 67 - Battery Swapping

Lecture 68 - Standardization and On board Chargers

Lecture 69 - Public Chargers - Part 1

Lecture 70 - Public Chargers - Part 2

Lecture 71 - Bulk Chargers/Swap Stations - Part 1

Lecture 72 - Bulk Chargers/Swap Stations - Part 2

Lecture 73 - Economics of Public Chargers in context

Lecture 74 - Analytics - Part 1

Lecture 75 - Analytics - Part 2

Lecture 76 - Course Summary

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Applied Linear Algebra (Electrical Engineering)

Co-ordinators : Prof. Andrew Thangaraj

Lecture 1 - Introduction to the Course

Lecture 2 - Vector Spaces: Introduction

Lecture 3 - Linear Combinations and Span

Lecture 4 - Subspaces, Linear Dependence and Independence

Lecture 5 - Basis and Dimension

Lecture 6 - Sums, Direct Sums and Gaussian Elimination

Lecture 7 - Linear Maps and Matrices

Lecture 8 - Null space, Range, Fundamental theorem of linear maps

Lecture 9 - Column space, null space and rank of a matrix

Lecture 10 - Algebraic operations on linear maps

Lecture 11 - Invertible maps, Isomorphism, Operators

Lecture 12 - Solving Linear Equations

Lecture 13 - Elementary Row Operations

Lecture 14 - Translates of a subspace, Quotient Spaces

Lecture 15 - Row space and rank of a matrix

Lecture 16 - Determinants

Lecture 17 - Coordinates and linear maps under a change of basis

Lecture 18 - Simplifying matrices of linear maps by choice of basis

Lecture 19 - Polynomials and Roots

Lecture 20 - Invariant subspaces, Eigenvalues, Eigenvectors

Lecture 21 - More on Eigenvalues, Eigenvectors, Diagonalization

Lecture 22 - Eigenvalues, Eigenvectors and Upper Triangularization

Lecture 23 - Properties of Eigenvalues

Lecture 24 - Linear state space equations and system stability

Lecture 25 - Discrete-time Linear Systems and Discrete Fourier Transforms

Lecture 26 - Sequences and counting paths in graphs

Lecture 27 - PageRank Algorithm

Lecture 28 - Dot product and length in Cn, Inner product and norm in V over F

Lecture 29 - Orthonormal basis and Gram-Schmidt orthogonalisation

Lecture 30 - Linear Functionals, Orthogonal Complements

Lecture 31 - Orthogonal Projection

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Projection and distance from a subspace

Lecture 33 - Linear equations, Least squares solutions and Linear regression

Lecture 34 - Minimum Mean Squared Error Estimation

Lecture 35 - Adjoint of a linear map

Lecture 36 - Properties of Adjoint of a Linear Map

Lecture 37 - Adjoint of an Operator and Operator-Adjoint Product

Lecture 38 - Self-adjoint Operator

Lecture 39 - Normal Operators

Lecture 40 - Complex Spectral Theorem

Lecture 41 - Real Spectral Theorem

Lecture 42 - Positive Operators

Lecture 43 - Quadratic Forms, Matrix Norms and Optimization

Lecture 44 - Isometries

Lecture 45 - Classification of Operators

Lecture 46 - Singular Values and Vectors of a Linear Map

Lecture 47 - Singular Value Decomposition

Lecture 48 - Polar decomposition and some applications of SVD

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Basic Electrical Circuits (Electrical Engineering)

Co-ordinators : Dr. Nagendra Krishnapura

Lecture 1 - Preliminaries

Lecture 2 - Current

Lecture 3 - Voltage

Lecture 4 - Electrical elements and circuits

Lecture 5 - Kirchhoff's current law (KCL)

Lecture 6 - Kirchhoff's voltage law (KVL)

Lecture 7 - Voltage source

Lecture 8 - Current source

Lecture 9 - Resistor

Lecture 10 - Capacitor

Lecture 11 - Inductor

Lecture 12 - Mutual inductor

Lecture 13 - Linearity of elements

Lecture 14 - Series connection-Voltage sources in series

Lecture 15 - Series connection of R, L, C, current source

Lecture 16 - Elements in parallel

Lecture 17 - Current source in series with an element; Voltage source in parallel with an element

Lecture 18 - Extreme cases: Open and short circuits

Lecture 19 - Summary

Lecture 20 - Voltage controlled voltage source (VCVS)

Lecture 21 - Voltage controlled current source (VCCS)

Lecture 22 - Current controlled voltage source (CCVS)

Lecture 23 - Current controlled current source (CCCS)

Lecture 24 - Realizing a resistance using a VCCS or CCCS

Lecture 25 - Scaling an element's value using controlled sources

Lecture 26 - Example calculation

Lecture 27 - Power and energy absorbed by electrical elements

Lecture 28 - Power and energy in a resistor

Lecture 29 - Power and energy in a capacitor

Lecture 30 - Power and energy in an inductor

Lecture 31 - Power and energy in a voltage source

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Power and energy in a current source

Lecture 33 - Goals of circuit analysis

Lecture 34 - Number of independent KCL equations

Lecture 35 - Number of independent KVL equations and branch relationships

Lecture 36 - Analysis of circuits with a single independent source

Lecture 37 - Analysis of circuits with multiple independent sources using superposition

Lecture 38 - Superposition: Example

Lecture 39 - What is nodal analysis

Lecture 40 - Setting up nodal analysis equations

Lecture 41 - Structure of the conductance matrix

Lecture 42 - How do elements circuit appear in the nodal analysis formulation

Lecture 43 - Completely solving the circuit starting from nodal analysis

Lecture 44 - Nodal analysis example

Lecture 45 - Matrix inversion basics

Lecture 46 - Nodal analysis with independent voltage sources

Lecture 47 - Supernode for nodal analysis with independent voltage sources

Lecture 48 - Nodal analysis with VCCS

Lecture 49 - Nodal analysis with VCVS

Lecture 50 - Nodal analysis with CCVS

Lecture 51 - Nodal analysis with CCCS

Lecture 52 - Nodal analysis summary

Lecture 53 - Planar circuits

Lecture 54 - Mesh currents and their relationship to branch currents

Lecture 55 - Mesh analysis

Lecture 56 - Mesh analysis with independent current sources-Supermesh

Lecture 57 - Mesh analysis with current controlled voltage sources

Lecture 58 - Mesh analysis with current controlled current sources

Lecture 59 - Mesh analysis using voltage controlled sources

Lecture 60 - Nodal analysis versus Mesh analysis

Lecture 61 - Superposition theorem

Lecture 62 - Pushing a voltage source through a node

Lecture 63 - Splitting a current source

Lecture 64 - Substitution theorem: Current source

Lecture 65 - Substitution theorem: Voltage source

Lecture 66 - Substituting a voltage or current source with a resistor

Lecture 67 - Extensions to Superposition and Substitution theorem

Lecture 68 - Thevenin's theorem

Lecture 69 - Worked out example: Thevenin's theorem

Lecture 70 - Norton's theorem

Lecture 71 - Worked out example: Norton's theorem

Lecture 72 - Maximum power transfer theorem

Lecture 73 - Preliminaries

Lecture 74 - Two port parameters

Lecture 75 - y parameters

Lecture 76 - y parameters: Examples

Lecture 77 - z parameters

Lecture 78 - z parameters: Examples

Lecture 79 - h parameters

Lecture 80 - h parameters: Examples

Lecture 81 - g parameters

Lecture 82 - g parameters: Examples

Lecture 83 - Calculations with a two-port element

Lecture 84 - Calculations with a two-port element

Lecture 85 - Degenerate cases

Lecture 86 - Relationships between different two-port parameters

Lecture 87 - Equivalent circuit representation of two-ports

Lecture 88 - Reciprocity

Lecture 89 - Proof of reciprocity of resistive two-ports

Lecture 90 - Proof for 4-terminal two-ports

Lecture 91 - Reciprocity in terms of different two-port parameters

Lecture 92 - Reciprocity in circuits containing controlled sources

Lecture 93 - Examples

Lecture 94 - Feedback amplifier using an opamp

Lecture 95 - Ideal opamp

Lecture 96 - Negative feedback around the opamp

Lecture 97 - Finding opamp sign for negative feedback

Lecture 98 - Example: Determining opamp sign for negative feedback

Lecture 99 - Analysis of circuits with opamps

Lecture 100 - More on opamps: Example circuits and additional topics

Lecture 101 - Inverting amplifier

Lecture 102 - Summing amplifier

Lecture 103 - Instrumentation amplifier

Lecture 104 - Negative resistance

Lecture 105 - Finding opamp signs for negative feedback-circuits with multiple opamps

Lecture 106 - Opamp supply voltages and saturation

Lecture 107 - KCL with an opamp and supply currents

Lecture 108 - Circuits with storage elements (capacitors and inductors)

Lecture 109 - First order circuit with zero input-natural response

Lecture 110 - First order RC circuit with zero input-Example

Lecture 111 - First order circuit with a constant input

Lecture 112 - General form of the first order circuit response

Lecture 113 - First order RC circuit with a constant input-Example

Lecture 114 - First order circuit with piecewise constant input

Lecture 115 - First order circuit with piecewise constant input-Example

Lecture 116 - First order circuit-Response of arbitrary circuit variables

Lecture 117 - Summary: Computing first order circuit response

Lecture 118 - Does a capacitor block DC?

Lecture 119 - Finding the order of a circuit

Lecture 120 - First order RC circuits with discontinuous capacitor voltages

Lecture 121 - Summary: Computing first order circuit response with discontinuities

Lecture 122 - First order RL circuits

Lecture 123 - First order RL circuit with discontinuous inductor current-Example

Lecture 124 - First order RC circuit with an exponential input

Lecture 125 - First order RC response to its own natural response

Lecture 126 - First order RC response to a sinusoidal input

Lecture 127 - First order RC response to a sinusoidal input-via the complex exponential

Lecture 128 - Summary: Linear circuit response to sinusoidal input via the complex exponential

Lecture 129 - Three methods of calculating the sinusoidal steady state response

Lecture 130 - Calculating the total response including initial conditions

Lecture 131 - Why are sinusoids used in measurement?

Lecture 132 - Second order system natural response

Lecture 133 - Second order system as a cascade of two first order systems

Lecture 134 - Second order system natural response-critically damped and underdamped

Lecture 135 - Generalized form of a second order system

Lecture 136 - Numerical example

Lecture 137 - Series and parallel RLC circuits

Lecture 138 - Forced response of a second order system

Lecture 139 - Steady state response calculation and Phasors

Lecture 140 - Phasors (Continued...)

Lecture 141 - Magnitude and Phase plots

Lecture 142 - Magnitude and phase plotes of a second order system

Lecture 143 - Maximum power transfer and Conjugate matching

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 28 - Integrated Optical Components: Distributed Bragg Reflector (DBR)

Lecture 29 - Integrated Optical Components: Distributed Bragg Reflector (DBR): Device Design - Part 1

Lecture 30 - Integrated Optical Components: Distributed Bragg Reflector (DBR): Device Design - Part 2

Lecture 31 - Tunable Devices and Reconfigurable Circuits: Phase Error Interference

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Tunable Devices and Reconfigurable Circuits: Post Fabrication Phase Error Corrections

Lecture 33 - Tunable Devices and Reconfigurable Circuits: Thermo-Optic Switching and Tuning

Lecture 34 - Tunable Devices and Reconfigurable Circuits: Programmable Silicon Photonics

Lecture 35 - Electro-Optic Modulators for Integrated Photonics: Basic Design and Working Principle

Lecture 36 - Electro-Optic Modulators for Integrated Photonics: Various Physical Mechanisms

Lecture 37 - Electro-Optic Modulators for Integrated Photonics: FCCE Based Silicon Photonics Modulator

Lecture 38 - Light Sources and Photodetectors for Integrated Photonics: Integrated Photonic light Sources - Part 1

Lecture 39 - Light Sources and Photodetectors for Integrated Photonics: Integrated Photonic light Sources - Part 2

Lecture 40 - Light Sources and Photodetectors for Integrated Photonics: Photodetectors for Silicon Photonics

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Semiconductor Devices (Electrical Engineering)

Co-ordinators : Prof. Naresh Kumar Emani

Lecture 1 - Types of Semiconductors

Lecture 2 - Classical Vs Quantum Mechanics

Lecture 3 - Electrons in infinite and finite 1D potential well

Lecture 4 - 3D potential well model of atom and Bohr's model

Lecture 5 - Covalent bonds and inter-atomic interactions in Silicon

Lecture 6 - Energy band formation

Lecture 7 - Electron hole pair generation

Lecture 8 - Direct and Indirect bandgap semiconductors

Lecture 9 - Energy levels in infinite and finite potential wells (short demo)

Lecture 10 - Effective mass in Semiconductors

Lecture 11 - Intrinsic carrier density

Lecture 12 - Doping and extrinsic semiconductors

Lecture 13 - Fermi level in extrinsic semiconductors

Lecture 14 - Temperature dependence of Fermi level

Lecture 15 - Temperature dependence of Fermi level

Lecture 16 - Charge neutrality relationship

Lecture 17 - Drift current and energy band representation of kinetic energy of carriers

Lecture 18 - Semiconductor bands in a electric field

Lecture 19 - Diffusion current

Lecture 20 - Non-uniform doping

Lecture 21 - Equilibrium Vs Nonequilibrium carrier response

Lecture 22 - Minority carrier diffusion equation (MCDE) - Example problems

Lecture 23 - Quasi Fermi level in nonequilibrium conditions

Lecture 24 - Quasi Fermi level and minority carrier diffusion length

Lecture 25 - Semiconductor device fabrication

Lecture 26 - PN Junctions - An introduction

Lecture 27 - PN Junction electrostatics

Lecture 28 - Energy band diagram of PN junction

Lecture 29 - Depletion width and peak electric field

Lecture 30 - PN junction electrostatics - examples

Lecture 31 - Demo of PN Junction Lab on Nanohub

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Forward and reverse biased PN junctions

Lecture 33 - Minority carrier injection in PN junctions

Lecture 34 - Current in forward biased PN junction

Lecture 35 - Current in reverse biased PN junction

Lecture 36 - Depletion capacitance in PN junction

Lecture 37 - Non-idealities in PN junction diode

Lecture 38 - Nanohub Demo - PN Junction with applied bias

Lecture 39 - Schottky barrier in metal-semiconductor junction

Lecture 40 - Current flow across a Schottky barrier

Lecture 41 - Ohmic vs rectifying contacts

Lecture 42 - An Ideal MOS Capacitor

Lecture 43 - Operating regimes of a MOSCAP

Lecture 44 - Simplified band diagrams of accumulation and depletion in MOSCAP

Lecture 45 - Inversion in a MOSCAP

Lecture 46 - NMOSCAP in accumulation mode

Lecture 47 - NMOSCAP in depletion mode

Lecture 48 - NMOSCAP in inversion mode

Lecture 49 - Exact solution vs delta-depletion approximation

Lecture 50 - Threshold voltage in a MOSCAP

Lecture 51 - Nanohub Demo - MOSCAP tool

Lecture 52 - Non-ideal MOS Capacitor

Lecture 53 - MOSCAP Capacitance-Voltage (CV) Characteristics

Lecture 54 - Example problems with MOSCAPs

Lecture 55 - Impact of doping, oxide thickness and temperature on CV

Lecture 56 - Nanohub Demo - MOS CV

Lecture 57 - Introduction to MOSFET

Lecture 58 - Operating modes of a MOSFET

Lecture 59 - IV Characteristics of a long channel MOSFET

Lecture 60 - Example problems with MOSFETs

Lecture 61 - MOSFET device metrics

Lecture 62 - CMOS Technology

Lecture 63 - MOSFET Scaling and technology nodes

Lecture 64 - Limits of scaling

Lecture 65 - Current characteristics of a short channel MOSFET

Lecture 66 - Threshold voltage characteristics of short channel MOSFET

Lecture 67 - MOSFETs in the 21st century

Lecture 68 - Optical absorption and bandgap

Lecture 69 - Introduction to solar cells

Lecture 70 - Efficiency of a solar cell

Lecture 71 - Types of photodetectors

Lecture 72 - PIN and avalanche Photodectectors

Lecture 73 - Photodetector metrics

Lecture 74 - Radiative absoption and emission processes

Lecture 75 - Materials for optoelectronic devices

Lecture 76 - Operation of a light emitting diode (LED)

Lecture 77 - LED emission spectrum

Lecture 78 - Stimulated emission and lasing

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Electric Vehicles and Renewable Energy (Electrical Engineering)

Co-ordinators : Prof. Ashok Jhunjhunwala, Prof. Prabhjot Kaur, Prof. Kaushal Kumar Jha, Prof. L Kannan

Lecture 1 - Electric Vehicle Introduction

Lecture 2 - The drive Torque, Power, Speed and Energy

Lecture 3 - Energy Source

Lecture 4 - Vehicle Auxillary, Petrol pumps and Charging stations

Lecture 5 - Introduction to Electric Vehicles in India

Lecture 6 - Can India Drive its EV program Innovatively and Differently and scale

Lecture 7 - Battery Cost reduction strategy

Lecture 8 - A bit about Batteries, Charging and Swapping Infrastructure

Lecture 9 - Where will we get Lithium for batteries and EV Subsystems

Lecture 10 - Forces acting when a vehicle move

Lecture 11 - Aerodynamic drag, Rolling Resistance and Uphill Resistance

Lecture 12 - Power and torque to accelerate

Lecture 13 - Putting it all together - 1

Lecture 14 - Putting it all together - 2

Lecture 15 - Concept of drive cycle - 1

Lecture 16 - Concept of drive cycle - 2

Lecture 17 - Drive Cycles and Energy used per km - Part 1

Lecture 18 - Drive Cycles and Energy used per km - Part 2

Lecture 19 - EV Subsystem: Design of EV Drive Train - Part 1

Lecture 20 - EV Subsystem: Design of EV Drive Train - Part 2

Lecture 21 - Introduction to Battery Parameters - Part 1

Lecture 22 - Introduction to Battery Parameters - Part 2

Lecture 23 - Why Lithium Ion Battery? - Part 1

Lecture 24 - Why Lithium Ion Battery? - Part 2

Lecture 25 - Batteries in Future

Lecture 26 - Li-Ion Battery Cells

Lecture 27 - SoH and SoC estimation and Self Discharge - Part 1

Lecture 28 - SoH and SoC estimation and Self Discharge - Part 2

Lecture 29 - Battery Pack Development - Part 1

Lecture 30 - Battery Pack Development - Part 2

Lecture 31 - Computation of Effective cost of battery - Part 1

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Computation of Effective cost of battery - Part 2

Lecture 33 - Charging Batteries

Lecture 34 - Fundamentals of Battery Pack Design

Lecture 35 - Electrical Design of Battery Pack - Part 1

Lecture 36 - Electrical Design of Battery Pack - Part 2

Lecture 37 - Electrical Design of Battery Pack - Part 3

Lecture 38 - Mechanical Design of Battery Pack - Part 1

Lecture 39 - Mechanical Design of Battery Pack - Part 2

Lecture 40 - Mechanical Design of Battery Pack - Part 3

Lecture 41 - Mechanical Design of Battery Pack - Part 4

Lecture 35 - Noise Simulations for CP-PLL Blocks

Lecture 36 - Introduction to Oscillators

Lecture 37 - Low Swing Ring Oscillator - Part I

Lecture 38 - Low-Swing Ring Oscillator - Part II

Lecture 39 - Large-Swing Ring Oscillator - Part I

Lecture 40 - Large-Swing Ring Oscillator - Part II

Lecture 41 - Large-Swing Ring Oscillator - Part III

Lecture 42 - Large-Swing Ring Oscillator - Part IV

Lecture 43 - Large-Swing Ring Oscillator - Part V

Lecture 44 - Supply Regulated VCO - Part I

Lecture 45 - Supply Regulated VCO - Part II

Lecture 46 - Supply Regulated VCO - Part III

Lecture 47 - Phase Noise in Ring Oscillators

Lecture 48 - Circuit level Design of PFD - Part I

Lecture 49 - Circuit level Design of PFD - Part II

Lecture 50 - Circuit level Design of PFD - Part III

Lecture 51 - Circuit level Design of Charge Pump - Part I

Lecture 52 - Circuit-level Design of Charge Pump - Part II

Lecture 53 - Circuit-level Design of Charge Pump - Part III

Lecture 54 - Circuit-level Design of Charge Pump - Part IV

Lecture 55 - Circuit-level Design of Charge Pump - Part V

Lecture 56 - Circuit-level Design of Charge Pump - Part VI

Lecture 57 - Circuit-level Design of Clock Frequency Divider

Lecture 58 - Techniques for Wide Frequency Range Clock Multiplier

Lecture 59 - Introduction to Digital PLL

Lecture 60 - Design of Time-to-Digital Converter

Lecture 61 - Small Signal Analysis of Digital PLL

Lecture 62 - Noise Analysis in Digital PLL

Lecture 63 - Analog/Digital Hybrid PLL - Part I

Lecture 64 - Analog/Digital Hybrid PLL - Part II

Lecture 65 - Course Summary

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fundamentals of Nano and Quantum Photonics (Electrical Engineering)

Co-ordinators : Prof. Naresh Kumar Emani

Lecture 1 - Review of Maxwell's Equations

Lecture 2 - Wave Equation

Lecture 3 - Dispersion Relation

Lecture 4 - Propagating and Evanescent Waves

Lecture 5 - Diffraction Limit and Spatial Frequencies

Lecture 6 - Plane Waves

Lecture 7 - Optical Response of Materials

Lecture 8 - Lorentz Model

Lecture 9 - Properties of Lorentz Oscillator Model

Lecture 10 - Drude-Lorentz Model for Metals

Lecture 11 - Kramers-Kronig Relation

Lecture 12 - Engineering Optical Response of Materials

Lecture 13 - Low dimensional systems

Lecture 14 - Absorption in Semiconductors

Lecture 15 - Optical gain in semiconductors

Lecture 16 - Absorption in low-dimensional semiconductors

Lecture 17 - Selection rules for optical processes

Lecture 18 - Scattering of EM radiation

Lecture 19 - LSPR: Quasi-static approximation

Lecture 20 - Size dependence of Plasmon Resonance

Lecture 21 - Tuning Plasmonic Resonances

Lecture 22 - Surface Plasmon Polariton(SPP)

Lecture 23 - Understanding SPP Dispersion Diagram

Lecture 24 - Exciting Surface Plasmon Polaritons

Lecture 25 - Analytical Calculation of Scattering Coefficients - IPython code overview

Lecture 26 - EM Waves in Multilayer Stack - T Matrix formulation

Lecture 27 - Photonic Bandgap in 1D

Lecture 28 - EM Waves in 1D Photonic Crystal

Lecture 29 - Diffracton Grating

Lecture 30 - Applications of Photonic Crystals

Lecture 31 - PhC in 1D - T-matrix examples

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

NPTEL : An Introduction to Electronics Systems Packaging (Electrical Engineering)

Co-ordinators : Prof. G.V. Mahesh

Lecture 1 - Introduction and Objectives of the course

Lecture 2 - Definition of a system and history of semiconductors

Lecture 3 - Products and levels of packaging

Lecture 4 - Packaging aspects of handheld products; Case studies in applications

Lecture 5 - Case Study (continued); Definition of PWB, summary and Questions for review

Lecture 6 - Basics of Semiconductor and Process flowchart; Video on â€œSand-to-Siliconâ€

Lecture 7 - Wafer fabrication, inspection and testing

Lecture 8 - Wafer packaging; Packaging evolution; Chip connection choices

Lecture 9 - Wire bonding, TAB and flipchip-1

Lecture 10 - Wire bonding, TAB and flipchip-2; Tutorials

Lecture 11 - Why packaging? & Single chip packages or modules (SCM)

Lecture 12 - Commonly used packages and advanced packages; Materials in packages

Lecture 13 - Advances packages (continued); Thermal mismatch in packages; Current trends in packaging

Lecture 14 - Multichip modules (MCM)-types; System-in-package (SIP); Packaging roadmaps; Hybrid circuits; Quiz on packages

Lecture 15 - Electrical Issues â€“ I; Resistive Parasitic

Lecture 16 - Electrical Issues â€“ II; Capacitive and Inductive Parasitic

Lecture 17 - Electrical Issues â€“ III; Layout guidelines and the Reflection problem

Lecture 18 - Electrical Issues â€“ IV; Interconnection

Lecture 19 - Quick Tutorial on packages; Benefits from CAD; Introduction to DFM, DFR & DFT

Lecture 20 - Components of a CAD package and its highlights

Lecture 21 - Design Flow considerations; Beginning a circuit design with schematic work and component layout

Lecture 22 - Demo and examples of layout and routing; Technology file generation from CAD; DFM check list and design rules; Design for Reliability

Lecture 23 - Review of CAD output files for PCB fabrication; Photo plotting and mask generation

Lecture 24 - Process flow-chart; Vias; PWB substrates

Lecture 25 - Substrates continued; Video highlights; Surface preparation

Lecture 26 - Photoresist and application methods; UV exposure and developing; Printing technologies for PWBs

Lecture 27 - PWB etching; Resist stripping; Screen-printing technology

Lecture 28 - Through-hole manufacture process steps; Panel and pattern plating methods

Lecture 29 - Video highlights on manufacturing; Solder mask for PWBs; Multilayer PWBs; Introduction to microvias

Lecture 30 - Microvia technology and Sequential build-up technology process flow for high-density interconnects

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Conventional Vs HDI technologies; Flexible circuits; Tutorial session

Lecture 32 - SMD benefits; Design issues; Introduction to soldering

Lecture 33 - Reflow and Wave Soldering methods to attach SMDs

Lecture 34 - Solders; Wetting of solders; Flux and its properties; Defects in wave soldering

Lecture 35 - Vapour phase soldering, BGA soldering and Desoldering/Repair; SMT failures

Lecture 36 - SMT failure library and Tin Whiskers

Lecture 37 - Tin-lead and lead-free solders; Phase diagrams; Thermal profiles for reflow soldering; Lead-free alloys

Lecture 38 - Lead-free solder considerations; Green electronics; RoHS compliance and e-waste recycling issues

Lecture 39 - Thermal Design considerations in systems packaging

Lecture 40 - Introduction to embedded passives; Need for embedded passives; Design Library; Embedded resistor processes

Lecture 41 - Embedded capacitors; Processes for embedding capacitors; Case study examples; Summary of materials in packaging

Lecture 42 - Chapter-wise summary

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Power Electronics and Distributed Generation (Electrical Engineering)

Lecture 34 - Peltier heat sink

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Integrated Circuits, MOSFETs, Op-Amps and their Applications (Electrical Engineering)

Co-ordinators : Prof. Hardik Jeetendra Pandya

Lecture 1 - Introduction to Integrated Circuits (IC) Technology

Lecture 2 - Introduction to fabrication of IC: Substrates

Lecture 3 - Introduction to IC fabrication

Lecture 4 - Introduction to IC fabrication (Continued...)

Lecture 5 - Introduction to the fabrication of sensors

Lecture 6 - Introduction to fabrication technology

Lecture 7 - Introduction to fabrication technology (Continued...)

Lecture 8 - Introduction to fabrication technology (Continued...)

Lecture 9 - Introduction to fabrication technology (Continued...)

Lecture 10 - Introduction to fabrication technology (Continued...)

Lecture 11 - Process flow for Fabrication of MOSFETs

Lecture 12 - Operation of Enhancement type MOSFET

Lecture 13 - Operation of Depletion type MOSFET

Lecture 14 - MOSFETs Characteristics and Applications (Current Mirrors)

Lecture 15 - Introduction to Operational Amplifiers

Lecture 16 - Operational Amplifier Characteristics

Lecture 17 - Operational Amplifier Characteristics (Continued...)

Lecture 18 - Characteristics of an op-amp (Continued...)

Lecture 19 - Operational Amplifier Configarations

Lecture 20 - Operational Amplifier Configarations (Continued...)

Lecture 21 - Applications of Operational Amplifier: Differential Amplifier

Lecture 22 - Applications of Operational Amplifier: Integerator

Lecture 23 - Applications of Operational Amplifier: Differentiator

Lecture 24 - Introduction to Passive and Active Filters and op-amp as Low Pass Filter

Lecture 25 - Operational Amplifier as a High Pass Filter

Lecture 26 - Operational Amplifier as a Band Pass and Band Reject Filter

Lecture 27 - Introduction to Oscillator

Lecture 28 - RC Phase Shift Oscillator using Op-amp

Lecture 29 - Wein Bridge Oscillator using Op-amp

Lecture 30 - Hartley and Colpitts Oscillator using Op-amp

Lecture 31 - Working of Crystal Oscillators

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Construction and Operation of UJT Relaxation Oscillators

Lecture 33 - Introduction to Noise and its Types

Lecture 34 - Analysis of Data Sheets of an Op-Amp

Lecture 35 - Analysis of Data Sheets of an Op-Amp (Continued...)

Lecture 36 - Analysis of Data Sheets of an Op-Amp (Continued...)

Lecture 37 - Experiment - Introduction to Laboratory Equipment

Lecture 38 - Experiment - Measurement of Active and Passive elements using Multimeter

Lecture 39 - Experiment - Working with Laboratory Equipment: Power Supply

Lecture 40 - Experiment - Working with Laboratory Equipment: Function Generator, Oscilloscope

Lecture 41 - Experiment - Op-Amp Characteristics: Input Bias Current

Lecture 42 - Experiment - Op-Amp Characteristics: Input Offset Current

Lecture 43 - Experiment - Op-Amp Characteristics: Input Offset Voltage

Lecture 44 - Experiment - Op-Amp as Inverting Amplifier

Lecture 45 - Experiment - Op-Amp as Non-Inverting Amplifier

Lecture 46 - Experiment - To study input and output voltage range of an Op-Amp

Lecture 47 - Experiment - Differential amplifier using op-amp

Lecture 48 - Experiment - To study the gain of instrumentation amplifier

Lecture 49 - Experiment - Summing amplifier using op-amp

Lecture 50 - Experiment - To study op-amp based comparator

Lecture 51 - Experiment - To study op-amp based integrator and differentiator

Lecture 52 - Experiment - Study of passive low pass filter

Lecture 53 - Experiment - Op-amp based active low pass filter

Lecture 54 - Experiment - Passive and active high pass filter

Lecture 55 - Experiment - Introduction to experimental set-up of band pass filter

Lecture 56 - Experiment - Passive and active band pass filter

Lecture 57 - Experiment - Introduction to experimental set-up for band reject filter

Lecture 58 - Experiment - Active band reject filter

Lecture 59 - Experiment - Peak detector circuit using Op-Amp

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Semiconductor Devices and Circuits (Electrical Engineering)

Co-ordinators : Prof. Sanjiv Sambandan

Lecture 1 - Quantum Mechanics: Concept of Wave Particle, Schrodinders Equation

Lecture 2 - Quantum Mechanics:Â Particle in a Box

Lecture 3 - Quantum Mechanics:Â Particle in a Box (Continued...), Harmonic Oscillator

Lecture 4 - Solids: Formation of Bands, Kronig-Penny Model

Lecture 5 - Solids: Kronig-Penny Model (Continued...)

Lecture 6 - Solids: Electrons and Holes

Lecture 7 - Solids: Electrons and Holes (Continued...)

Lecture 8 - Solids: Crystals

Lecture 9 - Density of States

Lecture 10 - Density of States (Continued...), Fermi Function

Lecture 11 - Fermi Function - Carrier Concentration

Lecture 12 - Doping

Lecture 13 - Doping (Continued...)

Lecture 14 - Recombination and Generation

Lecture 15 - Recombination and Generation (Continued...)

Lecture 16 - Recombination and Generation (Continued...), Charge Transport

Lecture 17 - Charge Transport (Continued...)

Lecture 18 - Continuity Equation

Lecture 19 - Junctions

Lecture 20 - Metal Semiconductor Junctions

Lecture 21 - Schottky Contact: Electrostatics

Lecture 22 - Schottky Contact: Current-Voltage (IV) Characteristics

Lecture 23 - Schottky Contact: IV Characteristics (Continued...)

Lecture 24 - Schottky Contact: Small Signal Impedance

Lecture 25 - PN Junctions: Electrostatics

Lecture 26 - PN Junctions: IV Characteristics

Lecture 27 - PN Junctions: Small Signal Impedance

Lecture 28 - PN Junctions: Non-Idealities

Lecture 29 - Bipolar Junction Transistors (BJT)

Lecture 30 - BJT: IV Characteristics

Lecture 31 - BJT: Non-Idealities and Equivalent Circuit Modeling

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Metal Oxide Semiconductor Capacitor (MOSCAP)

Lecture 33 - MOSCAP (Continued...)

Lecture 34 - MOSCAP: CV Characteristics

Lecture 35 - MOSCAP: CV Characteristics (Continued...)

Lecture 36 - MOSFET: Introduction

Lecture 37 - MOSFET: I-V characteristics

Lecture 38 - MOSFET: I-V characteristics (Continued...)

Lecture 39 - MOSFET: I-V characteristics (Continued...)

Lecture 40 - Subthreshold swing, Additional concepts

Lecture 41 - Trapped charge, Body-bias

Lecture 42 - Scaling of MOSFETs

Lecture 43 - Scaling of MOSFETs (Continued...), Leakage currents in MOSFETs

Lecture 44 - MOSFET characterization: Parameter extraction

Lecture 45 - MOSFET characterization: Trapped charges, contact resistance

Lecture 46 - MOSFET as a switch

Lecture 47 - MOSFET as a switch (Continued...)

Lecture 48 - Amplifiers using MOSFET

Lecture 49 - Amplifiers using MOSFET (Continued...)

Lecture 50 - Circuits: Frequency Response, Noise

Lecture 51 - Introduction: Amorphous Semiconductors

Lecture 52 - Thin Film Transistors

Lecture 53 - Tutorials Session - 1

Lecture 54 - Tutorials Session - 2

Lecture 55 - Tutorials Session - 3

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fabrication Techniques for MEMs-based Sensors: Clinical Perspective (Electrical Engineering)

Co-ordinators : Prof. Hardik Jeetendra Pandya

Lecture 1 - Introduction to Microengineering Devices

Lecture 2 - Introduction to Microengineering Devices (Continued...)

Lecture 3 - Introduction to Microengineering Devices (Continued...)

Lecture 4 - Silicon, silicon di-oxide and photolithography

Lecture 5 - Silicon, silicon di-oxide and photolithography (Continued...)

Lecture 6 - Physical Vapour Deposition

Lecture 7 - Physical Vapour Deposition (Continued...)

Lecture 8 - Photolithography

Lecture 9 - Mask Aligner

Lecture 10 - Mask Aligner (Continued...)

Lecture 11 - Micromachining

Lecture 12 - Micromachining: Fabrication of VOC Sensor

Lecture 13 - Micromachining: Fabrication of VOC Sensor (Continued...)

Lecture 14 - Micromachining: Fabrication of VOC Sensor and Cantilever

Lecture 15 - Chemical Vapour Deposition

Lecture 16 - Typical Microfabricated Devices for Biomedical Applications

Lecture 17 - Cancer Diagnostic Tool

Lecture 18 - Process flow for Fabrication of Micro Heater

Lecture 19 - Process flow for Fabrication of Interdigited Electrodes

Lecture 20 - Process flow for Fabrication of Interdigited Electrodes (Continued...)

Lecture 21 - Process flow for Fabrication of ETM phenotyping

Lecture 22 - Process flow for Fabrication of Piezo canteliver

Lecture 23

Lecture 24

Lecture 25

Lecture 26

Lecture 27 - Microchip for Rapid Drug Screening

Lecture 28 - Microchip for Rapid Drug Screening (Continued...)

Lecture 29 - A Microfluidic chip for rapid bacterial antibiotic Susceptibility testing

Lecture 30 - Smart Catheter

Lecture 31 - Smart Catheter: Flexible Force Sensor

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Smart Catheter: Flexible Force Sensor (Continued...)

Lecture 33 - Tissue and Cell Culture Techniques

Lecture 34 - Clean Room: Equipments Required

Lecture 35 - GLP: Gowning Procedure for using Lab

Lecture 36 - Introduction to Equipments: Refridgerator

Lecture 37 - Gowning Procedure for using Biological Lab Setup

Lecture 38 - Introduction to Equipments: Desiccator

Lecture 39 - Introduction to Equipments: Impedance Analyzer

Lecture 40 - Introduction to Equipments: DAQ

Lecture 41 - Function generator, Multimeter, Sampling, LabVIEW, NI-CDAQ

Lecture 42 - Introduction to Equipments: Stereo Microscope

Lecture 43 - Introduction to Equipments: Metallurgical Microscope

Lecture 44 - Introduction to Equipments: Inverted Microscope

Lecture 45 - Introduction to Equipments: Fire Alarm

Lecture 46 - Introduction to Equipments: Bio-safety Hood

Lecture 47 - Introduction to Equipments: Peristaltic Pump

Lecture 48 - Introduction to Equipments: Incubator

Lecture 49 - Introduction to Equipments: Oven

Lecture 50 - Introduction to Equipments: Micromanipulator

Lecture 51 - PDMS Moulding

Lecture 52 - 3D Printing

Lecture 53 - Introduction to Fabricated Sensors

Lecture 54 - Simulation: Electro- Thermo- Mechanical Properties of Micro-heater using COMSOL Multiphysics

Lecture 55 - Simulation: Electro- Thermo- Mechanical Properties of Micro-heater using COMSOL Multiphysics (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Op-Amp Practical Applications: Design, Simulation and Implementation (Electrical Engineering)

Co-ordinators : Prof. Hardik Jeetendra Pandya

Lecture 1 - Introduction/Summary on Op-amps

Lecture 2 - Introduction/Summary on Op-amps (Continued...)

Lecture 3 - Introduction/Summary on Op-amps (Continued...)

Lecture 4 - Effect of Loading and Input Impedance - Part 1

Lecture 5 - Effect of Loading and Input Impedance - Part 2

Lecture 6 - Effect of Loading and Input Impedance - Part 3

Lecture 7 - Effect of Loading and Input Impedance - Part 4

Lecture 8 - Introduction to an Analog Circuit Development Board (TI ASLK Pro)

Lecture 9 - Op-amp Applications: Half Wave Rectifier

Lecture 10 - Op-amp Applications: Full Wave Rectifier

Lecture 11 - Op-amp Applications: Clipper

Lecture 12 - Op-amp Circuits using Diodes: Clamper

Lecture 13 - Understanding the Range of Feedback Amplifiers

Lecture 14 - Op-amps as Phase Shift Oscillator

Lecture 15 - Op-amp as Wein Bridge Oscillator

Lecture 16 - Op-amp as Hartley Oscillator

Lecture 17 - Op-amp as Colpitts Oscillator

Lecture 18 - Op-amps as Comparator: Window Comparator

Lecture 19 - Op-amp with Positive Feedback: Inverting Schmitt Trigger

Lecture 20 - Op-amp with Positive Feedback: Non-Inverting Schmitt Trigger

Lecture 21 - Op-amp with Positive Feedback: Astable Multivibrator

Lecture 22 - Op-amp with Positive Feedback: Monostable Multivibrator

Lecture 23 - Op-amp based Voltage Controlled Current Source

Lecture 24 - Measure of Unknown Resistance by Constant Current Drive Circuit Implemented using Op-amp

Lecture 25 - Design and Development of Temperature Controlled Circuit using Op-amp as ON-OFF, Proportional and Proportional Integral Controllers: Introduction

Lecture 26 - Implemetation of Error Detector Cirucit and Signal Conditioning Circuit for Temperature Control

Lecture 27 - Implementation of Plant/Heating Circuit and ON-OFF Controller

Lecture 28 - Implementation of P and PI Controllers

Lecture 29 - Experiment on Controlling the Temperature on the Plant using different Controllers

Lecture 30 - Experiment: Design and Implementation of Signal Conditioning unit for Thermocouple Cold Junction Compensation

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Introduction to ECG Experiment

Lecture 32 - Desing and Implementation of ECG Preprocessing Stage - Part 1

Lecture 33 - Desing and Implementation of ECG Preprocessing Stage - Part 2

Lecture 34 - Desing and Implementation of ECG Preprocessing Stage - Part 3

Lecture 35 - Desing and Implementation of ECG Preprocessing Stage - Part 4

Lecture 36 - Desing and Implementation of Peak Detetor and Thresholding Circuit for ECG Signal Conditioning

Lecture 37 - Live Demonstration on ECG Signal Acquistion, Conditioning and Measurement of BPM

Lecture 38 - Understanding Analog Multipliers using Development Board

Lecture 39 - Application: Automatic Gain Controller using Development Board

Lecture 40 - Introdution to Data-Acquisition

Lecture 41 - Analog to Digital Conversion Circuits and Experiment on 2-bit Flash Type ADC

Lecture 42 - Digital to Analog Conversion Circuits and Experiment on 4-bit R-2R DAC

Lecture 43 - DAC Basics using Development Board - Introduction

Lecture 44 - Understanding DAC 7821 Datasheet

Lecture 45 - Basic DAC Experiment on Variable Gain Amplifier

Lecture 46 - Understanding DAC: Experiment on Variable Square and Triangular Wave Generator

Lecture 47 - Introduction to CDAQ (Compact DAQ)

Lecture 48 - Software-in-Loop based Temperature Controller using CDAQ and LabVIEW

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Physical Modelling for Electronics Enclosures using Rapid prototyping (Electrical Engineering)

Co-ordinators : Prof. N. V Chalapathi Rao

Lecture 1 - Products prototyping

Lecture 2 - Prototype concepts

Lecture 3 - Physical simulation

Lecture 4 - Rapid Prototyping

Lecture 5 - Products detailing

Lecture 6 - Advantages of Design Modelling

Lecture 7 - Sample product concept

Lecture 8 - Product sample exercise 1

Lecture 9 - Exercise in product sample 2

Lecture 10 - Integration of components 1

Lecture 11 - Components integration in models

Lecture 12 - 3D printing detail 1

Lecture 13 - 3D printing detail 2

Lecture 14 - 3D print assembly design

Lecture 15 - Heat spreader to 3D print

Lecture 16 - Metallic, 3D, build up 1

Lecture 17 - 3D build up 2

Lecture 18 - 3D design 1 from Photo snap

Lecture 19 - 3D design 2 from Photo snap

Lecture 20 - 3D Laser cuts 1, prints

Lecture 21 - 3D Laser cuts 2, open source public prints

Lecture 22 - Demo of 3D Part print

Lecture 23 - Building a model 1

Lecture 24 - Building a model 2

Lecture 25 - Common place objects

Lecture 26 - Materials

Lecture 27 - Future 3D In biology

Lecture 28 - Product clamp variants

Lecture 29 - Product clamp build up

Lecture 30 - Multi direction features

Lecture 31 - Multi direction features (Continued...)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Fastening detail

Lecture 33 - Flat objects

Lecture 34 - Modularity

Lecture 35 - Creative design work

Lecture 36 - Creative designs

Lecture 37 - Using flat features

Lecture 38 - Organic shapes

Lecture 39 - Simulation for alternate use

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Recent Advances in Transmission Insulators (Electrical Engineering)

Co-ordinators : Prof Subba Reddy B

Lecture 1 - Introduction to Transmission and distribution Insulators

Lecture 2 - Manufacturing process for Ceramic/glass Insulators

Lecture 3 - Manufacturing process for Polymeric Insulators

Lecture 4 - Design Considerations of Transmission Insulators

Lecture 5 - Field experience of Ceramic/Glass and Polymeric Insulators

Lecture 6 - Comparison of Transmission Insulators

Lecture 7 - Environmental issues with transmission Insulators

Lecture 8 - Reliability and Philosophy of Testing

Lecture 9 - Testing of Ceramic, Glass and Composite Insulators

Lecture 10 - Cleaning methods adopted for Insulators

Lecture 11 - Cleaning methods adopted for Insulators (Continued...)

Lecture 12 - Coating techniques for Insulators

Lecture 13 - Introduction to Hybrid Insulators

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fundamentals of Semiconductor Devices (Electrical Engineering)

Co-ordinators : Prof. Digbijoy N. Nath

Lecture 1 - Introduction to semiconductors

Lecture 2 - Introduction to energy bands

Lecture 3 - Fundamentals of band structure

Lecture 4 - Band structure (Continued...) and Fermi-Dirac distribution

Lecture 5 - Density of states

Lecture 6 - Doping and intrinsic carrier concentration

Lecture 7 - Equilibrium carrier concentration

Lecture 8 - Temperature-dependence of carrier concentration

Lecture 9 - High doping effects and incomplete ionization

Lecture 10 - Carrier scattering and mobility

Lecture 11 - Low-field and high-field transport, introduction to diffusion

Lecture 12 - Drift-diffusion and trap statistics

Lecture 13 - Current continuity equation

Lecture 14 - Continuity equation (Continued...) and introduction to p-n junction

Lecture 15 - p-n junction under equilibrium

Lecture 16 - p-n junction under equilibrium (Continued...)

Lecture 17 - p-n junction under bias

Lecture 18 - p-n junction under bias (Continued...)

Lecture 19 - p-n junction: generation-recombination currents

Lecture 20 - Application of p-n junctions

Lecture 21 - Breakdown of junction and C-V profiling

Lecture 22 - Introduction to Schottky junction

Lecture 23 - Schottky junction under equilibrium

Lecture 24 - Schottky junction under bias

Lecture 25 - Introduction to transistors: BJT

Lecture 26 - Basics of BJT

Lecture 27 - Working of BJT

Lecture 28 - Working of BJT (Continued...)

Lecture 29 - Delays in BJT

Lecture 30 - MOS: Introduction

Lecture 31 - MOS: Capacitance-voltage

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Ideal MOS system: derivation of threshold voltage

Lecture 33 - MOS C-V in more details

Lecture 34 - MOSFET - An introduction

Lecture 35 - Gradual Channel Approximation: Derivation of I-V characteristics

Lecture 36 - Substrate bias effect and subthreshold conduction in MOSFET

Lecture 37 - Short Channel Effects in MOSFET

Lecture 38 - Introduction to compound semiconductors

Lecture 39 - Basics of heterojunctions

Lecture 40 - Band diagram of heterojunctions

Lecture 41 - Heterojunctions (Continued....)

Lecture 42 - Heterojunction transistors

Lecture 43 - III-nitrides

Lecture 44 - Solar cell basics

Lecture 45 - Solar cell (Continued...)

Lecture 46 - Solar cell: Shockley Quiesser Limit

Lecture 47 - Basics of photodetectors

Lecture 48 - Photodetectors: figures of merit and types of devices

Lecture 49 - Junction photodetectors

Lecture 50 - Basics of recombination

Lecture 51 - Basics of LED

Lecture 52 - LED: light extraction and design issues

Lecture 53 - Visible LED: photometry and colorimetry

Lecture 54 - Transistors for power electronics

Lecture 55 - Transistors for power electronics (Continued...) and for RF electronics

Lecture 56 - Transistors for RF (Continued...) and transistors for Memory

Lecture 57 - Basics of microelectronic fabrication

Lecture 58 - Microelectronic fabrication (Continued...)

Lecture 59 - Summary

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Advanced IOT Applications (Electrical Engineering)

Co-ordinators : Prof. T V Prabhakar

Lecture 1 - Overview of localization using IoT sensors

Lecture 2 - Outdoor localization without GPS - I

Lecture 3 - Outdoor localization without GPS - II

Lecture 4 - Outdoor localization using elevation - pressure mapping

Lecture 5 - Localization using IMU sensors - I

Lecture 6 - Localization using IMU sensors - II

Lecture 7 - Localization using IMU sensors - III

Lecture 8 - RFID based localization - I

Lecture 9 - RFID based localization - II

Lecture 10 - Simulation of simple algorithms for object detection

Lecture 11 - Building smart vehicle for collision avoidance

Lecture 12 - Basic computer vision algorithms - Part 1

Lecture 13 - Basic computer vision algorithms - Part 2

Lecture 14 - Code walkthrough of computer vision algorithm

Lecture 15 - Introduction to LiDAR

Lecture 16 - Range estimation and Obstacle avoidance

Lecture 17 - Introduction to vehicle platooning

Lecture 18 - Building blocks for autonomous vehicles - 1

Lecture 19 - Building blocks for autonomous vehicles - 2

Lecture 20 - On Board Diagnostics and protocols

Lecture 21 - Diagnostic services and fuel-injection ratio control unit

Lecture 22 - Real time event processing and Anomaly detection

Lecture 23 - OBD-II and stream processing demonstration

Lecture 24 - Speech recognition - Part 1

Lecture 25 - Speech recognition - Part 2

Lecture 26 - Speech recognition - Part 3

Lecture 27 - Speech recognition - Part 4

Lecture 28 - Device Security - Part 1

Lecture 29 - Device Security - Part 2

Lecture 30 - Device Security - Part 3

Lecture 31 - Need for air quality monitoring

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Air quality : pollutants and standards

Lecture 33 - Introduction to air quality sensors

Lecture 34 - Calibration techniques for IoT air quality sensors

Lecture 35 - Sensor types : semiconductor and electrochemical

Lecture 36 - Air quality : Overview of system design

Lecture 37 - Air quality : System design - Part 1

Lecture 38 - Air quality : System design - Part 2

Lecture 39 - Air quality : Real time measurement for a drive cycle

Lecture 40 - Introduction to First Responder networks

Lecture 41 - First Responders - Applications - Part 1

Lecture 42 - First Responders - Applications - Part 2

Lecture 43 - Cargo monitoring for tamper detection - Part 1

Lecture 44 - Cargo monitoring for tamper detection - Part 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Electronic Systems for Cancer Diagnosis (Electrical Engineering)

Co-ordinators : Prof. Hardik Jeetendra Pandya

Lecture 1 - Tissue and Cell Culture Techniques: Introduction

Lecture 2 - Tissue and Cell Culture Techniques: Methods

Lecture 3 - Tissue and Cell Culture Techniques: Devices

Lecture 4 - Cleanroom Equipments

Lecture 5 - Cleanroom Equipments (Continued...)

Lecture 6 - Introduction to photolithography

Lecture 7 - Photolithography: Mask Aligner

Lecture 8 - Photolithography: Designing Mask Aligner

Lecture 9 - Micromachining Techniques

Lecture 10 - Breast Cancer and Oral Cancer Statistics

Lecture 11 - Fabrication of MEMs-based Biochip for cancer diagnosis

Lecture 12 - Fabrication of MEMs-based Biochip for cancer diagnosis (Continued...)

Lecture 13 - Fabrication of Piezoresistive Sensor

Lecture 14 - Fabrication of Piezoresistive Sensor (Continued...)

Lecture 15 - Fabrication of SU-8 pillar on piezoresistive Sensor

Lecture 16 - Portable Cancer Diagnostic Tool Using a Disposable MEMS-Based Biochip

Lecture 17 - Mechanical Phenotyping of Breast Cancer using MEMS

Lecture 18 - Electrical characterization of Breast Tissue Cores

Lecture 19 - Fabrication of MEMS-based sensor for electro-mechanical phenotyping of breast cancer

Lecture 20 - Fabrication of electro-mechanical sensor (Continued...)

Lecture 21 - Assemby of the electro-mechanical sensor

Lecture 22 - Silicon substrate devices for breast cancer diagnosis

Lecture 23 - Understanding the methods and mechanism to study cell morphology

Lecture 24 - Cytology - A detail study on Spin Coater and Cytospin

Lecture 25 - Techniques in oral cytology studies

Lecture 26 - Techniques in cell morphology analysis

Lecture 27 - Comparitive study on diagnostic tools for oral cancer screening

Lecture 28 - Basic building blocks of Electronics System: Amplifiers

Lecture 29 - Basic building blocks of Electronics System: Amplifiers (Continued...)

Lecture 30 - Basic building blocks of Electronics System: Amplifiers (Continued...)

Lecture 31 - Basic building blocks of Electronics System: Filters

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 35 - Basic building blocks of Electronics System: Data Converteres (Continued...)

Lecture 36 - Basic building blocks of Electronics System: Signal Conditioning Circuits

Lecture 37 - Etching Process and Figure of Merits

Lecture 38 - ECG Signal Processing to calculate BPM

Lecture 39 - ECG Signal Processing to calculate BPM (Continued...)

Lecture 40 - ECG Signal Processing to calculate BPM (Continued...)

Lecture 41 - ECG Signal Processing to calculate BPM (Continued...)

Lecture 42 - ECG Signal Processing to calculate BPM (Continued...)

Lecture 43 - ECG Signal Processing to calculate BPM [Continued...)

Lecture 44 - MEMS based Force Sensor for Catheter Contact Force Measurement

Lecture 45 - 3D Printing: Introduction and Work Flow

Lecture 46 - 3D Fabrication Techniques

Lecture 47 - Gowning Procedure in Clean Room

Lecture 48 - Introduction to Equipments: Desiccators

Lecture 49 - PDMS Moulding procedure

Lecture 50 - Introduction to Equipments: Pristaltic Pump

Lecture 51 - Introduction to Equipments: Stereo Microscopy, Metallurgical Microscopy, Inverted Microscopy

Lecture 52 - Micromanipulator

Lecture 53 - Biosafety Cabinet and Ultrasonicbath

Lecture 54 - Incubator Shaker

Lecture 55 - Hotplate and Microcentrifuge

Lecture 56 - Autoclave

Lecture 57 - Impedance Analyser

Lecture 58 - Rapid Prototyping using 3D Printer

Lecture 59 - Etching Process

Lecture 60 - Electronic System for Drug Screening

Lecture 61 - Introduction to Equipments: DAQ

Lecture 62 - Introduction to Equipments: DAQ (Continued...)

Lecture 63 - Electronic Module for Gas sensor

Lecture 64 - Fabrication process flow for a metal oxide gas sensor

Lecture 65 - MEMS Simulation using Comsol Multiphysics

Lecture 66 - Introduction to COMSOL Multiphysics

Lecture 67 - COMSOL Examples for MEMS Applications

Lecture 68 - COMSOL Examples for MEMS Applications (Continued...)

Lecture 69 - Demonstration of Thermal Acutator and Understanding of Application Builder

Lecture 70 - Closed loop control of temperature sensor

Lecture 71 - Experimental Set-up of closed loop control of temperature sensor

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Electronic Modules for Industrial Applications using Op-Amps (Electrical Engineering)

Co-ordinators : Prof. Hardik Jeetendra Pandya

Lecture 1 - Introduction to Op-amp

Lecture 2 - Introduction Wafer Manufacturing Process and Clean room Protocols

Lecture 3 - Introduction to Fabrication Process Technology and Op-amp

Lecture 4 - Op-amp Characteristics and Datasheet Parameters

Lecture 5 - Overview of Active Filters and Oscillators

Lecture 6 - Overview of Op-amp Oscillators

Lecture 7 - Introduction to ECG Experiment

Lecture 8 - Design and Implementation of ECG Preprocessing Stage - Part 1

Lecture 9 - Design and Implementation of ECG Preprocessing Stage - Part 2

Lecture 10 - Design and Implementation of ECG Preprocessing Stage - Part 3

Lecture 11 - Design and Implementation of ECG Preprocessing Stage - Part 4

Lecture 12 - Design and Implementation of Peak Detector and Thresholding Circuit for ECG Signal Conditioning

Lecture 13 - Experiment: Live Demonstration of ECG Signal Acquistion, Conditioning and Measurement of BPM

Lecture 14 - Application: ECG Signals for detecting AF and the role of sensors

Lecture 15 - Photolithography: Masks

Lecture 16 - Understanding the process of photolithography

Lecture 17 - Photolithography: Mask Aligner

Lecture 18 - Photolithography: Designing of Mask Aligner System

Lecture 19 - Fabrication of Piezoresistive Sensor

Lecture 20 - Fabrication of MEMS based Catheter Contact Force Sensor

Lecture 21 - Design of Speed Control of DC Motor: Introduction

Lecture 22 - Design of Speed Control of DC Motor: Circuit Explanation

Lecture 23 - Design of Speed Control of DC Motor: Encoder Calibration

Lecture 24 - Design of Speed Control of DC Motor: Encoder Signal Conditioning Circuit - 1

Lecture 25 - Design of Speed Control of DC Motor: Encoder Signal Conditioning Circuit - 2

Lecture 26 - Design of Speed Control of DC Motor: Encoder Signal Conditioning Circuit - 3

Lecture 27 - Design of Speed Control of DC Motor: Encoder Signal Conditioning Circuit - 4

Lecture 28 - Design of Speed Control of DC Motor: Error Amplifier

Lecture 29 - Design of Speed Control of a DC Motor using Op-amp: Controllers

Lecture 30 - Design of Speed Control of a DC Motor using Op-amp: Circuit Implementation

Lecture 31 - Design of Speed Control of a DC Motor using DAQ - Part 1

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Design of Speed Control of a DC Motor using DAQ - Part 2

Lecture 33 - Design of Speed Control of a DC Motor using DAQ - Part 3

Lecture 34 - Introduction to Hot-Wire Anemometer

Lecture 35 - Signal-conditioning Circuit for Hot-Wire Anemometer

Lecture 36 - Signal-conditioning Circuit for Hot-Wire Anemometer Part 2

Lecture 37 - Signal-conditioning Circuit for Hot-Wire Anemometer: Simulation

Lecture 38 - Signal-conditioning Circuit for Hot-Wire Anemometer: Experiment

Lecture 39 - Introduction to Gas Sensors

Lecture 40 - Fabrication Process for Gas Sensor

Lecture 41 - Signalconditioning Circuit for Operating Heater Voltage of MQ-7 Gas Sensor - Part 1

Lecture 42 - Signalconditioning Circuit for Operating Heater Voltage of MQ-7 Gas Sensor - Part 2

Lecture 43 - Signalconditioning Circuit for Operating Heater Voltage of MQ-7 Gas Sensor - Part 3

Lecture 44 - Fundamentals of Electrophysiological signals

Lecture 45 - Fundamentals of EEG Signal

Lecture 46 - Application of EEG Signal for Detection of Hearing Loss

Lecture 47 - Closed loop control of temperature using DAQ and LabVIEW

Lecture 48 - Experimental Set-up of closed loop control of temperature sensor

Lecture 49 - Introduction to MEMS Simulation using Comsol Multiphysics

Lecture 50 - Introduction to COMSOL Multiphysics

Lecture 51 - COMSOL Examples for MEMS Applications

Lecture 52 - COMSOL Examples for MEMS Applications (Continued...)

Lecture 53 - Demonstration of Thermal Acutator and Understanding of Application Builder

NPTEL : NOC:Sensors and Actuators (Electrical Engineering)

Co-ordinators : Prof. Hardik Jeetendra Pandya

Lecture 1 - Sensors - Part 1

Lecture 3 - Sensors - Part 3

Lecture 4 - Sensors - Part 4

Lecture 5 - Sensors - Part 5

Lecture 6 - Recent Microsensors based system: E-Nose

Lecture 7 - Recent Microsensors based system: Force Sensor, Basics of Actuators

Lecture 8 - Microfabrication Basics

Lecture 9 - Introduction to cleanroom

Lecture 10 - Cleanroom Protocols

Lecture 11 - Introduction to Cleanroom Equipments: Micromanipulator, Stereo Microscope, metallurgical microscope, Incubator, Static Incubator, Inverted Microscope, Oven, Autoclave, Sonicator

Lecture 12 - Fabrication Process Flow of Microheater and Micromachining

Lecture 13 - Wafer Bonding and PDMS moulding

Lecture 14 - Overview of MEMS based sensors

Lecture 15 - Introduction to Cleanroom Equipments: Impedance Analyzer, LCR Meter, Micromanipulator

Lecture 16 - Introduction to Cleanroom Equipments: Biosafety Hood and safety

Lecture 17 - Process Sensor Process Flow, Cell based Diagnosis Device

Lecture 18 - Basics of Patterning and Drug Screening Device

Lecture 19 - MEMS applications in automobile system

Lecture 20 - Arduino Interfacing for Sensors and Actuators

Lecture 21 - Demonstration of DC Motor as an actuator

Lecture 22 - Demonstration of peristaltic pump using Arduino

Lecture 23 - Demonstration of PDMS Patterning

Lecture 24 - Crystal Orientation and Si-SiO2 interface

Lecture 25 - Surface Profilometry and Physical Vapour Deposition Techniques

Lecture 26 - Introduction to COMSOL Multiphysics and Modelling Examples

Lecture 27 - Demonstration of Thermal Actuators using COMSOL

Lecture 28 - Demonstration of MQ3 Gas sensor using Arduino

Lecture 29 - Photolithography - Part 1

Lecture 30 - Signal Conditioning Circuit for Temperature Sensors

Lecture 31 - Demonstration of Microheaters in COMSOL Multiphysics

Lecture 32 - Introduction to Cleanroom facilities for biomedical applications

Lecture 33 - Physical Deposition Techniques

Lecture 34 - Demonstration on peristaltic pump in cleanroom

Lecture 35 - Installation of Oxygen Plasma System

Lecture 36 - Demonstration of IR Based Sensor using Arduino

Lecture 37 - Illustration of fabricated Microfluidic Device for biochips with PDMS moulding

Lecture 38 - Photolithography - Part 2

Lecture 39 - Photolithography - Part 3

Lecture 40 - Introduction and Demonstration of Shape Memory Alloy

Lecture 41 - Applications of Shape Memory Alloy as a light weight actuators

Lecture 42 - Discussion on Fabricated Sensor with Silicon as Substrate

Lecture 43 - Discussion and Microscopic Inspection of Fabricated Sensor with Silicon as a Substrate

Lecture 44 - Tissue Deparaffinization for Biosensors

Lecture 45 - Clean room guidelines and Cancer Dianostic tool

Lecture 46 - Basics of Pressure Sensor and Demonstration using Arduino Microcontroller

Lecture 47 - Basics of Stepper Motor and Demonstration using Arduino Microcontroller

Lecture 48 - Microscopic Inspection of Diced wafers and CNT Sensing Layer for fabricated sensor

Lecture 49 - Process flow for Microcantilever for Mechanical Phenotyping of breast cancer tissues

Lecture 50 - Applications of microcantilever for Mechanical Phenotyping of breast cancer tissues

Lecture 51 - Installation and Introduction to Physical Vapour Deposition System

Lecture 52 - Human Machine Interface for Controlling Deposition System

Lecture 53 - Flexible MEMS for phenotyping tissue properties - I

Lecture 54 - Flexible MEMS for phenotyping tissue properties - II

Lecture 55 - System Demonstration for Physical Vapor Deposition

Lecture 56 - Introduction to CAD Modelling - I

Lecture 57 - Introduction to CAD Modelling - II

Lecture 58 - Biosensors for ETM Phenotyping of breast cancer tissues for better prognosis

Lecture 59 - Biosensors for Electrothermal sensor

Lecture 60 - MEMS based sensor for catheter contact force measurement

Lecture 61 - Microfluidics based Drug Screening

Lecture 62 - Basic aspects of 3D Printing

Lecture 63 - 3D Printing Materials and Demonstration of Remote 3D Printing

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 54 - Lab: Echogeneration

Lecture 55 - Lab: Using JiDSP

Lecture 56 - Summary

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Advanced Neural Science for Engineers (Electrical Engineering)

Co-ordinators : Prof. Vikas V

Lecture 1 - Introduction to Biomedical Research

Lecture 2 - Fabricated Biosensors and Systems

Lecture 3 - Lab 1 - Introduction to the Fabrication lab

Lecture 4 - Lab 2 - Cleanroom and Gowning Protocol

Lecture 5 - Developed Systems at a glance

Lecture 6 - Silicon and Silicon Dioxide

Lecture 7 - Piranha Cleaning of Silicon Wafer

Lecture 8 - Polyimide Coating on Silicon Wafer

Lecture 9 - Thermal Oxidation of Silicon and Thickness measurement

Lecture 10 - Fundamental of Physical Vapour Deposition

Lecture 11 - Lab 3 - Lithography: Demonstration

Lecture 12 - Sputtering

Lecture 13 - Basics of Photolithography

Lecture 14 - Lab 4 - E-Beam Evaporation: Demo

Lecture 15 - Photolithography - II

Lecture 16 - Photolithography - III

Lecture 17 - Lab 5 - E-Beam Evaporation: Demo - II

Lecture 18 - Lab 6 - Liftoff Demonstration

Lecture 19 - Lithography Optics - I

Lecture 20 - Soft Lithography - I

Lecture 21 - Soft Lithography - II

Lecture 22 - Lab 7 - Sputtering Demonstration - I

Lecture 23 - Lab 8 - Sputtering Demonstration - II

Lecture 24 - Thin Film Deposition: CVD - I

Lecture 25 - Thin Film Deposition: CVD - II

Lecture 26 - Lithography Optics - II

Lecture 27 - Role of Fabrication in Neural Engineering

Lecture 28 - Micromachining

Lecture 29 - Overview of Experimental Neurophysiology

Lecture 30 - Fabrication of Neural Implants

Lecture 31 - Introduction to Packaging for Neural Systems

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Lab 9 - 3D Printing for neural devices

Lecture 33 - Introduction to Biopotentials

Lecture 34 - EEG: Introduction, Demonstration and Applications

Lecture 35 - Neural Implants: Fabrication and Characterization

Lecture 36 - Design of Wireless Biphasic Pulse Generator

Lecture 37 - Basics of EEG/ERP Experimental Desing

Lecture 38 - Micromachining and Etching

Lecture 39 - Epileptic Seizure Detection and Classification

Lecture 40 - Newborn Hearing Screening - I

Lecture 41 - Newborn Hearing Screening - II

Lecture 42 - Applications of EEG/ERP Experimental Design

Lecture 43 - Flexible MEA for Electrocorticography Signal Acquisition

Lecture 44 - Flexible biodegradable MEAs

Lecture 45 - Microneedle Electrode Array

Lecture 46 - Neurosurgery-based MEA Implantation - I

Lecture 47 - Neurosurgery-based MEA Implantation - II

Lecture 48 - Neurosurgery-based MEA Implantation - III

Lecture 49 - Neurosurgery-based MEA Implantation - IV

Lecture 50 - Deep Brain Stimulation/Recording for Parkinson's - I

Lecture 51 - Deep Brain Stimulation/Recording for Parkinson's - II

Lecture 52 - Computational Neuroscience Fundamentals

Lecture 53 - Mathematical Analysis in Neural Science

Lecture 54 - Neuroanatomy for Neural Engineering

NPTEL : NOC:Design of Electric Motors (Electrical Engineering)

Co-ordinators : Dr. Prathap Reddy

Lecture 1 - History Prospect of Electrical Machines

Lecture 2 - Electric Fields

Lecture 3 - Magnetic Fields - 1

Lecture 4 - Magnetic Fields - 2

Lecture 5 - Electric and Magnetic Circuits Interface

Lecture 6 - Magnetic Materials and Concepts of BH Curves

Lecture 7 - Analysis of Magnetic Circuits With and Without Air Gaps

Lecture 8 - Example Problems of Magnetic Circuits

Lecture 9 - Magnetic Circuits with Multiple Windings and Permanent Magnets

Lecture 10 - Force Equations in Electromechanical Systems - 1

Lecture 11 - Force Equations in Electromechanical Systems - 2

Lecture 12 - Design of Electromagnetic Systems

Lecture 13 - Realization of Electrical Machines - 1

Lecture 14 - Realization of Electrical Machines - 2

Lecture 15 - Magnetic Fields in DC Machines - 1

Lecture 16 - Magnetic Fields in AC Machines - 1

Lecture 17 - Magnetic Fields in AC Machines - 2

Lecture 18 - Magnetic Fields in AC Machines - 3

Lecture 19 - MMFDistribution ofAC Machines

Lecture 20 - Basics of Electrical Machine Windings

Lecture 21 - Stator winding design-single layer winding

Lecture 22 - Stator winding design-double layer winding

Lecture 23 - Stator Winding Design-Fractional Slot Double Layer Winding

Lecture 24 - Variable Pole Machine Stator Winding Design (Pole-Phase Modulation) - 1

Lecture 25 - Variable Pole Machine Stator Winding Design (Pole-Phase Modulation) - 2

Lecture 26 - Importance of Motor Design and Standards of Electric Motors

Lecture 27 - Electric Machine Sizing Equations-Output Power and Volume (D2L) Product Equation

Lecture 28 - Lab Session on Re-winding of Induction Motor (Example: Double Layer Winding)

Lecture 29 - The Figure of Merits for Electric Motors and Aspect Ratio to Decouple the D2L Product

Lecture 30 - Electric Machine Sizing Equations-Output Power Equation in terms of D3L Product - 1

Lecture 31 - Electric Machine Sizing Equations-Output Power Equation in terms of D3L Product - 2

Lecture 32 - Analysis of Copper Function and Output Function w r t the Electric Machine D3L Product Eqn

Lecture 33 - Example Problems on Output Power Equation in terms of D3L Product

Lecture 34 - Electric Machine Sizing Equations-Output Power Equation in terms of D the power 2.5 L Product

Lecture 35 - Design Procedure of an Electric Machine

Lecture 36 - Name Plate Details and Datasheets of Induction Motor

Lecture 37 - Design of Induction Machine- Stator Design - 1 (Stator Core design)

Lecture 38 - Design of Induction Machine- Stator Design - 2 (Stator Winding Design)

Lecture 39 - Design of Induction Machine- Stator Design - 3 (Stator Slot Geometry)

Lecture 40 - Design of Induction Machine- Rotor Design - 1 (Rotor Slots Selection)

Lecture 41 - Design of Induction Machine- Rotor Design - 2 (Rotor MMF and Bar Currents)

Lecture 42 - Design of Induction Machine- Rotor Design - 3 (Rotor Slot Geometry)

Lecture 43 - Design of Induction Machine- Rotor Design - 4 (Skewing of Rotor)

Lecture 44 - Design of Induction Machine- Rotor Design - 4 (Resistance of Rotor Winding)

Lecture 45 - Carter's Coefficient of Electrical Machines

Lecture 46 - Effective Length Equations of the Machine Core with Different Stator and Rotor Lengths

Lecture 47 - Stator MMF and Magnetizing Current Equations of Induction Machine

Lecture 48 - Magnetizing Inductance of Induction Machine

Lecture 49 - Stator and Rotor Leakage Inductances of Induction Machine

Lecture 50 - Equivalent Circuit Parameters of Induction Machine

Lecture 51 - Loss Calculation of Induction Machine - 1

Lecture 52 - Loss Calculation of Induction Machine - 2 and Performance Parameters of Induction Motor

Lecture 53 - Switched Reluctance Machine Sizing Equations-Output Power and Volume (D2L) Product Equation

Lecture 54 - The Figure of Merits for SRM and Example Problem on Output Power Equation i t f D2L Product

Lecture 55 - Design of Switched Reluctance Machine: Stator Design - 1

Lecture 56 - Design of Switched Reluctance Machine: Stator Design - 2 and Rotor Design

Lecture 57 - Procedure for Calculation of SRM Inductance: Aligned Inductance - 1

Lecture 58 - Calculation of SRM Inductance: Aligned Inductance - 2

Lecture 59 - Efficiency and Loss Calculation of SRM

Lecture 60 - Importance of Thermal Design and Thermal Limits for Electrical Machines

Lecture 61 - Electric and Thermal Circuits Interface

Lecture 62 - Heat Transfer Methods and Basic Equations for Thermal Resistance

Lecture 63 - Heat Flow in Electrical Machines

Lecture 64 - Cooling Methods and Standards for Electrical Machines

Lecture 65 - Basics of Thermal Equivalent Circuits

Lecture 66 - Thermal Equivalent Circuit - 1

Lecture 67 - Thermal Equivalent Circuit - 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Basics of Semiconductor Microwave Devices (Electrical Engineering)

Co-ordinators : Prof Digbijoy N Nath

Lecture 1 - An Introduction to the course and outline of the course

Lecture 2 - Historical overview of the development of microwave devices

Lecture 3 - Applications of semiconductor microwave devices

Lecture 4 - Applications of semiconductor microwave devices (Continued...)

Lecture 5 - Heterojunction device physics

Lecture 6 - Heterojunction device physics (Continued...) and III-nitrides

Lecture 7 - III-nitrides and polarization

Lecture 8 - III-nitride high electron mobility transistors

Lecture 9 - Varactors and Schottky multipliers

Lecture 10 - Varactors and Schottky multipliers (Continued...)

Lecture 11 - Diodes for microwave applications

Lecture 12 - IMPATT diode

Lecture 13 - Tunnel diodes and Introduction to Gunn diodes

Lecture 14 - Gunn diode and its modes

Lecture 15 - Introduction to MESFETs

Lecture 16 - Advanced concepts of GaAs MESFETs

Lecture 17 - GaAs MESFET fabrication and practical aspects

Lecture 18 - Practical aspects of FET design and small-signal model

Lecture 19 - GaAs MESFETs: cut-off frequency and aspects of power devices

Lecture 20 - GaAs MESFETs for power amplifiers

Lecture 21 - Modulation doping in compound semiconductors

Lecture 22 - Band diagram of MODFETs/HEMTs

Lecture 23 - Design issues and methodology for microwave HEMTs

Lecture 24 - Small-signal model and noise in HEMTs

Lecture 25 - The concept of pseudomorphic or pHEMTs

Lecture 26 - Multi-finger HEMTs

Lecture 27 - pHEMTs for low noise and introduction to InP HEMT

Lecture 28 - InP HEMTs for power and the concept of metamorphic HEMTs

Lecture 29 - AlGaN/GaN HEMT: applications, structure, substrates and FOM

Lecture 30 - AlGaN/GaN HEMT: device basics, current collapse and passivation

Lecture 31 - AlGaN/GaN HEMT: gate process, field-plate and trade-offs in design

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - AlGaN/GaN HEMT: Practical aspects and commercial HEMTs

Lecture 33 - GaN RF HEMT on eval board, and emerging topics of research

Lecture 34 - Linearity in GaN HEMTs - A device perspective

Lecture 35 - Nanoscale MOSFETs and short channel effects

Lecture 36 - Parasitic resistances and capacitances in nanoscale MOSFETs

Lecture 37 - RF MOSFET Layout and RF Silicon-on-insulator

Lecture 38 - Noise in MOSFETs and Introduction to LDMOS

Lecture 39 - Working of LDMOS and VDMOS

Lecture 40 - LDMOS: Parasitics, and the concept of RESURF

Lecture 41 - LDMOS: HCI, snapback, finger layout and some aspects of commercial devices

Lecture 42 - BJT: common base and common emitter from the device point of view

Lecture 43 - BJT: Kirk effect, Ebers-Moll model and base transit time

Lecture 44 - BJT: small-signal model, gain and cut-off frequency

Lecture 45 - BJT: Emitter and base designs and drift transistor

Lecture 46 - Collector design in modern BJT and Introduction to HBTs

Lecture 47 - HBT: base current and collapse of the current gain

Lecture 48 - High-frequency HBT and Introduction to SiGe HBT

Lecture 49 - SiGe HBT: various resistances and capacitances, scaling and aspects of BiCMOS

Lecture 50 - Basics of microwave: transmission line theory

Lecture 51 - Waveguides, T-lines and introduction to 2-port networks

Lecture 52 - S-parameters and the basics of Smith Chart

Lecture 53 - Smith chart and matching

Lecture 54 - Impedance matching using Smith Chart and stub line

Lecture 55 - Passives in microwave circuits

Lecture 56 - Inductors in microwave circuits

Lecture 57 - More on passive elements in microwave circuits

Lecture 58 - On-wafer measurement and S-parameters

Lecture 59 - On-wafer de-embedding

Lecture 60 - On-wafer and fixture-based measurements and calibration

Lecture 61 - More on fixtures and basic transistor concepts for power amplifiers

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Adv. Digital Signal Processing - Multirate and wavelets (Electronics and Communication Engineering)

Co-ordinators : Prof. V.M. Gadre

Lecture 1 - Introduction

Lecture 2 - The Haar Wavelet

Lecture 3 - The Haar Multiresolution Analysis

Lecture 4 - Wavelets And Multirate Digital Signal Processing

Lecture 5 - Equivalence - Functions And Sequences

Lecture 6 - The Haar Filter Bank

Lecture 7 - Haar Filter Bank Analysis And Synthesis

Lecture 8 - Relating psi, phi and the Filters

Lecture 9 - Iterating the filter bank from Psi, Phi

Lecture 10 - Z-Domain Analysis Of Multirate Filter Bank

Lecture 11 - Two Channel Filter Bank

Lecture 12 - Perfect Reconstruction - Conjugate Quadrature

Lecture 13 - Conjugate Quadrature Filters - Daubechies Family of MRA

Lecture 14 - Daubechies' Filter Banks - Conjugate Quadrature Filters

Lecture 15 - Time And Frequency Joint Perspective

Lecture 16 - Ideal Time Frequency Behaviour

Lecture 17 - The Uncertainty Principle

Lecture 18 - Time Bandwidth Product Uncertainty

Lecture 19 - Evaluating and Bounding squareroot t.squareroot omega

Lecture 20 - The Time Frequency Plane & its Tilings

Lecture 21 - Short time Fourier Transform & Wavelet Transform in General

Lecture 22 - Reconstruction & Admissibility

Lecture 23 - Admissibility in Detail Discretization of Scale

Lecture 24 - Logarithmic Scale Discretization, Dyadic Discretization

Lecture 25 - The Theorem of (DYADIC) Multiresolution Analysis

Lecture 26 - Proof of the Theorem of (DYADIC) Multiresolution Analysis

Lecture 27 - Introducing Variants of The Multiresolution Analysis Concept

Lecture 28 - JPEG 2000 5/3 FilterBank & Spline MRA

Lecture 29 - Orthogonal Multiresolution Analysis with Splines

Lecture 30 - Building Piecewise Linear Scaling Function, Wavelet

Lecture 31 - The Wave Packet Transform

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Nobel Identities & The Haar Wave Packet Transform

Lecture 33 - The Lattice Structure for Orthogonal Filter Banks

Lecture 34 - Constructing the Lattice & its Variants

Lecture 35 - The Lifting Structure & Polyphase Matrices

Lecture 36 - The Polyphase Approach - The Modulation Approach

Lecture 37 - Modulation Analysis and The 3-Band Filter Bank, Applications

Lecture 38 - The Applications *Data Mining, *Face Recognition

Lecture 39 - Proof that a non-zero function can not be both time and band-limited

Lecture 40 - M-Band Filter Banks and Looking Ahead

Lecture 41 - Tutorial -Session 1

Lecture 42 - Student's Presentation

Lecture 43 - Tutorial on Uncertainty Product

Lecture 44 - Tutorial on Two band Filter Bank

Lecture 45 - Tutorial -Frequency Domain Analysis of Two band Filter Bank

Lecture 46 - Zoom in and Zoom out using Wavelet Transform

Lecture 47 - More Thoughts on Wavelets : Zooming In

Lecture 48 - Towards selecting Wavelets through vanishing moments

Lecture 49 - In Search of Scaling Coefficients

Lecture 50 - Wavelet Applications

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Basic Electrical Circuits (Electronics and Communication Engineering)

Co-ordinators : Dr. Nagendra Krishnapura

Lecture 1 - Introduction to the course;Current and Voltage;Kirchhoff's Current and Voltage laws

Lecture 2 - Electrical circuit elements: Voltage and current sources; R, C, L; Voltage sources in series; Example of superposition

Lecture 3 - Elements in series and parallel; Superposition in linear circuits

Lecture 4 - Controlled sources; Determining the characteristics of a two terminal element; Realizing a resistor using a VCCS or a CCVS

Lecture 5 - Nodal analysis of a network with conductances and current sources; Setting up the equations; Conductance matrix; Superposition

Lecture 6 - Circuit analysis; Number of KCL and KVL equations in a circuit; Nodal analysis of a network with conductances and current sources; Setting up the equations; Conductance matrix;

Lecture 7 - Nodal analysis with voltage sources and controlled sources; Brief introduction to modified nodal analysis; Use of supernode to solve circuits with voltage sources; Superposition theorem

Lecture 8 - Mesh analysis of a circuit with resistors and voltage sources; Comparison with nodal analysis; Mesh analysis of circuits with current sources-supermesh

Lecture 9 - Choice of nodal versus mesh analysis; Circuit theorems: Pushing a voltage source through a node, splitting a current source, substitution theorem, superposition

Lecture 10 - Thevenin and Norton (theorem and) equivalent circuits; Power conservation in a circuit

Lecture 11 - Tellegen's theorem; Reciprocity theorem

Lecture 12 - Compensation Theorem; Two ports

Lecture 13 - Two port parameters-y parameters

Lecture 14 - Two port parameters(z, h, and g); Reciprocal two ports

Lecture 15 - Opamp, ideal opamp circuits, non-inverting and inverting amplifiers; Ensuring that the opamp has negative feedback

Lecture 16 - RC circuit natural response; First order differential equation

Lecture 17 - RC (first-order) circuit, complete response with step inputs; Transient(natural) and steady state(forced) responses; Zero-state and zero-input responses

Lecture 18 - Step response of RC circuit with loops of voltage sources and capacitors; RL circuits; RLC circuits

Lecture 19 - Second order(RLC circuit) natural response; Series and prallel RLC circuits; Differential equation-characteristic equation and solutions; Forced response of a second order circuit

Lecture 20 - General formulation of second order(RLC circuit) natural response; Natural frequency and damping/quality factor; Series/parallel RLC circuits; R, L, C in sinusoidal steady state

Lecture 21 - Sinusoidal steady state response of RC and RLC circuits

Lecture 2 - Embedded System Software and Hardware, stack implementation in ARM, Endianness, condition codes

Lecture 3 - Processor core VS CPU core, ARM7TDMI Interface signals, Memory Interface, Bus Cycle types, Register set, Operational Modes

Lecture 4 - Instruction Format, ARM Core Data Flow Model, ARM 3 stage Pipeline, ARM family attribute comparision

Lecture 5 - ARM 5 stage Pipeline, Pipeline Hazards, Data forwarding - a hardware solution

Lecture 6 - ARM ISA and Processor Variants, Different Types of Instructions, ARM Instruction set, data processing instructions

Lecture 7 - Shift Operations, shift Operations using RS lower byte, Immediate value encoding

Lecture 8 - Dataprocessing Instructions

Lecture 9 - Addressing Mode-1, Addressing Mode-2

Lecture 10 - Addressing Mode-2, LDR/STR, Addressing mode-3 with examples

Lecture 11 - Instruction Timing, Addressing Mode-4 with Examples

Lecture 12 - Swap Instructions, Swap Register related Instructions, Loading Constants

Lecture 13 - Program Control Flow, Control Flow Instructions, B & BL instructions, BX instruction

Lecture 14 - Interrupts and Exceptions, Exception Handlers, Reset Handling

Lecture 15 - Aborts, software Interrupt Instruction, undefined instruction exception

Lecture 16 - Interrupt Latency, Multiply Instructions, Instruction set examples

Lecture 17 - Thumb state, Thumb Programmers model, Thumb Implementation, Thumb Applications

Lecture 18 - Thumb Instructions, Interrupt processing

Lecture 19 - Interrupt Handelling schemes, Examples of Interrupt Handlers

Lecture 20 - Coprocessors

Lecture 21 - Coprocessor Instructions, data Processing Instruction, data transfers, register transfers

Lecture 22 - Number representations, floating point representation

Lecture 23 - Flynn's Taxonomy, SIMD and Vector Processors, Vector Floating Point Processor (VFP), VFP and ARM interactions, An example vector operation

Lecture 24 - Memory Technologies, Need for memory Hierarchy, Hierarchical Memory Organization, Virtual Memory

Lecture 25 - Cache Memory, Mapping Functions

Lecture 26 - Cache Design, Unified or split cache, multiple level of caches, ARM cache features, coprocessor 15 for system control

Lecture 27 - Processes, Memory Map, Protected Systems, ARM systems with MPU, memory Protection Unit (MPU)

Lecture 28 - Physical Vs Virtual Memory, Paging, Segmentation

Lecture 29 - MMU Advantage, virtual memory translation, Multitasking with MMU, MMU organization, Tightly coupled Memory (TCM)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 30 - ARM Development Environment, Arm Procedure Call Standard (APCS),

Lecture 31 - Example C program

Lecture 32 - Embedded software Development, Image structure, linker inputs and outputs, memory map, application startup

Lecture 33 - AMBA Overview, Typical AMAB Based Microcontroller, AHB bus features, AHB Bus transfers, APB bus transfers, APB bridge

Lecture 34 - DMA, Peripherals, Programming Peripherals in ARM

Lecture 35 - DMA:Direct Memory Access

Lecture 36 - Protocols (I2c, SPI), UART, GPIO

Lecture 37 - ARM ISAs, ARMv5, ARMv6, ARM v7, big.little technology, ARMv8

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Embedded Software Testing (Electronics and Communication Engineering)

Co-ordinators : Mr. Madhukeshwara H.M

Lecture 1 - Embedded Systems Basics Session 1

Lecture 2 - Embedded Systems Basics Session 1 (Continued...)

Lecture 3 - Prerequistics for Embedded Systems Testing

Lecture 4 - Test Case Designa and procedures

Lecture 5 - Test Standards

Lecture 44 - MOSFET: Transport - II

Lecture 45 - MOSFET: Landauer Transport

Lecture 46 - Landauer Transport and Ballistic MOSFET

Lecture 47 - Ballistic MOSFET

Lecture 48 - Ballistic Injection Velocity

Lecture 49 - Velocity Saturation in Ballistic MOSFET and Electrostatics

Lecture 50 - MOS Electrostatics

Lecture 51 - MOS Electrostatics

Lecture 52 - MOSFET: Electrostatics, Threshold Voltage

Lecture 53 - MOSFET: 2D Electrostatics

Lecture 54 - MOSFET: 2D Electrostatics and Quantum Confinement

Lecture 55 - ETSOI MOSFETs, Quantum Confinement, Strain Engineering

Lecture 56 - Strain Engineering, Thermoelectric Effects

Lecture 57 - Thermoelectric Effects

Lecture 58 - Thermoelectric Effects, Quantum Dot Devices

Lecture 59 - Quantum Dot Devices

Lecture 60 - Quantum Dot Devices - IV Characteristics, DFT, Course Summary

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Low Voltage CMOS Circuit Operation (Electronics and Communication Engineering)

Co-ordinators : Prof. Anand Bulusu

Lecture 1 - Introduction and Motivation

Lecture 2 - Review of MOSFET operation - I

Lecture 3 - Review of MOSFET operation - II

Lecture 4 - Basic charge model - I

Lecture 5 - Basic charge model - II

Lecture 6 - Basic charge model - III

Lecture 7 - Basic charge model - IV

Lecture 8 - Basic charge model - V

Lecture 9 - Basic charge model - VI

Lecture 10 - Basic charge model - VII

Lecture 11 - Basic charge model - VIII

Lecture 12 - Basic charge model - IX

Lecture 13 - Basic charge model - X

Lecture 14 - Minimum energy point - I

Lecture 15 - Minimum energy point - II

Lecture 16 - Minimum energy point - III

Lecture 17 - Transistor sizing for combinational circuit - I

Lecture 18 - Transistor sizing for combinational circuit - II

Lecture 19 - Transistor sizing for asymmetric combinational circuits

Lecture 20 - Charging and discharging mechanism in NTV combinational gates

Lecture 21 - Effective current for NTV inverter

Lecture 22 - Effective current for NTV combinational gates - I

Lecture 23 - Effective current for NTV combinational gates - II

Lecture 24 - Effective current for NTV combinational gates - III

Lecture 25 - Combinational circuit design considering variations - I

Lecture 26 - Combinational circuit design considering variations - II

Lecture 27 - Buffer design considering INWE

Lecture 28 - Decoder design considering INWE

Lecture 29 - Flip-flop operation

Lecture 30 - Warning flip-flops design and operation

Lecture 31 - Single phase flip-flops design and operation

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Consideration of radiation effects in NTV

Lecture 33 - Radiation-hardened NTV sequential circuit elements

Lecture 34 - Level shifters for multi-Vdd domains

Lecture 35 - Introduction to 6T SRAM

Lecture 36 - Stability and Reliability Issues in 6T SRAM

Lecture 37 - Read and Write-Assist Circuits in 6T SRAM

Lecture 38 - Physical Insights into Channel Charge Distribution

Lecture 39 - FinFET based Standard Cell Design

Lecture 40 - Example problems

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Circuits for Analog System Design (Electronics and Communication Engineering)

Co-ordinators : Prof. M.K. Gunasekaran

Lecture 1 - Transistor Amplifier

Lecture 2 - Transistor Op-amp and Transistor Based Voltage Regulator

Lecture 3 - Some applications of transistor - I

Lecture 4 - Some applications of transistor - II

Lecture 5 - Transformer design & Heat sink design

Lecture 6 - Op-amp Based Linear Voltage Regulator

Lecture 7 - Short circuit protection for linear power supply

Lecture 8 - Temperature indicator design using Op-amp

Lecture 9 - On & off Temperature controller design

Lecture 10 - Proportional Temperature Controller Design

Lecture 11 - PID - Temperature Controller Design

Lecture 12 - Heater Drive for Various Temperature Controllers

Lecture 13 - Short Circuit Protection of Power MOSFET

Lecture 14 - Error budgeting for temperature Indicator

Lecture 15 - PID Temperature Controllers with Error Budgeting

Lecture 16 - Error Budgeting for Constant Current Sources

Lecture 17 - Error Budgeting for Thermo Couple Amplifier

Lecture 18 - Error Budgeting for Op amp Circuits

Lecture 19 - Gain Error Calculation in Op amp Circuits

Lecture 20 - Input Resistance Calculations for Op amp

Lecture 21 - Output Resistance Calculations for Op amp

Lecture 22 - Error Budgeting for Different Circuits

Lecture 23 - 4-20 mA current Transmitter design

Lecture 24 - Error budgeting for 4-20mA Current Transmitters

Lecture 25 - LVDT Based Current Transmitters

Lecture 26 - Constant Current Source Design

Lecture 27 - 4-20 MA Based Temperature Transmitter

Lecture 28 - 3-Wire Current Transmitter

Lecture 29 - Various Resistance Measurement Techniques

Lecture 30 - Ratio Transformer Technique to Measure Resistance and capacitance

Lecture 31 - Capacitive Sensor Circuit Design Examples

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Capacitive Sensor Circuit With High Impedance Amplifier

Lecture 33 - AC- applications of the Op-Amp and Lock in Amplifier Design

Lecture 34 - Design of lock in Amplifier Circuit with example

Lecture 35 - Dual Slopes ADC â€“ Design Examples

Lecture 36 - Dual Slope ADC and Successor approximation ADC

Lecture 37 - MC based ADC

Lecture 38 - Digital to analog Converter design and working, Flash ADC

Lecture 39 - Flash ADC and ADC Converter errors

Lecture 40 - Sigma delta ADC working Principle

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Digital System design with PLDs and FPGAs (Electronics and Communication Engineering)

Co-ordinators : Prof. Kuruvilla Varghese

Lecture 1 - Course Contents, Objective

Lecture 2 - Revision of Prerequisite

Lecture 3 - Design of Synchronous Sequential Circuits

Lecture 4 - Analysis of Synchronous Sequential Circuits

Lecture 5 - Top-down Design

Lecture 6 - Controller Design

Lecture 7 - Control algorithm and State diagram

Lecture 8 - Case study 1

Lecture 9 - FSM issues 1

Lecture 10 - FSM Issues 2

Lecture 11 - FSM Issues 3

Lecture 12 - FSM Issues 4

Lecture 13 - FSM Issues 5

Lecture 14 - Synchronization 1

Lecture 15 - Synchronization 2

Lecture 16 - Case study 2

Lecture 17 - Case study on FPGA Board

Lecture 18 - Entity, Architecture and Operators

Lecture 19 - Concurrency, Data flow and Behavioural models

Lecture 20 - Structural Model, Simulation

Lecture 21 - Simulating Concurrency

Lecture 22 - Classes and Data types

Lecture 23 - Concurrent statements and Sequential statements

Lecture 24 - Sequential statements and Loops

Lecture 25 - Modelling flip-flops, Registers

Lecture 26 - Synthesis of Sequential circuits

Lecture 27 - Libraries and Packages

Lecture 28 - Operators, Delay modelling

Lecture 29 - Delay modelling

Lecture 30 - VHDL Examples

Lecture 31 - VHDL coding of FSM

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - VHDL Test bench

Lecture 33 - VHDL Examples, FSM Clock

Lecture 34 - Evolution of PLDs

Lecture 35 - Simple PLDs

Lecture 36 - Simple PLDs: Fitting

Lecture 37 - Complex PLDs

Lecture 38 - FPGA Introduction

Lecture 39 - FPGA Interconnection, Design Methodology

Lecture 40 - Xilinx Virtex FPGAâ€™s CLB

Lecture 41 - Xilinx Virtex Resource Mapping, IO Block

Lecture 42 - Xilinx Virtex Clock Tree

Lecture 43 - FPGA Configuration

Lecture 44 - Altera and Actel FPGAs

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Error Correcting Codes (Electronics and Communication Engineering)

Co-ordinators : Prof. P. Vijay Kumar

Lecture 1 - Course Overview & Basics

Lecture 2 - Example Codes and their Parameters

Lecture 3 - Mathematical Preliminaries: Groups

Lecture 4 - Subgroups and Equivalence Relations

Lecture 5 - Cosets, Rings & Fields

Lecture 6 - Vector Spaces, Linear Independence and Basis

Lecture 7 - Linear Codes, & Linear independence

Lecture 8 - Spanning & Basis

Lecture 9 - The Dual Code

Lecture 10 - Systematic Generator Matrix

Lecture 11 - Minimum Distance of a Linear Code

Lecture 12 - Bounds on the size of a Code

Lecture 13 - Asymptotic Bounds

Lecture 14 - Standard Array Decoding

Lecture 15 - Performance Analysis of the SAD

Lecture 16 - State and Trellis

Lecture 17 - The Viterbi Decoder

Lecture 18 - Catastrophic Error Propagation

Lecture 19 - Path Enumeration

Lecture 20 - Viterbi Decoder over the AWGN Channel

Lecture 21 - Generalized Distributive Law

Lecture 22 - The MPF Problem

Lecture 23 - Further Examples of the MPF Problem

Lecture 24 - Junction Trees

Lecture 25 - Example of Junction Tree Construction

Lecture 26 - Message passing on the Junction tree

Lecture 27 - GDL Approach to Decoding Convolutional Codes

Lecture 28 - ML Code-Symbol Decoding of the Convolutional Code

Lecture 29 - LDPC Codes

Lecture 30 - LDPC Code Terminology

Lecture 31 - Gallager Decoding Algorithm A

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - BP Decoding of LDPC Codes

Lecture 33 - BP Decoding (Continued)

Lecture 34 - Density Evolution under BP decoding

Lecture 35 - Convergence & Concentration Theorem - LDPC Codes

Lecture 36 - A Construction for Finite Fields

Lecture 37 - Finite Fields: A Deductive Approach

Lecture 38 - Deductive Approach to Finite Fields

Lecture 39 - Subfields of a Finite field

Lecture 40 - Transform Approach to Cyclic Codes

Lecture 41 - Estimating the Parameters of a Cyclic Code

Lecture 42 - Decoding Cyclic Codes

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Nanoelectronics: Devices and Materials (Electronics and Communication Engineering)

Co-ordinators : Dr. Navakanta Bhat, Prof. K.N. Bhat, Dr. S.A. Shivashankar

Lecture 1 - Introduction to Nanoelectronics

Lecture 2 - CMOS Scaling Theory

Lecture 3 - Short Channel Effects

Lecture 4 - Subthreshold Conduction

Lecture 5 - Drain Induced Barrier Lowering

Lecture 6 - Channel and Source / Drain Engineering

Lecture 7 - CMOS Process Flow

Lecture 8 - Gate oxide scaling and reliability

Lecture 9 - High-k gate dielectrics

Lecture 10 - Metal gate transistor

Lecture 11 - Industrial CMOS Technology

Lecture 12 - Ideal MOS C-V Characteristics

Lecture 13 - Effect of non idealities on C-V

Lecture 14 - MOS Parameter Extraction from C-V Characteristics

Lecture 15 - MOS Parameter Extraction from I-V Characteristics

Lecture 16 - MOSFET Analysis, sub-threshold swing Â“SÂ”

Lecture 17 - Interface state density effects on Â“SÂ”. Short Channel Effects (SCE) and Drain Induced Barrier Lowering (DIBL)

Lecture 18 - Velocity Saturation, Ballistic transport, and Velocity Overshoot Effects and Injection Velocity

Lecture 19 - SOI Technology and comparisons with Bulk Silicon CMOS technology

Lecture 20 - SOI MOSFET structures, Partially Depleted (PD)and Fully Depleted (FD) SOIMOSFETs

Lecture 21 - FD SOI MOSFET: Operation Modes and Threshold Voltages and Electric Fields

Lecture 22 - Sub-threshold Slope & SCE suppression in FD SOI MOSFET, Volume Inversion and Ultra thin (UTFD) SOI MOSFET and quantization Effect, FINFET

Lecture 23 - Need for MS contact Source/Drain Junction in Nano scale MOSFETs

Lecture 24 - Rectifying and Ohmic contacts and challenges in MS unction source drain MOSFET Technology

Lecture 25 - Effect of Interface states and Fermi level pinning on MS contacts on Si and passivation techniques for MS S/D MOSFETS

Lecture 26 - Germanium as an alternate to silicon for high performance MOSFETs and the challenges in Germanium Technology

Lecture 27 - Germanium MOSFT technology and recent results on surface passivated Ge MOSFETS

Lecture 28 - Compound semiconductors and hetero junction FETsfor high performance

Lecture 29 - GaAs MESFETs: Enhancement and depletion types. Velocity Overshoot effcts in GaAs MESFETs

Lecture 30 - Hetero-junctions and High Electron Mobility Transistors (HEMT)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Introduction to Nanomaterials

Lecture 32 - Basic Principles of Quantum Mechanics

Lecture 33 - Basic Principles of Quantum Mechanics (Continued...)

Lecture 34 - Energy bands in crystalline solids

Lecture 35 - Quantum structures and devices

Lecture 36 - Crystal growth and nanocrystals

Lecture 37 - Nanocrystals and nanostructured thin films

Lecture 38 - Nanowires and other nanostructures

Lecture 39 - Carbon Nanostructures and CVD

Lecture 40 - Atomic layer deposition (ALD)

Lecture 41 - Characterisation of nanomaterials

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Pattern Recognition (Electronics and Communication Engineering)

Co-ordinators : Prof. P.S. Sastry

Lecture 1 - Introduction to Statistical Pattern Recognition

Lecture 2 - Overview of Pattern Classifiers

Lecture 3 - The Bayes Classifier for minimizing Risk

Lecture 4 - Estimating Bayes Error; Minimax and Neymann-Pearson classifiers

Lecture 5 - Implementing Bayes Classifier; Estimation of Class Conditional Densities

Lecture 6 - Maximum Likelihood estimation of different densities

Lecture 7 - Bayesian estimation of parameters of density functions, MAP estimates

Lecture 8 - Bayesian Estimation examples; the exponential family of densities and ML estimates

Lecture 9 - Sufficient Statistics; Recursive formulation of ML and Bayesian estimates

Lecture 10 - Mixture Densities, ML estimation and EM algorithm

Lecture 11 - Convergence of EM algorithm; overview of Nonparametric density estimation

Lecture 12 - Convergence of EM algorithm, Overview of Nonparametric density estimation

Lecture 13 - Nonparametric estimation, Parzen Windows, nearest neighbour methods

Lecture 14 - Linear Discriminant Functions; Perceptron -- Learning Algorithm and convergence proof

Lecture 15 - Linear Least Squares Regression; LMS algorithm

Lecture 16 - AdaLinE and LMS algorithm; General nonliner least-squares regression

Lecture 17 - Logistic Regression; Statistics of least squares method; Regularized Least Squares

Lecture 18 - Fisher Linear Discriminant

Lecture 19 - Linear Discriminant functions for multi-class case; multi-class logistic regression

Lecture 20 - Learning and Generalization; PAC learning framework

Lecture 21 - Overview of Statistical Learning Theory; Empirical Risk Minimization

Lecture 22 - Consistency of Empirical Risk Minimization

Lecture 23 - Consistency of Empirical Risk Minimization; VC-Dimension

Lecture 24 - Complexity of Learning problems and VC-Dimension

Lecture 25 - VC-Dimension Examples; VC-Dimension of hyperplanes

Lecture 26 - Overview of Artificial Neural Networks

Lecture 27 - Multilayer Feedforward Neural networks with Sigmoidal activation functions;

Lecture 28 - Backpropagation Algorithm; Representational abilities of feedforward networks

Lecture 29 - Feedforward networks for Classification and Regression; Backpropagation in Practice

Lecture 30 - Radial Basis Function Networks; Gaussian RBF networks

Lecture 31 - Learning Weights in RBF networks; K-means clustering algorithm

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Support Vector Machines -- Introduction, obtaining the optimal hyperplane

Lecture 33 - SVM formulation with slack variables; nonlinear SVM classifiers

Lecture 34 - Kernel Functions for nonlinear SVMs; Mercer and positive definite Kernels

Lecture 35 - Support Vector Regression and ?-insensitive Loss function, examples of SVM learning

Lecture 36 - Overview of SMO and other algorithms for SVM; ?-SVM and ?-SVR; SVM as a risk minimizer

Lecture 37 - Positive Definite Kernels; RKHS; Representer Theorem

Lecture 38 - Feature Selection and Dimensionality Reduction; Principal Component Analysis

Lecture 39 - No Free Lunch Theorem; Model selection and model estimation; Bias-variance trade-off

Lecture 40 - Assessing Learnt classifiers; Cross Validation;

Lecture 41 - Bootstrap, Bagging and Boosting; Classifier Ensembles; AdaBoost

Lecture 42 - Risk minimization view of AdaBoost

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Analog Circuits and Systems 1 (Electronics and Communication Engineering)

Co-ordinators : Prof. K. Radhakrishna Rao

Lecture 1 - Introduction to Sensors, Signals and Systems

Lecture 2 - Role of Analog Signal Processing in Electronic Products - Part I

Lecture 3 - Role of Analog Signal Processing in Electronic Products - Part II

Lecture 4 - Analog Signal Processing using One Port Networks

Lecture 5 - Analog Signal Processing using One Port Networks, Passive Two Ports and Ideal amplifiers

Lecture 6 - Synthesis of Amplifiers using Nullators and Norators

Lecture 7 - Passive Electronic Devices for Analog Signal Processing

Lecture 8 - Active Devices for Analog Signal Processing Systems

Lecture 9 - Electronic Devices for Analog Circuits - Part I

Lecture 10 - Electronic Devices for Analog Circuits - Part II

Lecture 64 - Geoserver - Raster and SLD Integration

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Principles of Engineering System Design (Engineering Design)

Co-ordinators : Dr. T. Asokan

Lecture 1 - Introduction to system Design

Lecture 2 - Engineering systems Classification & examples

Lecture 3 - Modern System design processes

Lecture 4 - Six functions of design process

Lecture 5 - Tools for enabling creative development

Lecture 6 - Team Development : Group Exercises

Lecture 7 - System Requirement Analysis

Lecture 8 - Originating Requirements: Example System Engineering software -CORE

Lecture 9 - Functional Architecture Development

Lecture 10 - Functional Decomposition

Lecture 11 - Functional Decomposition : Examples

Lecture 12 - Physical Architecture Development

Lecture 13 - Implementing Fault Tolerance in Physical Architecture

Lecture 14 - Operational Architecture Development - Part I

Lecture 15 - Operational Architecture Development - Part II

Lecture 16 - Interface architecture Development

Lecture 17 - Interface standards and Design process

Lecture 18 - Integration and qualification

Lecture 19 - Qualification planning and methods

Lecture 20 - System Design Example: Autolink system

Lecture 21 - System Design Examples

Lecture 22 - System Design Examples (Continued...)

Lecture 23 - Graphical Modelling Techniques

Lecture 24 - Process modeling

Lecture 25 - Behavior modeling

Lecture 26 - Graphical Modelling Techniques (Continued...)

Lecture 27 - System modeling and simulation

Lecture 28 - Bondgraph modeling of Dyanamic systems

Lecture 29 - Decision making in System Design

Lecture 30 - Decision making in System Design (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Vehicle Dynamics (Engineering Design)

Co-ordinators : Dr. R. Krishnakumar

Lecture 1 - Introduction to Vehicle Dynamics

Lecture 2 - Longitudinal Dynamics

Lecture 3 - Vehicle Load Distribution - Acceleration and Braking

Lecture 4 - Brake Force Distribution, Braking Efficiency and Braking Distance

Lecture 5 - Tractor - Semi Trailer

Lecture 6 - Tire Mechanics - An Introduction

Lecture 7 - Mechanical Properties of Rubber

Lecture 8 - Slip, Grip and Rolling Resistance

Lecture 9 - Tire Construction and Force Development

Lecture 10 - Contact Patch and Contact Pressure Distribution

Lecture 11 - Tire Brush Model

Lecture 12 - Lateral Force Generation

Lecture 13 - Ply Steer and Conicity - Part 1

Lecture 14 - Ply Steer and Conicity - Part 2

Lecture 15 - Tire Models - Magic Formula

Lecture 16 - Classification of Tyre Models and Combined Slip

Lecture 17 - Lateral Dynamics - An Introduction

Lecture 18 - Lateral Dynamics - Bicycle Model

Lecture 19 - Lateral Dynamics - Stability and Steering Conditions

Lecture 20 - Understeer Gradient and State Space Approach

Lecture 21 - Handling Response of a Vehicle

Lecture 22 - Mimuro Plot for Lateral Transient Response - Part 1

Lecture 23 - Mimuro Plot for Lateral Transient Response - Part 2

Lecture 24 - Parameters affecting vehicle handling characteristics

Lecture 25 - Subjective and Objective Evaluation of Vehicle Handling - Part 1

Lecture 26 - Subjective and Objective Evaluation of Vehicle Handling - Part 2

Lecture 27 - Subjective and Objective Evaluation of Vehicle Handling and Rollover P

Lecture 28 - Rollover Prevention (Continued...) and Vertical Dynamics

Lecture 29 - Vertical Dynamics - An Introduction

Lecture 30 - Vertical Dynamics - Quarter Car Model

Lecture 31 - Noise, Vibration and Harshness - Random Processes

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Random Process and Conclusion (Continued...)

NPTEL : NOC:Control Systems (Engineering Design)

Co-ordinators : Prof. C.S.Shankar Ram

Lecture 1 - Introduction to Control Systems - Part 1

Lecture 2 - Introduction to Control Systems - Part 2

Lecture 3 - Overview of Feedback Control Systems - Part 1

Lecture 4 - Overview of Feedback Control Systems - Part 2

Lecture 5 - Mathematical Preliminaries - Part 1

Lecture 6 - Mathematical Preliminaries - Part 2

Lecture 7 - Transfer Function - Part 1

Lecture 8 - Transfer Function - Part 2

Lecture 9 - System Response - Part 1

Lecture 10 - System Response - Part 2

Lecture 11 - BIBO Stability - Part 1

Lecture 12 - BIBO Stability - Part 2

Lecture 13 - Effect of Zeros - Part 1

Lecture 14 - Effect of Zeros - Part 2

Lecture 15 - Closed Loop System - Part 1

Lecture 16 - Closed Loop System - Part 2

Lecture 17 - First Order Systems - Part 1

Lecture 18 - First Order Systems - Part 2

Lecture 19 - Second Order Systems - Part 1

Lecture 20 - Second Order Systems - Part 2

Lecture 21 - Controllers - Part 1

Lecture 22 - Controllers - Part 2

Lecture 23 - Closed Loop Control - Part 1

Lecture 24 - Closed Loop Control - Part 2

Lecture 25 - Routh's Stabilty Criterion - Part 1

Lecture 26 - Routh's Stabilty Criterion - Part 2

Lecture 27 - Special Cases of Routh's Stability Criterion - Part 1

Lecture 28 - Special Cases of Routh's Stability Criterion - Part 2

Lecture 29 - Performance Specifications - Part 1

Lecture 30 - Performance Specifications - Part 2

Lecture 31 - Steady State Error Analysis - Part 1

Lecture 32 - Steady State Error Analysis - Part 2

Lecture 33 - Root Locus 1 - Part 1

Lecture 34 - Root Locus 1 - Part 2

Lecture 35 - Root Locus 2 - Part 1

Lecture 36 - Root Locus 2 - Part 2

Lecture 37 - Root Locus 3 - Part 1

Lecture 38 - Root Locus 3 - Part 2

Lecture 39 - Root Locus 4 - Part 1

Lecture 40 - Root Locus 4 - Part 2

Lecture 26 - PRA-Introduction

Lecture 27 - PRA-Organizational and Quality Aspects

Lecture 28 - PRA-Qualitative Modeling and Analysis

Lecture 29 - PRA-Quantification of the PRA model

Lecture 30 - Monte Carlo Simulation, Root Cause Analysis

Lecture 31 - Low Power and Shutdown PRA

Lecture 32 - Internal Flood PRA

Lecture 33 - Level 1 Fire PRA

Lecture 34 - Seismic PRA

Lecture 35 - Level 2 and Level 3 PRA

Lecture 36 - Human Reliability- Introduction

Lecture 37 - State of the Art in Human-Reliability

Lecture 38 - Technique for Human Error Rate Prediction (THERP)

Lecture 39 - Human Cognitive Reliability (HCR) Method

Lecture 40 - CQB - Method Consciousness, Cognition, Conscience and Brain

Lecture 41 - Uncertainty - Introduction

Lecture 42 - Uncertainty: Overview, preliminary discussions considering selected approaches

Lecture 43 - Parametric Approach to Uncertainty

Lecture 44 - Uncertainty Modelling using Fuzzy Approach in RBE

Lecture 45 - Uncertainty â€“ Bayesian, and Monte-Carlo technique

Lecture 46 - Scope of Course and Introduction

Lecture 47 - PoF and FMMECA

Lecture 48 - Failure Mechanism and Models

Lecture 49 - Virtual Qualification

Lecture 50 - Physical qualification and Prognostics

Lecture 51 - PHM Introduction

Lecture 52 - Prognostics and Health Management in RBE

Lecture 53 - Major AI and ML Techniques and Algorithms in PHM

Lecture 54 - Role of ANN technique in RUL Estimation

Lecture 55 - Uncertanity Management in PHM

Lecture 56 - RBE-Introduction

Lecture 57 - RBE for Life Extension in support of regulatory relicensing

Lecture 58 - RBE-Risk Monitor

Lecture 59 - RBE-Inservice-Inspection

Lecture 60 - RB Operator Support System

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Introduction to Japanese Language and Culture (General)

Co-ordinators : Mrs. Vatsala Misra

Lecture 1 - Introduction to Japanese scripts

Lecture 2 - Jiko shoukai (Self introduction)

Lecture 3 - Dochira kara desu ka (Where are you from?)

Lecture 4 - Senmon wa nan desu ka (What is your specialization?)

Lecture 5 - Kore wa hon desu (This is a book)

Lecture 6 - Ikura desu ka (How much is it?)

Lecture 7 - Ima nan-ji desu ka (What is the time now?)

Lecture 8 - Kaigi wa roku-ji-han kara desu (The meeting is from 6:30)

Lecture 9 - Ashita Tokyo e ikimasu. (I will go to Tokyo tomorrow)

Lecture 10 - Watashi wa mainichi roku-ji ni okimasu (I wake up at 6â€™oclock everyday)

Lecture 11 - Itsu Kanpur e kimashita ka (When did you come to Kanpur?)

Lecture 12 - Y?binkyoku wa asoko ni arimasu (The post office is over there)

Lecture 13 - Rao san wa doko ni imasu ka (Where is Mr. Rao?)

Lecture 14 - Pikuniku e ikimash? (Letâ€™s go for a picnic)

Lecture 15 - Kesa pan to tamago o tabemashita (I ate eggs and bread for breakfast)

Lecture 16 - Depa-to no tonari no biru wa gink? desu (The building next to the department store is the bank)

Lecture 17 - Taj hoteru wa ookii hoteru desu(Hotel Taj is a big hotel)

Lecture 18 - Hoteru de nani o tabemashita ka (What did you eat at the hotel?)

Lecture 19 - Tokyo wa ?kikute kirei desu (Tokyo is big and beautiful)

Lecture 20 - Ko-hi- wa oishiku arimasen(Coffee is not tasty)

Lecture 21 - Hantai kotoba (Opposites)

Lecture 22 - Watashi wa mainichi miruku o nomimasu (I drink milk everyday)

Lecture 23 - Watashi wa oniisan ni kamera o moratta(I received a camera from my brother)

Lecture 24 - Nani o tabetai desu ka(What do you want to eat?)

Lecture 25 - Nani o sashiagemasu ka (Giving and Receiving)

Lecture 26 - Sensei wa watashi ni hon o kuremashita (My teacher gave me a book)

Lecture 27 - Chotto matte kudasai (Just a minute please)

Lecture 28 - Ke-ki o tabete mite kudasai (Eat and see how is the cake)

Lecture 29 - Nani o shite imasu ka(What are you doing?)

Lecture 30 - Tokyo ni sunde imasu (I live in Tokyo)

Lecture 31 - Kanji ga kakemasu (I can write Kanji)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Im?to wa ningy? o hoshigatte imasu (My sister wants a doll)

Lecture 33 - Aisukuri-mu ga ke-ki yori suki desu (I like ice-cream more than cakes)

Lecture 34 - Kutsu o kai ni ikimasu (I am going to buy shoes)

Lecture 35 - Ashita motto atsuku narimasu (It is going to become very hot tomorrow)

Lecture 36 - Rainen Tokyo e iku to omoimasu (I think I will go to Tokyo next year)

Lecture 37 - Pen de kaite mo ii desu ka(Is it alright to write in pen?)

Lecture 38 - Comprehensions and Expressions

Lecture 39 - Basic Kanji

Lecture 40 - Basic Kanji

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Astronomy in Ancient, Medieval and Early Telescopic Era of India (General)

Co-ordinators : Prof. Amitabha Ghosh

Lecture 1 - Introduction

Lecture 2 - Pre Siddhantic Astronomy

Lecture 3 - Siddhantic Astronomy

Lecture 4 - Astronomy in Medieval India

Lecture 5 - Introduction to Telescopic Astronomy and Concluding remarks

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Carbon Accounting and Sustainable Designs in Product Lifecycle Management (General)

Co-ordinators : Prof. Amandeep Singh Oberoi, Prof. Deepu Philip, Prof. Prabal Pratap Singh

Lecture 1 - Productivity and Sustainability - Part 1

Lecture 2 - Measuring Productivity

Lecture 3 - Measures Affecting Productivity

Lecture 4 - Productivity and Sustainability - Part 2

Lecture 5 - Environmental Management system

Lecture 6 - Green System

Lecture 7 - Carbon Footprint

Lecture 8 - Carbon Credit Trading

Lecture 9 - Industrial Ecology and Carbon Footprint

Lecture 10 - Examples of Carbon Footprint Calculations

Lecture 11 - Examples of Carbon Footprint Calculations

Lecture 12 - Some More Green Thoughts and Footprints

Lecture 13 - Green Manufacturing

Lecture 14 - Partnership for a New Generation of Vehicles (PNGV)

Lecture 15 - Smart Design and Engineering

Lecture 16 - Road to Product Lifecycle Management - Part 1

Lecture 17 - Road to Product Lifecycle Management - Part 2

Lecture 18 - Road to Product Lifecycle Management - Part 3

Lecture 19 - Sustainability and Green Supply Chain - Part 1

Lecture 20 - Sustainability and Green Supply Chain - Part 2

Lecture 21 - Energy Transformations

Lecture 22 - PLM Components and levels - Part 1

Lecture 23 - PLM Components and levels - Part 2

Lecture 24 - PLM integration - Part 1

Lecture 25 - PLM integration - Part 2

Lecture 26 - Facility carbon accounting

Lecture 27 - Activities of emission - Part 1

Lecture 28 - Activities of emission - Part 2

Lecture 29 - Carbon and business data - Part 1

Lecture 30 - Carbon and business data - Part 2

Lecture 62 - Characterisation of materials - III

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Contemporary Issues in Philosophy of Mind and Cognition (Humanities and Social Sciences)

Co-ordinators : Dr. Rajakishore Nath, Dr. Ranjan K. Panda

Lecture 1 - Introduction

Lecture 2 - Transcendental Consciousness

Lecture 3 - Plato's Theory of Mind

Lecture 4 - Parable of Cave : Plato's

Lecture 5 - Aristotle's Concept Mind

Lecture 6 - The Concept of Mind in Upanishadas

Lecture 7 - Dualism - I

Lecture 8 - Dualism - II

Lecture 9 - Dualism - III

Lecture 10 - Against Dualism

Lecture 11 - Property Dualism

Lecture 12 - Varieties of Materialism

Lecture 13 - Mind-Body Identity Theory

Lecture 14 - Functionalism

Lecture 15 - Different Models of Cognitive Mind

Lecture 16 - Connectionism and Folk - Psychology

Lecture 17 - Representation - I

Lecture 18 - Representation - II

Lecture 19 - Artificial Intelligence - I

Lecture 20 - Artificial Intelligence - II

Lecture 21 - Artificial Intelligence - III

Lecture 22 - The Limit of Artificial Intelligence - I

Lecture 23 - The Limit of Artificial Intelligence - II

Lecture 24 - Biological Naturalism

Lecture 25 - The Concept of Intentionality

Lecture 26 - The Structure of Consciousness - I

Lecture 27 - The Structure of Consciousness - II

Lecture 28 - Phenomenal Consciousness - I

Lecture 29 - Phenomenal Consciousness - II

Lecture 30 - Language, Representation & Meaning - I

Lecture 31 - Language & Meaning - II

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Language & Mind

Lecture 33 - Language & World - I

Lecture 34 - Language & World - II

Lecture 35 - Emergentism & Supervenience

Lecture 36 - Reduction & Realization - I

Lecture 37 - Reduction & Realization - II

Lecture 38 - The Cartesian Mind Revisited

Lecture 39 - Personal Identity - I

Lecture 40 - Personal Identity - II

Lecture 41 - Creativity : Human Vs Machine - I

Lecture 42 - Creativity : Human Vs Machine - II

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Understanding Creativity and Creative Writing (Humanities and Social Sciences)

Co-ordinators : Prof. Neelima Talwar

Lecture 1 - Overview

Lecture 2 - In Conversation with Richard Schechner

Lecture 3 - Multilingual Plurality: Our Environment - Part I

Lecture 4 - Multilingual Plurality: Our Environment - Part II

Lecture 5 - Interplay of Languages and Forms of Writing - Part I

Lecture 6 - Interplay of Languages and Forms of Writing - Part II

Lecture 7 - Creativity and Cultures

Lecture 8 - Notion of Play and The Three Domain Activities

Lecture 9 - Theory of Enjoyment: Critical Assessment

Lecture 10 - Divergences and Convergences - Part I

Lecture 11 - Divergences and Convergences - Part II

Lecture 12 - Creative and Cultural Spaces for Students

Lecture 13 - Being and Doing: Writing as Performance

Lecture 14 - Writers and Writing: The Dialogic Process

Lecture 15 - Creativity, Writing, Creative Writing: Recent Viewpoints

Lecture 16 - Issues Related to the Teaching of Creative Writing

Lecture 17 - Writers on Writing: Albert Camus

Lecture 18 - Critical Reading of Great Writers: Albert Camus

Lecture 19 - Critical Reading of Important Writers: Margaret Atwood

Lecture 20 - Reading and Writing

Lecture 21 - Indian Writing: Writers/Narrators

Lecture 22 - Contemporary Indian Writers: The Search for Creativity - Part I

Lecture 23 - Contemporary Indian Writers: The Search for Creativity - Part II

Lecture 24 - Mosaic Patterns: Module 2

Lecture 25 - Introduction to Drama

Lecture 26 - Performance and Script Writing: Mime

Lecture 27 - Western Classical Theory

Lecture 28 - Student Response - I

Lecture 29 - Indian Drama: Classical Theory and Practice

Lecture 30 - Interacting Continuum: Classical, Folk and Modern Drama

Lecture 31 - From The Perspective of Playwriting: Monologue

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - From The Playwright's Perspective - Part I

Lecture 33 - From The Playwright's Perspective - Part II

Lecture 34 - From The Perspective of Playwriting: Anton Chekhov

Lecture 35 - Drama in the Classroom: Experience and Writing

Lecture 36 - Student Response - II

Lecture 37 - Performative Reading of the Cherry Orchard

Lecture 38 - Short Story as a Genre

Lecture 39 - Short Stories by Indian Women Writers

Lecture 40 - Modern Western Short Story

Lecture 41 - Varieties of Writing Processes

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Energy Resources, Economics and Environment (Humanities and Social Sciences)

Co-ordinators : Prof. Rangan Banerjee

Lecture 1 - Energy Flow Diagram

Lecture 2 - Global Trends in Energy Use

Lecture 3 - Energy Use in India: Some Calculations

Lecture 4 - Energy and Environment

Lecture 5 - The Kaya Identity

Lecture 6 - Emission Factor

Lecture 7 - Energy and Quality of Life

Lecture 8 - Energy Inequality

Lecture 9 - Energy Security

Lecture 10 - Introduction to Country Energy Balance assignment

Lecture 11 - Energy balance of Japan

Lecture 12 - Energy balance of Australia

Lecture 13 - Energy balance of Mexico

Lecture 14 - Energy Economics - Part 1

Lecture 15 - Energy Economics - Part 2

Lecture 16 - Energy Economics - Part 3

Lecture 17 - Energy Economics - Tutorial

Lecture 18 - Energy resources - Part 1

Lecture 19 - Energy resources - Part 2

Lecture 20 - Renewable Energy Sources - Part 1

Lecture 21 - Renewable Energy Sources - Part 2

Lecture 22 - Materials for Energy

Lecture 23 - Non Renewable Resource Economics - Part 1

Lecture 24 - Non Renewable Resource Economics - Part 2

Lecture 25 - Non Renewable Resource Economics - Part 3

Lecture 26 - Preferences and Utility

Lecture 27 - Utility and Social Choice - Part 1

Lecture 28 - Utility and Social Choice - Part 2

Lecture 29 - Utility and Social Choice - Part 3

Lecture 30 - Utility and Social Choice - Part 4

Lecture 31 - Revision Paper-1 - Part 1

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Public and Private Good/Bads

Lecture 33 - Aggregation of Demand Curves

Lecture 34 - Externalities

Lecture 35 - Revision Paper-1 - Part 2

Lecture 36 - Revision paper-1 - Part 3

Lecture 37 - Energy Project Financing - Part 1

Lecture 38 - Energy Project Financing - Part 2

Lecture 39 - Energy Project Financing - Tutorial

Lecture 40 - Input Output Analysis - Part 1

Lecture 41 - Input Output Analysis - Part 2

Lecture 42 - Input Output Analysis - Part 3

Lecture 43 - Input Output Analysis - Tutorial

Lecture 44 - Primary Energy Analysis - Part 1

Lecture 45 - Primary Energy Analysis - Part 2

Lecture 46 - Net Energy Analysis - Part 1

Lecture 47 - Net Energy Analysis - Part 2

Lecture 48 - Net Energy Analysis - Part 3

Lecture 49 - Net Energy Analysis - Part 4

Lecture 50 - Energy Policy - Part 1

Lecture 51 - Energy Policy - Part 2

Lecture 52 - Energy Policy Examples - Part 1

Lecture 53 - Energy Policy Examples - Part 2

Lecture 54 - Revision Paper-2 - Part 1

Lecture 55 - Revision Paper-2 - Part 2

Lecture 56 - Future Energy Systems

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Paninian Grammar (Humanities and Social Sciences)

Co-ordinators : Prof. Malhar Kulkarni

Lecture 1 - Aims and objectives of the course

Lecture 2 - Systemic and Textual approaches to study PÄá¹‡inian grammar

Lecture 3 - PÄá¹‡ini and his linguistic background

Lecture 4 - Scholars and texts in the PÄá¹‡inian grammatical tradition and their contribution

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Basic Concepts of Modal Logic (Humanities and Social Sciences)

Co-ordinators : Dr. A.V. Ravishankar Sarma

Lecture 1 - What is logic? General Introduction

Lecture 2 - Propositional Logic : Syntax

Lecture 3 - Propositional Logic : Semantics

Lecture 4 - Semantic Tableaux Method for Propositional Logic: General Examples

Lecture 5 - Semantic Tableaux Method : Some Puzzles

Lecture 6 - Semantic Tableaux Method-3: More puzzles

Lecture 7 - Limitations of Classical Logic

Lecture 8 - Origin of Modal Logic : Historical Survey

Lecture 9 - Origin of Modal Logic : Strict Implication

Lecture 10 - Strict Implication

Lecture 11 - Strict Implication : Examples

Lecture 12 - Language of Normal Modal Logic

Lecture 13 - Language of Modal Logic, Modal Sentences - 1

Lecture 14 - Language of Modal Logic 2 : Syntax

Lecture 15 - Axiomatic Modal Logic : Some Proofs

Lecture 16 - Semantics of Modal Logic : Relational Structures

Lecture 17 - Kripke semantics for Modal Logic systems

Lecture 18 - Kripke semantics for Modal Logic : Some Examples

Lecture 19 - Kripke Semantics for Modal Logic : Examples

Lecture 20 - Semantic Tableaux method - I

Lecture 21 - Semantic Tableaux method - II

Lecture 22 - Possible worlds and Modal realism

Lecture 23 - Conditional logic introduction

Lecture 24 - Conditional logic C

Lecture 25 - Conditional logics: C, C+, S, C1, C2 and conclusion

NPTEL : NOC:Introduction to Psychology (Humanities and Social Sciences)

Co-ordinators : Braj Bhushan

Lecture 1 - Major Areas of Psychology

Lecture 2 - Major Milestones in Psychology

Lecture 3 - Methods in Psychology

Lecture 4 - Schools of thoughts in Psychology

Lecture 5 - Sensory Mechanisms

Lecture 6 - External Factors in Perception

Lecture 7 - Theory of Signal Detection

Lecture 8 - Gestalt Principles

Lecture 9 - Form Perception

Lecture 10 - Role of Culture in Perception

Lecture 11 - Basic Concepts of Learning

Lecture 12 - Classical Conditioning

Lecture 13 - Concepts and Applications of Classical Conditioning

Lecture 14 - Operant Conditioning

Lecture 15 - Observational Learning

Lecture 16 - Cognitive Learning

Lecture 17 - Models of Memory

Lecture 18 - Short Term Memory - Storage and Retention

Lecture 19 - Long Term Memory - Episodic Memory

Lecture 20 - Long Term Memory - Autobiographical and Semantic Memory

Lecture 21 - Long Term Memory - Procedural Memory

Lecture 22 - Forgetting

Lecture 23 - Theories of Emotion - 1

Lecture 24 - Theories of Emotion - 2

Lecture 25 - Basic Emotions

Lecture 26 - Culture and Emotions

Lecture 27 - Musculature Analysis of Facial Expressions

Lecture 28 - Biological Basis of Emotion

Lecture 29 - Nature vs Nurture

Lecture 30 - Behavioural Genetics - I

Lecture 31 - Behavioural Genetics - II

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Intelligence

Lecture 33 - Aptitude

Lecture 34 - Various Perspectives of Personality

Lecture 35 - Neo Freudian and Behaviourist Perspective

Lecture 36 - Behaviourist and Humanistic Perspective

Lecture 37 - Indian Perspective of Personality and Assessment of Personality

Lecture 38 - Psychometric tests of Personality Assessment

Lecture 39 - Lab Session 1

Lecture 40 - Lab Session 2

Lecture 41 - Lab Session 3

Lecture 42 - Lab Session 4

Lecture 43 - Lab Session 5

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Folk and Minor Art in India (Humanities and Social Sciences)

Co-ordinators : Dr. Shatarupa Thakurta Roy

Lecture 1 - Changing Definition of Folk and Minor Art

Lecture 2 - Timelines and Regions: General Mapping

Lecture 3 - Traditional Roots: Elements and Principles

Lecture 4 - Timelessness: Primitive Connection

Lecture 5 - Evolution in Purpose: Ritualistic to Propagative

Lecture 6 - Contemporary Practice

Lecture 7 - Classification and Connections: Traditional Roots

Lecture 8 - Early Literary Resources

Lecture 9 - Mythical Associations

Lecture 10 - Idea of Nationalism and Modernism in the Context of Folk Art-I and II

Lecture 11 - Relevance of the Art Practice

Lecture 12 - Contextualization and Decontextualization

Lecture 13 - Concept of Communication for Social Purpose

Lecture 14 - Aesthetic Perspective

Lecture 15 - Secularity and Religious Plurality

Lecture 16 - Ethnographic perspective on the study of Folk Art and Culture

Lecture 17 - About the Exponents who brought the culture under the Limelight

Lecture 18 - Commonality and Congruity in the Diverse Content of Art

Lecture 19 - School of Art in Madhubani Painting

Lecture 20 - Art as a Feminine Preserve vs the Male painters of Madhubani

Lecture 21 - Yamapata, Pytkar and other art practice of Jharkhand: Yamapata by the Jadopatias, Sohari Painters and their Art

Lecture 22 - Patachitra of Bengal

Lecture 23 - Patachitra of Odisha

Lecture 24 - Continuum of the Practice: Ancient Centres, Contemporary Scenario, Method and Material - 1

Lecture 25 - Continuum of the Practice: Ancient Centres, Contemporary Scenario, Method and Material - 2

Lecture 26 - Continuum of the Practice: Ancient Centres, Contemporary Scenario, Method and Material - 3

Lecture 27 - Case study-1 : Gond Art

Lecture 28 - Case study-2 : Bengal Patachitra

Lecture 29 - Case study-3 : Madhubani Paintings

Lecture 30 - Characteristics of Contemporary Collection - Semiotic Analysis

Lecture 31 - Characteristics of Contemporary Collection - Thematic and Iconic Analysis

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Characteristics of Contemporary Collection of Indian Folk and Minor Art

Lecture 33 - Thematic Change in Contemporary Collection of Indian Folk and Minor Art

Lecture 34 - Individual Expression in Contemporary Collection of Indian Folk and Minor Art

Lecture 35 - Cultural Condition: Colonial and Postcolonial Bengal - Part I

Lecture 36 - Cultural Condition: Colonial and Postcolonial Bengal - Part II

Lecture 37 - Contextualizing Folk idiom - Part I

Lecture 38 - Contextualizing Folk idiom - Part II

Lecture 39 - Contextualizing Folk idiom - Part III

Lecture 40 - Coexistence and Collaborations with Mainstream Art

Lecture 41 - Alternative Context: Place of Folk Art in Contemporary Lifestyle

Lecture 42 - Need of Paradigm Shift - I

Lecture 43 - Need of Paradigm Shift - II

Lecture 44 - Endnote

NPTEL : NOC:Developing Soft Skills and Personality (Humanities and Social Sciences)

Co-ordinators : Dr. T. Ravichandran

Lecture 1 - Introduction: A New Approach to Learning

Lecture 2 - Planning and Goal-Setting

Lecture 3 - Human Perceptions: Understanding People

Lecture 4 - Types of Soft Skills: Self-Management Skills

Lecture 5 - Aiming for Excellence: Developing Potential and Self-Actualisation

Lecture 6 - Need Achievement and Spiritual Intelligence

Lecture 7 - Conflict Resolution Skills: Seeking Win-Win Solution

Lecture 8 - Inter-Personal Conflicts: Two Examples

Lecture 9 - Inter-Personal Conflicts: Two Solutions

Lecture 10 - Types of Conflicts: Becoming a Conflict Resolution Expert

Lecture 11 - Types of Stress: Self-Awareness About Stress

Lecture 12 - Regulating Stress: Making the best out of Stress

Lecture 13 - Habits: Guiding Principles

Lecture 14 - Habits: Identifying Good and Bad Habits

Lecture 15 - Habits: Habit Cycle

Lecture 16 - Breaking Bad Habits

Lecture 17 - Using the Zeigarnik Effect for Productivity and Personal Growth

Lecture 18 - Forming Habits of Success

Lecture 19 - Communication: Significance of Listening

Lecture 20 - Communication: Active Listening

Lecture 21 - Communication: Barriers to Active Listening

Lecture 22 - Telephone Communication: Basic Telephone Skills

Lecture 23 - Telephone Communication: Advanced Telephone Skills

Lecture 24 - Telephone Communication: Essential Telephone Skills

Lecture 25 - Technology and Communication: Technological Personality?

Lecture 26 - Technology and Communication: Mobile Personality?

Lecture 27 - Topic: Technology and Communication: E-Mail Principles

Lecture 28 - Technology and Communication: How not to Send E-Mails!

Lecture 29 - Technology and Communication: Netiquette

Lecture 30 - Technology and Communication: E-Mail Etiquette

Lecture 31 - Communication Skills: Effective Communication1

Lecture 32 - Barriers to Communication: Arising out of Sender / ReceiverÂ's Personality

Lecture 33 - Barriers to Communication: Interpersonal Transactions

Lecture 34 - Barriers To Communication: Miscommunication

Lecture 35 - Non-Verbal Communication: Pre-Thinking Assessment - 1

Lecture 36 - Non-Verbal Communication: Pre-Thinking Assessment - 2

Lecture 37 - Nonverbal Communication: Introduction and Importance

Lecture 38 - Non-Verbal Communication: Issues and Types

Lecture 39 - Non-Verbal Communication: Basics and Universals

Lecture 40 - Non-Verbal Communication: Interpreting Non-Verbal Cues

Lecture 41 - Body Language: For Interviews

Lecture 42 - Body Language: For Group Discussions

Lecture 43 - Lecture 43

Lecture 44 - Presentation Skills: Becoming a Professional

Lecture 45 - Presentation Skills: The Role of Body Language

Lecture 46 - Presentation Skills: Using Visuals

Lecture 47 - Reading Skills: Effective Reading

Lecture 48 - Human Relations: Developing Trust and Integrity

Lecture 8 - Multimedia Presentation : Understanding the Basics

Lecture 9 - Communication Styles

Lecture 10 - Speaking in Groups

Lecture 11 - The World of Visual Culture I

Lecture 12 - Visual Perception

Lecture 13 - The Aural : Its relevance and Impact

Lecture 14 - The Body and the Way It Communicates

Lecture 15 - The Face, Its Expressions and What It Says

Lecture 16 - Building Relationships

Lecture 17 - Understanding Group Dynamics - I

Lecture 18 - Understanding Group Dynamics - II

Lecture 19 - Groups, Conflicts and their Resolution

Lecture 20 - Social Network, Media and Extending Our Identity

Lecture 21 - How Emotionally Mature Are You

Lecture 22 - Improving Your Emotional Intelligence

Lecture 23 - Empathy

Lecture 24 - Intrapersonal Communication

Lecture 25 - Change Tolerance

Lecture 26 - Creativity : What Does It Mean

Lecture 27 - Creativity : A Detailed Exploration

Lecture 28 - Creativity : Activities Applied

Lecture 29 - Creativity at Workplace

Lecture 30 - Creativity, Critical Thinking and Problem Solving

Lecture 31 - Motivating Oneself

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - The Art of Persuasion - I

Lecture 33 - The Art of Persuasion - II

Lecture 34 - From Persuasion to Negotiation

Lecture 35 - Leadership and Motivating Others

Lecture 36 - Managing Time

Lecture 37 - Managing Stress

Lecture 38 - Resilience

Lecture 39 - Work - Life Balance

Lecture 40 - Applying Soft Skills to Workplace

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Symbolic Logic (Humanities and Social Sciences)

Co-ordinators : Prof. Chhanda Chakraborti

Lecture 1 - Introduction

Lecture 2 - Propositions, Arguments, Components, Basic Characteristics

Lecture 3 - Recognizing arguments, Diagramming logic flow

Lecture 4 - Types of arguments, Deductive, Inductive, different norms to assess arguments

Lecture 5 - Concepts of Validity Soundness, Consistency

Lecture 6 - History of Symbolic Language

Lecture 7 - Propositional Logic: Syntax

Lecture 8 - Connectives, Scope of Connectives

Lecture 9 - Truth-functional Connectives, Propositional Variables, Propositional Constants

Lecture 10 - Symbolization with Connectives

Lecture 11 - Propositional Logic: Semantics Basics of a Truth Table

Lecture 12 - Using Truth Table: Tautology, Contradiction, Contingent Propositions

Lecture 13 - Using Truth Table: Testing Arguments for Validity and Invalidity

Lecture 14 - Shorter Truth Table

Lecture 15 - Using Truth Table: Testing a Set of Propositions for consistency and inconsistency, and for logical equivalence

Lecture 16 - Introduction to Truth Trees

Lecture 17 - Truth Tree Rules and their Application

Lecture 18 - More on Truth-Tree Recovery of Partial Truth - Values

Lecture 19 - Using the Truth Trees

Lecture 20 - More on Truth Trees

Lecture 21 - Formal Proof of Validity

Lecture 22 - Valid Argument Forms:

Lecture 23 - How to Apply the Rules of Inference in a Proof

Lecture 24 - Understanding the Rules

Lecture 25 - Proofs with All Rules

Lecture 26 - Completeness : What it is

Lecture 27 - Indirect Proof

Lecture 28 - Conditional Proof

Lecture 29 - More on Conditional Proof

Lecture 30 - More on Derivations

Lecture 31 - Limitation of Propositional Logic

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Basic 4 Types of Categorical Propositions

Lecture 33 - Understanding Logical Relations in Standard Form Categorical Propositions

Lecture 34 - Translating Non-Standard Propositions into Standard Form Categorical Propositions

Lecture 35 - Validity and Invalidity of Syllogisms

Lecture 36 - First Order Predicate Logic

Lecture 37 - Quantifiers

Lecture 38 - Scope of a Quantifier Edit Lesson

Lecture 39 - Multiple Quantifiers

Lecture 40 - Understanding Overlapping Quantifiers Sharing Predicates and Scope

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction on Intellectual Property to Engineers and Technologists (Humanities and Social Sciences)

Co-ordinators : Prof. Tapas Kumar Bandyopadhyay

Lecture 1 - Basic of Intellectual Property

Lecture 2 - Introduction to Law

Lecture 3 - Theories of IP

Lecture 4 - Different Forms of IP

Lecture 5 - Different Forms of IP and Applicability of Theory

Lecture 6 - Patent Basic

Lecture 7 - Patent Ability Criteria

Lecture 8 - Non-Patentable Invention

Lecture 9 - Prier-Art Search

Lecture 10 - Patent Filing Procedure

Lecture 11 - Patent Prosecution

Lecture 12 - Patent Prosecution (Continued...)

Lecture 13 - International Patent

Lecture 14 - Patent Infringement

Lecture 15 - Patent Management

Lecture 16 - Utility Model Protection

Lecture 17 - Copyright Basic

Lecture 18 - Copy Right Registration

Lecture 19 - Copyright Infringement and Fair Use

Lecture 20 - Copyright in Digital Media

Lecture 21 - Industrial Design Basic

Lecture 22 - Industrial Design Registration

Lecture 23 - Utility Patent Vs Industrial Design

Lecture 24 - Trademark Basic

Lecture 25 - Trademark Registration

Lecture 26 - Tradmark and Internet

Lecture 27 - Certification Mark and Collective Mark

Lecture 28 - Geographical Indication

Lecture 29 - Economics of GI Edit Lesson

Lecture 30 - Trademark Vs GI Trademark Managment

Lecture 31 - IC Layout Design and Basic

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - IC Layout Design Registration

Lecture 33 - Trade- Secret and Basic

Lecture 34 - Trade-Secret Protection

Lecture 35 - Patent Vs Trade-Secret

Lecture 36 - Plant Variety Protection

Lecture 37 - Bio-diversity

Lecture 38 - Comparative Analysis

Lecture 39 - IP Management

Lecture 40 - Case - Study on IP Management

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Globalization and Culture (Humanities and Social Sciences)

Co-ordinators : Prof. Anjali Gera Roy

Lecture 1 - Globalization Definition

Lecture 2 - Global Flows and New Media and Technologies

Lecture 3 - Globalization and Nation

Lecture 4 - Rise of Global Capitalism

Lecture 5 - Cultural Imperialism

Lecture 6 - Global Monocultures

Lecture 7 - Birth of Asian Kool

Lecture 8 - Bhangra Reinvention

Lecture 9 - Disorienting Bhangra

Lecture 10 - The Body of Dance

Lecture 11 - World Music I - Tabla

Lecture 12 - World Music II - Qawwali

Lecture 13 - World Music III - Baul

Lecture 14 - Is Chutney the New Rage

Lecture 15 - Bollywood Song and Dance

Lecture 16 - Planet Bollywood

Lecture 17 - Bollywood at Large

Lecture 18 - Bollywood Assemblages - Part I

Lecture 19 - Bollywood Assemblages - Part II

Lecture 20 - Bollywood's Soft Power

Lecture 21 - Travels of Dastan

Lecture 22 - Scripting the Nation

Lecture 23 - Cracking the Nation

Lecture 24 - Narrating and Interrogating the Nation

Lecture 25 - Cosmopolitans the Borderless World

Lecture 26 - Orientalism

Lecture 27 - Yoga, Meditation, Gurus

Lecture 28 - Beatles, Ravi Shankar and Sitar

Lecture 29 - Orientalizing India

Lecture 30 - Neoorientalism

Lecture 31 - The Birth of Indo-Chic

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Henna, Bindi, Saris and Bangles

Lecture 33 - The Taste of Curry

Lecture 34 - Global News

Lecture 35 - News as Infortainment

Lecture 36 - Global Media Cultures

Lecture 37 - Cultural Imperialism

Lecture 38 - Contraflows in Global Media

Lecture 39 - Contraflows in News and Entertainment

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 20 - Third person pronouns and nouns (m/n/f) in the dual - Part 2

Lecture 21 - Third person pronouns and nouns (m/n/f) in the dual - Part 3

Lecture 22 - Third person pronouns and nouns (m/n/f) in the dual - Part 4

Lecture 23 - Third person pronouns and nouns (m/n/f) in the dual - Part 5

Lecture 24 - Revision of the third person pronouns and nouns (m/n) in the dual - Part 1

Lecture 25 - Revision of the third person pronouns and nouns (f) in the dual - Part 2

Lecture 26 - Introduction to the verb conjugations in the kriyÄtipatti-lá¹›á¹… (the conditional)

Lecture 27 - Introduction to the verb conjugations in the vidhi-liá¹… (the optative)

Lecture 28 - Introduction to the conjugation of â€˜asâ€™ (to be) from the adÄdigaá¹‡a (2nd group) in the various tenses and moods

Lecture 29 - Introduction to the conjugation of the verb â€˜dÄâ€™ (to give) from the juhotyÄdigaá¹‡a (3rd group) in the various tenses and moods

Lecture 30 - Introduction to the conjugation of the verb â€˜divâ€™ (to shine, to sport) and â€˜vidâ€™ (to know) from the divÄdigaá¹‡a (4th group)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Introduction to the conjugation of the verb â€˜Å›ruâ€™ (to hear) from the svÄdigaá¹‡a (5th group) in the various tenses and moods

Lecture 32 - Introduction to the conjugation of the verb from the ká¹› (to do) from the tanÄdigaá¹‡a (8th group) in the various tenses and moods

Lecture 33 - Introduction to the conjugation of the verb 'mil' (to meet) from the tudÄdigaá¹‡a (6th group) in the various tenses and moods

Lecture 34 - Introduction to the conjugation of the verb 'bhuj' (to protect) from the rudhÄdigaá¹‡a (7th group) in the various tenses and moods

Lecture 35 - Introduction to the conjugation of the verb â€˜jÃ±Äâ€™ (to know) from the kryÄdigaá¹‡a (9th group) in the various tenses and moods

Lecture 36 - Introduction of nouns (m) ending with â€˜uâ€™ and â€˜iâ€™ in the three vacanas

Lecture 37 - Introduction of nouns (n) ending with â€˜uâ€™ and â€˜iâ€™ in the three vacanas

Lecture 38 - Introduction of nouns (f) ending with â€˜uâ€™ and â€˜iâ€™ in the three vacanas

Lecture 39 - Introduction of nouns (m) ending with â€˜inâ€™ and of nouns (n/f) ending with â€˜nâ€™ in the three vacanas

Lecture 40 - Introduction of nouns (m/n/f) ending with â€˜tâ€™ in the three vacanas

Lecture 41 - Introduction of nouns (m/f/n) ending with â€˜á¹›â€™ in the three vacanas

Lecture 42 - Introduction to the svarasandhi

Lecture 43 - Introduction to the visargasandhi

Lecture 44 - Introduction to the vyaÃ±janasandhi

Lecture 45 - Summary and Conclusion

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Entrepreneurship and IP strategy (Humanities and Social Sciences)

Co-ordinators : Prof. Gouri Gargate

Lecture 1 - Introduction

Lecture 2 - What is an entrepreneurship ?

Lecture 3 - What do you understand by IP ?

Lecture 4 - Whether entrepreneurship and IP related? What is role of IP straegy in entrepreneurship?

Lecture 5 - Case study I - IT industry

Lecture 6 - Innovation, invention and creativity

Lecture 7 - Types of innovation

Lecture 8 - Innovation, market and IP

Lecture 9 - Open innovation and IP

Lecture 10 - Case Study II - Biotechnology

Lecture 11 - Trademark - Definition

Lecture 12 - Trademark - Types

Lecture 13 - Trademark - Registration

Lecture 14 - Trademark infringement

Lecture 15 - Case study III - Textile industry

Lecture 16 - Patent - introduction

Lecture 17 - Patent infringement

Lecture 18 - Patent strategies - I

Lecture 19 - Patent strategies - II

Lecture 20 - Capsule version

Lecture 21 - Copyright - Definition and subject matter

Lecture 22 - Copyright and related rights

Lecture 23 - Copyright registration and entrepreneurship

Lecture 24 - Copyright infringement

Lecture 25 - Case study IV - Film industry

Lecture 26 - Industrial Design- Definition, concept

Lecture 27 - Industrial Designs Act - Key features

Lecture 28 - Industrial Design-Business

Lecture 29 - Industrial Design infringement

Lecture 30 - Case study V - Automobile industry

Lecture 31 - IP strategy for start-up and MSME

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - IP transaction - introduction

Lecture 33 - IP valuation, bank loan, insurance

Lecture 34 - Success story and business model of a few start-ups

Lecture 35 - Case Study VI - Agriculture

Lecture 36 - Incubators, research parks

Lecture 37 - Various Government policies

Lecture 38 - Various Government policies

Lecture 39 - Capsule revision

Lecture 40 - Am I ready to venture my start up? (Course applicability)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Urbanization and Environment (Humanities and Social Sciences)

Co-ordinators : Prof. Jenia Mukherjee

Lecture 33 - Historical Urban Political Ecology (HUPE): Blue Infrastructures of Kolkata

Lecture 34 - Urban Environmentalisms

Lecture 35 - Urban Environmentalisms: Case Study 1: The Adi Ganga Bachao Andolan

Lecture 36 - Urban Environmentalisms: Case Study 2: Protests to Protect the EKW

Lecture 37 - Translocal Learning for Water Justice: Peri-urban Pathways in India, Tanzania and ...

Lecture 38 - Informing Urban Disaster Studies using Comparative Urban Environmentalism

Lecture 39 - Urban Environmental Heritage: Insights from Bengalâ€™s Mini-Europe

Lecture 40 - The Way Forward

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Advanced Level of Spoken Sanskrit (Humanities and Social Sciences)

Co-ordinators : Prof. Anuradha Choudry

Lecture 1 - Course Overview and Revision of Sentence formation

Lecture 2 - Understanding the concepts of à¤•à¥¤à¤•à¤®à¥ and à¤µà¤¿à¤•à¤•à¥à¤¤à¤¿à¤f

Lecture 3 - Revision of Masculine nouns (à¤ªà¥à¤,à¤²à¤¿à¤™à¥à¤—-à¤,à¥à¤¬à¤¨à¥à¤¤à¤¾à¤f) and some verbs (à¤¤à¤¿à¤™à¥à¤¤à¤¾à¤f).

Lecture 4 - Revision of Masculine nouns (à¤ªà¥à¤²à¥à¤²à¤¿à¤™à¥à¤—-à¤,à¥à¤¬à¤¨à¥à¤¤à¤¾à¤f) and some verb forms (à¤¤à¤¿à¤™à¥à¤¤à¤¾à¤f)

Lecture 5 - Revision of Feminine nouns (à¤,à¥à¤¤à¥à¤°à¥€à¤²à¤¿à¤™à¥à¤—-à¤,à¥à¤¬à¤¨à¥à¤¤à¤¾à¤f) and some verb forms (à¤¤à¤¿à¤™à¥à¤¤à¤¾à¤f)

Lecture 6 - Neuter nouns (à¤¨à¤ªà¥à¤,à¤,à¤•à¤²à¤¿à¤™à¥à¤—-à¤,à¥à¤¬à¤¨à¥à¤¤à¤¾à¤f) and some verb forms (à¤¤à¤¿à¤™à¥à¤¤à¤¾à¤f)

Lecture 7 - Revision of à¤µà¤°à¥à¤£à¤®à¤¾à¤²à¤¾, à¤®à¤¾à¤'à¥‡à¤¶à¥à¤µà¤°à¤,à¥,à¤¤à¥à¤°à¤¾à¤£à¤¿, vibrational effect of à¤µà¤°à¥à¤£à¤¾f

Lecture 8 - Revision of à¤‰à¤ªà¤,à¤°à¥à¤—à¤¾f and their applications

Lecture 9 - Revision of à¤,à¥à¤µà¤°à¤,à¤¨à¥à¤§à¤¿à¤f with à¤,à¥,à¤¤à¥à¤°à¤¾à¤£à¤¿

Lecture 10 - Revision of à¤µà¥à¤¯à¤žà¥à¤œà¤¨à¤,à¤¨à¥à¤§à¤¿à¤f with à¤,à¥,à¤¤à¥à¤°à¤¾à¤£à¤¿ and practice - Part 1

Lecture 11 - Revision of à¤µà¥à¤¯à¤žà¥à¤œà¤¨à¤,à¤¨à¥à¤§à¤¿à¤f with à¤,à¥,à¤¤à¥à¤°à¤¾à¤£à¤¿ and practice - Part 2

Lecture 12 - Revision of à¤µà¤¿à¤,à¤°à¥à¤—à¤,à¤¨à¥à¤§à¤¿à¤f with à¤¨à¤¿à¤¯à¤®à¤¾à¤f and practice

Lecture 13 - Understanding the 10 à¤—à¤£à¤¾à¤f - Part 1

Lecture 14 - Understanding the 10 à¤—à¤£à¤¾à¤f - Part 2

Lecture 15 - Understanding the à¥§à¥¦ à¤²à¤•à¤¾à¤°à¤¾à¤f in à¤ªà¤°à¤,à¥à¤®à¥^à¤ªà¤¦à¥€ and in à¤†à¤¤à¥à¤®à¤¨à¥‡à¥‡à¤ªà¤¦à¥€

Lecture 16 - Overview of à¤,à¥à¤¬à¤¨à¥à¤¤à¤¾à¤f (Nouns), à¤¤à¤¿à¤™à¤¨à¥à¤¤à¤¾à¤f (Verbs), à¤…à¤µà¥à¤¯à¤¯à¤¾à¤¨à¤¿ (Indeclinables) and à¤µà¤¾à¤šà¥à¤¯à¤®à¥ ...

Lecture 17 - Introduction and practice of à¤µà¤¾à¤šà¥à¤¯à¤®à¥ - à¤•à¤°à¥à¤¤à¥à¤fà¤µà¤¾à¤šà¥à¤¯à¤®à¥, à¤•à¤°à¥à¤®à¤µà¤¾à¤šà¥à¤¯à¤®à¥, à¤à¤¾à¤µà¤µà¤¾à¤šà¥à¤¯à¤®à¥

Lecture 18 - à¤µà¥fà¤¤à¥à¤¤à¤¿à¤¨à¥€à¤,à¤ªà¤£à¤®à¥: Elaboration of the concept of à¤µà¥fà¤¤à¥à¤¤à¤¿à¤f

Lecture 19 - à¤µà¥fà¤¤à¥à¤¤à¤¿à¤¨à¥€à¤,à¤ªà¤£à¤®à¥: Elaboration of the concept of à¤µà¥fà¤¤à¥à¤¤à¤¿à¤f (Continued...)

Lecture 20 - à¤µà¥fà¤¤à¥à¤¤à¤¿à¤¨à¥€à¤,à¤ªà¤£à¤®à¥: Elaboration of the concept of à¤µà¥fà¤¤à¥à¤¤à¤¿à¤f (Continued...)

Lecture 21 - à¤µà¥fà¤¤à¥à¤¤à¤¿à¤¨à¥€à¤,à¤ªà¤£à¤®à¥: Elaboration of the concept of à¤µà¥fà¤¤à¥à¤¤à¤¿à¤f (Continued...)

Lecture 22

Lecture 23 - Practice of à¤,à¤®à¤¾à¤,à¤f /compound word

Lecture 24 - Introduction and Practice of à¤…à¤µà¥à¤¯à¤¯à¤ªà¤¦à¥à¤•à¤°à¤£à¤®à¥ / Indeclinables

Lecture 25 - Introduction to the concept of à¤…à¤¨à¥à¤µà¤¯à¤f with practice

Lecture 26 - The concept of à¤…à¤¨à¥à¤µà¤¯à¤f with practice

Lecture 27 - Course summary

Lecture 19 - Oil Price Movements 2010-15/16

Lecture 20 - Oil Price since 2018

Lecture 21 - Oil price in the recent times

Lecture 22 - Structure of OPEC

Lecture 23 - Cartel

Lecture 24 - Role of OPEC in explaining oil price

Lecture 25 - Role of Saudi Arabia

Lecture 26 - Petroleum as a depleting resource

Lecture 27 - Can depletion explain price development ?

Lecture 28 - Cost performance of global oil industry and Oil Spills

Lecture 29 - Structural change and resource discovery

Lecture 30 - Theory of Production: A brief overview

Lecture 31 - Production Possibility Frontier

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Labour Demand

Lecture 33 - Theoretical model - I

Lecture 34 - Theoretical Framework - II

Lecture 35 - Country Experiences

Lecture 36 - Market structure

Lecture 37 - Oligopoly and Market structure

Lecture 38 - Introduction to Game Theory - I

Lecture 39 - Introduction to Game Theory - II

Lecture 40 - Nash Equilibirum

Lecture 41 - Competition versus collusion

Lecture 42 - Collusive Oligopoly: Price Leadership

Lecture 43 - Price Leadership Dominant Firm Model - I

Lecture 44 - Price Leadership Dominant Firm Model - II

Lecture 45 - Cartel

Lecture 46 - Intemporal Allocation and Utility

Lecture 47 - Optimum Choice of a Consumer: Problem of Utility Maximisation

Lecture 48 - Optimal Division of Natural Resources

Lecture 49 - Hotelling's rule

Lecture 50 - Intertemporally Optimal Prices: Some observations

Lecture 51 - Model of Economic Growth - I

Lecture 52 - Model of Economic Growth - II

Lecture 53 - Discovery of Natural Resources

Lecture 54 - Model of Economic growth with uncertainty

Lecture 55 - Exchange Rate and its Determination

Lecture 56 - Oil Price Shock

Lecture 57 - BoP Crisis of the Indian Economy in 1991

Lecture 58 - Crisis and efficiency of exchange rate policies

Lecture 59 - Concluding Remarks - I

Lecture 60 - Concluding Remarks - II

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:The Science of Happiness and Wellbeing (Humanities and Social Sciences)

Co-ordinators : Prof. Priyadarshi Patnaik, Prof. Manas K Mandal

Lecture 1 - Introduction: Why Happiness Matters and How We Will Go About Exploring It

Lecture 2 - Can We Define Happiness?

Lecture 3 - Happiness and Wellbeing : Do Cultures and Environments Call the Shorts!

Lecture 4 - Doing Happiness' - Philosophical and existential questions, and responses

Lecture 5 - Happiness - antecedents and implications

Lecture 6 - Basic Issues

Lecture 7 - Myths and Misconceptions

Lecture 8 - Happiness - the unanswered questions

Lecture 9 - Evolution of Happiness

Lecture 10 - Belief and Gene

Lecture 11 - Empathy

Lecture 12 - Happiness and Morality

Lecture 13 - Exploring the self and the other

Lecture 14 - Pro-sociality and happiness - Generosity, give and take

Lecture 15 - Pro-sociality and happiness - Virtuesand strengths

Lecture 16 - Relationship - Connected and happy

Lecture 17 - Networking and its relevance for happiness and wellbeing

Lecture 18 - Money and Happiness

Lecture 19 - How does optimism affect happiness?

Lecture 20 - Sharing and Belonging

Lecture 21 - Happiness and body language

Lecture 22 - Failure and Resilience

Lecture 23 - Innovation and Happiness

Lecture 24 - Conflicts and Stress

Lecture 25 - Stress and Coping

Lecture 26 - Reconnecting happiness: beyond pandemic

Lecture 27 - Meditation and Mindfulness: An Overview

Lecture 28 - Meditation and Mindfulness: Practice Toolkit

Lecture 29 - Creativity, Intuition and Flow

Lecture 30 - Can we really not be creative and happy?

Lecture 31 - Emotional intelligence

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Happiness at work

Lecture 33 - Nudging and Decision-making

Lecture 34 - Can we measure happiness? The case of cities and states

Lecture 35 - Happiness and leadership habits

Lecture 36 - Measurement of Happiness

Lecture 37 - Consumerism, happiness and wellbeing

Lecture 38 - Technology and happiness

Lecture 39 - Doing research on happiness: Connecting dots

Lecture 40 - Summing up: Social innovation and project ideas for social transformation

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Environmental Science (Humanities and Social Sciences)

Co-ordinators : Dr. Samik Chowdhury, Dr. Sudha Goel

Lecture 1 - Major Environmental Concerns and Pollution

Lecture 2 - Population Growth Models

Lecture 3 - Resource Consumption and Pollution

Lecture 4 - Measuring Environmental Impacts - the IPAT Model and Ecological Footprint

Lecture 5 - Measuring - Earth Overshoot Day, Energy Performance Index and Lifecycle Assessment

Lecture 6 - Principles of Sustainable Development

Lecture 7 - Principles of Sustainable Development (Sustainable Development Goals)

Lecture 8 - Principles of Sustainable Development (Achieving SDGs and Sustainability Indices)

Lecture 9 - Principles of Sustainable Development (Case Study I: Sustainable Urbanization)

Lecture 10 - Principles of Sustainable Development (Case Study II: Green Buildings)

Lecture 11 - Air Pollution (Definition, Causes, Sources and Types)

Lecture 12 - Air Pollution (Influence of Meteorology)

Lecture 13 - Air Pollution (Local Effects and Mitigation Measures)

Lecture 14 - Air Pollution (Regional Issues and Mitigation Measures)

Lecture 15 - Air Pollution (Global Issues and Mitigation Measures, Indoor Air Quality)

Lecture 16 - Climate Change (Definition and Evidence)

Lecture 17 - Climate Change (Causes and Determinants)

Lecture 18 - Climate Change (Projections and Related Impacts)

Lecture 19 - Climate Change (Mitigation Options)

Lecture 20 - Climate Change (Adaption and Policy Responses)

Lecture 21 - Renewable Energy - I (Overview)

Lecture 22 - Renewable Energy - I (Solar Energy - I)

Lecture 23 - Renewable Energy - I (Solar Energy - II)

Lecture 24 - Renewable Energy - I (Solar Energy - III)

Lecture 25 - Renewable Energy - I (Wind Energy)

Lecture 26 - Renewable Energy - II (Geothermal Energy)

Lecture 27 - Renewable Energy - II (Ocean Energy - I)

Lecture 28 - Renewable Energy - II (Ocean Energy - II)

Lecture 29 - Renewable Energy - II (Hydropower)

Lecture 30 - Renewable Energy - II (Bioenergy)

Lecture 31 - Circular Economy (Introduction to the Concept)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Circular Economy (Circular Economy Strategies - I)

Lecture 33 - Circular Economy (Circular Economy Strategies - II)

Lecture 34 - Circular Economy (Circular Business Models)

Lecture 35 - Circular Economy (Industrial Symbiosis)

Lecture 36 - Hydrologic cycle, sources of water and water pollution

Lecture 37 - Water Quality Parameters - General

Lecture 38 - Water Quality Parameters - Oxygendemanding wastes and Microbial

Lecture 39 - Nitrogen species in rivers and the DO Sag Curve

Lecture 40 - NGT, WQI and reuse and recycling of wastewater

Lecture 41 - Importance and Integrated Solid Waste Management

Lecture 42 - Sources of MSW, MSW Generation Rates and Composition

Lecture 43 - MSW Composition and Collection

Lecture 44 - MSW Treatment and Disposal

Lecture 45 - E-Waste Management

Lecture 46 - Sound, noise and its characteristics

Lecture 47 - Audiometry

Lecture 48 - Effects of noise

Lecture 49 - Noise rating systems and modeling

Lecture 50 - Noise control and regulations

Lecture 51 - Fundamentals of Ecology - I

Lecture 52 - Fundamentals of Ecology - II

Lecture 53 - Fundamentals of Ecology - III

Lecture 54 - Soil Pollution - I

Lecture 55 - Soil Pollution - II

Lecture 56 - The Environmental Movement and its global and local impacts

Lecture 57 - Environmental Law and Rules in India

Lecture 58 - Important legal judgments pertaining to the Environment

Lecture 59 - NGT and its important judgments

Lecture 60 - Rapid Environmental Impact Assessment - A case study of the River Ib Barrage

Lecture 30 - How to Coach

Lecture 31 - Grip of Basic Bowling Action

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Key Points Pace Bowling

Lecture 33 - Run Up

Lecture 34 - Sports Parents

Lecture 35 - Off Spin Basics

Lecture 36 - Off Spin Stock and Variations

Lecture 37 - Inswing

Lecture 38 - Out Swing

Lecture 39 - Off Cutter and Leg Cutter

Lecture 40 - Key Points

Lecture 41 - Leg Spin

Lecture 42 - Base Up and Two Hand Pick Up

Lecture 43 - Long Barrier and Rettrib

Lecture 44 - Key Points Wrist Spin, Stock and Variations

Lecture 45 - Key points ground fielding base up and attacking

Lecture 46 - Key points ground fielding defensive and retrieve

Lecture 47 - Underarm Overarm and Crowhop Throw

Lecture 48 - Importance of Fitness

Lecture 49 - Fitness

Lecture 50 - Key Points Throwing

Lecture 51 - Weight Training for Cricketers

Lecture 52 - Catching Techniques

Lecture 53 - Catching Parallel and High Catch

Lecture 54 - Key Points Catching

Lecture 55 - Key Points Catching Parallel and High Catch

Lecture 56 - Pitch Preparation

Lecture 57 - Wicket Keeping Standing UP

Lecture 58 - Wicket Keeping Standing Back

Lecture 59 - Key points of wicket keeping skill

Lecture 60 - How to coach

Lecture 61 - Efficient Conduct of a Practice Session

Lecture 62 - How to Shoot PDF

Lecture 63 - Methods and Approach of Batting

Lecture 64 - Tactics in Cricket

Lecture 65 - Chucking in cricket

Lecture 66 - Myth and true in Cricket

Lecture 67 - Diet Chart

Lecture 68 - Beat the Heat

Lecture 69 - Motivation

Lecture 70 - How to conduct Fielding Drill

Lecture 71 - Warmup and Cooling Down Exercises

Lecture 72 - Revisions of Batting Setup and Front Foot Shorts

Lecture 73 - Revisions of Cut,Pull and Hook Shots

Lecture 74 - Revisions of Bowling Skill

NPTEL : NOC:Mastering Speaking and Presentations: A Case Based Approach (Humanities and Social Sciences)

Co-ordinators : Prof. Seema Singh

Lecture 1 - Course Introduction

Lecture 2 - Pre-Assessment

Lecture 3 - Vocabulary Made Easy

Lecture 4 - The Power of Words

Lecture 5 - Case Studies 1 - Mr. Akshat Ranjit Kumar and Mr. Vijendra Singh Shyam

Lecture 6 - Spoken English Part 1: Introduction to Word Accent

Lecture 7 - Word Accent: Disyllabic Words

Lecture 8 - Word Accent: Shift of Accent in Disyllabic Words

Lecture 9 - Word Accent: Polysyllabic Words

Lecture 10 - Case Studies 2 - Ms. Pooja Saini and Mr. Akshath Surwase

Lecture 11 - Spoken English Part 2: Introduction to Rhythm

Lecture 12 - Introduction to Rhythm

Lecture 13 - Rising Intonation

Lecture 14 - Falling Intonation

Lecture 15 - Case Studies 3 - Aditya Raj, A Rohith Kumar and Naini Suhas Reddy

Lecture 16 - Spoken English Part 3 - Introduction to Spoken English in Specific Scenarios

Lecture 17 - How to Speak in Formal Settings

Lecture 18 - How to Speak with People Lower in Hierarchy than You

Lecture 19 - Telephone Skills: Taking and Making Calls, Voice, Intonation, and Language

Lecture 20 - Case Studies 4 - Devansh Gupta, Om Jain and Sujesh Sheshadri

Lecture 21 - Impactful Presentations Part 1 - Introduction to Body Langauge and Voice Modulation

Lecture 22 - The role of Nonverbal Communication in delivering impactful Presentations

Lecture 23 - Body Language: Mechanics and Style

Lecture 24 - Voice Modulation - Voice Projection, Replacing Fillers, and Emphasis

Lecture 25 - Case Studies 5 - Anuj Kumar, Yash Gupta and Pawan Sharma

Lecture 26 - Impactful Presentations Part 2: The Power of Pause

Lecture 27 - Pause to engage audience in a conversation

Lecture 28 - Combine Pause and Repetition Techniques

Lecture 29 - Demonstrate Confidence and Control to Establish your Presence

Lecture 30 - Case Studies 6 - Soumyashree Nayak,Vedant Sharma, D S Ram and Yogesh Kushwaha

Lecture 31 - Impactful Presentations Part 3: Introduction to Empathy

Lecture 32 - The Role of Empathy in Delivering Impactful Presentations

Lecture 33 - How to make your Presentations have an Impact on your Audiences

Lecture 34 - Key Takeaways on Impactful Presentations that leave lasting Impressions

Lecture 35 - Case Studies 7 - S Ayush, Akshit Goyal, Shivang Devina and Raunak Dariyal

Lecture 36 - Case Studies on Effective Speaking and Impactful Presentations - Part I

Lecture 37 - Case Studies on Effective Speaking and Impactful Presentations - Part II

Lecture 38 - Case Observation 1 - Tatoo History, Art, and Culture - by Crow

Lecture 39 - Case Observation 2 - Effective Presentations by Ms. Akriti Agarwal

Lecture 40 - Course Conclusion

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Modernisation and Creative Communication (Humanities and Social Sciences)

Co-ordinators : Prof. Saswat Samay Das, Prof. Ananya Roy Pratihar

Lecture 1 - Modernisation: Introduction and Contemporaneity - Part 1

Lecture 2 - Modernisation: Introduction and Contemporaneity - Part 2

Lecture 3 - Modernisation and Creativity

Lecture 4 - Modernisation Theory: Evolution, Analysis and Applications

Lecture 5 - Tools of Modernisation

Lecture 6 - Modernity, Modernism and Modernisation

Lecture 7 - Historical Context of Modernisation: Premodern Societies to Enlightenment Phase

Lecture 8 - Socio-Cultural Model of Modernisation: Liberalism and Socialism

Lecture 9 - Modernity as an Unfinished Project

Lecture 10 - Dematerialisation of Communication

Lecture 11 - Critiques of Modernisation

Lecture 12 - Altermodernities

Lecture 13 - Modernism, Modernisation and Postcolonial India

Lecture 14 - Machines, Animals and Aliens: Horizons of Incommunicability

Lecture 15 - The New Space of Homo Digitalis

Lecture 16 - Modernisation as a Communicative Practice

Lecture 17 - Shift from Traditional to Modern Communicative Paradigms

Lecture 18 - Socio-Cultural Impact of Communication Practices

Lecture 19 - Storytelling as a Tool of Creative Communication

Lecture 20 - Future Trajectories of Modernisation Through Innovative Communicative Practices

Lecture 21 - Speaking into the Air - Part 1

Lecture 22 - From Matter to Mind

Lecture 23 - Communication with the Dead

Lecture 24 - Hegel, Marx, Kierkegaard: Self, Communication and Society

Lecture 25 - Dead Letters

Lecture 26 - The Telephonic Uncanny: Communication, Identity and Disconnection

Lecture 27 - Radio Broadcasting and Communication

Lecture 28 - The Communication Gap: Fragments, Misunderstanding, and Dialogic Challenges

Lecture 29 - The Dark Side of Communication

Lecture 30 - Relevance of Speaking into the Air

Lecture 31 - Media, Market and Creative Communication

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Shifts from the Print to the Digital

Lecture 33 - Marketizing Media or Mediatizing Market ?

Lecture 34 - Creative Communication in the Digital Age

Lecture 35 - Trends and the Future of Creative Communication

Lecture 36 - Dominion of Communication Barriers

Lecture 37 - Decolonising Communication

Lecture 38 - Ethical and Sustainable Communicative Practices

Lecture 39 - Translation and World-Making

Lecture 40 - Reimagining Communication: One Planet, Many Worlds

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Aspects of Western Philosophy (Humanities and Social Sciences)

Co-ordinators : Dr. Sreekumar Nellickappilly

Lecture 1 - Greek Philosophy: Ionians, Pythagoras, Parmenides, Heraclitus and Democritus

Lecture 2 - Sophists, Socrates; philosophy of man; relativism and subjectivism; the idea of good

Lecture 3 - Platos idealism: theory of ideas

Lecture 4 - Plato: theory of knowledge, method of dialectic; theory of soul

Lecture 5 - Aristotles criticism of Platonic idealism and the concepts of Form and Matter

Lecture 6 - Aristotles theory of causation; potentiality and actuality

Lecture 7 - Medieval philosophy: St. Augustine and the Problem of evil; St. Thomas Aquinass concepts of faith and reason; proofs for the existence of God.

Lecture 8 - Modern Philosophy: mail characteristic features; renaissance and scientific revolution; rationalism and empiricism: main features.

Lecture 9 - Descartes: the method in philosophy; the concepts of doubt and indubitable knowledge.

Lecture 10 - Descartes: the mind-body dualism; the concept of God and proofs for Gods existence

Lecture 11 - Spinoza: the concepts of Substance, attributes and modes.

Lecture 12 - Spinozas pantheism-God and nature

Lecture 13 - Leibniz: Monadology; the mind-body problem revisited; concept of God; the concept of pre-established harmony

Lecture 14 - The empiricism of John Locke: ideas and their classification; refutation of innate ideas

Lecture 15 - John Locke: theory of knowledge; concept of substance; the primary and secondary qualities

Lecture 16 - Berkeley: the refutation of the distinction between primary and secondary qualities, immaterialism

Lecture 17 - Berkeleys critique of abstract ideas, esse est percipi, the problem of solipsism; God and self

Lecture 18 - Hume : Impressions and ideas, knowledge concerning relations of ideas and knowledge concerning matters of fact, induction and causality.

Lecture 19 - The external world and the self, personal identity, rejection of metaphysics, scepticism, reason and the passions.

Lecture 20 - Critical Philosophy: characteristic features; kantd objectives: the classification of judgements, possibility of synthetic a priori judgements, the Copernican revolution

Lecture 21 - Kant: forms of sensibility, categories of understanding; the process of knowledge acquisition; phenomenon and noumenon,

Lecture 22 - The Ideas of Reason-soul, God and world as a whole; antinomies; rejection of speculative metaphysics.

Lecture 23 - Kants ethics; freedom and immortality, problems with Kant.

Lecture 24 - Hegel : The conception of Geist (spirit), the dialectical method, concepts of being, non-being and becoming,

Lecture 25 - Absolute idealism; consciousness, self consciousness and reason.

Lecture 26 - Karl Marx: historical materialism; the significance of the proletariat; the base structure-superstructure division.

Lecture 27 - Nietzsche : Critique of western culture, religion and morality; will to power; the idea of superman.

Lecture 28 - Linguistic turn in British philosophy: Russells logical atomism and the refutation of idealism.

Lecture 29 - Wittgenstein : early Wittgensteins conception of language and reality; the picture theory of meaning

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 30 - Later Wittgensteins conception of language games and forms of life; meaning and use.

Lecture 31 - Logical positivism; against metaphysics and a scientific conception of philosophy; the limitation of logical positivism

Lecture 32 - Husserl : Phenomenology and the methods of reduction; the principle of intentionality.

Lecture 33 - Phenomenological reduction, eidetic reduction and transcendental reduction; transcendental subjectivity; the pure subject.

Lecture 34 - Heidegger : phenomenological hermeneutics; concept of Being; man as being-in-the-world; destruction of the western intellectual tradition.

Lecture 35 - Authentic and inauthentic existence; Truth as disclosure

Lecture 36 - Existentialism: main features; existence precedes essence; freedom and responsibility; finiteness and situatedness of human existence

Lecture 37 - Sartres conception of human existence; man is condemned to be free; rejection of essentialism

Lecture 38 - The concept of being-in-itself, being-for-itself and being-for-others

Lecture 39 - Postmodernism: major trends and chief characteristic features; conceptions of human subject; different postmodern approaches

Lecture 40 - Deconstruction, feminism, discourse theory etc.
