DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Introduction to Aerospace Propulsion (Aerospace Engineering)

Co-ordinators : Prof. Bhaskar Roy, Prof. A M Pradeep

Lecture 1 - Course Intro & Historical development of flights

Lecture 2 - Early development of aircraft propulsive devices

Lecture 3 - Development of Jet propulsion for aircraft

Lecture 4 - Introduction to thermodynamics, Scope and method, Basic concepts: system, surroundings, property, intensive and extensive, state, equilibrium and state postulate, process, path and cycle

Lecture 5 - Quasi-static processes, zeroth law of thermodynamics and temperature, concept of energy and its various forms, internal energy, enthalpy

Lecture 6 - Specific heats at constant pressure and volume Work and heat transfers

Lecture 7 - Tutorial

Lecture 8 - First law of thermodynamics for closed systems

Lecture 9 - First law of thermodynamics for open systems/flow processes

Lecture 10 - Second law of thermodynamics, heat engines, refrigerators and heat pumps, Kelvin-Planck and Clausius statement of second law of thermodynamics

Lecture 11 - Reversible and irreversible processes, concept of entropy

Lecture 12 - Increase of entropy principle, third law of thermodynamics, absolute entropy, perpetual motion machines

Lecture 13 - Tutorial

Lecture 14 - Carnot cycle, Carnot principle, thermodynamic temperature scale

Lecture 15 - Exergy, availability and second law efficiency

Lecture 16 - Tutorial

Lecture 17 - Gas and vapour power cycles, Otto cycle, Diesel cycle, Dual cycle

Lecture 18 - Rankine cycle, Brayton cycle, Stirling and Ericsson cycles

Lecture 19 - Thermodynamic property relations, Jacobean and Legendre transformations, Maxwellâ€™s equations

Lecture 20 - Tutorial

Lecture 21 - Properties of gas and vapour mixtures

Lecture 22 - One-dimensional compressible flows, isentropic flows

Lecture 23 - Flows with friction and heat transfer, normal and oblique shocks

Lecture 24 - Piston-prop engines: Otto cycles; Ideal and Real cycles

Lecture 25 - IC Engines for aircraft application

Lecture 26 - Performance parameters of IC engines

Lecture 27 - Supercharging of aircraft IC engines

Lecture 28 - Tutorial: IC Engines

Lecture 29 - Propeller fundamentals

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 30 - Propeller aerodynamic theories - I

Lecture 31 - Propeller aerodynamic theories - II

Lecture 32 - Tutorial: Propellers

Lecture 33 - Ideal cycles for Jet engines

Lecture 34 - Ideal cycles for variants of jet engines

Lecture 35 - Tutorial

Lecture 36 - Fundamentals of Ramjets and Pulsejets

Lecture 37 - Fundamentals of Rocket engines

Lecture 38 - Fundamentals of Missile engines

Lecture 39 - Various space vehicles and their engines

Lecture 40 - Closure of the lecture series : recap

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Jet Aircraft Propulsion (Aerospace Engineering)

Co-ordinators : Prof. A M Pradeep, Prof. Bhaskar Roy

Lecture 1 - Introduction & Development of Jet Aircraft Propulsion

Lecture 2 - How the Aircraft Jet Engines make Thrust

Lecture 3 - Jet Engine Basic Performance Parameters

Lecture 4 - Turbojet, Reheat Turbojet and Multi-spool Engines

Lecture 5 - Turbofan, Turbo-prop and Turboshaft engines

Lecture 6 - Ideal and Real Brayton cycles

Lecture 7 - Jet Engine Cycles for Aircraft propulsion

Lecture 8 - Cycle components and component performances

Lecture 9 - Tute-1

Lecture 10 - Analysis of engine real cycles

Lecture 11 - Tute-2

Lecture 12 - Thermodynamics of Compressors

Lecture 13 - Thermodynamics of Turbines

Lecture 14 - Axial Compressors : two dimensional analytical model

Lecture 15 - Cascade analysis; Loss and Blade performance estimation

Lecture 16 - Free Vortex theory; Single-Multi-stage characteristics

Lecture 17 - Tutes-3

Lecture 18 - Elements of centrifugal compressor

Lecture 19 - Centrifugal Compressor characteristics: Surging, Choking

Lecture 20 - Axial flow turbines; Turbine Blade 2-D (cascade) analysis

Lecture 21 - Multi-staging: Axial Turbine; Turbine Cooling Technology

Lecture 22 - Radial Turbine Aerodynamics & Thermodynamics; Losses

Lecture 23 - Tutes-4

Lecture 24 - Types of combustion chambers: mechanism & parameters

Lecture 25 - Pr. Loss, Combustion efficiency; Combustion intensity

Lecture 26 - Practical combustion system ; Stability, Fuel injection

Lecture 27 - Intakes for Powerplant: Transport / Military Aircraft

Lecture 28 - Subsonic, Transonic, Supersonic Intake Designs

Lecture 29 - Nozzle : fixed and variable geometry nozzles

Lecture 30 - C-D nozzle and their uses

Lecture 31 - Tute-5

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Engine Off Design Operations

Lecture 33 - Aircraft Engine component matching: Dimensional analysis

Lecture 34 - Engine component matching and Sizing

Lecture 35 - Installed Performance of Engine

Lecture 36 - Tute-6

Lecture 37 - Use of Ramjets and Pulsejets in Aircraft propulsion

Lecture 38 - Thermodynamic Cycle & Performance Parameters

Lecture 39 - Flow in Diffusers, Combustors and Nozzles

Lecture 40 - Performanace and Design of Ramjet & Scramjet Engines

Lecture 41 - Tute-7

Lecture 42 - Future of Aircraft Propulsion

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Turbomachinery Aerodynamics (Aerospace Engineering)

Co-ordinators : Prof. Bhaskar Roy, Prof. A M Pradeep

Lecture 1 - Introduction to Turbo machines Syllabus, References and Schedules

Lecture 2 - Axial Flow Compressors and Fans : Introduction to Compressor Aerothermodynamics

Lecture 3 - A two dimensional analytical model :Cascade

Lecture 4 - 2D losses in Axial flow Compressor Stage : Primary losses

Lecture 5 - Tutorial 1 : Two Dimensional Axial Flow Compressors

Lecture 6 - 3D Flows in Blade Passages, Secondary Flows, Tip leakage Flow, Scrubbling

Lecture 7 - Three Dimensional Flow Analysis : Radial Equilibrium Concept

Lecture 8 - Classical Blade Design Laws : Free Vortex and other Laws

Lecture 9 - Three Dimensional Flow Analysis in Axial Flow Compressor

Lecture 10 - Tutorial 2 : Three Dimensional Axial Flow Compressors

Lecture 11 - Axial Compressor Characteristics: Single stage, Multi stage and Multi spool Characteristics

Lecture 12 - Instability in Axial Compressors

Lecture 13 - Inlet Distortion and Rotating Stall, Control of Instability

Lecture 14 - Transonic Compressors and Shock Structure Models, Transonic Compressor Characteristics

Lecture 15 - Axial Flow Compressor Design, Inter Spool Duct

Lecture 16 - Design of Compressor Blades, Aerofoil Design (Subsonic, Transonic, Supersonic Profiles)

Lecture 17 - Design of Compressor Blade: 3D Blade Shapes of Rotors and Stators

Lecture 18 - Noise Problem in Axial Compressors and Fans

Lecture 19 - Axial Flow Turbines: Introduction to Turbines Aerothermodynamics

Lecture 20 - Axial Flow Turbines: Turbine Blade 2D (Cascade) Analysis

Lecture 21 - Axial Flow Turbines: Work done, Degree of Reaction, Losses and Efficiency

Lecture 22 - Axial Flow Turbines: Blade and Axial Flow Passages, Exit Flow Matching with Nozzle

Lecture 23 - Tutorial 3 : Axial Flow Turbines

Lecture 24 - Multi staging and Multi spooling of Turbine

Lecture 25 - 3D Flow in Turbine: 3D Flow Theories, Free Vortex Theories etc.

Lecture 26 - Tutorial 4 : 3D Flows in Axial Flow Turbines

Lecture 27 - Turbine Blade Cooling â€“ Fundamentals of Heat Transfer, Blade Cooling Requirements

Lecture 28 - Turbine Blade Cooling Technologies

Lecture 29 - Turbine Blade Design: Turbine Profiles, Aerofoil Data and Profile Construction

Lecture 30 - Turbine Blade Design: 3D Blade Shapes

Lecture 31 - Centrifugal Compressors: Thermodynamics and Aerodynamics

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Centrifugal Compressors: Characteristics, Stall, Surge Problems

Lecture 33 - Tutorial 5 : Centrifugal Compressors

Lecture 34 - Design of Centrifugal Compressors: Impellers, Vane/Vane less Diffusers, Volutes

Lecture 35 - Radial Turbines: Thermodynamics and Aerodynamics

Lecture 36 - Tutorial 6 : Radial Turbines

Lecture 37 - Radial Turbine Characteristics and Design of Radial Turbines

Lecture 38 - CFD for Turbomachinery: Grid Generation, Boundary Conditions for Flow Analysis

Lecture 39 - CFD for Turbomachinery: Flow Track and Inter-spool Duct Design using CFD

Lecture 40 - CFD for Turbomachinery: 2D and 3D Blade Generation and Analysis Using CFD

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Aerospace Engineering (Aerospace Engineering)

Co-ordinators : Prof. Rajkumar Pant

Lecture 1 - Course Layout and Brief Introduction of Course Instructor

Lecture 2 - Introduction to International Standard Atmosphere (ISA)

Lecture 3 - Pressure, Temperature, Density and Viscosity Variation with Altitude in ISA

Lecture 4 - Other Standard Atmospheres

Lecture 5 - Aircraft Component Nomenclature - Wing and its Components

Lecture 6 - Aircraft Component Nomenclature - Fuselage and its Components

Lecture 7 - Aircraft Component Nomenclature - Tail Plane and its Components

Lecture 8 - Tutorial 1 - Aircraft Component Nomenclature

Lecture 9 - Essentials of Incompressible Flow - Part I

Lecture 10 - Essentials of Incompressible Flow - Part II

Lecture 11 - Bernoulli's Equation and Coanda Effect

Lecture 12 - Mach Number

Lecture 13 - Tutorial 2 - Incompressible Flow and Flow Visualization

Lecture 14 - Viscous Flow and Reynolds Number

Lecture 15 - Introduction to Boundary Layer

Lecture 16 - Pressure Measurement

Lecture 17 - Air Speed Measurement - Pitot Static Tube

Lecture 18 - Air Speed Corrections

Lecture 19 - Altitude and ROC/ROD Measurement

Lecture 20 - Measurements in Compressible Flows

Lecture 21 - Non Pneumatic Instruments

Lecture 22 - Introduction to Aerofoils and Aerofoil Nomenclature

Lecture 23 - Aerofoils - A Visit to the Past

Lecture 24 - Thick Aerofoils

Lecture 25 - Low Reynolds Number Aerofoils

Lecture 26 - Lift Generation by Wings - Part I

Lecture 27 - Lift Generation by Wings - Part II

Lecture 28 - Coefficient of Lift and Coefficient of Pressure

Lecture 29 - Tutorial on Aerofoils

Lecture 30 - Critical Mach Number

Lecture 31 - Wave Drag

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Swept Wings

Lecture 33 - Introduction to Drag and Types of Drag

Lecture 34 - Factors Affecting Induced Drag

Lecture 35 - Skin Friction Drag

Lecture 36 - Tutorial on Critical Mach Number and Wave Drag

Lecture 37 - Introduction to Propulsion

Lecture 38 - Gas Turbine Engine Types - Part I

Lecture 39 - Gas Turbine Engine Types - Part II

Lecture 40 - Introduction to Electric Propulsion and Ion Propulsion

Lecture 41 - Steady Level Flight

Lecture 42 - Power Required for the Steady Level Flight

Lecture 43 - Steady Level Flight - A Pilot's View

Lecture 44 - Tutorial on Steady Level Flight

Lecture 45 - Gliding Flight

Lecture 46 - Climbing Flight and Ceiling

Lecture 47 - Introduction to Turning Flight

Lecture 48 - Turning Flight Equations

Lecture 49 - Instantaneous and Sustained Turn

Lecture 50 - Tutorial on Climbing Flight and Turning Flight

Lecture 51 - Introduction to Static Stability: Center of Pressure, Center of Gravity and Neutral Point

Lecture 52 - Aerodynamic Center and Effect of Center of Gravity

Lecture 53 - Effect of Center of Gravity - A Practical Demonstration

Lecture 54 - Introduction to V-n Diagram

Lecture 55 - V-n Diagram as per FAR 23 Regulations

Lecture 56 - Effect of Gusts on V-n Diagram

Lecture 57 - Tutorial on Stability and Control

Lecture 58 - Range

Lecture 59 - Specific Fuel Consumption and Generalized Range Equation

Lecture 60 - Endurance

Lecture 61 - Take-off Performance of Flight - Part I

Lecture 62 - Take-off Performance of Flight - Part II

Lecture 63 - Landing Performance of Flight

Lecture 64 - Tutorial on Range Payload Diagram

Lecture 65 - Tutorial on Range and Endurance

Lecture 66 - Flapping Wing Aerodynamics - Part I

Lecture 67 - Flapping Wing Aerodynamics - Part II

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Aircraft Design (Aerospace Engineering)

Co-ordinators : Prof. Rajkumar Pant

Lecture 1 - What is Aircraft Design

Lecture 2 - Aircraft Design Process

Lecture 3 - Design Stages

Lecture 4 - Phases in Aircraft Design

Lecture 5 - The Design Spiral

Lecture 6 - Importance of Cost in Aircraft Design

Lecture 7 - Basic Laws of Aircraft Design

Lecture 8 - Requirements Capture

Lecture 9 - Quality Function Deployment

Lecture 10 - House of Quality Chart

Lecture 11 - Example of HoQ for HALE UAV

Lecture 12 - Illustration of HOQ-GA aircraft

Lecture 13 - Airliners

Lecture 14 - Key Issues in Design of Airliners

Lecture 15 - Design Considerations - Future Airliners

Lecture 16 - Supersonic Transport Aircraft

Lecture 17 - Airliner and Supersonic Aircraft, some additional concepts

Lecture 18 - Design Considerations - Cargo Aircraft

Lecture 19 - Design Considerations - GA Aircraft

Lecture 20 - Types of Military Aircraft

Lecture 21 - Cargo, GA and Military Aircraft, Some additional concepts

Lecture 22 - Aircraft Configuration Design

Lecture 23 - Podded Engines on Wings

Lecture 24 - Wing Sweep

Lecture 25 - Canards and Flying Wing

Lecture 26 - Three Surface Aircraft

Lecture 27 - Winglets

Lecture 28 - Thrust Vectoring

Lecture 29 - Few Novel Concepts_01

Lecture 30 - Aircraft Configuration Design - Closing Remarks

Lecture 31 - Choices in Aircraft Layout

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Wing Geometry Definitions

Lecture 33 - Options for Wing layout

Lecture 34 - Propulsion System Layout

Lecture 35 - Tail Plane Layout

Lecture 36 - Landing Gear Layout - Part 1

Lecture 37 - Landing Gear Layout - Part 2

Lecture 38 - Landing Gear of some Famous Aircraft

Lecture 39 - Tutorial on OpenVSP

Lecture 40 - Initial Sizing in Aircraft Design

Lecture 41 - Estimation of Empty Weight Fraction

Lecture 42 - Estimation of Mission Segment Weights

Lecture 43 - Estimation of Fuel Weight Fractions

Lecture 44 - Estimation of maximum L/D

Lecture 45 - Estimation of engine parameters

Lecture 46 - Estimation of Design gross weight

Lecture 47 - Take-off weight build up

Lecture 48 - Tutorial on Initial Sizing of Transport Aircraft

Lecture 49 - Tutorial on Initial Sizing of Military Aircraft

Lecture 50 - Subsonic Parasite Drag Estimation

Lecture 51 - Component Buildup Method

Lecture 52 - Drag Estimation of Military Aircraft

Lecture 53 - Tutorial on Drag Polar Estimation of Military Aircraft

Lecture 54 - Estimation of Lift Coefficient

Lecture 55 - Estimation of Maximum Lift Coefficient

Lecture 56 - Flaps as High Lift Devices

Lecture 57 - Tutorial on Lift Coefficient Estimation of Transport Aircraft

Lecture 58 - Tutorial on Lift Coefficient Estimation of Military Aircraft

Lecture 59 - Constraint Analysis- Introductory Remarks

Lecture 60 - Constraint Analysis- Transport Aircraft - Part 1

Lecture 61 - Constraint Analysis- Transport Aircraft - Part 2

Lecture 62 - Tutorial on Constraint Analysis of Transport Aicraft - Part 1

Lecture 63 - Tutorial on Constraint Analysis of Transport Aicraft - Part 2

Lecture 64 - Constraint Analysis- Military Aircraft

Lecture 65 - Tutorial on Constraint Analysis of Military Aicraft - Part 1

Lecture 66 - Tutorial on Constraint Analysis of Military Aicraft - Part 2

Lecture 67 - Refined Sizing

Lecture 68 - Tutorial on Refined Sizing of Jet Fighter Aircraft

Lecture 69 - Cost Estimation in Aircraft Conceptual Design

Lecture 70 - Aircraft Life Cycle Cost Estimation

Lecture 71 - Tutorial on RDT&E and Production Cost Estimation of Transport Aircraft

Lecture 72 - Tutorial on DT&E and Production Cost Estimation of HALE UAV

Lecture 73 - Estimation of Direct Operating Cost

Lecture 74 - Fighter Aircraft Life Cycle Cost Estimation Model

Lecture 75 - Range Payload Diagram - Part 1

Lecture 76 - Range Payload Diagram - Part 2

Lecture 77 - Tutorial on Range Payload Diagram of Transport Aircraft

Lecture 78 - Environmental issues in Aircraft Design

Lecture 79 - Limit Manoeuvre Envelope

Lecture 80 - Effect of Gust

Lecture 81 - Aircraft Loads

Lecture 82 - Tutorial on V-n Diagram of Transport Aircraft

Lecture 83 - High Altitude Long Endurance (HALE) Aircraft

Lecture 84 - Morphing of Aircraft Configurations

Lecture 85 - Guest Lectuer on Air Power and Multi-role Fighter Aircraft - Part 1

Lecture 86 - Guest Lectuer on Air Power and Multi-role Fighter Aircraft - Part 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Launch Vehicle Analysis and Design (Aerospace Engineering)

Co-ordinators : Prof. Ashok Joshi

Lecture 1 - Introduction

Lecture 2 - Course Plan

Lecture 3 - Ascent Mission Basics

Lecture 4 - Force and Geometry Models - 1

Lecture 5 - Force and Geometry Models - 2

Lecture 6 - Idealized Performance

Lecture 7 - Trajectory Under Gravity

Lecture 8 - Impact of Gravity

Lecture 9 - Impact of Drag

Lecture 10 - Curvilinear Motion Concept

Lecture 11 - Constant Pitch Rate Solution

Lecture 12 - Constant Velocity Solution

Lecture 13 - Constant (T/m) Solution

Lecture 14 - Ascent Mission Design

Lecture 15 - Multi-stage Rocket Basics

Lecture 16 - Multi-stage Configuration Basics

Lecture 17 - Multi-stage Solution Basics

Lecture 18 - Multi-stage Problem Definition

Lecture 19 - Optimal Staging Strategy

Lecture 20 - Lagrange Solution

Lecture 21 - Approximate Staging Solution

Lecture 22 - Variant Concept

Lecture 23 - Variant Design Solution

Lecture 24 - Parallel Staging Concept

Lecture 25 - Parallel Staging Benefits

Lecture 26 - Jet Damping and Ballistic Missiles

Lecture 27 - Current Rocket Concepts

Lecture 28 - Launch Widow and SSTO Concepts

Lecture 29 - Reentry Concept

Lecture 30 - Ballistic Reentry Solution

Lecture 31 - Lifting and Other Reentry Modes

Lecture 35 - Multi-stage Rocket Concept

Lecture 36 - Optimal Multi-stage Solutions

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Lighter than Air Systems (Aerospace Engineering)

Co-ordinators : Prof. Rajkumar Pant

Lecture 1 - Introduction to the Course Content

Lecture 2 - Differences between LTA and HTA systems

Lecture 3 - The three conventional LTA systems

Lecture 4 - LTA gases, Types of Airships and their components

Lecture 5 - Introduction of Skyship 600 and USP of Airships

Lecture 6 - Applications of Airships

Lecture 7 - Tethered Aerostat systems

Lecture 8 - Why use Aerostats

Lecture 9 - Some Queries on Aerostats

Lecture 10 - Historical developments of LTA systems - Part I

Lecture 11 - Historical developments of LTA systems - Part II

Lecture 12 - Historical developments of LTA systems - Part III

Lecture 13 - Historical developments of LTA systems - Part IV

Lecture 14 - Historical developments of LTA systems - Part V

Lecture 15 - Historical developments of LTA systems - Part VI

Lecture 16 - Overview of PADD

Lecture 17 - Remote Controlled Airships

Lecture 18 - Autonomous Airships

Lecture 19 - Indoor Blimp Projects by students

Lecture 20 - Biomimetic Airships

Lecture 21 - Introduction to Buoyancy

Lecture 22 - Basic Concepts of Aerostatics

Lecture 23 - Ballasting, Weigh off and Fuel weight recovery

Lecture 24 - In flight Ballast Collection methods

Lecture 25 - Static Lift Prediction - Part I

Lecture 26 - Static Lift Prediction - Part II

Lecture 27 - Tutorial Problem 1 on Static Lift Estimation

Lecture 28 - Effect of Humidity and Vapour Pressure

Lecture 29 - Calculation of Ambient Air Density

Lecture 30 - Tutorial Problem 2 and 3 on Static Lift Estimation

Lecture 31 - Effect of Lifting Gas Purity, Superpressure and Superheat

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Ballonet Air Weight Estimation

Lecture 33 - Net Static Lift of non rigid airships

Lecture 34 - Net Static Lift for other LTA systems

Lecture 35 - Tutorial Problem 4 on Net Static Lift Estimation

Lecture 36 - Parameters affecting Static Lift

Lecture 37 - Effect of change in Atmospheric Pressure

Lecture 38 - Tutorial Problem 5 on Change in Atmospheric Pressure

Lecture 39 - Effect of Superpressure

Lecture 40 - Tutorial Problem 6 on effect of Superpressure

Lecture 41 - Effect of Slow change in Atmospheric Temperature and Superheat

Lecture 42 - Effect of Rapid change in Atmospheric Temperature

Lecture 43 - Tutorial Problem 7 on Change in Atmospheric Temperature and Superheat

Lecture 44 - Revision and Tutorial Problem 08 and 09 on Affecting Parameters of Static Lift

Lecture 45 - Effect of change in Relative Humidity

Lecture 46 - Effect of change in Lifting Gas Purity

Lecture 47 - Effect of change in Lifting Gas Volume

Lecture 48 - Determination of Inflation Fraction

Lecture 49 - Flight To Lower Ground Elevation

Lecture 50 - Tutorial Problem 10 on Helium Addition

Lecture 51 - Outdoor Hot Air Balloon

Lecture 52 - Pressure Height

Lecture 53 - Tutorial Problem 11 on Pressure Height Calculation

Lecture 54 - Sea Level Inflation Fraction

Lecture 55 - Flight above Pressure Height

Lecture 56 - Effect of Change in Operating Altitude

Lecture 57 - Tutorial Problem 12 on Lifting Gas Loss

Lecture 58 - Descent Following Exceedance

Lecture 59 - Pressure Height for other LTA Vehicles

Lecture 60 - Discussion of Practice Questions

Lecture 61 - Envelope Materials - Part I

Lecture 62 - Envelope Materials - Part II

Lecture 63 - Envelope Materials - Part III

Lecture 64 - Fabric Testing Machines - Part I

Lecture 65 - Fabric Testing Machines - Part II

Lecture 66 - Need for Ground Handling

Lecture 67 - Aerium Hanger for CL 160 Airship

Lecture 68 - Ground Handling of Airships

Lecture 69 - Types of Mooring Masts and Design Requirements

Lecture 70 - Nose Battens for Envelopes

Lecture 71 - Need for Airship Design Methodology

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Engineering Thermodynamics (2017) (Aerospace Engineering)

Co-ordinators : Dr. Jayant K. Singh

Lecture 1 - Fundamental laws of nature, system definitions and applications

Lecture 2 - Thermodynamic property, state, equilibrium and process

Lecture 3 - Temperature scale and pressure

Lecture 4 - Macroscopic and microscopic forms of energy

Lecture 5 - Different forms of work, energy transfer and sign convention

Lecture 6 - First law of thermodynamics and energy balance

Lecture 7 - Efficiency of mechanical and electrical devices

Lecture 8 - Examples on basic concept and energy balance

Lecture 9 - Phase change of a pure substance

Lecture 10 - Property diagrams of pure substances

Lecture 11 - Thermodynamic properties of a pure substance from a property table

Lecture 12 - Thermodynamic properties of a pure substance

Lecture 13 - Equations of state and compressibility chart

Lecture 14 - Examples on properties of pure substances

Lecture 15 - Quasi equilibrium, moving boundary work

Lecture 16 - Polytropic process

Lecture 17 - Energy analysis of closed system and unrestrained expansion

Lecture 18 - Internal energy, enthalpy, and specific heats of ideal gas

Lecture 19 - Internal energy, enthalpy, and specific heats of solids and liquids

Lecture 20 - Examples on energy balance for closed systems and moving boundary work

Lecture 21 - Conservation of mass and steady flow processes

Lecture 22 - Flow work and energy of flowing fluid

Lecture 23 - Energy balance for steady flow devices

Lecture 24 - Throttling valve, mixing chamber and heat exchanger

Lecture 25 - Energy analysis of steady and unsteady flow devices

Lecture 26 - Examples on mass and energy analysis of open systems

Lecture 27 - Second law of thermodynamics, heat engine and cyclic devices

Lecture 28 - COP of refrigerator and heat pump, second law statements

Lecture 29 - Perpetual motion machines, reversible and irreversible processes, Carnot cycle

Lecture 30 - Carnot principles, thermodynamic temperature scale, Carnot HE and HP

Lecture 31 - Examples on second law of thermodynamics

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Clausius inequality, application of second law

Lecture 33 - Entropy, increase in entropy principle, isentropic process

Lecture 34 - Change in entropy of solids, liquids and ideal gases

Lecture 35 - Reversible flow work, multistage compressor, efficiency of pump and compressors

Lecture 36 - Entropy balance in closed system and control volume

Lecture 37 - Examples on entropy change in a system

Lecture 38 - Exergy and second law efficiency

Lecture 39 - Exergy of a fixed mass and flowing stream

Lecture 40 - Exergy transfer due to heat, mass and work, exergy destruction

Lecture 41 - Exergy balance and second law efficiency for closed systems and steady flow devices

Lecture 42 - Examples related to exergy change and exergy destruction

Lecture 43 - Gas power cycles and air-standard assumptions

Lecture 44 - An overview of reciprocating engines and otto cycle

Lecture 45 - Analysis of Diesel cycle

Lecture 46 - Analysis of Brayton cycle

Lecture 47 - Examples on gas power cycles such as Otto, Diesel and Brayton

Lecture 48 - Rankin and Carnot vapour power cycles

Lecture 49 - Ideal regenerative Rankin cycle and combined gas-vapour cycle

Lecture 50 - Refrigeration cycles

Lecture 51 - Examples on vapour power cycles

Lecture 52 - Thermodynamic property relations: Gibbs equation, Mnemonic diagrams and reciprocity relations

Lecture 53 - hermodynamic property relations: Clapeyron equation and Maxwell relations

Lecture 54 - Thermodynamic property relations: Joule-Thomson coefficient and cyclic relations

Lecture 55 - Combustion and conservation of mass in a chemical reaction

Lecture 56 - Energy balance for reacting systems

Lecture 57 - Enthalpy of formation and combustion, adiabatic flame temperature

Lecture 58 - Examples on property relations and reaction thermodynamics

Lecture 39 - Emission Control Methods

Lecture 40 - Combustion Modification Methods

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Design of Fixed Wing Unmanned Aerial Vehicles (Aerospace Engineering)

Co-ordinators : Prof. Saderla Subrahmanyam

Lecture 1 - Introduction, course content and classification of UAVs

Lecture 2 - Measurement of Flight Velocity and Standard Atmosphere

Lecture 3 - Anatomy of Airplane and Airfoil Nomenclature

Lecture 4 - Examples, Pitot and static tube and differential pressure sensor

Lecture 5 - Generation of Lift and Drag

Lecture 6 - Aerodynamic center and center of pressure, Various wing planform

Lecture 7 - Lifting line theory, NACA airfoil nomenclature

Lecture 8 - Airfoil and Finite wing, Various wing planform

Lecture 9 - Interpreting airfoil data, Cl vs Alpha and drag polar, selection of airfoil

Lecture 10 - Introduction to Airplane performance, Equation of motion

Lecture 11 - Thrust required and Power required

Lecture 12 - Calculation of Performance parameters and selection of power plant

Lecture 13 - Climb Performance, Engine Sizing and Power Plant selection

Lecture 14 - Weight Estimation , Common propulsion systems

Lecture 15 - Weight Estimation contd., Electric propulsion, Battery Sizing

Lecture 16 - Iterative weight estimation and Wing sizing

Lecture 17 - Wing Planform selection and sizing and Flight test of Cropped delta wing UAVs

Lecture 18 - Effect of variation of CG location and Static Stability

Lecture 19 - C.G. location and Longitudinal Static stability

Lecture 20 - Tutorial 1

Lecture 21 - Contribution of tail in static stability and Neutral point.

Lecture 22 - Tutorial 2

Lecture 23 - Tutorial 3

Lecture 54

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Introduction to CFD (Aerospace Engineering)

Co-ordinators : Prof. M. Ramakrishna

Lecture 1 - Introduction, Why and how we need computers

Lecture 2 - Representing Arrays and functions on computers

Lecture 3 - Representing functions - Box functions

Lecture 4 - Representing functions - Polynomials and Hat functions

Lecture 5 - Hat functions, Quadratic and Cubic representations

Lecture 6 - Demo - Hat functions, Aliasing

Lecture 7 - Representing Derivatives - finite differences

Lecture 8 - Finite differences, Laplace equation

Lecture 9 - Laplace equation - Jacobi iterations

Lecture 10 - Laplace equation - Iteration matrices

Lecture 11 - Laplace equation - convergence rate

Lecture 12 - Laplace equation - convergence rate Continued

Lecture 13 - Demo - representation error, Laplace equation

Lecture 14 - Demo - Laplace equation, SOR

Lecture 15 - Laplace equation - final, Linear Wave equation

Lecture 16 - Linear wave equation - Closed form and numerical solution, stability analysis

Lecture 17 - Generating a stable scheme and Boundary conditions

Lecture 18 - Modified equation

Lecture 19 - Effect of higher derivative terms on Wave equation

Lecture 20 - Artificial dissipation, upwinding, generating schemes

Lecture 21 - Demo - Modified equation, Wave equation

Lecture 22 - Demo - Wave equation / Heat Equation

Lecture 23 - Quasi-linear One-Dimensional. wave equation

Lecture 24 - Shock speed, stability analysis, Derive Governing equations

Lecture 25 - One-Dimensional Euler equations - Attempts to decouple

Lecture 26 - Derive Eigenvectors, Writing Programs

Lecture 27 - Applying Boundary conditions

Lecture 28 - Implicit Boundary conditions

Lecture 29 - Flux Vector Splitting, setup froms averaging

Lecture 30 - Roes averaging

Lecture 31 - Demo - One Dimensional flow

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Accelerating convergence - Preconditioning, dual time stepping

Lecture 33 - Accelerating convergence - Intro to Multigrid method

Lecture 34 - Multigrid method

Lecture 35 - Multigrid method - final, Parallel Computing

Lecture 36 - Calculus of Variations - Three Lemmas and a Theorem

Lecture 37 - Calculus of Variations - Application to Laplace Equation

Lecture 38 - Calculus of Variations - Final and Random Walk

Lecture 39 - Overview and Recap of the course

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Rocket Propulsion (Aerospace Engineering)

Co-ordinators : Prof. K. Ramamurthi, Prof. S. Varunkumar

Lecture 1 - Introduction

Lecture 2 - Motion in Space

Lecture 3 - Rotational Frame of Reference and Orbital Velocities

Lecture 4 - Velocity Requirements

Lecture 5 - Theory of rocket propulsion

Lecture 6 - Rocket Equation and Staging of Rockets

Lecture 7 - Review of Rocket Principles: Propulsion Efficiency

Lecture 8 - Examples Illustrating Theory of Rocket Propulsion and Introduction to Nozzles

Lecture 9 - Theory of Nozzles

Lecture 10 - Nozzle Shape

Lecture 11 - Area Ratio of Nozzles: Under Expansion and Over Expansion

Lecture 12 - Characteristic Velocity and Thrust Coefficient

Lecture 13 - Divergence Loss in Conical Nozzles and the Bell Nozzles

Lecture 14 - Unconventional Nozzles and Problems in Nozzles

Lecture 15 - Criterion for Choice of Chemical Propellants

Lecture 16 - Choice of Fuel-Rich Propellants

Lecture 17 - Performance Prediction Analysis

Lecture 18 - Factors Influencing Choice of Chemical Propellants

Lecture 19 - Low energy liquid propellants and Hybrid propellants Chapter 5: Solid Propellant Rockets

Lecture 20 - Introduction to Solid Propellant Rockets

Lecture 21 - Burn Rate of Solid Propellants and Equilibrium Pressure in Solid Propellant Rockets

Lecture 22 - Design Aspects of Solid Propellant Rockets

Lecture 23 - Burning Surface Area of Solid Propellant Grains

Lecture 24 - Ignition of Solid Propellant Rockets

Lecture 25 - Review of Solid Propellant Rockets

Lecture 26 - Feed Systems for Liquid Propellant Rockets

Lecture 27 - Feed System Cycles for Pump Fed Liquid Propellant Rockets

Lecture 28 - Analysis of Gas Generator and Staged combustion cycles and introduction to injectors

Lecture 29 - Injectors, Cooling of Chambers and Mixture Ratio Distribution

Lecture 30 - Efficiencies due to mixture ratio distribution and incomplete vaporization

Lecture 31 - Pumps and Turbines: Propellant Feed System at Zero -g- Conditions

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Review of Liquid Bi-propellant Rockets and Introduction to Mono-propellant Rockets

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Weather Forecast in Agriculture and Agro-advisory (WF) (Agriculture)

Co-ordinators : Dr. R. Nagarajan, Co Faculty, Dr.T.N.Balasubramanian (Rtd.), Instructor Incharge

Lecture 1 - Introduction

Lecture 2 - Basic aspects of Atmosphere, Climate, Weather

Lecture 3 - Basic aspects of Rainfall and their application in crop production

Lecture 4 - Basic aspects of Temperature and their application in crop production

Lecture 5 - Basic aspects of Relative humidity, Cloud cover and their application in crop production

Lecture 6 - Basic aspects of wind, wind direction and their application in crop production

Lecture 7 - Three weather codes and crop production

Lecture 8 - Crop production risks and their management

Lecture 9 - Weather sensitive crops, stages and farm operations

Lecture 10 - Crop-weather interactions and definition

Lecture 11 - Crop-Weather Interactions: Wheat, Rice and Maize

Lecture 12 - Crop-Weather Interactions: Sorghum, Groundnut and Pigeon pea

Lecture 13 - Crop-Weather Interactions: Cotton and Sugarcane

Lecture 14 - Crop-Weather Interactions: Sugarbeet and Chickpea

Lecture 15 - Crop-Weather Interactions: Sunflower and Mustard

Lecture 16 - Genesis of weather forecast in India and Abroad

Lecture 17 - Types of weather forecast and details

Lecture 18 - Types of weather forecast and details (Continued...)

Lecture 19 - Simple methods of verification of weather forecast with real event

Lecture 20 - Traditional knowledges on weather forecast and their validity

Lecture 21 - Weather thumb rules and their validity

Lecture 22 - Development and component of agro advisory for weather forecast

Lecture 23 - Development and component of agro advisory for weather forecast (Continued...)

Lecture 24 - Model agro advisories for selected five days weather forecast

Lecture 25 - Mass communication mode of agro advisories and their effectiveness

Lecture 26 - Discussion on weather forecast and agro advisory from different website

Lecture 27 - Role of climate manager on farm management decision based on weather forecast at village level and assignment

Lecture 28 - Development of selected weather window for issuing agro advisory - case study from Tamil Nadu

Lecture 29 - Model of agro advisory for 54 selected weather window of Tamil Nadu for rice

Lecture 30 - Response farming- a type of farm planning being practiced in Australia considering seasonal climate forecast

Lecture 31 - Case study in India on the adoption of weather based crop production - Crop management

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Case study in India on the adoption of weather based crop production - Pest and disease management

Lecture 33 - Case study in India on the adoption of weather based animal production

Lecture 34 - Cost benefit analysis for the case study done on crop management

Lecture 35 - Cost benefit analysis for the case study done on animal management

Lecture 36 - Summary

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:ICT Basics (Agriculture)

Co-ordinators : Prof. T.V. Prabhakar

Lecture 1 - Introduction

Lecture 2 - Highlights Week 0 and 1

Lecture 3 - What is ICT?

Lecture 4 - Architecture of a Computer

Lecture 5 - Architecture of a Phone

Lecture 6 - What is the Internet?

Lecture 7 - What is WWW?

Lecture 8 - Highlights Week 2

Lecture 9 - Phones, Smart Phones, Phablets, Tablets

Lecture 10 - Introduction to Android

Lecture 11 - Network Architectures - Part-1 (Introduction to Computer Networks)

Lecture 12 - Network Architectures - Part-2 (Overview of Network Architecture)

Lecture 13 - Network Architectures - Part-3 (Architecture of Internet)

Lecture 14 - Mobile Wireless Communications - Introduction (Module-1)

Lecture 15 - Mobile Wireless Communication (Module-2)

Lecture 16 - Highlights Week 3

Lecture 17 - Adaptive and Responsive Websites

Lecture 18 - Data management

Lecture 19 - Knowledge Representation

Lecture 20 - Knowledge Representation Techniques

Lecture 21 - Expert Systems

Lecture 22 - Highlights Week - 4

Lecture 23 - Speech Recognition

Lecture 24 - Speech Synthesis

Lecture 25 - Identity Management - Part 1

Lecture 26 - Identity Management - Part 2

Lecture 27 - Location Recognition - Part 1

Lecture 28 - Location Recognition - Part 2

Lecture 29 - Parameter Sensing

Lecture 30 - Highlights Week-5

Lecture 31 - Social Networking - Part 1

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Social Networking - Part 2

Lecture 33 - Blogs

Lecture 34 - Facebook

Lecture 35 - Twitter

Lecture 36 - 3G WCDMA (Module- 3)

Lecture 37 - 4G Mobile Wireless WiMAX (Module-4)

Lecture 38 - Advanced Wireless Technologies (Module-5)

Lecture 39 - LTE, WLAN, Bluetooth and Future

Lecture 40 - Highlights Week-6

Lecture 41 - Introduction to Cloud Computing

Lecture 42 - Introduction to Cloud Services

Lecture 43 - Cloud Service Providers

Lecture 44 - GIS Application in Agriculture - Part 1

Lecture 45 - GIS Application in Agriculture - Part 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Momentum Transfer in Process Engineering (Agriculture)

Co-ordinators : Prof. Tridib Kumar Goswami

Lecture 1

Lecture 2

Lecture 3

Lecture 4

Lecture 5

Lecture 6

Lecture 7

Lecture 8

Lecture 9

Lecture 10

Lecture 11 - Application of Navier Stokeâ€™s equation for finding out viscosity - Part 2

Lecture 12 - Application of Navier Stokeâ€™s equation for finding out viscosity - Part 3

Lecture 13 - Flow through pipes

Lecture 14 - Hagen-poiseuille equation from Navier stokes equation

Lecture 15 - Fanning friction factor

Lecture 16 - Moodyâ€™s chart

Lecture 17 - Laminar and turbulent flow in a pipe

Lecture 18 - Flow through flat and parallel plates

Lecture 19 - Flow of film or film flow

Lecture 20 - Problems and solution of falling film

Lecture 21 - Flow through annulus - Part 1

Lecture 22 - Flow through annulus - Part 2

Lecture 23 - Stokeâ€™s law

Lecture 24 - Flow through flat plates or slits

Lecture 25 - Problems and solution for flow through flat plates or slits

Lecture 26 - Compressible fluid flow

Lecture 27 - Flow through nozzle - I

Lecture 28 - Flow through nozzle - II

Lecture 29 - Flow through nozzle - problems and solutions

Lecture 30 - Nozzle flow- problems and solutions

Lecture 31 - Sonic velocity

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Sonic velocity - Mach number

Lecture 33 - Variable fluid flow

Lecture 34 - Variable fluid flow - problems and solutions

Lecture 35 - Variable fluid flow - problems and solutions (Continued...)

Lecture 36 - Pneumatic conveying

Lecture 37 - Problem on Pneumatic conveying - Part 1

Lecture 38 - Problem on Pneumatic conveying - Part 2

Lecture 39 - Non Newtonian fluid flow - Part 1

Lecture 40 - Non Newtonian fluid flow - Part 2

Lecture 41 - Velocity profile for Non Newtonian fluid

Lecture 42 - Average velocity for Non Newtonian fluid

Lecture 43 - Problems and solution of Non Newtonian fluid - Part 1

Lecture 44 - Problems and solution of Non Newtonian fluid - Part 2

Lecture 45 - Flow of Non Newtonian fluid through slit

Lecture 46 - Generalized coefficient of Reynolds number

Lecture 47 - Flow through packed beds

Lecture 48 - Ergunâ€™s equation- derivation - Part 1

Lecture 49 - Ergunâ€™s equation- derivation - Part 2

Lecture 50 - Solving problems on Ergunâ€™s equation

Lecture 51 - Solving problems on Ergunâ€™s equation

Lecture 52 - Fluidization

Lecture 53 - Fluidized bed flow

Lecture 54 - Problem of Fluidized bed condition - Part 1

Lecture 55 - Problem of Fluidized bed condition - Part 2

Lecture 56 - Problem and solution

Lecture 57 - Problem and solution

Lecture 58 - Problem and solution

Lecture 59 - Problem and solution

Lecture 60 - Problem and solution with comprehension of course

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Farm Machinery (Agriculture)

Co-ordinators : Prof. VK Tewari

Lecture 1 - Importance of Farm Machines in the Contest of Enhance Production, Multiple Cropping, Labour Scarcity etc.

Lecture 2 - Ploughing and first opening of the soil, the design and component details

Lecture 3 - Tractor, implement and soil force consideration for tillage implement design

Lecture 4 - Tractor, implement and soil force consideration for tillage implement design

Lecture 5 - Mechanics of rotavoator or rotary tillers

Lecture 6 - Design of a tractor PTO operated rotavator

Lecture 7 - Tractor implement hitching systems

Lecture 8 - Mechanics of tractor implement hitch system and traction prediction models

Lecture 9 - Laboratory class on traction and tire testing

Lecture 10 - Combination tillage implements for efficient land preparation

Lecture 11 - LASER guided land laveller

Lecture 12 - Introduction of seeding operation

Lecture 13 - Types of seed metering devices and their operation

Lecture 14 - Types of fertilizer metering, furrow opening and soil covering devices

Lecture 15 - Equipment for seeding and planting

Lecture 16 - Equipment for precision planting

Lecture 17 - Equipment for Paddy Transplanting

Lecture 18 - Microcontroller based uniform seed rate application system

Lecture 19 - GPS based automatic Variable rate fertilizer applicator

Lecture 20 - Embedded GPS integrated Variable Rate Fertilizer Applicator

Lecture 21 - Design of a seeding equipment - PART 1

Lecture 22 - Design of a seeding equipment - PART 2

Lecture 23 - Design of a seeding equipment - PART 3

Lecture 24 - Design a tractor drawn seed drill for a 40 hp tractor - I

Lecture 25 - Design a tractor drawn seed drill for a 40 hp tractor - II

Lecture 26 - Testing of tractor operated seeding equipment

Lecture 27

Lecture 28

Lecture 29

Lecture 30

Lecture 31

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Farm machines for interculture operation

Lecture 33 - Performance of weeding blades of a push-pull weeder

Lecture 34 - Advanced level machinery for inter and intra row weeding

Lecture 35 - Tractor mounted contact type microcontroller based improved variable rate herbicide applicator

Lecture 36 - Design of manually operated weeding equipment

Lecture 37 - Plant protection equipment/machinery

Lecture 38 - Selection and design of plant protection equipment/machinery

Lecture 39 - Manually operated knapsack-cum-boom sprayer

Lecture 40 - Performance evaluation of sprayer

Lecture 41 - Testing and certification of spraying equipment

Lecture 42 - Problems based on the design and selection of spraying equipment - I

Lecture 43 - Problems based on the design and selection of spraying equipment - II

Lecture 44 - Advanced level spraying equipment: Ultrasonic sensor based sprayer

Lecture 45 - Advanced level spraying equipment: Drone assisted variable rate chemical application system and electrostatic sprayer

Lecture 46 - Harvesting equipment

Lecture 47 - Machines for harvesting cereal crops, root and fruit crops

Lecture 48 - Combine Harvester

Lecture 49 - Advanced technology approach for cotton harvesting

Lecture 50 - hreshing operation and equipment

Lecture 51 - Design of threshing equipment

Lecture 52 - Performance evaluation and testing of thresher

Lecture 53 - Conservation Agriculture

Lecture 54 - Materials for construction of farm machinery

Lecture 55 - Machinery for Land Drainage, Land Reclamation and Estate Maintenance Part - I

Lecture 56 - Machinery for Land Drainage, Land Reclamation and Estate Maintenance Part - II

Lecture 57 - Machinery for Land Drainage, Land Reclamation and Estate Maintenance Part - III

Lecture 58 - Machinery Selection and Management - Part 1

Lecture 59 - Machinery Selection and Management - Part 2

Lecture 60 - Epilogue

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Irrigation and Drainage (Agriculture)

Co-ordinators : Prof. Damodhara Rao Mailapallli

Lecture 1 - Introduction

Lecture 2 - Soil Properties - I

Lecture 3 - Soil Properties - II

Lecture 4 - Soil Water

Lecture 5 - Tutorial - I

Lecture 6 - Field water balance

Lecture 7 - Evapotranspiration

Lecture 8 - Crop water requirement

Lecture 9 - Irrigation Scheduling

Lecture 10 - Tutorial

Lecture 11 - Irrigation Water Conveyance System

Lecture 12 - Irrigation Water Conveyance

Lecture 13 - Channel Design Structures

Lecture 14 - Measurement of Irrigation Water: Pipe

Lecture 15 - Tutorial

Lecture 16 - Water Application Methods

Lecture 17 - Surface Irrigation Hydraulics

Lecture 18 - Furrow Irrigation Hydraulics

Lecture 19 - Border Irrigation Design

Lecture 20 - Tutorial

Lecture 21 - Sprinkler Irrigation Design

Lecture 22 - Sprinkler Irrigation : Hydraulic Design

Lecture 23 - Drip Irrigation - I

Lecture 24 - Drip Irrigation Design

Lecture 25 - Tutorial (Week 5)

Lecture 26 - Irrigation Wells

Lecture 27 - Aquifer Properties

Lecture 28 - Well Hydraulics - 1

Lecture 29 - Well Hydraulics - 2

Lecture 30 - Tutorial

Lecture 31 - Introduction

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Centrifugal Pump: Basics

Lecture 33 - Centrifugal Pumps: Power Requirement

Lecture 34 - Pump Characteristic Curves

Lecture 35 - Tutorial

Lecture 36 - Management of salt affected soils: Saline and alkali soils - 1

Lecture 37 - Management of salt affected soils: Saline and alkali soils - 1

Lecture 38 - Agricultural Drainage: Related Concepts

Lecture 39 - Agricultural Drainage: Introduction

Lecture 40 - Tutorial

Lecture 41 - Drainage System Components

Lecture 42 - Drainage System : Drain Pipe

Lecture 43 - Drainage System : Structures

Lecture 44 - Drainage System Design

Lecture 45 - Tutorial

Lecture 46 - Subsurface Drainage Design - 1

Lecture 47 - Subsurface Drainage Design - 2

Lecture 48 - Subsurface Drainage Design - 3

Lecture 49 - Subsurface Drainage Design - 4

Lecture 50 - Tutorial

Lecture 51 - Surface drainage system design - 1

Lecture 52 - Surface drainage system design - 2

Lecture 53 - Non-conventional drainage

Lecture 54 - Economics of drainage project

Lecture 55 - Tutorial

Lecture 56 - Case study of drainage system

Lecture 57 - Drainage Model

Lecture 58 - Irrigation Efficiency

Lecture 59 - Irrigation Economics

Lecture 60 - Irrigation model

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fundamentals of Food Process Engineering (Agriculture)

Co-ordinators : Prof. Jayeeta Mitra

Lecture 1 - Importance Of Rheology In Food

Lecture 2 - Food Rheology

Lecture 3 - Food Rheology

Lecture 4 - Food Rheology

Lecture 5 - Food Rheology

Lecture 6 - Measurements of Rheological Properties

Lecture 7 - Measurements of Rheological Properties

Lecture 8 - Rheological Properties of Viscoelastic Food

Lecture 9 - Rheological Properties of Viscoelastic Food

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Engineering Mechanics (Basic Courses (Semester 1 and 2))

Co-ordinators : Prof. Manoj K Harbola

Lecture 1 - Engineering Mechanics

Lecture 2 - Equilibrium - I

Lecture 3 - Equilibrium - II

Lecture 4 - Equilibrium - III

Lecture 5 - Plan Trusses - I

Lecture 6 - Plan Trusses - II

Lecture 7 - Friction

Lecture 8 - Properties of Surfaces - I

Lecture 9 - Properties of Surfaces - II

Lecture 10 - Properties of Surfaces - III

Lecture 11 - Method of Virtual Work

Lecture 12 - Motion of Particles Planar Polar Coordinates

Lecture 13 - Motion With Constraints

Lecture 14 - Motion of Particle With Friction

Lecture 15 - Motion of Particles With Drag

Lecture 16 - Momentum

Lecture 17 - Work and Energy - I

Lecture 18 - Work and Energy - II

Lecture 19 - Work and Energy - III

Lecture 20 - Work and Energy - IV

Lecture 21 - Rotational Motion - I

Lecture 22 - Rotational Motion - II

Lecture 23 - Rotational Motion - III

Lecture 24 - Rotational Motion - IV

Lecture 25 - Rotational Motion - V

Lecture 26 - Rotational Motion - VI

Lecture 27 - Simple Harmonic Motion - I

Lecture 28 - Simple Harmonic Motion - II

Lecture 29 - Simple Harmonic Motion - III

Lecture 30 - Motion in Uniformly Accelerating Frames

Lecture 31 - Motion In Rotating Frame

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Mathematics I (Basic Courses (Semester 1 and 2))

Co-ordinators : Prof. Swagato K. Ray, Prof. Shobha Madan, Dr. P. Shunmugaraj

Lecture 1 - Real Number

Lecture 2 - Sequences I

Lecture 3 - Sequences II

Lecture 4 - Sequences III

Lecture 5 - Continuous Function

Lecture 6 - Properties of Continuous Function

Lecture 7 - Uniform Continuity

Lecture 8 - Differentiable Functions

Lecture 9 - Mean Value Theorem

Lecture 10 - Maxima - Minima

Lecture 11 - Taylor's Theorem

Lecture 12 - Curve Sketching

Lecture 13 - Infinite Series I

Lecture 14 - Infinite Series II

Lecture 15 - Tests of Convergence

Lecture 16 - Power Series

Lecture 17 - Riemann Integral

Lecture 18 - Riemann Integrable Functions

Lecture 19 - Applications of Riemann Integral

Lecture 20 - Length of a curve

Lecture 21 - Line Integrals

Lecture 22 - Functions of Several Variables

Lecture 23 - Differentiation

Lecture 24 - Derivatives

Lecture 25 - Mean Value Theorem

Lecture 26 - Maxima Minima

Lecture 27 - Method of Lagrange Multipliers

Lecture 28 - Multiple Integrals

Lecture 29 - Surface Integrals

Lecture 30 - Green's Theorem

Lecture 31 - Stokes Theorem

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Physics I - Oscillations and Waves (Basic Courses (Semester 1 and 2))

Co-ordinators : Prof. S. Bharadwaj

Lecture 1 - Simple Harmonic Oscillators

Lecture 2 - Damped Oscillator - I

Lecture 3 - Damped Oscillator - II

Lecture 4 - Oscillator With External Forcing - I

Lecture 5 - Oscillator With External Forcing

Lecture 6 - Resonance

Lecture 7 - Coupled Oscillations

Lecture 8 - Sinusoidal Plane Waves - I

Lecture 9 - Electromagnetic waves - I

Lecture 10 - Electromagnetic Waves - II

Lecture 11 - The Vector Nature of Electromagnetic Waves

Lecture 12 - The Electromagnetic Spectrum

Lecture 13 - The Electromagnetic Spectrum - II

Lecture 14 - Interference - I

Lecture 15 - Interference - II

Lecture 16 - Interference - III

Lecture 17 - Interference - IV

Lecture 18 - Coherence

Lecture 19 - Coherence

Lecture 20 - Diffraction - I

Lecture 21 - Diffraction - II

Lecture 22 - Diffraction - III

Lecture 23 - Diffraction - IV

Lecture 24 - X-Ray Diffraction

Lecture 25 - Beats

Lecture 26 - The Wave Equation

Lecture 27 - Solving the Wave Equation

Lecture 28 - Waves

Lecture 29 - Standing Waves

Lecture 30 - Standing Waves

Lecture 31 - Polarization

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Compton Effect

Lecture 33 - Wave - Particle Duality

Lecture 34 - Wave - Particle Duality

Lecture 35 - Probability Amplitude

Lecture 36 - Probability

Lecture 37 - Schrodinger Wave Equation

Lecture 38 - Measurements

Lecture 39 - Particle in a Potential

Lecture 40 - Potential Well

Lecture 41 - Potential Well

Lecture 42 - Potential Well

Lecture 43 - Quantum Tunneling

Lecture 44 - Quantum Tunneling

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Strategic Management (Basic Courses (Semester 1 and 2))

Co-ordinators : Prof. Kalyan Chakravarti

Lecture 1 - Strategy: Philosophy;Competition;Competitive Advantage - Part - I

Lecture 2 - Strategy: Philosophy;Competition;Competitive Advantage - Part - II

Lecture 3 - Case Study - Group Presentation on Case - I (Baddi`s Solvent)

Lecture 4 - Case Study - Group Presentation on Case - II

Lecture 5 - Case Study - Group Presentation on Case - III

Lecture 6 - Case Study - Group Presentation on Case - IV Form

Lecture 7 - Strategy: Implementation in Organizations

Lecture 8 - Strategy: Design: Process: Managing Strategic Change

Lecture 9 - Case Study: The House of Tata

Lecture 10 - Case Study: The House of Tata

Lecture 11 - Group Presentation - II

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Proteins and Gel-Based Proteomics (Biotechnology)

Co-ordinators : Prof. Sanjeeva Srivastava

Lecture 0 - Proteins and Gel-Based Proteomics; Course Introduction

Lecture 1 - Introduction to amino acids

Lecture 2 - Introduction to proteins

Lecture 3 - Protein folding & misfolding

Lecture 4 - Protein purification techniques

Lecture 5 - Introduction to proteomics

Lecture 6 - Systems biology and proteomics

Lecture 7 - Sample preparation and pre-analytical factors

Lecture 8 - Sample preparation: Pre-analytical factors (Continued...)

Lecture 9 - Sample preparation: Protein extraction and quantification

Lecture 10 - One-dimensional electrophoresis

Lecture 11 - 2-DE: Rehydration, IEF & Equilibration

Lecture 12 - 2-DE: Second dimension, staining & destaining

Lecture 13 - 2-DE: Gel analysis

Lecture 14 - 2-DE: Applications

Lecture 15 - 2-DE: Applications (Continued...) & Challenges

Lecture 16 - 2D-DIGE: Basics

Lecture 17 - 2D-DIGE: Data analysis

Lecture 18 - 2D-DIGE: Applications

Lecture 19 - Protein identification using MALDI-TOF/TOF

Lecture 20 - Proteomics experiment data analysis & challenges

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Mass spectrometry based proteomics (Biotechnology)

Co-ordinators : Prof. Sanjeeva Srivastava

Lecture 0 - Introductory lecture

Lecture 1 - Introduction to proteomics

Lecture 2 - Proteomics and sample preparation

Lecture 3 - Bacterial protein extraction

Lecture 4 - In-gel digestion

Lecture 5 - Fundamentals of mass spectrometry

Lecture 6 - Chromatography technologies

Lecture 7 - Liquid chromatography

Lecture 8 - Mass spectrometry: Ionization sources

Lecture 9 - Mass spectrometry: Mass analyzers

Lecture 10 - MALDI sample preparation and analysis

Lecture 11 - Introduction to quantitative proteomics

Lecture 12 - Hybrid mass spectrometry configurations

Lecture 13 - SILAC: In Vivo labeling

Lecture 14 - iTRAQ: In Vitro labeling

Lecture 15 - TMT: In vitro labeling

Lecture 16 - Quantitative proteomics data analysis

Lecture 17 - Proteomics and Systems biology I

Lecture 18 - Proteomics & Systems biology II

Lecture 19 - Proteomics applications

Lecture 20 - Advances and challenges in proteomics

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Interactomics: Protein Arrays and Label-free Biosensors (Biotechnology)

Co-ordinators : Prof. Sanjeeva Srivastava

Lecture 1 - Introduction to Interactomics

Lecture 2 - An overview of label-free technologies

Lecture 3 - An overview of surface plasmon resonance (SPR)

Lecture 4 - An overview of surface plasmon resonance imaging (SPRi)

Lecture 5 - Basics of SPR: Surface chemistry

Lecture 6 - Basics of SPR: Experimental design

Lecture 7 - Protein immobilization for protein-protein interaction studies

Lecture 8 - Protein-protein interaction study: Binding analysis

Lecture 9 - Protein-protein interaction study: Kinetic analysis

Lecture 10 - Protein-small molecule interaction study: Immobilization and binding analysis

Lecture 11 - Protein-small molecule interaction study: Kinetic analysis

Lecture 12 - SPR: Interactive Session - I

Lecture 13 - SPR: Interactive Session - II

Lecture 14 - An overview of ellipsometry and interferometry techniques

Lecture 15 - An introduction to BioLayer Interferometry (BLI) and its applications in protein research

Lecture 16 - Kinetic analysis of protein-protein interaction using BLI

Lecture 17 - Label-free quantification of proteins using BLI

Lecture 18 - Diffraction-based biosensors - I

Lecture 19 - Diffraction-based biosensors - II

Lecture 20 - Nanotechniques in proteomics - I

Lecture 21 - Nanotechniques in proteomics - II

Lecture 22 - High throughputplatforms of interactomics: Protein arrays

Lecture 23 - Conventional label based detection techniques for Protein microarrays

Lecture 24 - Novel detection techniques for Protein microarrays

Lecture 25 - Recombinational cloning and its application for Protein microarrays

Lecture 26 - An introduction to Cell-free protein synthesis

Lecture 27 - Cell-free synthesis based protein microarrays: PISA and NAPPA

Lecture 28 - Cell-free synthesis based protein microarrays: MIST, DAPA and Halotag Arrays

Lecture 29 - Digging deeper into NAPPA: Basic Workflow

Lecture 30 - Digging deeper into NAPPA: Surface Chemistry, Printing and Assessment

Lecture 31 - Application of cell free expression protein microarrays in biomarker discovery

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Application of cell free expression protein microarrays in immunological studies

Lecture 33 - Basics of microarray image scanning

Lecture 34 - Software for Image scanning and data processing

Lecture 35 - Microarray Data Analysis - Part I

Lecture 36 - Microarray Data Analysis - Part II

Lecture 37 - Application of protein microarray in biomarker discovery - I

Lecture 38 - Application of protein microarray in biomarker discovery - II

Lecture 39 - Systems biology and networks

Lecture 40 - Challenges in proteomics

NPTEL : NOC:Introduction to Proteomics (Biotechnology)

Co-ordinators : Prof. Sanjeeva Srivastava

Lecture 1 - Introduction to amino acids

Lecture 2 - Introduction to proteins

Lecture 3 - Protein folding and misfolding

Lecture 4 - Introduction to proteomics

Lecture 5 - Lab session â€“ Protein-protein interaction using label-free biosensors

Lecture 6 - Sample preparation and pre-analytical factors

Lecture 7 - Sample preparation: Pre-analytical factors (Continued...)

Lecture 8 - Sample preparation: Protein extraction and quantification

Lecture 9 - One-dimensional electrophoresis

Lecture 10 - Introduction to 2-DE

Lecture 11 - 2-DE: Second dimension, staining and destaining

Lecture 12 - 2-DE: Gel analysis

Lecture 13 - 2-DE Applications

Lecture 14 - 2-DE Applications (Continued...) and Challenges

Lecture 15 - Lab session - Protein/peptide pre-fractionation using OFFGEL FRACTIONATOR and data analysis

Lecture 16 - 2D-DIGE: Basics

Lecture 17 - 2D-DIGE: Data analysis

Lecture 18 - 2D-DIGE: Applications

Lecture 19 - Systems biology and proteomics - I

Lecture 20 - Systems biology and proteomics - II

Lecture 21 - Fundamentals of mass spectrometry

Lecture 22 - Chromatography technologies

Lecture 23 - Liquid chromatography

Lecture 24 - Mass spectrometry: Ionization sources

Lecture 25 - Mass spectrometry: Mass analyzers

Lecture 26 - MALDI sample preparation and analysis

Lecture 27 - Hybrid mass spectrometry configurations

Lecture 28 - Lab session - Demonstration of Q-TOF MS technology

Lecture 29 - In-gel and in-solution digestion

Lecture 30 - Lab session - Sample preparation: tissue sample preservation technology

Lecture 31 - Introduction to quantitative proteomics

Lecture 32 - SILAC: In vivo labeling

Lecture 33 - iTRAQ: In vitro labeling

Lecture 34 - TMT: In vitro labeling

Lecture 35 - Quantitative proteomics data analysis

Lecture 36 - Proteomics applications

Lecture 37 - Challenges in proteomics

Lecture 38 - OMICS and translational research

Lecture 39 - Lab session â€“ Targeted proteomics using triple quadrupole mass spectrometry

Lecture 40 - Lab session â€“ Targeted proteomics: multiple reaction monitoring

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Biostatistics (Biotechnology)

Co-ordinators : Prof. Shamik Sen

Lecture 1 - Introduction to the course

Lecture 2 - Data representation and plotting

Lecture 3 - Arithmetic mean

Lecture 4 - Geometric mean

Lecture 5 - Measure of Variability, Standard deviation

Lecture 6 - SME, Z-Score, Box plot

Lecture 7 - Moments, Skewness

Lecture 8 - Kurtosis, R programming

Lecture 9 - R programming

Lecture 10 - Correlation

Lecture 11 - Correlation and Regression - Part-I

Lecture 12 - Correlation and Regression - Part-II

Lecture 13 - Interpolation and extrapolation

Lecture 14 - Nonlinear data fitting

Lecture 15 - Concept of Probability: introduction and basics

Lecture 16 - Counting principle, Permutations, and Combinations

Lecture 17 - Conditional probability

Lecture 18 - Conditional probability and Random variables

Lecture 19 - Random variables, Probability mass function, and Probability density function

Lecture 20 - Expectation, Variance and Covariance - Part-I

Lecture 21 - Expectation, Variance and Covariance - Part-II

Lecture 22 - Binomial random variables and Moment generating function

Lecture 23 - Probability distribution: Poisson distribution and Uniform distribution Part-I

Lecture 24 - Uniform distribution Part-II and Normal distribution Part-I

Lecture 25 - Normal distribution Part-II and Exponential distribution

Lecture 26 - Sampling distributions and Central limit theorem - Part-I

Lecture 27 - Sampling distributions and Central limit theorem - Part-II

Lecture 28 - Central limit theorem - Part-III and Sampling distributions of sample mean

Lecture 29 - Central limit theorem - Part-IV and Confidence intervals

Lecture 30 - Confidence intervals Part- II

Lecture 31 - Test of Hypothesis - 1

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Test of Hypothesis - 2 (1 tailed and 2 tailed Test of Hypothesis, p-value)

Lecture 33 - Test of Hypothesis - 3 (1 tailed and 2 tailed Test of Hypothesis, p-value)

Lecture 34 - Test of Hypothesis - 4 (Type -1 and Type -2 error)

Lecture 35 - T-test

Lecture 36 - 1 tailed and 2 tailed T-distribution, Chi-square test

Lecture 37 - ANOVA - 1

Lecture 38 - ANOVA - 2

Lecture 39 - ANOVA - 3

Lecture 40 - ANOVA for linear regression, Block Design

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Mechanobiology (Biotechnology)

Co-ordinators : Prof. Shamik Sen

Lecture 1 - Need to Study Mechanobiology

Lecture 2 - Cell as a Tent, Individual Components

Lecture 3 - Cell-ECM Crosstalk

Lecture 4 - ECM Proteins: Collagen

Lecture 5 - Measuring Properties of Collagen Networks

Lecture 6 - Properties of Collagen Networks

Lecture 7 - Rheology

Lecture 8 - Rheology of Biopolymer Networks

Lecture 9 - Atomic Force Microscopy (AFM)

Lecture 10 - Design of Protein Constructs for AFM

Lecture 11 - Protein Unfolding using AFM

Lecture 12 - Protein Unfolding using AFM

Lecture 13 - Focal Adhesions: Focal Adhesion Proteins

Lecture 14 - Focal Adhesion Organization

Lecture 15 - Focal Adhesions: Role of Forces

Lecture 16 - Cytoskeleton: Actin

Lecture 17 - Force-velocity Relationships of Actin Networks

Lecture 18 - Mesenchymal Cell Migration

Lecture 19 - Actin Dynamics during Mesenchymal Migration

Lecture 20 - Actin Dynamics during Mesenchymal Migration

Lecture 21 - Adhesion Independent Migration

Lecture 22 - Adhesion Independent and Collective Cell Migration

Lecture 23 - Collective Cell Migration

Lecture 24 - Mechanobiology of Stem Cell Fate - I

Lecture 25 - Mechanobiology of Stem Cell Fate - II

Lecture 26 - Mechanobiology of Stem Cell Fate - III

Lecture 27 - Mechanobiology of Diseases: Cancer - I

Lecture 28 - Mechanobiology of Diseases: Cancer - II

Lecture 29 - Mechanobiology of Diseases: Cancer - III

Lecture 30 - Mechanobiology of Diseases: Atherosclerosis and Hypertension

Lecture 31 - Mechanobiology of Diseases: Muscular Dystrophy

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Nuclear Mechanotransduction: LINC complex

Lecture 33 - Nuclear Mechanotransduction: LINC Complex in Cell Migration

Lecture 34 - Nuclear Mechanotransduction: Gene Regulation

Lecture 35 - Mechanical Forces and DNA damage

Lecture 36 - Techniques in Mechanobiology: Hydrogels

Lecture 37 - Techniques in Mechanobiology: AFM

Lecture 38 - Techniques in Mechanobiology: Traction Force Microscopy, Trypson Deadhesion and Laser Ablation

Lecture 39 - Techniques in Mechanobiology: Microfabrication

Lecture 40 - Techniques in Mechanobiology: FRET

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introductory Mathematical Methods for Biologists (Biotechnology)

Co-ordinators : Dr. Ranjith Padinhateeri

Lecture 1 - Introduction

Lecture 2 - Graphs and Functions

Lecture 3 - Equations as Graphs

Lecture 4 - Graphs : Exponential and Periodic Functions

Lecture 5 - Graphs : Logarithmic and Other Functions

Lecture 6 - Images as 2D/3D Functions

Lecture 7 - Functions and its Derivatives

Lecture 8 - Computing Derivatives of Curves

Lecture 9 - Rules for Calculating Derivatives

Lecture 10 - Understanding Derivatives

Lecture 11 - Curvature and Second Derivative

Lecture 12 - Plotting Curves

Lecture 13 - Numerical Calculation of Derivatives

Lecture 14 - Function, Derivatives and Series Expansion

Lecture 15 - L'Hopital's Rule and Partial Derivatives

Lecture 16 - Integration

Lecture 17 - Integration : Rules

Lecture 18 - Integration : Graphical Understanding

Lecture 19 - Integration : More Examples

Lecture 20 - Integration : Product of Two Functions

Lecture 21 - Exponential Growth and Decay

Lecture 22 - Scalars and Vectors

Lecture 23 - Vectors : Position and Movement in 2D

Lecture 24 - Cell Symmetry : Use of Polar Coordinates

Lecture 25 - Gradient, Forces and Flows : Part I

Lecture 26 - Gradient, Forces and Flows : Part II

Lecture 27 - Understanding Diffusion

Lecture 28 - Diffusion Constant and Einstein Relation 1905

Lecture 29 - Diffusion Equation

Lecture 30 - Diffusion vs. Active Transport

Lecture 31 - Nernst Equation

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Fourier Series : Part I

Lecture 33 - Fourier Series : Part II

Lecture 34 - Fourier Transform

Lecture 35 - Introduction to Statistics

Lecture 36 - Mean, Standard deviation and Distribution

Lecture 37 - Frequency Distribution and Probability Distribution

Lecture 38 - Binomial Distribution

Lecture 39 - Normal Distribution

Lecture 40 - Hypothesis Testing and Mathematical Modeling

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Bioengineering: An Interface with Biology and Medicine (Biotechnology)

Co-ordinators : Prof. Sanjeeva Srivastava

Lecture 1 - Why biology for engineers - Part I

Lecture 2 - Why biology for engineers - Part II

Lecture 3 - Life processes and Cell

Lecture 4 - Cell and its properties

Lecture 5 - Clinicianâ€™s Perspective - I

Lecture 6 - Nucleic Acid and Central Dogma

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Enzyme Science and Engineering (Biotechnology)

Co-ordinators : Prof. Subhash Chand

Lecture 1 - Introduction and Scope to Enzyme Science and Engineering

Lecture 2 - Characteristic Features of Enzymes

Lecture 3 - Enzymes as Biocatalysts

Lecture 4 - Enzymatic Catalysis

Lecture 5 - Specificity of Enzyme Action

Lecture 6 - Kinetics of Enzyme Catalyzed Reactions

Lecture 7 - Kinetics of Enzyme Catalyzed Reactions

Lecture 8 - Deviation from Hyperbolic Enzyme Kinetics

Lecture 9 - Role of Effector Molecules in Enzyme Kinetics

Lecture 10 - Reversible Inhibition

Lecture 11 - Effect of PH and Temperature on Enzyme

Lecture 12 - Kinetics of Bi substrate Enzyme

Lecture 13 - Kinetics of Bi substrate Enzyme

Lecture 14 - Immobilized Enzymes - I

Lecture 15 - Immobilized Enzymes - II

Lecture 16 - Immobilized Enzymes - III

Lecture 17 - Immobilization of Enzymes by Entrapment

Lecture 18 - Effect of Immobilization

Lecture 19 - Reactors for Enzyme Catalyzed Reactions

Lecture 20 - Idealized Enzyme Reactor Performance

Lecture 21 - Idealized Enzyme Reactor Performance

Lecture 22 - Kinetic Parameters for IME Systems

Lecture 23 - Steady State Analysis of Mass Transfer

Lecture 24 - Steady State Analysis of Mass Transfer

Lecture 25 - Non Ideal Flow in Continuous Immobilized Enzyme

Lecture 26 - Applications of Immobilized Enzymes in Process

Lecture 27 - Analytical Applications

Lecture 28 - Enzyme Technology Challenges

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Dynamical Models in Biology (Biotechnology)

Co-ordinators : Prof. Biplab Bose

Lecture 1 - Mathematical modeling in Biology

Lecture 2 - How to Start Modeling

Lecture 3 - Modeling the spread of infectious disease

Lecture 4 - Modeling population growth

Lecture 5 - Numerical solution of ODE-1

Lecture 6 - Numerical solution of ODE-2

Lecture 7 - Simulating ODE-based models: Introduction to JSim

Lecture 8 - Simulating ODE-based models: Examples of simulation in JSim

Lecture 9 - Steady state and stability analysis: Understanding Steady State

Lecture 10 - Steady state and stability analysis: Stability of Steady States

Lecture 11 - Phase Plane Analysis - I

Lecture 12 - Phase Plane Analysis - II

Lecture 13 - Concepts of Bifurcation:Introduction

Lecture 14 - Concepts of Bifurcation:Bifurcation in Biological Systems

Lecture 15 - Modeling Molecular Processes in Cell: Introduction

Lecture 16 - Modeling Molecular Processes in Cell: Receptor-Ligand Interaction

Lecture 17 - Modeling Molecular Processes in Cell: Enzymatic Processes

Lecture 18 - Modeling Molecular Processes in Cell: Transcription and Translation

Lecture 19 - Modeling Cell Signaling: Negative Feedback Motif

Lecture 20 - Modeling Cell Signaling: Positive Feedback Motif

Lecture 21 - Modeling Cell Signaling: Incoherent Feedforward Motif

Lecture 22 - Modeling Transcriptional Circuits-1

Lecture 23 - Modeling Transcriptional Circuits-2

Lecture 24 - Online Resources for Mathematical Modeling in Biology

Lecture 21 - Indole alkaloids - Early steps of biosynthesis

Lecture 22 - Indole alkaloids - Metabolic engineering of early steps of indole alkaloid pathway

Lecture 23 - Indole alkaloids - Environmental factors regulating indole alkaloid biosynthesis

Lecture 24 - Indole alkaloids - Role of elicitors in modulating alkaloids accumulation

Lecture 25 - Indole alkaloids - Late steps of indole alkaloid biosynthesis

Lecture 26 - Indole alkaloids - Regulatory roles of transcription factors in light-induced

Lecture 27 - Engineering indole alkaloid pathways in Catharanthus roseus hairy root cultures

Lecture 28 - Missing enzymes of vindoline biosynthetic pathway

Lecture 29 - Monoterpene indole alkaloid pathway cell and tissue localization

Lecture 30 - Model for biosynthesis and secretion of monoterpenoid indole alkaloids involving

Lecture 31 - Metabolic reprogramming of periwinkle plant culture

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Engineered yeast brews precursors of anticancer drug vinblastine

Lecture 33 - Recent discovery of strychnine biosynthetic pathway

Lecture 34 - Indole alkaloid biosynthesis - a final overview

Lecture 35 - Recent discovery of colchicine biosynthetic pathway

Lecture 36 - Biosynthesis of terpenoids - an outline

Lecture 37 - Diversity of monoterpenoids

Lecture 38 - Biosynthesis of monoterpenoids

Lecture 39 - Diversity of sesquiterpenes, diterpenes, triterpenes and polyterpenes

Lecture 40 - Oleoresins and polyterpenes - an outline

Lecture 41 - Monoterpenoids as components of floral scent volatiles: Metabolic engineering of

Lecture 42 - Biosynthesis of carotenoids and carotenoid cleavage products

Lecture 43 - Metabolic engineering of carotenoid pathway

Lecture 44 - Metabolic engineering of carotenoid pathway: Golden Rice Story

Lecture 45 - Menthol story: Biosynthesis and pathway manipulation - I

Lecture 46 - Menthol story: Biosynthesis and pathway manipulation - II

Lecture 47 - Artemisinin, hyperforin and taxol - three promising candidates for biotechnological

Lecture 48 - Phenolics: Origin via shikimate pathway

Lecture 49 - Phenolics: Phenylpropanoids, benzenoids, coumarins, tannins

Lecture 50 - Phenolics: Monolignols, lignins and lignans

Lecture 51 - Phenolics: Metabolic engineering of monolignol pathways

Lecture 52 - Phenolics: Biosynthesis of lignans and podophyllotoxin; Caffeic acid esters

Lecture 53 - Phenolics: Flavonoids, Flavones, Isoflavonoids, Proanthocyanidins

Lecture 54 - Phenolics: Biosynthesis of anthocyanins; Metabolic pathway engineering for enhance

Lecture 55 - Phenolics: Metabolic engineering of anthocyanin pathways in flowers

Lecture 56 - Phenolics: Alcohol acetyl transferses and volatile phenolics

Lecture 57 - Phenolics: Biosynthesis of volatile benzenoids

Lecture 58 - Phenolics: Biosynthesis of vanillin in plants

Lecture 59 - Phenolics: Metabolic engineering for vanillin

Lecture 60 - Phenolics: Biosynthesis of shikonin

Lecture 61 - Phenolics: Metabolic engineering of shikonin pathway

Lecture 62 - Molecular Pharming: Transplastomic plants

Lecture 63 - Molecular Pharming: production of human somatotropin in tobacco

NPTEL : NOC:Introduction to Complex Biological Systems (Biotechnology)

Co-ordinators : Prof. Soumya De, Prof. Dibyendu Samanta

Lecture 1 - Fundamentals of a Living System

Lecture 2 - Discovery of Genetic Material

Lecture 3 - Chemical and Physical Properties of Nucleic Acids

Lecture 4 - Introduction to DNA Replication

Lecture 5 - Mechanistic Overview of DNA Replication

Lecture 6 - Gene expression and The Central Dogma of Molecular Biology

Lecture 7 - Transcription: Involved Machineries and Processes

Lecture 8 - Translation: Decoding the message of an mRNA

Lecture 9 - Time-space correlation and fidelity of transcription and translation

Lecture 10 - Regulation of gene expression

Lecture 11 - Amino acids, hierarchy of protein structure

Lecture 12 - Protein folding, Folding funnel, Anfinsenâ€™s experiment

Lecture 13 - Protein-ligand interactions

Lecture 14 - Allosteric regulation of proteins, e.g. haemoglobin

Lecture 15 - Membrane proteins

Lecture 16 - Introduction to enzymes

Lecture 17 - Theory of enzyme catalysis

Lecture 18 - Specificity of enzymes, e.g. Chymotrypsin

Lecture 19 - Enzyme inhibition. Types and mechanism of inhibitors. Design of inhibitors

Lecture 20 - Engineered enzymes and their applications

Lecture 21 - Introduction to cells

Lecture 22 - Visualizing cells

Lecture 23 - Cell division cycle

Lecture 24 - Stem Cells

Lecture 25 - Cancer

Lecture 14 - Protein Structure, Folding and Function - Part 1

Lecture 15 - Protein Structure, Folding and Function - Part 2

Lecture 16 - Secondary Strcuture of Proteins: Ramachandran Plot - Part 1

Lecture 17 - Secondary Strcuture of Proteins: Ramachandran Plot - Part 2

Lecture 18 - Protein Structure, Folding and Function - Part 3

Lecture 19 - Protein Structure, Folding and Function - Part 4

Lecture 20 - Protein Structure, Folding and Function - Part 5

Lecture 21 - Protein Structure, Folding and Function - Part 6

Lecture 22 - Enzymes, Carbohydrates and Lipids

Lecture 23 - Introduction to Genetics - Part 1

Lecture 24 - Introduction to Genetics - Part 2

Lecture 25 - Introduction to Genetics - Part 3

Lecture 26 - Mendilian and Non-Mendilian Genetics - Part 1

Lecture 27 - Mendilian and Non-Mendilian Genetics - Part 2

Lecture 28 - Mendilian and Non-Mendilian Genetics - Part 3

Lecture 29 - Introduction to Microscopy - Part 1

Lecture 30 - Introduction to Microscopy - Part 2

Lecture 31 - Introduction to Microscopy - Part 3

Lecture 32 - Biology of Cells - Part 1

Lecture 33 - Biology of Cells - Part 2

Lecture 34 - Complexity and Compartmentalization in Cells - Part 1

Lecture 35 - Complexity and Compartmentalization in Cells - Part 2

Lecture 36 - Endosymbiont Theory

Lecture 37 - Structure of the Cell: Cell Wall and Cell Membrane

Lecture 38 - Structure of the Cell: Discussion Session

Lecture 39 - Plasma Membrane: The Boundaries of Life

Lecture 40 - Plasma Membrane: Discussion Session

Lecture 41 - Introduction to Cytoskeleton - Part 1

Lecture 42 - Cytoskeleton: Discussion Session 1

Lecture 43 - Introduction to Cytoskeleton - Part 2

Lecture 44 - Cytoskeleton: Discussion Session 2

Lecture 45 - Motor Proteins in Cell

Lecture 46 - Motor Proteins in Cell: Discussion Session

Lecture 47 - Discussion on Directionality of Motor Protein

Lecture 48 - Endomembrane System of Cells - Part 1

Lecture 49 - Endomembrane System of Cells: Discussion Session 1

Lecture 50 - Endomembrane System of Cells - Part 2

Lecture 51 - Endomembrane System of Cells: Discussion Session 2

Lecture 52 - Endomembrane System of Cells - Part 3

Lecture 53 - Endomembrane System of Cells: Discussion Session 3

Lecture 54 - Endomembrane System of Cells - Part 4

Lecture 55 - Endomembrane System of Cells: Discussion Session 4

Lecture 56 - Cell Division

Lecture 57 - Cell Division: Discussion session

Lecture 58 - Discussion Session on Organization and Function of a Cell

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:RNA Biology (Biotechnology)

Co-ordinators : Prof. Rajesh Ramachandran

Lecture 1 - Introduction to RNA Biology and RNA World - The Beginning

Lecture 2 - Introduction to RNA Biology and RNA World - Evidences

Lecture 3 - Introduction to RNA Biology and RNA World - Origin of Monomers

Lecture 4 - Introduction to RNA Biology and RNA World - Shift to DNA

Lecture 5 - Introduction to RNA Biology and RNA World - RNA Self Replication

Lecture 6 - Introduction to RNA Biology and RNA World - Origin of RNA Enzymes

Lecture 7 - RNA as Enzymes: The Ribozymes

Lecture 8 - RNA as Enzymes: Structure and Functions

Lecture 9 - RNA as Enzymes: The Present and Future

Lecture 10 - RNA Transcription: The Central Dogma

Lecture 11 - RNA Transcription: Initial Steps

Lecture 12 - RNA Transcription: Different Stages

Lecture 13 - RNA Transcription: Termination and RNA Modification

Lecture 14 - RNA Transcription: Different Polymerases

Lecture 15 - RNA Processing and Life Cycle: RNA Maturation and RNPs

Lecture 16 - RNA Processing and Life Cycle: RNA Splicing

Lecture 17 - RNA Processing and Life Cycle: Post Transcriptional Processing

Lecture 18 - Alternative RNA Processing and Editing: Alternative Splicing

Lecture 19 - Alternative RNA Processing and Editing: Implications of Introns

Lecture 20 - Alternative RNA Processing and Editing: Splicing and Pathology

Lecture 21 - Alternative RNA Processing and Editing: RNA Editing in Detail

Lecture 22 - Alternative RNA Processing and Editing: Relevance of RNA Editing

Lecture 23 - Alternative RNA Processing and Editing: Relevance in Immunology

Lecture 24 - RNA Splicing, Export and Stability: Relevance of Introns

Lecture 25 - RNA Splicing, Export and Stability: Introns in RNA Splicing

Lecture 26 - RNA Splicing, Export and Stability: Different Spliceosomes

Lecture 27 - RNA Splicing, Export and Stability: SMN Complex

Lecture 28 - snRNA, rRNA, miRNA, siRNA Processing, Export and Function: Introns and Link to Splicing

Lecture 29 - snRNA, rRNA, miRNA, siRNA Processing, Export and Function: RNA Helicases

Lecture 30 - snRNA, rRNA, miRNA, siRNA Processing, Export and Function: Nucleo Cytoplasmic Transport

Lecture 31 - snRNA, rRNA, miRNA, siRNA Processing, Export and Function: Nucleoporins and miRNAs

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 107 - Law of dynamic polarization, support from others studies

Lecture 108 - Santiago Ramon y Cajal - Career turning point and Palm Sunday years

Lecture 109 - Cajalâ€™s trailblazing discoveries that earned him the Nobel Prize

Lecture 110 - 'Enduring Legacy of Cajal'

Lecture 111 - Robert Barany - Early life and prior work done by other scientists

Lecture 112 - Robert Barany - The serendipitous discovery of the caloric test

Lecture 113 - Robert Barany - Vestibular System and connection to Cerebellum

Lecture 114 - Robert Barany - Modern Applications of Barany's work - Space medicine and Astronaut training

Lecture 115 - Robert Barany - Summary of Contributions

Lecture 116 - Charles Sherrington Personal Background

Lecture 117 - Charles Sherrington - quiet mind expt, Neuroplasiticity, animal locomotion studies

Lecture 118 - Charles Sherrington - Reciprocal innervation, Pain and Emotion, Mind and Body

Lecture 119 - Charles Sherrington's Magnum Opus - The integrative action of the nervous system

Lecture 120 - Charles Sherrington - Insights into life and work by Molnar and Brown

Lecture 121 - Charles Sherrington - Summary of contributions

Lecture 122 - Edgar Adrian, Keith Lucas and Novel instruments used in Neurophysiology

Lecture 123 - Edgar Adrian - Early life, All or none principle in neurons, Key findings with Keith Lucas

Lecture 124 - Edgar Adrian - Work with Alexander Forbes, Gasser and Erlanger (St. Louis connection)

Lecture 125 - Edgar Adrian - 'Failed experiment', Perseverance in science

Lecture 126 - Edgar Adrian - Recording from single sensory and motor neurons

Lecture 127 - Edgar Adrian - Nobel Prize, Admin work, Legacy

Lecture 128 - Edgar Adrian - Adventures with EEG

Lecture 129 - Edgar Adrian - Mapping cerebellar cortex, Cerebral cortex, Brain and Behavior, Olfaction

Lecture 130 - Hodgkin and Huxley - Biographical background, Scientific backdrop and state of Neurophysiology

Lecture 131 - Hodgkin and Huxley - Meeting of great minds and Challenges faced - Part 1

Lecture 132 - Hodgkin and Huxley - Meeting of great minds and Challenges faced - Part 2

Lecture 133 - Bernard Katz - personal background, scientific backdrop, soup vs spark debate

Lecture 134 - Bernard Katz - Quantal nature of synaptic transmission, Vesicle hypothesis, foundational work

Lecture 135 - Bernard Katz - del Castillo model of receptor activation, role of calcium in synapses, sodium

Lecture 136 - Bernard Katz Paper: The fine structure of neuromuscular junction of the frog

Lecture 137 - Roger Sperry - Personal Background, Split brain patients, Hemispheric specialization

Lecture 138 - Roger Sperry: Split Brain patients and Dichotomous consciousness

Lecture 139 - Roger Sperry: Unified consciousness and Behavioural differences in split brain patients,

Lecture 140 - Roger Sperry, Gazzaniga's Interpreter theory, Impact on Psychology and Neuroscience, Nobel Prize

Lecture 141 - Roger Sperry's Chemoaffinity hypothesis paper

Lecture 142 - Roger Sperry paper 'Mentalism: Yes, Dualism:No'

Lecture 143 - Jens Christian Skou Part 1 : The Story of Jens Christian Skou's life in science

Lecture 144 - Jens Christian Skou: Sodium Potassium pump overview and Nobel Prize

Lecture 145 - Jens Christian Skou: Paper - 'The Influence of Some Cations on an Adenosine Triphosphate

Lecture 146 - Arvid Carlsson - Personal Background, Education and Early Career, Pivot, Nobel prize contributions

Lecture 147 - Arvid Carlsson - History of L Dopa

Lecture 148 - Arvid Carlsson - Antipsychotics, Dopamine hypothesis, Serotonin and SSRIs, Omeprazole

Lecture 149 - Eric Kandel - Early life and nobel prize winning work

Lecture 150 - Eric Kandel - Synaptic Plasticity

Lecture 151 - Eric Kandel - Aplysia work, Short and long term memory and mechanisms

Lecture 152 - Paul Greengard - The Phosphorylation Paradigm

Lecture 153 - David Hubel and Torsten Wiesel - early life, education and collaboration

Lecture 154 - Hubel and Wiesel - Effect of early visual deprivation on cortical function

Lecture 155 - Hubel and Wiesel - Effect of visual misalignment on binocular integration

Lecture 156 - Hubel and Wiesel - Limited capacity for recovery following early visual deprivation

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fluidization Engineering (Chemical Engineering)

Co-ordinators : Dr. S.K. Majumder

Lecture 1 - Introduction

Lecture 2 - Particle properties

Lecture 3 - Particle / Powder Classifications

Lecture 4 - Minimum Fluidization Velocity: Fluid-solid System

Lecture 5 - Minimum Fluidization Velocity: Liquid-solid and gas-liquid-solid System

Lecture 6 - Flow regime and its map: Gas-solid Fluidization

Lecture 7 - Flow regime and its map: Liquid-solid and Gas-liquid-solid Fluidization

Lecture 8 - Frictional pressure drop in fluidized bed-fluid-solid system

Lecture 9 - Frictional pressure drop in fluidized Bed-Gas-liquid-solid system

Lecture 10 - Analysis of Frictional Pressure Drop in Fluidized Bed By Different Models

Lecture 11 - Gas Distribution Through Distributor

Lecture 12 - Calculation of gas pumping power consumption in fluidized bed

Lecture 13 - Bubbling Fluidization Part 1: Bubble Characteristics

Lecture 14 - Bubbling Fluidization Part 2: Bubble Characteristics (Continued...)

Lecture 15 - Bubbling Fluidization Part 3: Bubble coalescence in three-phase fluidization

Lecture 16 - Bubbling Fluidization Part 4: Bubble breakup in three-phase fluidization

Lecture 17 - Bubbling Fluidization Part 5: Gas and solid movements at bubble

Lecture 18 - Bubbling Fluidization Part 6: Slugging Bed

Lecture 19 - Entrainment Characteristics (Part 1) : Entrainment Characteristics

Lecture 20 - Entrainment Characteristics (Part 2) : Fast fluidization condition

Lecture 21 - Entrainment Characteristics (Part 2) : Elutriation Characteristics

Lecture 22 - Entrainment Characteristics (Part 2) : Attrition in Fluidized Bed (Part 1)

Lecture 23 - Attrition in Fluidized Bed (Part 2)

Lecture 24 - Solid movement, mixing: Gas-fluidized Bed

Lecture 25 - Solid segregation: Gas-fluidized bed

Lecture 26 - Solid mixing and segregation: Liquid-solid fluidized bed

Lecture 27 - Gas Dispersion and Interchange

Lecture 28 - Mass transfer in fluidized Bed-Gas-solid system

Lecture 29 - Mass transfer in fluidized Bed-Gas-liquid-solid system (Continued...)

Lecture 30 - Heat transfer Characteristics

Lecture 31 - Fluidized bed reactor design and its performance

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:An Introduction to Cardiovascular Fluid Mechanics (Chemical Engineering)

Co-ordinators : Dr. Raghvendra Gupta

Lecture 1 - An Introduction

Lecture 2 - Fluid Mechanics: A Review

Lecture 3 - Solid Mechanics: A Review

Lecture 4 - Rheology of blood

Lecture 5 - Blood morphology

Lecture 6 - Blood flow in a channel

Lecture 7 - Viscometers and Rheometers

Lecture 8 - Viscoelasticity

Lecture 9 - Flow Bifurcation

Lecture 10 - Pulsatile Flow 1

Lecture 11 - Pulsatile Flow 2

Lecture 12 - Flow in Elastic Tubes

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Multiphase Microfluidics (Chemical Engineering)

Co-ordinators : Dr. Raghvendra Gupta

Lecture 1 - An Introduction

Lecture 2 - Interface and Surface Tension

Lecture 3 - Flow Regimes 1

Lecture 4 - Flow Regimes 2

Lecture 5 - Taylor Flow 1

Lecture 6 - Taylor Flow 2

Lecture 7 - Computational Techniques

Lecture 8 - Bubble and Droplet Generation

Lecture 9 - Interface and Surface tension 2

Lecture 10 - Void Fraction and Pressure Drop

Lecture 11 - Liquid-Liquid Flow: Flow Regimes

Lecture 12 - Ideal annular Flow

Lecture 13 - Taylor Flow : Heat transfer 1

Lecture 14 - Taylor Flow : Heat transfer 2

Lecture 15 - Taylor Flow : Meat Transfer 1

Lecture 16 - Taylor Flow : Meat Transfer 2

Lecture 17 - Flow boiling in microchannels

Lecture 18 - Flow boiling in microchannels (Continued...)

Lecture 19 - Flow Measurement Techniques

Lecture 20 - Particle image Velocimetry

Lecture 21 - Inertial Microfluidics

Lecture 22 - Microfluidic applications

Lecture 23 - Microfluidic applications (Continued...)

Lecture 24 - Concluding Remarks

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Measurement Technique in Multiphase Flows (Chemical Engineering)

Co-ordinators : Prof. Rajesh Kumar Upadhyay

Lecture 1 - Introduction to Multiphase flow Measurement Techniques

Lecture 2 - Invasive and Non-invasive Techniques

Lecture 3 - Hot Wire Anemometry

Lecture 4 - Optical Fiber Probe

Lecture 5 - Laser Doppler Anemometry (LDA)

Lecture 6 - LDA Post Processing and Particle Image Velocimetry (PIV)

Lecture 7 - PIV and Positron Emission Particle Tracking

Lecture 8 - Radioactive Particle Tracking - I

Lecture 9 - Radioactive Particle Tracking - II

Lecture 10 - Capacitance Probe, Optical Fiber Probe and ECT

Lecture 11 - Gamma-ray and X-ray Tomography, MRI

Lecture 12 - Summary

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Multiphase Flows (Chemical Engineering)

Co-ordinators : Prof. Rajesh Kumar Upadhyay

Lecture 1 - Multiphase flow introduction

Lecture 2 - Fundamental definitions and terminology used in Multiphase - I

Lecture 3 - Fundamental definitions and terminology used in Multiphase - II

Lecture 4 - Flow Regime Map for Gas-Liquid System

Lecture 5 - Flow Regime Map for Fluid-Solid System

Lecture 6 - Pneumatic Conveying

Lecture 7 - Momentum Equation through Reynolds Transport Theorem

Lecture 8 - Lockhart Martinelli Correlation

Lecture 9 - Pressure Drop Calculation for Homogeneous Flow

Lecture 10 - Pressure Drop Calculation for Separated and Annular Flow Regime

Lecture 11 - Lagrangian Tracking of Single Particle Under Different Forces

Lecture 12 - Multiphase Interactions: Drag Force

Lecture 13 - Multiphase Interactions: Multi-particle Drag, Virtual Mass Force, Basset Force and Lift Force

Lecture 14 - Introduction to Multiphase Flow Modeling

Lecture 15 - Algebraic Slip Method and Euler-Euler Method

Lecture 16 - KTGF and Euler-Lagrangian Model

Lecture 17 - Measurement Techniques: Velocity Measurement

Lecture 18 - Measurement Techniques: Phase Fraction Measurement

Lecture 19 - Bubble Column

Lecture 20 - Packed Bed Reactor

Lecture 21 - Fluidized Bed Reactor

Lecture 22 - Summary

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Chemical Engineering Thermodynamics (Chemical Engineering)

Co-ordinators : Prof. Sasidhar Gumma

Lecture 1 - Introduction

Lecture 2 - First law for closed systems

Lecture 3 - First law for open systems

Lecture 4 - Simple processes

Lecture 5 - Processes involving liquids and ideal gases

Lecture 6 - Temperature dependency of Cp in an ideal gas

Lecture 7 - Efficiency of Heat engines and Statement of Second Law

Lecture 8 - Entropy

Lecture 9 - Lost Work

Lecture 10 - Maxwell's Relations

Lecture 11 - Thermodynamic Diagrams

Lecture 12 - Thermodynamic Tables, Residual Properties

Lecture 13 - Virial Equation of State

Lecture 14 - Residual property relations from EoS

Lecture 15 - Cubic Equation of State

Lecture 16 - Cubic Equation of State

Lecture 17 - Thermodynamic Tables

Lecture 18 - Correlations for Liquids

Lecture 19 - Process Involving Phase Changes

Lecture 20 - Chemical potential

Lecture 21 - Partial molar properties

Lecture 22 - Examples

Lecture 23 - Ideal Solutions

Lecture 24 - Excess Properties

Lecture 25 - Fugacity

Lecture 26 - Calculation of Fugacity using EoS - Part 1

Lecture 27 - Calculation of Fugacity using EoS - Part 2

Lecture 28 - Calculation of Fugacity in Mixtures using Cubic EoS

Lecture 29 - Fugacity in Liquids, Activity Coeffcient

Lecture 30 - Models for Excess Gibbs free energy - Part 1

Lecture 31 - Models for Excess Gibbs free energy - Part 2

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Vapor Liquid Equilibrium - Part 1

Lecture 33 - Vapor Liquid Equilibrium - Part 2

Lecture 34 - Azeotropes

Lecture 35 - Gamma/Phi Formulation

Lecture 36 - LLE

Lecture 37 - VLLE

Lecture 38 - Enthalpy changes upon reaction

Lecture 39 - Reaction coordinate

Lecture 40 - Equilibrium constant

Lecture 41 - Examples

Lecture 42 - Conclusion

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Mass Transfer Operations-I (Chemical Engineering)

Co-ordinators : Dr. B. Mandal

Lecture 1 - Introduction and Overview of Mass Transfer Operation

Lecture 2 - Molecular and Eddy Diffusion, Diffusion Velocities and Fluxes

Lecture 3 - Fick's First and Second Law

Lecture 4 - Steady State Molecular Diffusion in fluids under stagnant and laminar flow conditions

Lecture 5 - Diffusion through variable cross-sectional area

Lecture 6 - Gas Phase Diffusion Coefficient measurement

Lecture 7 - Gas Phase Diffusion Coefficient prediction and liquid phase diffusion coefficient measurement and prediction

Lecture 8 - Multicomponent diffusion and diffusivity in solids

Lecture 9 - Mass transfer coefficient concept and classifications

Lecture 10 - Dimensionless groups and correlations for convective mass transfer coefficients

Lecture 11 - Mass transfer coefficient in laminar flow

Lecture 12 - Boundary Layer Theory and mass transfer coefficients in turbulent flow

Lecture 13 - Mass transfer theories

Lecture 14 - Interphase mass transfer

Lecture 15 - Interphase mass transfer and material balance for operating line

Lecture 16 - Number of ideal stages in counter current operation: graphical and algebraic methods

Lecture 17 - Introduction, classification, Sparged and agitated vessels design

Lecture 18 - Gas dispersed: Tray tower

Lecture 19 - Sieve Tray

Lecture 20 - Liquid dispersed: Venture scrubber, wetted wall column, Packed tower

Lecture 21 - Introduction to absorption, Equilibrium in gas-liquid system, and minimum liquid rate

Lecture 22 - Design of packed column absorber based on the Individual Mass Transfer Coefficient

Lecture 23 - Design of packed column absorber based on the Overall Mass Transfer Coefficient

Lecture 24 - Height Equivalent to a Theoretical Plate (HETP), Design of packed column absorber for dilute and concentrated gases

Lecture 25 - Absorption in plate column: Method of McCabe and Thiele-graphical determination of ideal trays and Introduction to multicomponent absorption

Lecture 26 - Introduction to distillation, binary equilibrium diagrams and concept of relative volatility

Lecture 27 - Distillation in non-ideal systems and concept of enthalpy-concentration diagram

Lecture 28 - Flash distillation

Lecture 29 - Batch and steam distillation

Lecture 30 - Continuous multistate fractionation

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Number of trays by McCabe and Thiele for distillation

Lecture 32 - Pinch Points and minimum reflux

Lecture 33 - Reflux below its bubble point: Sub-cooled reflux and use of open steam

Lecture 34 - Multiple feeds, multiple product withdrawal or side streams

Lecture 35 - Multistage batch distillation with reflux

Lecture 36 - The Ponchon-Savarit method

Lecture 37 - The Ponchon-Savarit method

Lecture 38 - Packed Distillation

Lecture 39 - Introduction to multicomponent distillation and multicomponent flash distillation

Lecture 40 - Minimum stages and minimum reflux in multicomponent distillation

Lecture 41 - Multicomponent batch distillation

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Transport Phenomena of Non-Newtonian Fluids (Chemical Engineering)

Co-ordinators : Prof. N. Kishore

Lecture 1 - Introduction and Basic Concepts

Lecture 2 - Classification of Non-Newtonian Fluids

Lecture 3 - Mathematical Models for Non-Newtonian Fluids

Lecture 4 - Viscoelastic Non-Newtonian Fluids

Lecture 5 - Capillary Viscometers: Sources of Errors and Correction Methods

Lecture 6 - Rotational Viscometers

Lecture 7 - Capillary Viscometers - Errors and Corrections II

Lecture 8 - Equation of Change for Non-Isothermal Systems

Lecture 9 - Rotational Viscometers - II

Lecture 10 - Rotational Viscometers - III

Lecture 11 - Transition from Laminar to Turbulent Flow in Pipes for GNF

Lecture 12 - Equations of Change for Isothermal Systems

Lecture 13 - Equations of Change for Non-Isothermal Systems

Lecture 14 - Power-law Fluids Flow in Concentric Annulus

Lecture 15 - Power-law and Ellis Model Fluids Flow Through Pipes

Lecture 16 - Bingham Plastic Fluids Flow through Pipes

Lecture 17 - Herschel Bulkley Fluids Flow through Pipes

Lecture 18 - Transition and Turbulent Flow of GNF in Pipes - I

Lecture 19 - Transition and Turbulent Flow of GNF in Pipes - II

Lecture 20 - Laminar flow of GNFs between Parallel Plates and along Inclined Surface

Lecture 21 - Laminar flow of GNFs along Inclined Surface and Concentric Annulus

Lecture 22 - Flow of Non-Newtonian Fluids through Packed Beds

Lecture 23 - Dispersion in Packed Beds: Non-Newtonian Effects

Lecture 24 - Liquid-Solid Fluidization by Power-law Liquids

Lecture 25 - Free Convection between Two Vertical Plates

Lecture 26 - Viscous Heat Generation

Lecture 27 - Temperature distribution in fluids confined between co-axial cylinders

Lecture 28 - Temperature distribution for FDF of Newtonian fluids in tubes

Lecture 29 - Heat Transfer Combined with Chemical Reactions

Lecture 30 - Transpiration Cooling

Lecture 31 - Basics of MT; Diffusion Through Stagnant Gas Film

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Non-Isothermal Diffusive MT and Forced Convective MT

Lecture 33 - Simultaneous Heat and Mass Transfer

Lecture 34 - Mass Transfer Combined with Chemical Reactions

Lecture 35 - Quasi-Steady Analysis of Simultaneous HT, MT and Chemical Reaction

Lecture 36 - Quasi-Steady Analysis of Simultaneous HT and MT - I

Lecture 37 - Quasi-Steady Analysis of Simultaneous HT and MT - II

Lecture 38 - Quasi-Steady Analysis of Simultaneous HT and MT - III

Lecture 39 - Momentum and Thermal Boundary Layer Flows

Lecture 40 - Momentum Boundary Layer Thickness of Non-Newtonian Fluids

Lecture 41 - Thermal and Concentration Boundary Layer Thickness of Non-Newtonian Fluids

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 23 - Basic principles, advantages of MF, cross-flow and dead-end MF, membranes and modules

Lecture 24 - Models for MF transport, plugging and throughput, fouling in MF, MF applications

Lecture 25 - Problems and solutions based on RO and MF

Lecture 26 - Problems and solutions based on UF

Lecture 27 - Dialysis, membranes and modules, mass transport in dialysis, diffusion analysis, applications

Lecture 28 - Ion-exchange membranes, ED process, energy requirement, applications, reverse ED

Lecture 29 - PV principle, advantages, mass transfer and applications, hybrid distillation/PV

Lecture 30 - Problems and solutions based on ED and PV

Lecture 31 - Concept, types of LM, mechanism of mass transfer in LM, choice of solvent and carrier, applications

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Basic principle of gas separation, transport mechanism, factors affecting gas separation, applications

Lecture 33 - Basic principle of MD, mechanism, process parameters, membranes, applications

Lecture 34 - Mechanism, coupled transport, carrier agent, active and passive transport, applications

Lecture 35 - Gas-liquid and liquid-liquid contactors, membrane reactors and bioreactors, PEM hydrogen fuel cell

Lecture 36 - Perstraction, membrane chromatography and controlled drug delivery

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Computer Aided Applied Single Objective Optimization (Chemical Engineering)

Co-ordinators : Prof. Prakash Kotecha

Co-ordinators : Prof. Parag A. Deshpande

Lecture 1 - Introduction and motivation

Lecture 2 - Dynamics of linear first order autonomous systems

Lecture 3 - Dynamics of linear first order autonomous systems (Continued...)

Lecture 4 - Lumped parameter analysis of cooling of a body

Lecture 5 - Lumped parameter analysis of cooling of a body (Continued...)

Lecture 6 - Introduction to higher order systems

Lecture 7 - Phase plane analysis of linear autonomous second order systems

Lecture 8 - Phase plane analysis of linear autonomous second order systems (Continued...)

Lecture 9 - Analysis of a free spring-mass system

Lecture 10 - Analysis of a free spring-mass system (Continued...)

Lecture 11 - Dynamics of non-autonomous systems

Lecture 12 - Similarity solution for non-autonomous higher order dynamics

Lecture 13 - Similarity solution for non-autonomous higher order dynamics (Continued...)

Lecture 14 - Analysis of a forced spring-mass system

Lecture 15 - Analysis of a forced spring-mass system (Continued...)

Lecture 16 - Phase portraits of linear autonomous systems of order three and higher

Lecture 17 - Phase portraits of linear autonomous systems of order three and higher (Continued...)

Lecture 18 - Analysis of complex reaction systems

Lecture 19 - Analysis of complex reaction systems (Continued...)

Lecture 20 - Analysis of complex reaction systems (Continued...)

Lecture 21 - Introduction to non-linear systems

Lecture 22 - Logistic population growth model

Lecture 23 - Logistic population growth model (Continued...)

Lecture 24 - Logistic population growth with harvesting

Lecture 25 - Logistic population growth with harvesting (Continued...)

Lecture 26 - Logistic population growth with threshold population

Lecture 27 - Logistic population growth with threshold population (Continued...)

Lecture 28 - Analysis of population dynamics in discrete domain

Lecture 29 - Analysis of fixed points and bifurcation in discrete domain

Lecture 30 - Analysis of fixed points and bifurcation in discrete domain (Continued...)

Lecture 31 - More on bifurcations in non-linear systems

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Non-linear systems in higher dimensions

Lecture 33 - Reactor stability analysis

Lecture 34 - Reactor stability analysis (Continued...)

Lecture 35 - Reactor stability analysis (Continued...)

Lecture 36 - Analysis of infectious disease dynamics

Lecture 37 - Analysis of infectious disease dynamics (Continued...)

Lecture 38 - Analysis of infectious disease dynamics (Continued...)

Lecture 39 - Analysis of atmosphere dynamics using Lorenz equations

Lecture 40 - Analysis of atmosphere dynamics using Lorenz equations (Continued...)

Lecture 41 - Analysis of system dynamics in transform domain

Lecture 42 - Analysis of first order system subjected to ideal forcing functions

Lecture 43 - Analysis of first order system subjected to ideal forcing functions (Continued...)

Lecture 44 - Analysis of response of second order systems

Lecture 45 - Analysis of response of second order systems (Continued...)

Lecture 46 - Analysis of (p,q) order systems

Lecture 47 - Analysis of (p,q) order systems (Continued...)

Lecture 48 - Analysis of multiple input - multiple output systems

Lecture 49 - Block diagrams and inter-conversion of state-space and transform domain models

Lecture 50 - Analysis of inverse response systems

Lecture 51 - Analysis of dynamics of discrete-time systems

Lecture 52 - Sampling and reconstruction of continuous signals

Lecture 53 - Conversion of continuous models to discrete-time models

Lecture 54 - Introduction to z-transforms

Lecture 55 - z-transforms Continued

Lecture 56 - Response of discrete-time systems

Lecture 57 - Response of discrete-time systems (Continued...)

Lecture 58 - Response of discrete-time systems (Continued...)

Lecture 59 - Stability analysis in transform domain

Lecture 60 - Review of the course

NPTEL : NOC:Metallocene and Metal-Carbene based Organometallic Compounds as Industrially Important Advanced Polyolefin Catalysts (Chemical Engineering)

Co-ordinators : Prof. Sanjib K. Patra

Lecture 35 - Emission control and effluent treatment in refinery

Lecture 36 - Fundamentals of thermochemistry: Combustion

Lecture 37 - Fundamentals of thermochemistry: Flame

Lecture 38 - Fundamentals of thermochemistry: Adiabatic flame temperature

Lecture 39 - Fundamentals of thermochemistry: Burner

Lecture 40 - Fundamentals of thermochemistry: Internal Combustion engine

NPTEL : NOC:Rheology and Processing of Paints, Plastic and Elastomer Based Composites (Chemical Engineering)

Co-ordinators : Prof. Santanu Chattopadhyay

Lecture 1 - Basic Introduction to Polymer

Lecture 2 - Structure Process Correlation

Lecture 3 - Basic Rheology

Lecture 4 - Classification of Fluids

Lecture 5 - Flow of Liquids Through Various Channels - 1

Lecture 6 - Flow of Liquids Through Various Channels - 2

Lecture 7 - Flow of Liquids Through Various Channels - 3

Lecture 8 - Introduction to Viscometers and Rheometers

Lecture 9 - Ostwald Viscometer, Brookfield Viscometer, Falling Piston Viscometers

Lecture 10 - ODR, MDR, RPA, PPR

Lecture 11 - DMA -In-Light of rheology

Lecture 12 - Master Curve and its Implications

Lecture 13 - Capillary Rheometer

Lecture 14 - Introduction to Paints and importance of rheology in paints

Lecture 15 - Rheology of paints - 1

Lecture 16 - Rheology of paints - 2

Lecture 17 - Rheology of Adhesives and Sealants

Lecture 18 - Rheology of Fiber and Plastics

Lecture 19 - Practical demonstration on Brookfield viscometer and Oswald viscometer

Lecture 20 - Practical demonstration on Mooney viscometer, ODR and MDR

Lecture 21 - Practical demonstration on RPA

Lecture 22 - Practical demonstration on PPR and DMA

Lecture 23 - Practical demonstration on Capillary Rheometer

Lecture 24 - Numeriacal Problems related to basic rhelogy

Lecture 25 - Importance of compounding and introduction to various compounding ingredients

Lecture 26 - Properties and role of various compounding ingredients

Lecture 27 - Surface treatment of reinforcing elements

Lecture 28 - Rhelogy of Elastomers

Lecture 29 - Importance of die swell (correlating with normal force differences)

Lecture 30 - Melt Fracture and other ectrudate instabilities

Lecture 31 - Introduction to plastic and rubber mixing and blending

Lecture 32 - Various mixing equipment and their importance

Lecture 33 - Introduction to Two-Roll Mill and Mixing on Two - Roll Mill 1

Lecture 34 - Introduction to Two-Roll Mill and Mixing on Two - Roll Mill 2

Lecture 35 - Introduction to Internel mixture Kneaders and Mixing using Internel mixture and Kneaders

Lecture 36 - Practical demonstration of Rubber mixing on a two roll and using an internal mixer

Lecture 37 - Molding Techniques

Lecture 38 - Calendering

Lecture 39 - Extrusion

Lecture 40 - Rheology of Injection moulding process

Lecture 41 - Plastic and fiber-related processing

Lecture 42 - Numerical problems related to various processing techniques

Lecture 43 - Wire coating, Garvey die, Profile Extrusion

Lecture 44 - Introduction to FEA based computationalfluid mechanics on extrusion - 1

Lecture 45 - Introduction to FEA based computationalfluid mechanics on extrusion - 2

Lecture 46 - Introduction to FEA based computationalfluid mechanics on extrusion - 3

Lecture 47 - Practical demonstartion on FEA

Lecture 48 - Concluding remarks and commentson applied rheology for advanced learners

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Computational Fluid Dynamics (Chemical Engineering)

Co-ordinators : Prof. Sreenivas Jayanti

Lecture 1 - Motivation for CFD and Introduction to the CFD approach

Lecture 2 - Illustration of the CFD approach through a worked out example

Lecture 3 - Eulerian approach, Conservation Equation, Derivation of Mass Conservation Equation and Statement of the momentum conservation equation

Lecture 4 - Forces acting on a control volume; Stress tensor; Derivation of the momentum conservation equation ; Closure problem; Deformation of a fluid element in fluid flow

Lecture 5 - Kinematics of deformation in fluid flow; Stress vs strain rate relation; Derivation of the Navier-Stokes equations

Lecture 6 - Equations governing flow of incompressible flow; Initial and boundary conditions; Wellposedness of a fluid flow problem

Lecture 7 - Equations for some simple cases; Generic scalar transport equation form of the governing equations; Outline of the approach to the solution of the N-S equations.

Lecture 8 - cut out the first 30s; Spatial discretization of a simple flow domain; Taylorâ€™s series expansion and the basis of finite difference approximation of a derivative; Central and one-sided difference approximations; Order of accuracy of finite difference ap

Lecture 9 - Finite difference approximation of pth order of accuracy for qth order derivative; cross -derivatives; Examples of high order accurate formulae for several derivatives

Lecture 10 - One -sided high order accurate approximations; Explicit and implicit formulations for the time derivatives

Lecture 11 - Numerical solution of the unsteady advection equation using different finite difference approximations

Lecture 12 - Need for analysis of a discretization scheme; Concepts of consistency, stability and convergence and the equivalence theorem of Lax ; Analysis for consistency

Lecture 13 - Statement of the stability problem; von Neumann stability analysis of the first order wave equation

Lecture 14 - Consistency and stability analysis of the unsteady diffusion equation; Analysis for two- and three -dimensional cases; Stability of implicit schemes

Lecture 15 - Interpretation of the stability condition; Stability analysis of the generic scalar equation and the concept of upwinding ; Diffusive and dissipative errors in numerical solution; Introduction to the concept of TVD schemes

Lecture 16 - Template for the generic scalar transport equation and its extension to the solution of Navier-Stokes equa tions for a compressible flow.

Lecture 17 - Illustration of application of the template using the MacCormack scheme for a three-dimensional compressible flow

Lecture 18 - Stability limits of MacCormack scheme; Limitations in extending compressible flow schemes to incompre ssible flows ; Difficulty of evaluation of pressure in incompressible flows and listing of various approaches

Lecture 19 - Artificial compressibility method and the streamfunction-vorticity method for the solution of NS equations and their limitations

Lecture 20 - Pressur e equation method for the solution of NS equations

Lecture 21 - Pressure-correction approach to the solution of NS equations on a staggered grid; SIMPLE and its family of methods

Lecture 22 - Need for effici ent solution of linear algebraic equations; Classification of approaches for the solution of linear algebraic equations.

Lecture 23 - Direct methods for linear algebraic equations; Gaussian elimination method

Lecture 24 - Gauss-Jordan method; LU decomposition method; TDMA and Thomas algorithm

Lecture 25 - Basic iterative methods for linear algebraic equations: Description of point -Jacobi, Gauss-Seidel and SOR methods

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 26 - Convergence analysis of basic iterative schemes; Diagonal dominance condition for convergence; Influence of source terms on the diagonal dominance condition; Rate of convergence

Lecture 27 - Application to the Laplace equation

Lecture 28 - Advanced iterative methods: Alternating Direction Implicit Method; Operator splitting

Lecture 29 - Advanced iterative methods; Strongly Implicit Proc edure; Conjugate gradient method; Multigrid method

Lecture 30 - Illustration of the Multigrid method for the Laplace equation

Lecture 31 - Overview of the approach of numerical solution of NS equations for simple domains; Introduction to complexity arising from physics and geometry

Lecture 32 - Derivation of the energy conservation equation

Lecture 33 - Derivation of the species conservation equation; dealing with chemical reactions

Lecture 34 - Turbulence; Characteri stics of turbulent flow; Dealing with fluctuations and the concept of time-averaging

Lecture 35 - Derivation of the Reynolds -averaged Navier -Stokes equations; identification of the closure problem of turbulence; Boussinesq hypothesis and eddy viscosity

Lecture 36 - Reynol ds stresses in turbulent flow; Time and length scales of turbulence; Energy cascade; Mixing length model for eddy viscosity

Lecture 37 - One-equation model for turbulent flow

Lecture 38 - Two -equation model for turbulent flow; Numerical calculation of turbulent reacting flows

Lecture 39 - Calculation of near-wall region in turbulent flow; wall function approach; near-wall turbulence models

Lecture 40 - Need for special methods for dealing with irregular flow geometry; Outline of the Body-fitted grid approach ; Coordinate transformation to a general, 3-D curvilinear system

Lecture 41 - Transformation of the governing equations; Illustration for the Laplace equation; Appearance and significance of cross - derivative terms; Concepts of structured and unstructured grids.

Lecture 42 - Finite vol ume method for complicated flow domain; Illustration for the case of flow through a duct of triangular cross - section.

Lecture 43 - Finite volume method for the general case

Lecture 44 - Generation of a structured grid for irregular flow domain; Algebraic methods; Elliptic grid generation method

Lecture 45 - Unstructured grid generation; Domain nodalization; Advancing front method for triangulation

Lecture 46 - Delaunay triangulation method for unstructured grid generation

Lecture 47 - Co -located grid approach for irregular geometries; Pressure correction equation for a co -located structured grid; Pressure correction equation for a co-located unstructured grid.

Lecture 12 - Normal and shear stresses on arbitrary surfaces: Force balance

Lecture 13 - Normal and shear stresses on arbitrary surfaces: Stress Tensor formulation

Lecture 14 - Stresses on deforming surfaces: Introduction to Perturbation Theory

Lecture 15 - Pulsatile flow: Analytical solution

Lecture 16 - Pulsatile flow: Analytical solution and perturbation solution for Rw 1

Lecture 17 - Pulsatile flow: Perturbation solution for Rw 1

Lecture 18 - Viscous heating: Apparent viscosity in a viscometer

Lecture 19 - Domain perturbation methods: Flow between wavy walls

Lecture 20 - Flow between wavy walls: Velocity profile

Lecture 21 - Introduction to stability of dynamical systems: ODEs

Lecture 22 - Stability of distributed systems (PDEs): reaction diffusion example

Lecture 23 - Stability of a reaction-diffusion system (Continued...)

Lecture 24 - Rayleigh-Benard convection: Physics and governing equations

Lecture 25 - Rayleigh-Benard convection: Linear stability analysis - Part 1

Lecture 26 - Rayleigh-Benard convection: Linear stability analysis - Part 2

Lecture 27 - Rayleigh-Benard convection: Linear stability analysis - Part 3

Lecture 28 - Rayleigh Benard convection: Discussion of results

Lecture 29 - Rayleigh-Taylor â€˜heavy over lightâ€™ instability

Lecture 30 - Rayleigh-Taylor instability (Continued...)

Lecture 31 - Capillary jet instability: Problem formulation

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Capillary jet instability: Linear stability analysis

Lecture 33 - Capillary jet instability: Rayleighâ€™s Work Principle

Lecture 34 - Tutorial Session: Solution of Assignment 4 on linear stability

Lecture 35 - Turing patterns: Instability in reaction-diffusion systems

Lecture 36 - Turing patterns: Results

Lecture 37 - Marangoni convection: Generalised tangential and normal stress boundary conditions

Lecture 38 - Marangoni convection: Stability analysis

Lecture 39 - Flow in a circular curved channel: Governing equations and scaling

Lecture 40 - Flow in a circular curved channel: Solution by regular perturbation

Lecture 41 - Stability of flow through curved channels: Problem formulation

Lecture 42 - Stability of flow through curved channels: Numerical calculation

Lecture 43 - Viscous Fingering: Darcyâ€™s law

Lecture 44 - Viscous Fingering: Stability analysis

Lecture 45 - Shallow Cavity flows

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Time-Frequency Analysis and Wavelet Transforms (Chemical Engineering)

Co-ordinators : Dr. Arun K.Tangirala

Lecture 1 - Introduction - Lecture 1.1 A

Lecture 2 - Introduction - Lecture 1.1 B

Lecture 3 - Introduction - Lecture 1.2 A

Lecture 4 - Introduction - Lecture 1.2 B

Lecture 5 - Basic Definitions and concepts - Lecture 2.1 (Basic Definitions and concepts - Part I)

Lecture 6 - Basic Definitions and concepts - Lecture 2.2 (Basic Definitions and concepts - Part II)

Lecture 7 - Basic Definitions and concepts - Lecture 2.3 (Basic Definitions and concepts - Part III)

Lecture 8 - A review of Fourier transforms - Lecture 3.1 (Continuous time Fourier series)

Lecture 9 - A review of Fourier transforms - Lecture 3.2 (Continuous time Fourier transform)

Lecture 10 - A review of Fourier transforms - Lecture 3.3 (Discrete time Fourier series)

Lecture 11 - A review of Fourier transforms - Lecture 3.4 (Discrete time Fourier transform)

Lecture 12 - A review of Fourier transforms - Lecture 3.5 (Properties of Fourier transforms)

Lecture 13 - A review of Fourier transforms - Lecture 3.6 (Discrete Fourier transform)

Lecture 14 - A review of Fourier transforms - MATLAB demo of Fourier transform and periodogram

Lecture 15 - Duration and Bandwidth - Duration and Bandwidth

Lecture 16 - Duration and Bandwidth - Bandwidth equation and Instantaneous frequency

Lecture 17 - Duration and Bandwidth - Instantaneous frequency and analytic signals

Lecture 18 - Duration and Bandwidth - Duration-Bandwidth principle

Lecture 19 - Duration and Bandwidth - Requirements of time-frequency anlysis techniques

Lecture 20 - Duration and Bandwidth - Requirements of time-frequency analysis and techniques

Lecture 21 - Short-time Fourier transform - Short-time Fourier transform

Lecture 22 - Short-time Fourier transform - Auxillary (MATLAB demonstration)

Lecture 23 - Short-time Fourier transform - Properties of STFT

Lecture 24 - Practical aspects of STFT

Lecture 25 - Closing Remarks

Lecture 26 - Wigner-Ville Distributions

Lecture 27 - Properties of WVD

Lecture 28 - Properties of WVD 2

Lecture 29 - Discrete WVD

Lecture 30 - Pseudo and Smoothed WVD

Lecture 28 - Molecular recognition - Part 9

Lecture 29 - Molecular recognition - Part 10

Lecture 30 - Property driven functions of Supramolecular assembly

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31

Lecture 32

Lecture 33 - Metal coordinated architectures

Lecture 34 - Engineering Supramolecular devices : Sensors,Switches,Devices and Molecules - Part 1

Lecture 35 - Engineering Supramolecular devices : Sensors,Switches,Devices and Molecules - Part 2

Lecture 36 - Engineering Supramolecular devices : Sensors,Switches,Devices and Molecules - Part 3

Lecture 37 - Engineering Supramolecular devices : Sensors,Switches,Devices and Molecules - Part 4

Lecture 38 - Engineering Supramolecular devices : Sensors,Switches,Devices and Molecules - Part 5

Lecture 39 - Engineering Supramolecular devices : Sensors,Switches,Devices and Molecules - Part 6

Lecture 40 - From molecules to machines : A glimpse at the travel

NPTEL : NOC:Artificial Lift (Chemical Engineering)

Co-ordinators : Prof. Abdus Samad

Lecture 1 - Introduction to oil and gas

Lecture 2 - Drilling and Completion

Lecture 3 - Well completion

Lecture 4 - Oil and gas production systems

Lecture 5 - Pumps, compressors and flow through pipes

Lecture 6 - Reservoir fluid

Lecture 7 - Fluid properties and Phase diagram - Part 1

Lecture 8 - Fluid properties and Phase diagram - Part 2

Lecture 9 - Nodal analysis

Lecture 10 - Reservoir deliverability - Single phase flow

Lecture 11 - Reservoir deliverability - Two phase flow

Lecture 12 - Flow over a flat surface or flow through pipe - Part 1

Lecture 13 - Flow over a flat surface or flow through pipe - Part 2

Lecture 14 - Single-Phase, Multi-Phase-Emulsion

Lecture 15 - Emulsification and demulsification

Lecture 16 - Single and Multi Phase flow-flow regimes

Lecture 17 - Multi phase flow-flow models

Lecture 18 - Choke Performance

Lecture 19 - Pump classifications

Lecture 20 - Classification of artificial lifts - Part 1

Lecture 21 - Classification of artificial lifts - Part 2

Lecture 22 - Sucker rod pump (SRP) - Part 1

Lecture 23 - Sucker rod pump (SRP) - Part 2

Lecture 24 - Sucker rod pump (SRP) - Part 3

Lecture 25 - Sucker rod pump (SRP) - Part 4

Lecture 26 - Sucker rod pump (SRP) - Part 5

Lecture 27 - Sucker rod pump (SRP) - Part 6

Lecture 28 - SRP-Pump performance analysis - Part 1

Lecture 29 - SRP-Pump performance analysis - Part 2

Lecture 30 - SRP-Pump performance analysis - Part 3

Lecture 31 - Introduction to progressive cavity punp

Lecture 32 - Progressive cavity Pump - Part 1

Lecture 33 - Progressive cavity Pump - Part 2

Lecture 34 - Progressive cavity Pump - Part 3

Lecture 35 - Progressive cavity Pump - Part 4

Lecture 36 - Progressive cavity Pump - Part 5

Lecture 37 - Electric submersible pump - Part 1

Lecture 38 - Electric submersible pump - Part 2

Lecture 39 - Electric submersible pump - Part 3

Lecture 40 - ESP- basic electrical systems - Part 1

Lecture 41 - ESP- basic electrical systems - Part 2

Lecture 42 - ESP- basic electrical systems - Part 3

Lecture 43 - ESP- numerical problems - Part 1

Lecture 44 - ESP- numerical problems - Part 2

Lecture 45 - ESP- numerical problems - Part 3

Lecture 46 - ESP- numerical problems - Part 1

Lecture 47 - ESP- numerical problems - Part 2

Lecture 48 - Gas lift basics - Part 1

Lecture 49 - Gas lift basics - Part 2

Lecture 50 - Gas lift valves and installartion - Part 1

Lecture 51 - Gas lift valves and installartion - Part 2

Lecture 52 - Plunger lift and design

Lecture 53 - Hydraulic jet pump fundamentals - Part 1

Lecture 54 - Hydraulic jet pump fundamentals - Part 2

Lecture 55 - Hydraulic engine pumps and design - Part 1

Lecture 56 - Hydraulic engine pumps and design - Part 2

Lecture 57 - Surface pump units for jet pump - Part 1

Lecture 58 - Surface pump units for jet pump - Part 2

Lecture 59 - Surface pump units for jet pump - Part 3

Lecture 60 - Surface compressor for gas lift - Part 1

Lecture 61 - Surface compressor for gas lift - Part 2

Lecture 62 - Surface compressor for gas lift - Part 3

NPTEL : NOC:Interfacial Engineering (Chemical Engineering)

Co-ordinators : Prof. Manigandan

Lecture 1 - Introduction to interfaces

Lecture 2 - Importance of surface; Application of interfaces

Lecture 3 - Basics of classical and emerging tools

Lecture 4 - Concepts of capillarity and surface tension (ST) and measurement of ST and contact angle

Lecture 5 - Overview of various surface tension measurement techniques

Lecture 6 - Young-Dupre equation; Tutorial

Lecture 7 - Young-Laplace equation; Tutorial

Lecture 8 - Kelvin equation; Tutorial

Lecture 9 - Contact angle for ideal and non-ideal cases; Application of Young-Dupre

Lecture 10 - Measurement of contact angle of surfaces at fluid-fluid interfaces

Lecture 11 - Washburn approach; Tutorial

Lecture 12 - Work of cohesion, adhesion, and spreading coefficient

Lecture 13 - Girifalco-Good Fowkes equation; Tutorial

Lecture 14 - Demonstration of force tensiometer

Lecture 15 - Demonstration of optical tensiometer

Lecture 16 - Shapes of micelles, critical micelle concentration (CMC); critical packing parameter (CPP)

Lecture 17 - Thermodynamic principles of self-assembly

Lecture 18 - Micellar-enhanced ultrafiltration (MEUF): A surfactant-based separation technique

Lecture 19 - HLB guidelines; Debye plot

Lecture 20 - Surface excess concepts and problem solving

Lecture 21 - Gibbs adsorption isotherm equation

Lecture 22 - Deposition of Langmuir Blodgett (LB) films; Adsorption from solution

Lecture 23 - Demonstration of double barrier LB deposition technique

Lecture 24 - Emulsion and microemulsion; Application of microemulsion

Lecture 25 - Demonstration of emulsification using several emulsifying devices

Lecture 26 - Demonstration of particle size analyzer

Lecture 27 - Demonstration of particle/droplet tracking using an inverted microscope

Lecture 28 - Introduction to colloids

Lecture 29 - Understanding Intermolecular forces

Lecture 30 - van der Waals force

Lecture 31 - Lifshitz approach

Lecture 32 - Electrical double layer (EDL) interaction (Helmholtz)

Lecture 33 - Gouy-Chapman EDL Model

Lecture 34 - Gouy-Chapman-Stern EDL model

Lecture 35 - Overlapping double layer interaction

Lecture 36 - Derjaguin approximation; DLVO forces of interactions

Lecture 37 - Force-measuring techniques: Direct and indirect measurements

Lecture 38 - Steric (Polymer-mediated) forces

Lecture 39 - Electrokinetic phenomena

Lecture 40 - Demonstration of zeta potential measurements

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Building Towards a Career in Chemical Industry (Chemical Engineering)

Co-ordinators : Prof. Nagarajan R, Prof. MS Srinivasan

Lecture 1 - Introduction and Need for this course

Lecture 2 - Learning Objectives and schedule

Lecture 3 - Sectors of Chemical Industry

Lecture 4 - Understanding cost by Engineers

Lecture 5 - Investment Cost

Lecture 6 - Understanding Financial Performance of Companies

Lecture 7 - Global perspective of Chemical Industry

Lecture 8 - Nature and Development of Indian Chemical Industry

Lecture 9 - Research, Tech development and Licensing

Lecture 10 - Guest lectuer on skill development

Lecture 11 - Technology Development Process

Lecture 12 - Technology Readiness Level

Lecture 13 - Evolution of Technology - Caustic soda example

Lecture 14 - Evolution of Technology - Caustic soda example

Lecture 15 - Case study of heat recovery

Lecture 16 - Case study of Tech development- auto thermal gasification

Lecture 17 - Guidelines on choosing and completing a project report on Technology Development

Lecture 18 - Guidelines on choosing and completing a project report

Lecture 19 - Example of a case study of an affordable potable water drinking technology described in detail

Lecture 20 - Example of potable water technolohy through desalination of sea water

Lecture 21 - Case study of manufacturing of Polysilicon in India as a example of Technology Development

Lecture 22 - Case study of manufacturing of Polysilicon in India as a example of Technology Development (Continued...)

Lecture 23 - Industrial R&D ecosystem in India

Lecture 24 - Technology Tranfer - prospects and challenges

Lecture 25 - Guidelines on choosing and completing a project report

Lecture 26 - Jobs and career options in Industry

Lecture 27 - Continuation of Jobs and career options in Industry

Lecture 28 - Application of Taguchi Quality Function analysis to industrial processes

Lecture 29 - Course review and Introduction to Taguchi Quality Function Development

Lecture 30 - Preparing for Job interviews

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Chemical Technology - I (Chemical Engineering)

Co-ordinators : Dr. I.D. Mall

Lecture 1 - Introduction to Chemical process Industries

Lecture 2 - Raw material for Organic Chemical Industries

Lecture 3 - Unit processes and unit operations in organic chemical Industries

Lecture 4 - Coal and coal as chemicals feed stock

Lecture 5 - Coal carbonization and Coke oven plant

Lecture 6 - Gasification of Coal,Petrocoke and Biomass

Lecture 7 - Introduction to Pulp and paper Industry, Raw material for paper industry and Technological development

Lecture 8 - Pulping and Bleaching

Lecture 9 - Recovery of Chemicals

Lecture 10 - Stock preparation and paper making

Lecture 11 - Introduction to Soap and detergent, Soap making and Recovery of Glycerine

Lecture 12 - Synthetic detergent and Linear alkyl benzene

Lecture 13 - Sugar and Fermentation industry

Lecture 14 - Ethanol as Biofuel and Chemical feed stock

Lecture 15 - Introduction : Staus of Petroleum refinery, Crude oil and Natural gas origin, occurrence, exploration, drilling and processing, Fuel norms

Lecture 16 - Evaluation of Crude oil,Petroleum Products and Apetrochemicals

Lecture 17 - Crude oil Distillation

Lecture 18 - Thermal Cracking: Visbreaking and Delayed Coking

Lecture 19 - Catalytic cracking: Fluid Catalytic cracking and Hydro cracking

Lecture 20 - Catalytic reforming

Lecture 21 - Alkylation, Isomerisation and Polymerisation

Lecture 22 - Desulphurisation Processes and Recovery of Sulphur

Lecture 23 - Profile of petrochemical Industry and its structure

Lecture 24 - Naphtha and gas cracking for production of olefins

Lecture 25 - Recovery of chemicals from FCC and steam cracking

Lecture 26 - Synthesis gas and its derivatives: Hydrogen, CO, Methanol, Formaldehyde

Lecture 27 - Ethylene derivatives: Ethylene Oxide, Ethylene glycol, Ethylene dichloride and Vinyl chloride

Lecture 28 - Propylene, Propylene oxide and Isopropanol

Lecture 29 - Aromatics Production

Lecture 30 - Aromatics product profile, Ethyl benzene & Styrene, Cumene and phenol, Bisphenol, Aniline

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Introduction to polymer, Elastomer and Synthetic Fibre, Polymerisation

Lecture 32 - Polymers:Polyolefins, Polyethylene, Polypropylene Polystyrene

Lecture 33 - Polyvinylchloride, polycarbonate, thermoset resin: phenolformaldehyde, uriaformaldehyde and melamineformaldehyde

Lecture 34 - Elastomers: Styrene butadiene Rubber(SBR), Poly butadiene, Nitrile rubber

Lecture 35 - Polymides or Nylons(PA)

Lecture 36 - DMT and Terephtalic Acid, Polyester, PET resin, PTB resin

Lecture 37 - Acrylic Fibre, Modified Acrylic Fibre, Acrylonitrile, Acrolein, Propylene Finber, Polyurethane

Lecture 38 - Viscose Rayon and Acetate rayon

Lecture 39 - Pesticide

Lecture 40 - Dye and Intermediates

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Process Integration (Chemical Engineering)

Co-ordinators : Dr. B. Mohanty

Lecture 1 - Process integration, methods and area of application

Lecture 2 - Fundamental concepts related to heat integration - Part 1

Lecture 3 - Fundamental concepts related to heat integration - Part 2

Lecture 4 - Data extraction

Lecture 5 - Hot composite curves

Lecture 6 - Cold composite curves

Lecture 7 - Hot and cold composite curves and the pinch

Lecture 8 - Threshold problems

Lecture 9 - Energy targeting procedure

Lecture 10 - Problem Table Algorithm - Part 1

Lecture 11 - Grand composite curve

Lecture 12 - Problem Table Algorithm - Part 2

Lecture 13 - Number of units target

Lecture 14 - Shell targeting - Part 1

Lecture 15 - Area targeting - Part 1

Lecture 16 - Area targeting - Part 2

Lecture 17 - Coast targeting - Part 1

Lecture 18 - Coast targeting - Part 2

Lecture 19 - Supertargeting- optimization of Î” t min

Lecture 20 - Global & stream specific Î”t min and its relevance

Lecture 21 - Topology Trap

Lecture 22 - Rules for Pinch Design Method (PDM) - Part 1

Lecture 23 - Rules for Pinch Design Method (PDM) - Part 2

Lecture 24 - Application of PDM for MER Hen Synthesis

Lecture 25 - Design for threshold problems

Lecture 26 - Design for single pinch problems

Lecture 27 - Design for multi pinch problems

Lecture 28 - HEN optimization

Lecture 29 - Remaining problem analysis

Lecture 30 - Driving Force Plot

Lecture 31 - Low Temperature process Design - Part 1

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Low Temperature process Design - Part 2

Lecture 33 - Integration of Gas turbine with process - Part 1

Lecture 34 - Integration of Gas turbine with process - Part 2

Lecture 35 - Placement and Integration of Distillation Column

Lecture 36 - Heat Integration of evaporators

Lecture 37 - Integration of heat pump

Lecture 38 - Placement of Heat Engine, Heat pump and Reactors

Lecture 39 - Integration of Furnace

Lecture 40 - Problem solving using HINT Software - Part 1

Lecture 41 - Problem solving using HINT Software - Part 2

Lecture 42 - Problem solving using HINT Software - Part 3

Lecture 43 - Problem solving using HINT Software - Part 4

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Mechanical Operations (Chemical Engineering)

Co-ordinators : Prof. Shabina Khanam

Lecture 1 - Introduction

Lecture 2 - Characterization of a single particle - 1

Lecture 3 - Characterization of a single particle - 2

Lecture 4 - Characterization of collection of particles - 1

Lecture 5 - Characterization of collection of particles - 2

Lecture 6 - Fine grain size distribution

Lecture 7 - Effectiveness of screen - 1

Lecture 8 - Effectiveness of screen - 2

Lecture 9 - Industrial screening equipment

Lecture 10 - Size reduction

Lecture 11 - Laws of comminution

Lecture 12 - Examples of Laws of comminution - 1

Lecture 13 - Examples of Laws of comminution - 2

Lecture 14 - Size reduction equipment - 1

Lecture 15 - Size reduction equipment - 2

Lecture 16 - Particle dynamics - 1

Lecture 17 - Particle dynamics - 2

Lecture 18 - Particle dynamics-Examples

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Polymer Physics (IIT-R) (Chemical Engineering)

Co-ordinators : Prof. Prateek Kumar Jha

Lecture 1 - Introduction to the course, Macromolecules and Life, Molecular flexibility

Lecture 2 - Classification of polymers, Types of polymerization, Average molecular weights and polydispersity

Lecture 3 - Motivation to study polymer physics

Lecture 4 - Random Walk Models of Single Chain I: end-to-end distance of a polymer chain, freely jointed chain, drunkard walk

Lecture 5 - Random Walk Models of Single Chain II: general random walk on a lattice

Lecture 6 - Random Walk Models of Single Chain III: Freely rotating chain, definition of persistence length

Lecture 7 - Models of semiflexible chains (Kratky Porod Model) - Part I

Lecture 8 - Models of semiflexible chains (Kratky Porod Model) - Part II

Lecture 9 - Probability density of an ideal chain - Part I

Lecture 10 - Probability density of an ideal chain - Part II

Lecture 11 - Entropic Elasticity, Bead-Spring Model, Simulations of random walk models

Lecture 12 - Derivation of Diffusion equation, Einstein notation

Lecture 13 - Definition of Radius of gyration

Lecture 14 - Radius of gyration for an ideal chain, concept of ideality

Lecture 15 - Nonbonded interactions, hydrophobic and hydrophilic behaviour

Lecture 16 - Definition of excluded volume; good, bad, and theta solvent

Lecture 17 - Virial expansion, Flory theory for good solvent

Lecture 18 - Flory theory for bad solvent, self-similarity and fractal nature of polymers

Lecture 19 - Derivation of fractal dimension, concentration regimes and overlap concentration

Lecture 20 - Size, shape, and structure. Gyration tensor and measures of asphericity.

Lecture 21 - Order-disorder transition

Lecture 22 - Scattering experiments, Pair correlation function

Lecture 23 - Structure of polymer chain, Introduction to Monte Carlo simulations of polymer chains

Lecture 24 - Monte Carlo algorithm: Detailed Balance, Metropolis algorithm

Lecture 25 - Practical aspects of Monte Carlo simulation

Lecture 26 - Molecular Dynamics Simulations, Review of Thermodynamics

Lecture 27 - Solution Thermodynamics - I

Lecture 28 - Solution Thermodynamics - II

Lecture 29 - Solution Thermodynamics - III

Lecture 30 - Solution Thermodynamics - IV

Lecture 31 - Phase separation regime, Introduction to lattice model of solutions

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Advanced Thermodynamics and Molecular Simulations (Chemical Engineering)

Co-ordinators : Prof. Prateek Kumar Jha

Lecture 1 - Introduction to the course

Lecture 2 - Molecular basis of energy and entropy

Lecture 3 - Probability and probability distributions

Lecture 4 - Probability distributions and thermodynamic equilibrium

Lecture 5 - Energy distribution in molecular systems

Lecture 6 - First and second law of thermodynamics

Lecture 7 - Reversible and irreversible processes; third law of thermodynamics; legendre transformation; thermodynamic functions for one component system

Lecture 8 - Thermodynamic functions for multi-component systems; chemical potential; why do we minimize thermodynamic functions?

Lecture 9 - Extensive and intensive variables; gibbs duhem relation; euler theorem; maxwell relations

Lecture 10 - Discrete and continuous probabilities; stirling approximation

Lecture 11 - Binomial distribution approaches Gaussian distribution for large n; definition of drunkard walk

Lecture 12 - Solution of drunkard walk; Lagrange multipliers

Lecture 13 - Energy distribution in molecular system revisited; introduction to thermodynamic ensembles

Lecture 14 - Canonical ensemble: most probable distribution, partition function

Lecture 15 - Definition of temperature; third law of thermodynamics

Lecture 16 - Canonical ensemble: Helmholtz free energy, averages and fluctuations, specific heat, deriving ideal gas law

Lecture 17 - Partition function of a dense gas; grand canonical ensemble: partition function, most probable distribution

Lecture 18 - Computing properties in grand canonical ensemble

Lecture 19 - Isothermal isobaric ensemble

Lecture 20 - Summary of thermodynamic ensembles; partition function of an ideal gas

Lecture 21 - Mixing and phase separation, phase equilibrium of a multiphase multicomponent system, Gibbs phase rule

Lecture 22 - Pure component phase diagram; solution thermodynamics: Helmholtz free energy density

Lecture 23 - Characterizing mixing and phase separation using Helmholtz free energy density

Lecture 24 - Common tangent construction, definition of binodal, spinodal, and critical point

Lecture 25 - Osmotic pressure and chemical potential

Lecture 26 - Lattice model of liquid solutions - I

Lecture 27 - Lattice model of liquid solutions - II

Lecture 28 - Lattice model of liquid solutions - III

Lecture 29 - Critical review of Lattice model, theoretical basis of molecular dynamics simulation

Lecture 30 - Theoretical basis of molecular dynamics simulation

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Interaction energy and force field

Lecture 32 - Liouiville theorem; theoretical basis of Monte Carlo simulation

Lecture 33 - Introduction to Monte Carlo simulation method

Lecture 34 - Markov chain algorithm, condition for equilibrium and detailed balance

Lecture 35 - Metropolis algorithm, periodic boundary condition

Lecture 36 - Numerical implementation of Monte Carlo simulation: Python Examples - I

Lecture 37 - Numerical implementation of Monte Carlo simulation: Python Examples - II

Lecture 38 - Numerical implementation of Monte Carlo simulation: Python Examples - III

Lecture 39 - Numerical implementation of Monte Carlo simulation: Python Examples - IV

Lecture 40 - Numerical implementation of Monte Carlo simulation: Python Examples - V

Lecture 41 - Particle simulations: comparison with quantum chemical and continuum simulations; bridging length and time scales

Lecture 42 - Pair potentials

Lecture 43 - Saving CPU time: short range and long range interactions

Lecture 44 - Bonded and non-bonded interactions, force fields

Lecture 45 - Practical aspects of molecular simulations

Lecture 46 - Numerical implementation of MD; thermostat and barostat

Lecture 47 - MD simulations - efficiency and parallelization, sampling and averaging, analysis of simulation trajectories

Lecture 48 - MD simulations - analysis of simulation trajectories (continued), Case Studies - I

Lecture 49 - MD simulations - Case Studies - II

Lecture 50 - MD simulations - Case Studies - III

Lecture 51 - Free energies and phase behavior; extension of canonical ensemble Monte Carlo to other ensembles

Lecture 52 - Extension of canonical ensemble Monte Carlo to other ensembles (Continued...)

Lecture 53 - Monte Carlo in Gibbs ensemble and semi-grand canonical ensemble, thermodynamic integration

Lecture 54 - Thermodynamic integration (continued); Widom's particle insertion; overlapping distribution method

Lecture 55 - Multiple histogram method; umbrella sampling; thermodynamic cycle; potential of mean force; pulling simulations; metadynamics; tackling time scale issues

Lecture 56 - Tackling time scale issues (continued); nonequilibrium molecular dynamics; mesoscale simulations: Langevin dynamics and Brownian dynamics, kinetic Monte Carlo simulations; dissipative particle dynamics

Lecture 57 - Multiparticle collision dynamics; lattice Boltzmann method; coarse-graining

Lecture 58 - Case studies

Lecture 59 - Simulations of chemical reactions using Kinetic Monte Carlo simulations

Lecture 60 - Reactive force fields; Ab initio molecular dynamics and other advanced methods; molecular simulations in chemical engineering; concluding remarks

Lecture 24 - Collision theory as a special case of TST

Lecture 25 - TST: an intuitive proof in one dimension

Lecture 26 - Rate as a flux across a dividing surface

Lecture 27 - Transition state theory: derivation 2 from dynamical perspective

Lecture 28 - Discussion of the assumptions of TST

Lecture 29 - Thermodynamic formulation of TST

Lecture 30 - Problem solving session - 3

Lecture 31 - Problem solving session - 4

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Hills and valleys of potential energy surfaces

Lecture 33 - Molecular dynamics: rolling spheres on potential energy surfaces

Lecture 34 - Predictions from potential energy surfaces - rotational vs vibrational energies

Lecture 35 - Free energy and potential of mean force

Lecture 36 - Transmission coefficient and molecualr dynamics

Lecture 37 - Problem solving session - 5

Lecture 38 - Microcanonical rate constant: putting balls in jars

Lecture 39 - Microcanonical rate constant: RRK model

Lecture 40 - Microcanonical rate constant: magic of Marcus - RRKM model

Lecture 41 - Canonical TST from micrononical RRKM model

Lecture 42 - Sum and density of states

Lecture 43 - Unimolecular decay - revisited

Lecture 44 - Unimolecular decay: RRK's approach

Lecture 45 - Unimolecular decay: RRKM's approach

Lecture 46 - Problem solving session - 6

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Concepts of Chemistry for Engineering (Chemistry and Biochemistry)

Co-ordinators : Prof. Anindya Datta

Lecture 1 - Introduction to quantum theory

Lecture 2 - Schrodinger's theory

Lecture 3 - Laws of quantum mechanics

Lecture 4 - Wave functions

Lecture 5 - Quantum mechanics of a free particle

Lecture 6 - Particle in 1D box

Lecture 7 - Particle in 2D box

Lecture 8 - Spherical polar coordinates and angular momentum

Lecture 9 - Developing Hydrogen atom orbitals - 1

Lecture 10 - Developing Hydrogen atom orbitals - 2

Lecture 11 - Developing Hydrogen atom orbitals - 3

Lecture 12 - Visualizing molecular orbitals

Lecture 13 - Molecular orbital theory 1: Introduction

Lecture 14 - Molecular orbital theory 2: Diatomic molecules

Lecture 15 - Molecular orbital theory 3: Homo-diatomic molecules - I

Lecture 16 - Molecular orbital theory 4: Homo-diatomic molecules - II

Lecture 17 - Molecular orbital theory 5: Hetero-diatomic molecules

Lecture 18 - Molecular orbital theory 6: Polyatomic molecules

Lecture 19 - Molecular orbital theory 7: Ethylene (Introduction to Huckel's theory) - I

Lecture 20 - Molecular orbital theory 8: Ethylene (Introduction to Huckel's theory) - II

Lecture 21 - Molecular orbital theory 9: Butadiene - I

Lecture 22 - Molecular orbital theory 9: Butadiene - II

Lecture 23 - Concept of effective nuclear charge

Lecture 24 - Electronic configuration of elements

Lecture 25 - Properties of Elements (Size, IE, EA and EN)

Lecture 26 - Polarizability

Lecture 27 - Hard soft acid base

Lecture 28 - Predicting molecular structures: VSEPR theory

Lecture 29 - Coordination Chemistry: 18 electron rule and VBT

Lecture 30 - Crystal Field Theory: Octahedral Complex

Lecture 31 - Crystal Field Theory: Tetrahedral Complex

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Crystal Field Theory: Octahedral vs. Tetrahedral Complex

Lecture 33 - Application of CFSE: Spinel and J-T Distortion

Lecture 34 - Introduction to Molecular Magnetism

Lecture 35 - Problem Solving Approach

Lecture 36 - Magnetism

Lecture 37 - Spectroscopic Term Symbol

Lecture 38 - Magnetic States of Matter: Paramagnetic, Ferro and Antiferromagnetic

Lecture 39 - Band structures of solid materials

Lecture 40 - Density of states and doping in semiconductors

Lecture 41 - Introduction to molecular spectroscopy

Lecture 42 - Rotational spectroscopy

Lecture 43 - Vibrational spectroscopy

Lecture 44 - Electronic Spectroscopy - I

Lecture 45 - Electronic Spectroscopy - II

Lecture 46 - Electronic Spectroscopy - III

Lecture 47 - Fluorescence Spectroscopy

Lecture 48 - Fundamentals of NMR spectroscopy and MRI

Lecture 49 - Surface characterization techniques

Lecture 50 - Introduction to thermodynamics: Work, heat and energy

Lecture 51 - First law of thermodynamics: Diathermic and adiabatic systems,exothermic and endothermic processes

Lecture 52 - Enthalpy, Hess's law

Lecture 53 - Second law of thermodynamics: Entropy and third law of thermodynamics

Lecture 54 - Helmholtz and Gibbs free energies, Concept of spontaneity

Lecture 55 - Electrochemical equilibrium, Nernst equation

Lecture 56 - Acid base and solubility equilibria

Lecture 57 - Corrosion

Lecture 58 - Extraction of metals

Lecture 59 - Ellingham Diagram

Lecture 60 - Problems From Thermodynamics

Lecture 61 - Intermolecular forces: Electrostatic and Ion-Dipole Interaction

Lecture 62 - Intermolecular forces: Dipole-dipole, hydrogen bonding

Lecture 63 - Real gases - Part 1

Lecture 64 - Real gases - Part 2

Lecture 65 - Introduction to Potential Energy Surfaces

Lecture 66 - Potential energy surface of H3 system

Lecture 67 - Salient features of H3 potential energy surface

Lecture 68 - Potential Energy Surfaces of HCN and H2F system

Lecture 69 - Representation of three dimensional structures

Lecture 70 - Structural isomers and stereoisomers

Lecture 71 - Configurations, Symmetry and Chirality

Lecture 72 - Enantiomers and Diastereomers

Lecture 73 - Optical activity, Conformational analysis, and absolute configuration

Lecture 74 - Substitution reactions

Lecture 75 - Elimination reactions

Lecture 76 - Addition, Oxidation and Reduction reactions

Lecture 77 - Synthesis of a drug molecule

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 60 - Summary and conclusion

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Many Body Methods in Quantum Chemistry (Chemistry and Biochemistry)

Co-ordinators : Prof. Sourav Pal, Prof. Achintya Kumar Dutta

Lecture 1 - Failure of classical mechanics

Lecture 2 - Postulates of quantum mechanics

Lecture 3 - Postulate 5 and 6

Lecture 4 - Overview of exactly solvable system

Lecture 5 - Introduction to many electron problem

Lecture 6 - Non-interacting and interacting quantum particles

Lecture 7 - Spin orbital concept

Lecture 8 - Slater determinant introduction

Lecture 9 - Form of exact wave function for interacting particles

Lecture 10 - A brief introduction to Configuration Interaction (CI)

Lecture 11 - Variational method and Rayleigh-Ritz variation

Lecture 12 - Linear variation method

Lecture 13 - Hartree-Fock theory introduction

Lecture 14 - Slater rules for matrix elements

Lecture 15 - Spin integrated for closed shell determinant

Lecture 16 - Examples of spin integrated determinants

Lecture 17 - Introduction to Lagrange variation

Lecture 18 - General lagrange variation

Lecture 19 - Lagrange variation to minimize the the Hartree-Fock energy

Lecture 20 - Non-canonical HF equation

Lecture 21 - Interpretation of coulomb and exchange terms

Lecture 22 - Unitary transformation of non-canonical HF equation

Lecture 23 - Canonical Hartree-Fock equation

Lecture 24 - Koopmans' approximation for IP

Lecture 25 - Koopmans' approximation for EA

Lecture 26 - Spin integrated Hartree-Fock for closed shell system (RHF)

Lecture 27 - Molecular Hartree-Fock introduction

Lecture 28 - Hartree-Fock Rothaan Hall equation

Lecture 29 - Symmetry of two electron integrals

Lecture 30 - HF Roothan equation in terms of atomic orbitals

Lecture 31 - Koopmans' IP for molecules

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Koopmans' EA for molecules

Lecture 33 - Roothaan equation in orthonormalized basis

Lecture 34 - Review of Hartree-Fock theory

Lecture 35 - Charge density, Bond order and Population analysis

Lecture 36 - Dipole Moment

Lecture 37 - Introduction to basis set

Lecture 38 - Dunning and Pople basis set

Lecture 39 - Polarization and diffuse function

Lecture 40 - Brillouin's theorem and Slater's rule type-2

Lecture 41 - Slater rule type-2

Lecture 42 - Spin adapted determinant

Lecture 43 - Dissociation of Hydrogen molecule problem

Lecture 44 - Inadequacies of restricted Hartree-Fock theory

Lecture 45 - Hartree-Fock perturbation theory and correlation correction

Lecture 46 - Hartree-Fock perturbation theory (Continued...)

Lecture 47 - Introduction of 2nd order perturbation theory

Lecture 48 - Intermediate normalization and an expression for the Correlation energy

Lecture 49 - Slater rule -3 and derivation of 2-nd order perturbation energy

Lecture 50 - Physical insight of pair correlation theory

Lecture 51 - Introduction to configuration intercation (CI)

Lecture 52 - Determine the parameter of CI

Lecture 53 - Construction of CIS hamiltonian matrix

Lecture 54 - Importance of doubly excited determinants in correlation contribution

Lecture 55 - Intermediate normalization and an expression for the Correlation energy

Lecture 56 - CI equation in terms of Normal-Ordered hamiltonian

Lecture 57 - Doubly excited CI function (D-CI)

Lecture 58 - Matrix structure of CISD (singly and doubly excited CI)

Lecture 59 - Some illustrative example

Lecture 60 - Effects of singly excited determinant in the calculation

Lecture 61 - D-CI for non-interacting hydrogen molecules

Lecture 62 - Size consistency problem in truncated CI

Lecture 63 - N-dependence of D-CI correlation energy

Lecture 64 - problem of truncating CI

Lecture 65 - Introduction of second quantization operator in quantum mechanics

Lecture 66 - Creation and annihilation operator and their properties

Lecture 67 - Operators in second quantization

Lecture 68 - Some basic examples related with second quantization operator

Lecture 69 - Hole-Particle formalism

Lecture 70 - Hugenholtz rule for diagrammatic construction of MP perturbation theory

Lecture 71 - Linked cluster diagram

Lecture 72 - Energy expression for higher order Moller-Plasset perturbation theory

Lecture 73 - Diagrammatic representation of MP3 energy and some practice problem

Lecture 74 - Overview of the some other correlation calculation method

Lecture 75 - A brief introduction to Coupled cluster theory

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Laser - Fundamentals and Applications (Chemistry and Biochemistry)

Co-ordinators : Prof. Manabendra Chandra

Lecture 1 - Unique properties of LASERs and their applications

Lecture 2 - LASER and its history

Lecture 3 - Interaction of Light with matter

Lecture 4 - Einsteins Concept of stimulated emission

Lecture 5 - Calculation of Einsteins coefficient

Lecture 6 - Population inversion, 2-level system and 3-level system

Lecture 7 - 3-level System and 4-level system

Lecture 8 - Components of LASERs

Lecture 9 - Modes of LASER cavity and standing waves

Lecture 10 - Transverse Modes of LASER cavity

Lecture 11 - Threshold Condition

Lecture 12 - Properties of Laser: Directionality and Intensity

Lecture 13 - Properties of Laser: Coherence and Monochromaticity

Lecture 14 - Continuous and Pulsed Lasers

Lecture 15 - Some Numerical problem

Lecture 16 - Cavity Dumping

Lecture 17 - Q-switching

Lecture 18 - Q-switching and Pockels effect

Lecture 19 - Passive Q-switching, Mode-Locking

Lecture 20 - Mode Locking

Lecture 21 - Mode - locking

Lecture 22 - Mode - locking (Continued...)

Lecture 23 - Passive Mode - locking and Types of LASERs

Lecture 24 - Solid state LASERs

Lecture 25 - Semiconductor LASERs and Gas LASERs

Lecture 26 - Gas LASERs

Lecture 27 - Chemical and Dye LASERs

Lecture 28 - Introduction to Non Linear Optics

Lecture 29 - Non Linear Optics

Lecture 30 - 2nd order Nonlinear optics

Lecture 31 - Non-linear optical processes

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Aspects of SHG and Application of non-linear optics

Lecture 33 - Application of LASER: LIDAR

Lecture 34 - Application of Laser: Laser Spectroscopy

Lecture 35 - Application of Laser: Enrichment of Isotope

Lecture 36 - Laser Induced Chemistry

Lecture 37 - Laser Induced Chemistry and Ultrafast chemical Dynamics

Lecture 38 - Lasers in Medical Sciences

Lecture 39 - Lasers in Material sciences and engineering and Optical Communications

Lecture 40 - Laser safety and summary

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Advanced Mathematical Methods for Chemistry (Chemistry and Biochemistry)

Co-ordinators : Prof. Madhav Ranganathan

Lecture 1 - Vectors, Vector Operations and Linear Independence

Lecture 2 - Vector Operations, Generalization of Vectors

Lecture 3 - Vector Differentiation, Vector Transformations

Lecture 4 - Vector Integration, Line, Surface and Volume Integrals

Lecture 5 - Practice Problems

Lecture 6 - Matrix as a vector transformation, linear system

Lecture 7 - Special Matrices: Symmetric, Orthogonal, Complex

Lecture 8 - Rotational Matrices, Eigenvalues and Eigenvectors

Lecture 9 - Determinants, Matrix Inverse

Lecture 10 - Practice Problems

Lecture 11 - Step Function, Delta Function

Lecture 12 - Gamma Function, Error Function

Lecture 13 - Spherical Polar Coordinates

Lecture 14 - Cylindrical Polar Coordinates, Integrals

Lecture 15 - Recap of Module 3, Practice Problems

Lecture 16 - ODEs and PDEs, First order ODEs, system of 1st order ODEs

Lecture 17 - First order ODEs, exact integrals, integrating factors

Lecture 18 - System of first order ODEs, Linear first order ODEs

Lecture 19 - General solution of a system of linear first order ODEs with constant coefficients

Lecture 20 - Recap of Module 4, Practice problems

Lecture 21 - Homogeneous 2nd Order ODE, Basis Functions

Lecture 22 - Nonhomogeneous 2nd Order ODE

Lecture 23 - Power Series Method of Solving ODEs

Lecture 24 - Frobenius Method / Power Series Method

Lecture 25 - Time-independent Schrodinger Equation for H-atom

Lecture 26 - Maxima and Minima, Taylor Series

Lecture 27 - Taylor Series for functions of several variables

Lecture 28 - Critical Points of Functions

Lecture 29 - Lagranges Method of Undetermined Multipliers

Lecture 30 - Recap of Module 6, Practice Problems

Lecture 31 - Nonlinear Differential Equations

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Phase Plane of A Pendulum

Lecture 33 - Stability of Critical Points

Lecture 34 - Population Dynamics Models

Lecture 35 - Recap of Module 7, Practice Problems

Lecture 36 - Fourier Series, Fourier Expansion of Periodic Functions

Lecture 37 - (Part A): Fourier Expansions and Differential Equations

Lecture 38 - (Part B): Fourier Expansions and Differential Equations

Lecture 39 - Orthogonal Eigenfunctions, Sturm-Liouville Theory

Lecture 40 - Recap of Module 8, Practice Problems

Lecture 41 - Fourier Transforms

Lecture 42 - Properties of Fourier Transforms

Lecture 43 - Fourier Transforms and Partial Differential Equations

Lecture 44 - Laplace Transforms

Lecture 45 - Recap of Module 9, Practice Problems

Lecture 46 - Partial Differential Equations, Boundary Conditions

Lecture 47 - Separation of Variables

Lecture 48 - (Part A): Two-dimensional Wave Equation, Bessel Functions

Lecture 49 - (Part B): Two-dimensional Wave Equation, Bessel Functions

Lecture 50 - Recap of Module 10, Practice Problems

Lecture 51 - Discrete and Continuous Random Variables

Lecture 52 - Probability Distribution Functions

Lecture 53 - Poisson Distribution, Gaussain Distribution

Lecture 54 - Error Estimates, Least Square Fit, Correlation Functions

Lecture 55 - Recap of Module 11, Practice Problems

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Solid State Chemistry (Chemistry and Biochemistry)

Co-ordinators : Prof. Madhav Ranganathan

Lecture 1 - Nature of solid state and the solid state materials

Lecture 2 - Thermodynamics of solids

Lecture 3 - Crystallisation Kinetics

Lecture 4 - Synthetic Strategy

Lecture 5 - Review of week 1 and Practice problems

Lecture 6 - Unit Cells

Lecture 7 - Conventional Unit Cell and Primitive Unit Cell

Lecture 8 - Bravais Lattices

Lecture 9 - Bravais Lattices, Basis and crystal

Lecture 10 - Summery of week 2 and Practices Problems

Lecture 11 - Symmetry In Crystals, Point Symmetries

Lecture 12 - Reflections, Inversions and Rotoinversions

Lecture 13 - Schonflies and Hermann-Mauguin Conventions

Lecture 14 - Fractional Coordinates, Planer Visualization

Lecture 15 - Review of week 3 And Practice Problems

Lecture 16 - Combining symmetry operations, translational symmetries

Lecture 17 - Screw Axis

Lecture 18 - Glide Planes

Lecture 19 - Symmetry and Symmetry Notations

Lecture 20 - Summary of week 4 and Practice Problems

Lecture 21 - Crystal Systems

Lecture 22 - Crystal Systems and Unit Cells

Lecture 23 - Point Groups

Lecture 24 - Space Groups

Lecture 25 - Week 5 Summary and Practice Problems

Lecture 26 - 32 Crystal Classes Based on Symmetry

Lecture 27 - Notation for 32 Crystal Classes

Lecture 28 - Short Form of Hermann-Mauguin Notations

Lecture 29 - Hermann - Mauguin notation for Space Groups

Lecture 30 - Summary and Practice Problems

Lecture 31 - Coordination number, Voids

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Lattice Imperfections and Crystals

Lecture 33 - Line Planner and Bulk defects and crystals

Lecture 34 - Thermodynamics of defects in crystals

Lecture 35 - Review of Week 7,Practice Problems

Lecture 36 - Miller Planes, Miller Indices

Lecture 37 - Miller Indices for Hexagonal Systems, Distance between Planes

Lecture 38 - X-ray diffraction, Bragg's Law, Reciprocal Lattice

Lecture 39 - Reciprocal Lattice, XRD instrumentation

Lecture 40 - Review of week 8, Practice Problems

Lecture 41 - XRD - Analysis of Pattern

Lecture 42 - Geometric Structure Factor - Missing Peaks

Lecture 43 - X-Ray Crystallography

Lecture 44 - Electron Microscopy

Lecture 45 - Review of Week 9. Practice Problems

Lecture 46 - Closed - Packed Structures and Voids

Lecture 47 - Crystal Structures of Binary Compounds

Lecture 48 - Perovskites and Spinals

Lecture 49 - Space filling Polyhedra, Alloys

Lecture 50 - Summary of Week 10 and Practice Problems

Lecture 51 - Free electron Models

Lecture 52 - Bloch Theorem

Lecture 53 - Band Theory of Solids

Lecture 54 - Bands in Higher Dimensions

Lecture 55 - Summary of Week 11 and Practice Problems

Lecture 56 - More about Band Theory, Crystal Momentum

Lecture 57 - Density of States

Lecture 58 - Metals, Insulators and Semiconductors

Lecture 59 - Band Gap and Optical Properties

Lecture 60 - Summary of Week 12 and Practice Problems

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Bioinorganic Chemistry (Chemistry and Biochemistry)

Co-ordinators : Prof. S. P. Rath

Lecture 1 - General Introduction and Prospects

Lecture 2 - Metals in Biology: Nature's Selection of Elements in Life

Lecture 3 - Metals in Biology: Control, Use and Enzymatic Action

Lecture 4 - Metals in Biology: Choice of Redox Active Metal Ions

Lecture 5 - Metals in Biology: Importance of Cobalt in Coenzyme-B12

Lecture 6 - Design Principles Used in Chemical Biology: Some Noteworthy Examples!

Lecture 7 - Design Principles Used in Chemical Biology: Role of Proteins in Controlling Reactivity!

Lecture 8 - Design Principles Used in Chemical Biology: Blue-Copper Proteins

Lecture 9 - Design Principles Used in Chemical Biology: Fixation of Nitrogen from Air

Lecture 10 - Life with Oxygen: Molecular and Chemical Properties of O2

Lecture 11 - Life with Oxygen: Cytochrome c oxidase

Lecture 12 - Life with Oxygen: Superoxide Dismutase Activity

Lecture 13 - Life with Oxygen: Catalase and Peroxidase Activities

Lecture 14 - Life with Oxygen: Oxygenase Activity

Lecture 15 - Life with Oxygen: O2-Carrying Proteins Hemocyanin and Hemerythrin

Lecture 16 - Life with Oxygen: O2-Carrying Proteins Hemoglobin and Myoglobin

Lecture 17 - Life with Oxygen: Reversible O2-binding and Transport

Lecture 18 - Life with Oxygen: Heme Oxygenase Activity

Lecture 19 - Metals in Medicine: Introduction to Medicinal Inorganic Chemistry

Lecture 20 - Metals in Medicine: Platinum-based Anti-Cancer Drugs

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Chemistry and Physics of Surfaces and Interfaces (Chemistry and Biochemistry)

Co-ordinators : Prof. Thiruvancheril G. Gopakumar

Lecture 1 - Intro-Chemistry and Physics of Surfaces and Interfaces

Lecture 2 - Historic perspective to surface science

Lecture 3 - Creating surfaces from bulk lattices

Lecture 4 - Reconstruction of surfaces

Lecture 5 - Hexagonal lattice and miller bravais indices

Lecture 6 - Introduction to ultra-high Vaccum and Preparation of Clean Surfaces

Lecture 7 - Adsorption and the Energetic of Adsorption

Lecture 8 - Nomenclature and types of Adlayers

Lecture 9 - Thermal Desorption Spectroscopy

Lecture 10 - Different types of Preparation methods for Thin Films

Lecture 11 - Examples of PVD and CVD

Lecture 12 - Moire Pattern at Solid-Solid Interface

Lecture 13 - Growth Modes of Adlayers

Lecture 14 - Energies that Control the Growth of Adlayers

Lecture 15 - Kinetic and Thermodynamic Control in Adlayer Growth

Lecture 16 - Molecular Adsorbates: Preparation

Lecture 17 - Molecular Adsorbates: Factors Controlling Molecular Adlayer Formation - I

Lecture 18 - Molecular Adsorbates: Factors Controlling Molecular Adlayer Formation - II

Lecture 19 - Molecular Adsorbates: Factors Controlling Molecular Adlayer Formation - III

Lecture 20 - Scanning Tunneling Microscopy

Lecture 21 - Tip-vaccum Tunneling Junction

Lecture 22 - Scanning Tunneling Spectroscopy - I

Lecture 23 - Scanning Tunneling Spectroscopy - II

Lecture 24 - Scanning Tunneling Spectroscopy: Applications - I

Lecture 25 - Scanning Tunneling Spectroscopy: Applications - II

Lecture 26 - Imaging Molecules and Atom Manipulation on Surfaces

Lecture 27 - Single Molecule Manipulation on Surfaces

Lecture 28 - Inelastic Tunneling Spectroscopy

Lecture 29 - Ultra-violet Photo-electron Spectroscopy (UPS)

Lecture 30 - Ultra-violet Photo-electron Spectroscopy (UPS): Applications

Lecture 31 - X-ray Photo-electron Spectroscopy (XPS)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - X-Ray Photo-electron Spectroscopy (XPS): Applications - 1

Lecture 33 - X-Ray Photo-electron Spectroscopy (XPS): Applications - 2

Lecture 34 - 2D Molecular Materials on Surface - 1

Lecture 35 - 2D Molecular Materials on Surface - 2

Lecture 36 - Atomic Force Microscopy (AFM) - I

Lecture 37 - Atomic Force Microscopy (AFM) - II

Lecture 38 - Atomic Force Microscopy (AFM) - III

Lecture 39 - Dynamics of Atoms on Surfaces

Lecture 40 - Summary

Lecture 39 - Reaction Mechanism - V

Lecture 40 - Biological Inorganic Chemistry

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Heterocyclic Chemistry (Chemistry and Biochemistry)

Co-ordinators : Prof. D.R. Mal

Lecture 1 - Definition and Scope

Lecture 2 - Single - Step Methods for IVPs

Lecture 3 - Systematic Nomenclature

Lecture 4 - Nomenclature (Continued...) and Important Names

Lecture 5 - Overview of Structure Determination in Heterocyclic Chemistry

Lecture 6 - 15N NMR in Heterocyclic Chemistry

Lecture 7 - Effects of Ring Nitrogen - A

Lecture 8 - Effects of Ring Nitrogen - B

Lecture 9 - Effects of Ring Nitrogen - C

Lecture 10 - Oxidation in Heterocyclic Chemistry

Lecture 11 - Oxidation in Heterocyclic Chemistry (Continued...)

Lecture 12 - Reduction in Heterocyclic Chemistry

Lecture 13 - Radicals in Heterocylic Chemistry - I

Lecture 14 - Radicals in Heterocylic Chemistry - II

Lecture 15 - Lithiation for 5-membered heterocycles

Lecture 16 - Lithiation for 5-membered heterocycles (Continued...)

Lecture 17 - Lithiation of 6-membered heterocycle and non-aromatic heterocycles

Lecture 18 - Magnetiation and Zincation in Heterocyclic Chemistry

Lecture 19 - Transition metal catalyzed cross coupling

Lecture 20 - Transition metal catalyzed cross coupling (Continued...)

Lecture 21 - Dehydrogenative (Oxidative) cross coupling

Lecture 22 - Tert-amino effect in heterocycle synthesis

Lecture 23 - [4 plus 2] cycloaddition in heterocyclic chemistry

Lecture 24 - [4 plus 2] cycloaddition in heterocyclic chemistry (Continued...)

Lecture 25 - [3 plus 2] Cycloaddition in heterocyclic chemistry

Lecture 26 - Cycloaddition : Revisited

Lecture 27 - [4 plus 3] Cycloaddition

Lecture 28 - [5 plus 2] Cycloaddition

Co-ordinators : Prof.Arijit Kumar De

Lecture 1 - Introduction to Chemical Thermodynamics and Kinetics

Lecture 2 - Properties of gases - Part 1

Lecture 3 - Properties of gases - Part 2

Lecture 4 - Introduction - Part 1

Lecture 5 - Introduction - Part 2

Lecture 6 - First law - Part 1

Lecture 7 - First law - Part 2

Lecture 8 - First law - Part 3

Lecture 9 - First law - Part 4

Lecture 10 - First law - Part 5

Lecture 11 - Second law - Part 1

Lecture 12 - Second law - Part 2

Lecture 13 - Spontaneity and equilibrium - Part 1

Lecture 14 - Spontaneity and equilibrium - Part 2

Lecture 15 - Spontaneity and equilibrium - Part 3

Lecture 16 - Phase equilibrium - Part 1

Lecture 17 - Phase equilibrium - Part 2

Lecture 18 - Phase equilibrium - Part 3

Lecture 19 - Phase equilibrium - Part 4

Lecture 20 - Phase equilibrium - Part 5

Lecture 21 - Phase equilibrium - Part 6

Lecture 22 - Phase equilibrium - Part 7

Lecture 23 - Mixtures - Part 1

Lecture 24 - Mixtures - Part 2

Lecture 25 - Mixtures - Part 3

Lecture 26 - Mixtures - Part 4

Lecture 27 - Mixtures - Part 5

Lecture 28 - Chemical Equilibrium - Part 1

Lecture 29 - Chemical Equilibrium - Part 2

Lecture 30 - Chemical Equilibrium - Part 3

Lecture 31 - Chemical Equilibrium - Part 4

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Chemical Equilibrium - Part 5

Lecture 33 - Chemical equilibrium - Part 2B

Lecture 34 - Chemical equilibrium - Part 2C

Lecture 35 - Electrochemistry - Part 1

Lecture 36 - Electrochemistry - Part 2

Lecture 37 - Electrochemistry - Part 3

Lecture 38 - Surfaces and interfaces

Lecture 39 - Chemical Kinetics: Rate laws - Part 1

Lecture 40 - Chemical Kinetics: Rate laws - Part 2

Lecture 41 - Chemical Kinetics: Rate laws - Part 3

Lecture 42 - Chemical Kinetics: Rate laws - Part 4

Lecture 43 - Chemical Kinetics: Mechanisms - Part 1

Lecture 44 - Chemical Kinetics: Mechanisms - Part 2

Lecture 45 - Chemical Kinetics: Mechanisms - Part 3

Lecture 46 - Chemical Kinetics: Mechanisms - Part 4

Lecture 47 - Chemical Kinetics: Mechanisms - Part 5

Lecture 48 - Chemical Kinetics: Mechanisms - Part 6

Lecture 49 - Reaction dynamics - Part 1

Lecture 50 - Reaction dynamics - Part 2

Lecture 51 - Reaction dynamics - Part 3

Lecture 52 - Reaction dynamics - Part 4

Lecture 53 - Reaction dynamics - Part 5

Lecture 54 - Reaction dynamics - Part 6

Lecture 55 - Reaction dynamics - Part 7

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Chemical Crystallography (Chemistry and Biochemistry)

Co-ordinators : Prof.Angshuman Roy Choudhury

Lecture 1 - Introduction to X-Ray Crystallography

Lecture 2 - Sources of X-Rays, Crystal Systems and Bravais lattices

Lecture 3 - Crystallographic Symmetries

Lecture 4 - Equivalent Points and 1D Lattices

Lecture 5 - 5 Fold Symmetry and 2D Lattices

Lecture 6 - 2D Space Lattices

Lecture 7 - Crystallographic Point Groups

Lecture 8 - Stereographic Projections of Point Groups

Lecture 9 - Understanding of Crystallographic Space Groups

Lecture 10 - 2D Projection of Space Groups

Lecture 11 - Tutorial - 01

Lecture 12 - 3D Space Groups and Equivalent Points

Lecture 13 - Obtaining Equivalent Points by Shifting of Origin

Lecture 14 - Representation of Orthorhombic and Tetragonal Space Groups

Lecture 15 - Miller Indices for Crystallographic Directions and Planes

Lecture 16 - Miller Indices and Planar Densities

Lecture 17 - Tutorial - 02

Lecture 18 - Cubic Structues and atomic packing factors

Lecture 19 - Ceramic Structures

Lecture 20 - Theory of X-Ray Diffraction

Lecture 21 - Tutorial - 03

Lecture 22 - Origin of Reciprocal Lattice

Lecture 23 - Bragg's Law in Reciprocal Lattice and Origin of Systematic Absences

Lecture 24 - Systematic Absences and Crystallisation Methods

Lecture 25 - Special Method of Crystallisation

Lecture 26 - Tutorial

Lecture 27 - Single Crystal X-Ray Diffraction Data Collection

Lecture 28 - Diffractometers

Lecture 29 - Diffractometers and Detectors

Lecture 30 - Laue's and Bragg's Analysis

Lecture 31 - Experimental Methods and Theoretical Understanding of X-Ray Diffraction

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Derivation of Friedel's Law from Structure Factor by Vector Space Diagram

Lecture 33 - Structure Fcator and Electron Density

Lecture 34 - Systematic Absence Conditions from Special Structure Factor Expression

Lecture 35 - Structure Refinement

Lecture 36 - Single Crystal X-Ray Diffractometer

Lecture 37 - Understanding the X-Ray Data

Lecture 38 - Data Handling (Solution and Refinement) using Various Crystallographic Packages

Lecture 39 - Structure Solution using Apex II (Bruker Diffractometer)

Lecture 40 - Direct Methods - Part 1

Lecture 41 - Direct Methods - Part 2

Lecture 42 - Disorder Treatment using Olex 2

Lecture 43 - Cambridge Structure Database and its Application

Lecture 44 - Data Reduction - Absorption Correction

Lecture 45 - Data Reduction - Lorentz and Polarization Correction

Lecture 46 - Data Reduction - Scale and Temperature Factor

Lecture 47 - Identification from Intensity Statistics the Correct Crystal System and Presence of Inversion Center

Lecture 48 - Identification from Intensity Statistics the presence of 2 fold axis in Lattice

Lecture 49 - Phase Problem

Lecture 50 - Direct Methods - Part 1

Lecture 51 - Direct Methods - Part 2

Lecture 52 - Sigma 1 and Triplet Relationship

Lecture 53 - Patterson Method

Lecture 54 - Powder X-Ray Diffractometer - Theory

Lecture 55 - Powder X-Ray Diffractometer - Lab

Lecture 56 - Polymorphs

Lecture 57 - Polymorphs

Lecture 58 - Review of Reciprocal Lattice

Lecture 59 - Review of Reciprocal Lattice

Lecture 60 - Review of Reciprocal Lattice and Bragg's Law in Reciprocal Lattice

Lecture 61 - Ewald's Sphere and Limiting Sphere

Lecture 62 - Origin of/Introduction to Systematic absences

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 42 - Transport Phenomena: Coefficient of viscosity

Lecture 43 - Equilibrium constant using partition method

Lecture 44 - Photochemistry: Degradation of a dye

NPTEL : NOC:Chemistry: Atomic Structure and Chemical Bonding (Chemistry and Biochemistry)

Co-ordinators : Prof. K. Mangala Sunder

Lecture 1 - Welcome

Lecture 2 - Elementary Mathematical Functions Used in Our Course

Lecture 3 - Schrodinger Equation: Particle in a One Dimensional Box

Lecture 4 - Particle in a One dimensional Box: Probabilities and Expectation Values

Lecture 5 - Elementary Mathematics: Introduction to Matrix Algebra - Part 1

Lecture 6 - Elementary Mathematics: Introduction to Matrix Algebra - Part 2

Lecture 7 - Elementary Mathematics: Matrix Eigenvalues and Eigenfunctions - Part I

Lecture 8 - Elementary Mathematics: Matrix Eigenvalues and Eigenfunctions - Part II

Lecture 9 - Particle in a Two Dimensional Box (Infinite Barrier)

Lecture 10 - Heisenbergâ€™s Uncertainty Principle

Lecture 11 - Expectation Values and Postulates in Quantum Mechanics

Lecture 12 - Problems and Solutions for Particle in One and Two Dimensional Boxes

Lecture 13 - Linear Vector Spaces: Matrix Representations

Lecture 14 - Linear Vector Spaces and Operators: Diracâ€™s Bracket Notation

Lecture 15 - Simple Harmonic Oscillator: Classical Hamiltonian

Lecture 16 - Simple Harmonic Oscillator: Quantum Mechanical Solutions

Lecture 17 - Simple Harmonic Oscillator: Wave Functions, Probabilities and Average Values

Lecture 18 - Simple Harmonic Oscillator: Average Values for Position and Momentum

Lecture 19 - Particle on a Ring: The Quantum Model

Lecture 20 - Particle on a Ring: Expectation Values for Angular Momentum

Lecture 21 - Coordinate Transformation

Lecture 22 - Problems and Solutions for Harmonic Oscillator

Lecture 23 - Hydrogen Atom: The Hamiltonian in Spherical Polar Coordinates

Lecture 24 - Hydrogen Atom: Separation of the SchrÃ¶dinger Equation

Lecture 25 - Hydrogen Atom: Radial and Angular Solutions and Animations - Part I

Lecture 26 - Hydrogen Atom: Radial and Angular Solutions and Animations - Part II

Lecture 27 - Hydrogen Atom: Radial Solutions and Probabilities

Lecture 28 - Power Series Method for Differential Equation - I

Lecture 29 - Hermiteâ€™s Differential Equation

Lecture 30 - Legendre and Associated Legendre Equation

Lecture 31 - Born-Oppenheimer Approximation

Lecture 32 - Introduction to Angular Momentum

Lecture 33 - Spin Â½ Angular Momentum

Lecture 34 - Spin Angular Momentum and Coupling of Two Spin-1/2 Angular Momenta

Lecture 35 - Coupling of Two Angular Momenta

Lecture 36 - Video Tutorial for Hermite polynomials and hydrogen atom - Part 1

Lecture 37 - Video Tutorials - Part 2

Lecture 38 - Variational Principle in Quantum Chemistry: Linear superposition Principle

Lecture 39 - Introduction to Variational Principle in Quantum Chemistry

Lecture 40 - Variational Method: Method of Lagrange Multipliers

Lecture 41 - Hydrogen Molecule Ion: The Molecular Orbital Method

Lecture 42 - Hydrogen Molecule Ion: Calculations and Results

Lecture 43 - Hydrogen Molecule: The Valence Bond Method

Lecture 44 - Hydrogen Molecule: Calculations and Molecular Orbital Method

Lecture 45 - Video Tutorials on Angular Momentum (Orbital and Spin) and Variational Method - Part 1

Lecture 46 - Video Tutorials on Angular Momentum (Orbital and Spin) and Variational Method - Part 2

Lecture 47 - Introduction to Quantum Mechanical Perturbation Theory

Lecture 48 - First Order Time Independent perturbation Theory for Non-Degenerate states

Lecture 49 - First and Second Order Time Independent Perturbation Theory for Non-Degenerate States

Lecture 50 - First and Second Order Time Independent Perturbation Theory: Simple Examples

Lecture 51 - Time Independent Perturbation Theory for Degenerate States: First Order

Lecture 52 - General MO method for Homonuclear Diatomic Molecules

Lecture 53 - General MO method for Heteronuclear Diatomic Molecules

Lecture 54 - Introduction to Hybridization and Valence Bond for Polyatomic Molecules

Lecture 55 - HÃœckel Molecular Orbital Theory - I

Lecture 56 - HÃœckel Molecular Orbital Theory - II

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Electrochemical Impedance Spectroscopy (Chemistry and Biochemistry)

Co-ordinators : Dr. S. Ramanathan

Lecture 1 - Electrochemistry, double layer, 3 electrode systems, supporting electrolyte

Lecture 2 - Rate constant, concept of impedance, Z of electrical elements, differential impedance

Lecture 3 - Time domain results

Lecture 4 - Graphical representation of data (Complex plane, Bode)

Lecture 5 - Introduction to other techniques

Lecture 6 - Tutorial 01

Lecture 7 - Type of analyzers, single and multi sine

Lecture 8 - FFT details, frequency range and resolution, cross correlation

Lecture 9 - Multi sine, odd harmonic, non-harmonics, crest factor, spectral leakage

Lecture 10 - Windowing

Lecture 11 - Tutorial 02

Lecture 12 - Introduction to KKT

Lecture 13 - Linearity, causality, stability, impedance vs. admittance, measurement model

Lecture 14 - Linear KKT illustration

Lecture 15 - Tutorial 03

Lecture 16 - Introduction to EEC, Choice of circuits, confidence intervals, AIC

Lecture 17 - EEC fitting, initial values, distinguishability

Lecture 18 - Zero/pole representation, Rt and Rp

Lecture 19 - Maxwell, Voigt, Ladder circuits, choice of initial values illustrated

Lecture 20 - Tutorial 04

Lecture 21 - Simple electron transfer reaction

Lecture 22 - Two step reaction with an intermediate (1 of 3)

Lecture 23 - Two step reaction with an intermediate (2 of 3)

Lecture 24 - Two step reaction with an intermediate (3 of 3)

Lecture 25 - E-EAR reaction, negative resistance (1 of 2)

Lecture 26 - E-EAR reaction, negative resistance (2 of 2)

Lecture 27 - Three step reaction with two adsorbed intermediates

Lecture 28 - Catalytic mechanism

Lecture 29 - Examples with Frumkin or Temkin isotherms

Lecture 30 - Challenges in RMA

Lecture 31 - Patterns Reported in Experiments

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Warburg part - 1

Lecture 33 - Warburg part - 2

Lecture 34 - Warburg part - 3

Lecture 35 - Bounded Warburg

Lecture 36 - CPE

Lecture 37 - Porous electrodes

Lecture 38 - Films, PDM

Lecture 39 - PDM

Lecture 40 - Applications

Lecture 41 - NLEIS. Introduction and mathematical background

Lecture 42 - Electron Transfer reaction

Lecture 43 - Two step reaction

Lecture 44 - Two step reaction (Continued...)

Lecture 45 - Rt and Rp estimation

Lecture 46 - Galvanostatic simulations

Lecture 47 - Instabilities

Lecture 48 - Solution resistance effects

Lecture 49 - Detection on nonlinearities using KKT

Lecture 50 - Frumkin and Temkin isotherms

Lecture 51 - NLEIS Experimental aspects. FFT, PSD, THD

Lecture 52 - Application - other techniques HA, EFM

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Medicinal Chemistry (Chemistry and Biochemistry)

Co-ordinators : Prof. Harinath Chakrapani

Lecture 1 - Introduction to Medicinal Chemistry - Part I

Lecture 2 - Introduction to Medicinal Chemistry - Part II

Lecture 3 - Intermolecular Binding Forces

Lecture 4 - Protein Structure and Function

Lecture 5 - Tutorial 1 - Acidity, Basicity and Related concepts

Lecture 6 - Tutorial 2 - Basic Concepts of Thermodynamics and Kinetics

Lecture 7 - Enzyme Catalysis - Part I

Lecture 8 - Enzyme Catalysis - Part II

Lecture 9 - Tutorial 3 - Binding Forces, Protein Structure and Function

Lecture 10 - Introduction to Receptors

Lecture 11 - Receptor Types and Functions

Lecture 12 - Tutorial 4 - Receptors, Binding Interactions, Ion Channels

Lecture 13 - Nucleic Acids

Lecture 14 - RNA and Protein Synthesis

Lecture 15 - Tutorial 5 - Nucleic acids, and Basics of Molecular Biology

Lecture 16 - Enzymes as Drug Targets

Lecture 17 - Enzyme Kinetics and Inhibition

Lecture 18 - Tutorial 6 - Enzyme Kinetics, Various Modes of Inhibition etc.

Lecture 19 - Receptors as Drug Targets - Part I

Lecture 20 - Receptors as Drug Targets - Part II

Lecture 21 - Tutorial 7 - Receptor-Drug Interactions, Stereochemistry, Chirality, Nomenclature

Lecture 22 - Receptor-Drug Interactions.

Lecture 23 - Stereochemistry and Conformation

Lecture 24 - Tutorial 8 - Determination of Drug-Receptor Interactions, Conformation of Cyclic and Acyclic Structures etc.

Lecture 25 - Nucleic Acids as Drug Targets - Part I

Lecture 26 - Nucleic Acids as Drug Targets - Part II

Lecture 27 - Miscellaneous Drug Targets

Lecture 28 - Tutorial 9 - Nucleic Acids and Related Topics

Lecture 29 - Mechanisms in Biological Chemistry - Part I

Lecture 1 - Introduction to Spectroscopy

Lecture 2 - Introduction to Quantum Mechanics - I

Lecture 3 - Introduction to Quantum Mechanics - II

Lecture 4 - A Simple Quantum Mechanical System: Particle in a one Dimensional Box

Lecture 5 - Spectroscopic Transitions

Lecture 6 - Intensity of a Transtion Depends on the Transition Dipole Moment - I

Lecture 7 - Intensity of a Transtion Depends on the Transition Dipole Moment - II

Lecture 8 - Comparision between Chemical Reactions and Spectroscopic Transitions

Lecture 9 - Lineshape Analysis

Lecture 10 - Different Forms of Spectroscopy

Lecture 11 - Spectroscopic Timescales

Lecture 12 - Correspondence between Linear Motion and Rotational Motion

Lecture 13 - Diatomic Rigid Rotor

Lecture 14 - Selection Rules and Rotational Spectrum

Lecture 15 - Isotope effect

Lecture 16 - Degeneracy

Lecture 17 - Intensities of Rotational Lines

Lecture 18 - Non Rigid Rotor

Lecture 19 - Polyatomic Molecules - I

Lecture 20 - Polyatomic Molecules - II and Numericals

Lecture 21 - Origin of the Rotational Selection Rule

Lecture 22 - Simple Harmonic Oscillator

Lecture 23 - Energy Levels

Lecture 24 - Selection Rules

Lecture 25 - Anharmonicity

Lecture 26 - Effects of Anharmonicity

Lecture 27 - Ro-vibrational Spectrum - I

Lecture 28 - Ro-vibrational Spectrum - II

Lecture 29 - Harmonic Oscillator Eigenvalues and Eigenfunctions - I

Lecture 30 - Harmonic Oscillator Eigenvalues and Eigenfunctions - II

Lecture 31 - Vibration of a Diatomic Molecule and Derivation of the Vibrational Selection Rule

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Ro-vibrational Spectrum - III

Lecture 33 - Vibration of Polyatomic Molecules - I

Lecture 34 - Vibration of Polyatomic Molecules - II

Lecture 35 - Vibration of Polyatomic Molecules - III

Lecture 36 - Normal Mode Coordinates

Lecture 37 - Introduction to Raman Spectroscopy

Lecture 38 - Quantum theory of Raman effect

Lecture 39 - Rotational Raman Spectroscopy

Lecture 40 - Nuclear Spin Statistics

Lecture 41 - Polarizability and Polarizability Ellipsoid

Lecture 42 - Raman Activity of Vibrations

Lecture 43 - Vibrational Raman Spectroscopy

Lecture 44 - Polarization Effects and Numericals

Lecture 45 - Resonance Spectroscopy - Introduction 1

Lecture 46 - Resonance Spectroscopy - Introduction 2

Lecture 47 - NMR Spectroscopy - 1

Lecture 48 - NMR Spectroscopy - 2

Lecture 49 - NMR Spectroscopy - 3

Lecture 50 - NMR Spectroscopy - 4

Lecture 51 - NMR Spectroscopy - 5

Lecture 52 - NMR Spectroscopy - 6

Lecture 53 - ESR Spectroscopy - 1

Lecture 54 - ESR Spectroscopy - 2

Lecture 55 - ESR Spectroscopy - 3

Lecture 56 - ESR Spectroscopy - 4

Lecture 57 - Electronic Spectroscopy - 1

Lecture 58 - Electronic Spectroscopy - 2

Lecture 59 - Electronic Spectroscopy - 3

Lecture 60 - Electronic Spectroscopy - 4

Lecture 61 - Electronic Spectroscopy - 5

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Symmetry, Stereochemistry and Applications (Chemistry and Biochemistry)

Co-ordinators : Prof. Angshuman Roy Choudhury

Lecture 1 - Introduction to stereochemistry

Lecture 2 - Nomenclature of Various Organic Molecules

Lecture 3 - Nomenclature of Cyclic molecules and other functional groups

Lecture 4 - Nomenclature of some complex molecules

Lecture 5 - Practising naming of molecules

Lecture 6 - Symmetry, Stereochemistry and Applications

Lecture 7 - Symmetry elements in organic molecules

Lecture 8 - Molecular point groups - Part I

Lecture 9 - Molecular point groups - Part II

Lecture 10 - Conformations and Configurations

Lecture 11 - Conformational Analysis - Part I

Lecture 12 - Conformational Analysis - Part II

Lecture 13 - Chair and Boat Conformation of Cyclohexane

Lecture 14 - Conformational Analysis of Disubstituted Cyclohexane Molecules

Lecture 15 - Isomerism and Representation of Isomers

Lecture 16 - Stereoisomerism

Lecture 17 - Drawing One Projection from Another

Lecture 18 - Optical Activity of Organic Molecules and Isomerism

Lecture 19 - Allenes and Biphenyls

Lecture 20 - Absolute Configuration in Biphenyls and D/L Systems

Lecture 21 - Asymmetry and Dissymmetry Molecules

Lecture 22 - Stereoisomerism and Local Symmetry

Lecture 23 - Topicity of Ligands

Lecture 24 - Topicity of Faces

Lecture 25 - Problems on Isomers and Topicity

Lecture 26 - Diastereomerism in Ring System - Part 1

Lecture 27 - Diastereomerism in Ring System - Part 2

Lecture 28 - Diastereomerism in Ring System - Part 3

Lecture 29 - Diastereomerism in PI System

Lecture 30 - Nucleophilic Reactions

Lecture 31 - Mechanism of Nucleophilic Substitution Reaction

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Stability of Carbocation

Lecture 33 - Elimination Reactions

Lecture 34 - Substitution VS Elimination Reactions

Lecture 35 - Addition Reactions to Alkenes and Alkynes - Part 1

Lecture 36 - Addition Reactions to Alkenes and Alkynes - Part 2

Lecture 37 - Oxidizing Agents in Organic Chemistry and Organometallic Compounds

Lecture 38 - Some Problems and their Answers in Stereochemistry

Lecture 39 - Dynamic Stereochemistry - Part 1

Lecture 40 - Dynamic Stereochemistry - Part 2

Lecture 41 - Reaction Specificity and Selectivity

Lecture 42 - Cram's Rule and Felkin-Anh Model

Lecture 43 - Kinetics of Organic Reactions

Lecture 44 - Name Reactions and Their Mechanism - Part 1

Lecture 45 - Name Reactions and Their Mechanism - Part 2

Lecture 46 - Modifications of Diels-Alder Reaction

Lecture 47 - Name Reactions and Their Mechanism - Part 3

Lecture 48 - Name Reactions and Their Mechanism - Part 4

Lecture 49 - Rearrangement Reactions in Organic Chemistry - Part 1

Lecture 50 - Rearrangement Reactions in Organic Chemistry - Part 2

Lecture 51 - Rearrangement Reactions in Organic Chemistry - Part 3

Lecture 52 - Rearrangement Reactions in Organic Chemistry - Part 4

Lecture 53 - Brief introduction to crystallographic symmetry

Lecture 54 - Symmetries in X-ray Crystallography

Lecture 55 - 2D lattices and space groups

Lecture 56 - 3D crystallographic point groups and space groups

NPTEL : NOC:Symmetry and Group Theory (2021) (Chemistry and Biochemistry)

Co-ordinators : Prof. Jeetender Chugh

Lecture 1 - Course Contents

Lecture 2 - Symmetry and Parity Operator

Lecture 3 - Symmetry Elements and Operations - Part 1

Lecture 4 - Symmetry Elements and Operations - Part 2

Lecture 5 - Planes and Reflections

Lecture 6 - Tutorial - 1

Lecture 7 - Coordinate System and Inversion Center

Lecture 8 - Improper axis and improper rotation

Lecture 9 - Solved Examples of Symmetry Elements and Operations

Lecture 10 - Product of Symmetry Operations

Lecture 11 - Tutorial - 2

Lecture 12 - Symmetry Point Groups - Part 1

Lecture 13 - Symmetry Point Groups - Part 2

Lecture 14 - Symmetry Point Groups - Part 3

Lecture 15 - Dipole Moment and Optical Acitivity

Lecture 16 - Tutorial - 3

Lecture 17 - Point Group Definition and Examples

Lecture 18 - Sub-Group and Classes

Lecture 19 - Matrix Representation of Symmetry Operations

Lecture 20 - Matrix Representation of Point Group

Lecture 21 - Tutorial - 4

Lecture 22 - Matrix Representation of Point Group

Lecture 23 - Reducible and Irreducible Representations

Lecture 24 - Great Orthogonality Theorem

Lecture 25 - Properties of Great Orthogonality Theorem

Lecture 26 - Tutorial - 5

Lecture 27 - Irreducible Representation using GOT

Lecture 28 - Reducible to Irreducible Representation using GoT

Lecture 29 - Character Table and Mulliken Symbols

Lecture 30 - How to write a complete character table

Lecture 31 - Tutorial - 6

Lecture 32 - Representations of a cyclic group

Lecture 33 - Group Theory and Quantum Mechanics

Lecture 34 - 1) Degenerate Eigen Functions 2) Direct Product

Lecture 35 - Direct Product

Lecture 36 - Tutorial - 7

Lecture 37 - Direct Product Applications - Part 1

Lecture 38 - Direct Product Applications - Part 2

Lecture 39 - Symmetry Adapted Linear Combinations - Part 1

Lecture 40 - Symmetry Adapted Linear Combinations - Part 2

Lecture 41 - Tutorial - 8

Lecture 42 - Incomplete Projection Operator

Lecture 43 - SALC using Projection Operator

Lecture 44 - Symmetry and Chemical Bonding

Lecture 45 - Valence Bond Theory

Lecture 46 - Tutorial - 9

Lecture 47 - Molecular Orbital Theory

Lecture 48 - Localised MO Theory

Lecture 49 - Delocalized MO Theory - Part 1

Lecture 50 - Delocalized MO Theory - Part 2

Lecture 51 - Ascent and Descent in Symmetry - Part 1

Lecture 52 - Ascent and Descent in Symmetry - Part 2

Lecture 53 - Crystal Field Theory - Part 1

Lecture 54 - Crystal Field Theory - Part 2

Lecture 55 - Jahn-Teller Distortion - Part 1

Lecture 56 - Jahn-Teller Distortion - Part 2

Lecture 57 - Introduction to Spectroscopy - Part 1

Lecture 58 - Introduction to Spectroscopy - Part 2

Lecture 59 - Vibrational Spectroscopy

Lecture 60 - 1) Raman Spectroscopy and 2) Atomic Motions

Lecture 61 - Symmetry of Normal Modes of Vibration

Lecture 62 - Visualizing Molecular Vibrations using Internal Coordinates

Lecture 63 - Spectral Transition Probabilities - Part 1

Lecture 64 - Spectral Transition Probabilities - Part 2

Lecture 9 - 2D Nuclear Overhauser Effect Spectroscopy (NOESY)

Lecture 10 - 2D NOESY and 2D ROESY

Lecture 11 - Principles of 2D Heteronuclear NMR

Lecture 12 - 2D Heteronuclear NMR: HSQC

Lecture 13 - Heteronuclear multiple quantum coherence (HMQC) and single quantum coherence (HSQC) - Part I

Lecture 14 - Heteronuclear multiple quantum coherence (HMQC) and single quantum coherence (HSQC) - Part II

Lecture 15 - 2D HSQC-TOCSY

Lecture 16 - 3D NMR Spectroscopy - Part I

Lecture 17 - 3D NMR Spectroscopy - Part II

Lecture 18 - 3D HNCA and 3D HNCO

Lecture 19 - 3D HNCACB and 3D HN(CO)CACB

Lecture 20 - Protein Backbone resonance assignment and side chain resonance assignment

Lecture 21 - Basic concepts of protein structure

Lecture 22 - Introduction to Structure Determination of Bio-Molecules by NMR

Lecture 23 - Over-expression of proteins in Bacteria

Lecture 24 - Isotope labeling of proteins for NMR studies - Part I

Lecture 25 - Isotope labeling of proteins for NMR studies - Part II

Lecture 26 - Isotope labeling of proteins for NMR studies - Part III

Lecture 27 - Isotope labeling of proteins for NMR studies - Part IV

Lecture 28 - Resonance assignments of Proteins - Part I

Lecture 29 - Resonance assignments of Proteins - Part II

Lecture 30 - Resonance assignments of Proteins - Part III

Lecture 31 - Determination of protein secondary structure from NMR data: CSI method

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Determination of protein secondary structure from NMR data: J coupling based method

Lecture 33 - Determination of protein tertiary structure from NMR data - Part I

Lecture 34 - 3D NOESY HSQC

Lecture 35 - Determination of protein tertiary structure from NMR data - Part II

Lecture 36 - Understanding Protein ligand interaction by NMR : Chemical shift perturbation

Lecture 37 - Understanding Protein ligand interaction by NMR : Chemical exchange

Lecture 38 - Understanding Protein ligand interaction by NMR : T2 Filter

Lecture 39 - Understanding Protein ligand interaction by NMR : STD NMR

Lecture 40 - Understanding Protein ligand interaction by NMR : Transfer NOE NMR

Lecture 41 - Understanding Protein ligand interaction by NMR : Diffusion ordered Spectroscopy (DOSY) - Part I

Lecture 42 - Understanding Protein ligand interaction by NMR : Diffusion ordered Spectroscopy (DOSY) - Part II

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Symmetry and Structure in the Solid State (Chemistry and Biochemistry)

Co-ordinators : Prof. T. N. Guru Row

Lecture 1 - Symmetry in 3D World

Lecture 2 - Two Fold Axis Representation with the Help of Esher Diagrams

Lecture 3 - Pure Rotation Axes

Lecture 4 - Properties of Crystal

Lecture 5 - Point Group Generation

Lecture 6 - Combination ofSymmetry Elements

Lecture 7 - Arrangement of Symmetry Equivalent Objects

Lecture 8 - Introduction to Plane Lattices

Lecture 9 - Bravais Lattices

Lecture 10 - Details of Stereographic Projections

Lecture 11 - Stereographic Projections (Continued)

Lecture 12 - Point Group and Crystal Systems - 1

Lecture 13 - Point Group and Crystal Systems - 2

Lecture 34 - Design of Electrical Systems

Lecture 35 - Intelligent Building

Lecture 36 - Life cycle cost and basics of building maintenance

Lecture 37 - Stages of maintenance management

Lecture 38 - Planning for building maintenance

Lecture 39 - Periodicity of maintenance management

Lecture 40 - Estimation of repair cycle

Lecture 41 - Cost profile of maintenance

Lecture 42 - Lamp replacement

Lecture 43 - Building inspection, Planned and Ad-hoc maintenance

Lecture 44 - Condition survey and health evaluation of buildings

Lecture 45 - Diagnosis of building by visual survey

Lecture 46 - Case studies of visual survey

Lecture 47 - Effect of corrosion and Alkali Aggregate Reaction

Lecture 48 - Sampling and choice of test location

Lecture 49 - Non Destructive Testing - 1

Lecture 50 - Non Destructive Testing - 2

Lecture 51 - Core strength test

Lecture 52 - Carbonation and Chloride measurement

Lecture 53 - Electrical methods of progress measurement

Lecture 54 - Repair, Rehabilitation and Retrofit

Lecture 55 - Periodicity and economics of condition survey

Lecture 56 - Interpretation of test results

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Sustainable Materials and Green Buildings (Civil Engineering)

Co-ordinators : Dr. B. Bhattacharjee

Lecture 1 - Introduction and Planet Equivalent

Lecture 2 - Basics of Carbon Cycle

Lecture 3 - Factors Affecting carbon Cycle

Lecture 4 - Fundamentals of Sustainability

Lecture 5 - Role of Materials and Embodied Energy

Lecture 6 - Case Study for Energy in Building

Lecture 7 - Calculation of Ecological Footprint

Lecture 8 - Role of Cement in Sustainability and Calculation of Chemical Exergy

Lecture 9 - Fuel for Cement

Lecture 10 - Cemebtitious/Supplementary Cementitious Materials and Their Characterization

Lecture 11 - Strength of Concrete With Supplementary Cementitious Materials and Composite Cements

Lecture 12 - Types of Composite Cements

Lecture 13 - Alternative Fuel for cement and Embodied Energy

Lecture 14 - Life Cycle Embodied Energy and Concrete Sustainability

Lecture 15 - Strength of Concrete and Use of Admixtures

Lecture 16 - Curing Methods and Use of Waste Water for Mixing and Curing

Lecture 17 - Modern Composite Concrete

Lecture 18 - Recycled Aggregate-ITZ and Proessing

Lecture 19 - Classification of Recycled Aggregate: Crushing and Grinding of Aggregates

Lecture 20 - Crushing and Grinding: Bond's Law+Operational Energy: U-Value

Lecture 21 - Operational Energy: Thermal Conductivity Models

Lecture 22 - Operational Energy: Thermal Conductivity Models (Continued...)

Lecture 23 - Operational Energy: Estimation of Thermal Conductivity

Lecture 24 - Thermal Diffusivity and Clay Bricks

Lecture 25 - Types of Bricks Kilns and Carbon Balance

Lecture 26 - Carbon Balance, Comparison of Various Types of Brick Kilns and Sealants, Paints, Adhesive

Lecture 27 - Sealants, Health Hazards of Building Materials and Emission Models

Lecture 28 - Emission Models and Testing

Lecture 29 - Energy Efficient Design of Buildings

Lecture 30 - Design Optimization of Buildings

Lecture 31 - Building Design Optimization Using Genetic Algorithm

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Urban Heat Island: Radiation Concepts

Lecture 33 - Urban Heat Island: Urban Canopy Layer

Lecture 34 - Evapotranspiration: Theory and Models

Lecture 35 - Evapotranspiration: Case Study and Surface Water Balance

Lecture 36 - Energy Conservation Building Code (ECBC2007)

Lecture 37 - Energy Conservation Building Code (ECBC2007) (Continued...)

Lecture 38 - ECBC Compliant Methodology

Lecture 39 - OTTV Methodology

Lecture 40 - Solar Energy and Solar Cells

Lecture 41 - Solar Photo Volatic Cells

Lecture 42 - Solar Water Heating

Lecture 43 - Design Strategies and the Green Design Process

Lecture 44 - Green Building Rating Systems

Lecture 45 - Autoclaved Aerated Concrete, Insulated Precast System and Insulated Precast Forms

Lecture 46 - Insulated Concrete Form and Tunnel Form

Lecture 47 - Modular Construction

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Scheduling Techniques in Projects (Civil Engineering)

Co-ordinators : Prof. J. Uma Maheswari

Lecture 1 - Introduction to Projects

Lecture 2 - Inputs to Scheduling

Lecture 3 - Critical Path Method

Lecture 4 - Precedence Diagramming Method

Lecture 5 - Line of Balance Method

Lecture 6 - Resource-driven Scheduling

Lecture 7 - Information-driven Scheduling

Lecture 8 - Dependency Structure Matrix - I

Lecture 9 - Dependency Structure Matrix - II

Lecture 10 - Dependency Structure Matrix - III

Lecture 11 - Beeline Diagramming Method

Lecture 12 - Other Scheduling Techniques

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Advanced Hydraulics (Civil Engineering)

Co-ordinators : Dr. Suresh A Kartha

Lecture 1 - Introduction - advanced hydraulics & course structure

Lecture 2 - Various classifications of open channel flows

Lecture 3 - Flow classifications & velocity distribution

Lecture 4 - Pressure distribution

Lecture 5 - Equation of continuity & energy

Lecture 6 - Specific energy & critical flow

Lecture 7 - Energy, momentum & specific force

Lecture 8 - Computation of critical flow - Part 1

Lecture 9 - Critical flow computations

Lecture 10 - Introduction to uniform flow

Lecture 11 - Manning's equation and normal depth

Lecture 12 - Uniform Flow Computations - Part 1

Lecture 13 - Uniform flow in compound sections, concept of normal slope

Lecture 14 - Uniform flow approximation for flood discharge

Lecture 15 - Design of channels for uniform flow

Lecture 16 - Design of channels using uniform flow

Lecture 17 - Design of erodible channels

Lecture 18 - Introduction to gradually varied flows

Lecture 19 - Gradually varied flow equations

Lecture 20 - Classification of gradually varied flow - Part 1

Lecture 21 - Classification of gradually varied flow - Part 2

Lecture 22 - Gradually varied flow profiles with change in bed slopes

Lecture 23 - GVF profile properties and transitional depths

Lecture 24 - Gradually varied flow computations - Part 1

Lecture 25 - Gradually varied flow computations RK method - Part 2

Lecture 26 - Standard step method for gradually varied flow computations

Lecture 27 - Spatially varied flow

Lecture 28 - Features on spatially varied flow

Lecture 29 - Rapidly varied flow - introduction

Lecture 30 - Theoretical aspects of hydraulic jump

Lecture 31 - Characteristics of jumps in rectangular channel

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Features of hydraulic jumps

Lecture 33 - Jumps as energy dissipators

Lecture 34 - Jump controls

Lecture 35 - Surges - Part 1

Lecture 36 - Surges - Part 2

Lecture 37 - Channel transitions - Part 1

Lecture 38 - Channel transitions - Part 2

Lecture 39 - Channel transitions - Part 3

Lecture 40 - Application of momentum principles

Lecture 41 - Pumps - 1

Lecture 42 - Turbines - Part 3 (pumps, turbines)

Lecture 43 - Turbines, cavitation

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Design of Steel Structures (Civil Engineering)

Co-ordinators : Prof. Damodar Maity

Lecture 1 - Introduction to Design of Steel Structures

Lecture 2 - Connections

Lecture 3 - Riveted Connections

Lecture 4 - Design of Rivet Joint

Lecture 5 - Welding

Lecture 6 - Design of Fillet and Butt Welds

Lecture 7 - Bolted Connection

Lecture 8 - Eccentric Connections: Rivet Joints

Lecture 9 - Design of Eccentric Connection With Load Lying in Plane of Joint Rivet Bolt

Lecture 10 - Eccentric Connection With Load Perpendicular to Plane of Riveted Joint

Lecture 11 - Analysis and Design of Join with Seat Connection

Lecture 12 - Eccentric Connection

Lecture 13 - Load Lying Perpendicular to the Plane of Weld Joint

Lecture 14 - Tension Member

Lecture 15 - Design of Tension Member

Lecture 16 - Design of Tension Member: Gusset Plates. Lug Angles and Tension Splices

Lecture 17 - Design of Tension Member: Subjected to Axial and Bending

Lecture 18 - Compression Member

Lecture 19 - Design of Compression Member

Lecture 20 - Design of Eccentrically Loaded tension Member

Lecture 21 - Built up Compression Member

Lecture 22 - Design of Built up Compression Member

Lecture 23 - Lacing for Built Up Compression Member

Lecture 24 - Design of Lacing System

Lecture 25 - Design of Batten Plates

Lecture 26 - Introduction to Flexural Members: Beams

Lecture 27 - Design Procedure of Beam Members

Lecture 28 - Design of Laterally Supported Beams

Lecture 29 - Design of Laterally Unsupported Beams

Lecture 30 - Built-Up Beams

Lecture 31 - Built-Up Beams: Curtailment of the Flange Plates and Shear Connections

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Design of a Built-Up Beams

Lecture 33 - Design of Shear Connections and Purlins

Lecture 34 - Gantry Girders

Lecture 35 - Design of Gantry Girders

Lecture 36 - Introduction to Plate Girders - Part 1

Lecture 37 - Introduction to Plate Girders - Part 2

Lecture 38 - Design of a Plate Girder

Lecture 39 - Column Base - Part 1

Lecture 40 - Column Base - Part 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Hydraulics (Civil Engineering)

Co-ordinators : Prof. Arup Kumar Sharma

Lecture 1 - Introduction to Hydraulics

Lecture 2 - Open Channel Hydraulics - Part 1

Lecture 3 - Open Channel Hydraulics - Part 2

Lecture 4 - Velocity and Pressure Distribution

Lecture 5 - Practical use of velocity co-efficient in channel flow

Lecture 6 - Conservation Principles & ioioGoverning Equations

Lecture 7 - Uniform Flow

Lecture 8 - Uniform Flow Formula

Lecture 9 - Computation of Uniform Flow - Part 1

Lecture 10 - Computation of Uniform Flow - Part 2

Lecture 11 - Uniform Flow in Mobile Boundary Channel

Lecture 12 - Incipient Motion Condition and Regime of Flow

Lecture 13 - Concept of Specific Energy

Lecture 14 - Computation of Critical Depth

Lecture 15 - Specific Force, Critical Depth & Sequent Depth

Lecture 16 - Non-uniform Flow: Gradually Varied Flow

Lecture 17 - Classification of Gradually Varied Flow

Lecture 18 - Characteristic of Gradually Varied Flow

Lecture 19 - Characteristic of Gradually Varied Flow & its Computation

Lecture 20 - Gradually Varied Flow & its Computation

Lecture 21 - Computation of Gradually Varied Flow

Lecture 22 - Gradually Varied Flow: Numerical Methods and Problem Solving

Lecture 23 - Rapidly Varied Flow: Hydraulic Jump

Lecture 24 - Hydraulic Jump

Lecture 25 - Flow Over Hump and Channel Contraction

Lecture 26 - Canal Design - 1

Lecture 27 - Canal Design - 2

Lecture 28 - Design of Alluvial Channel - 1

Lecture 29 - Design of Alluvial Channel - 2

Lecture 30 - Design of Alluvial Channel - 3

Lecture 31 - Unsteady Flow: Waves and its Classification

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Ground Water Hydrology (Civil Engineering)

Co-ordinators : Dr. Anirban Dhar, Dr. V.R. Desaai

Lecture 1 - Introduction : Ground Water (GW) Utilization and Historical Background, GW in hydrologic Cycle

Lecture 2 - Ground Water in & % Hydrologic Cycle (Continued...), Ground Water Budget, Ground Water Level Fluctuations and Environmental Influence

Lecture 3 - Ground water Level Fluctuations and Environmental Influence (Continued...) Literature/Data/Internet Resources

Lecture 4 - Ground water Level Fluctuations and Environmental Influence (Continued...) Literature/Data/Internet Resources

Lecture 5 - Occurrence and Movement of Ground Water : Origin and Age of Ground Water, Rock Properties Affecting Ground Water, Ground Water Column

Lecture 6 - Zones of Aeration and Saturation; Aquifers and their characteristics/classification

Lecture 7 - Aquifer Classification (Continued...), Ground water Basins and Springs; Dorcy's Law; Permeability

Lecture 8 - Determination pf Permeability :Heterogeneity and Anisotropy

Lecture 9 - Ground Water (GW) flowrates and flow directions; general flow equations through porous media

Lecture 10 - General Flow Equations Through Porous Media (Continued...), Dupuit's Assumptions

Lecture 11 - 1-D Unconfined Ground water Flows; Steady Flow into Wells

Lecture 12 - Steady Flow into Wells (Continued...); Unsteady Flow into Wells

Lecture 13 - Unsteady Flow into Wells (Continued...)

Lecture 14 - Unsteady Radial Flow in Confined and Unconfined Aquifers

Lecture 15 - Unsteady Radial Flow in Leaky Aquifers (Continued...); Well Flow Near Aquifer Boundaries

Lecture 16 - Well Flow for Special Conditions; Partially Penetrating Wells; Horizontal Wells and Collector Wells;Multiple Well Systems

Lecture 17 - Well Completion;Well Development; Well Protection; Well Rehabilitation; Well testing for Yields

Lecture 18 - Well Protection/Rehabilitation/Testing for yield (Continued...); Artificial Ground Water Recharge : Concept and Methods

Lecture 19 - Concept and methods of Artificial Ground Water Recharge (Continued...); Recharge Mounds and Induced Recharge

Lecture 20 - Induced Recharge (Continued...); Wastewater recharge for reuse; Water spreading

Lecture 21 - Pollution and Quality Analysis of Ground Water : Sources of Pollution of GW-Municipal, Industrial,Agricultural and Miscellaneous

Lecture 22 - Ground Water Pollution from Industrial, Agricultural and Miscellaneous Sources (Continued...)

Lecture 23 - Ground Water Pollution from Miscellaneous Sources (Continued...), Attenuation and Underground Distribution of Pollutants

Lecture 24 - Potential Evaluation of Ground water Pollution; Physical/Chemical/Biological analysis of Ground Water quality; Criteria and measures of Ground water quality

Lecture 25 - Ground water salinity and samples ;Graphical representations of ground water quality

Lecture 26 - Graphical representations of ground water quality (Continued...), Surface/Sub-Surface Investigation Of Ground Water:Geological/geophysical exploration;Remote sensing/electrical resistivity methods

Lecture 27 - Surface Investigation of ground water (Continued...):Electrical resistivity seismic refraction/gravity/magnetic methods

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 28 - Seismic refraction/gravity/magnetic methods (Continued...);Sub-surface investigation of ground water: Geographical/resistivity methods

Lecture 29 - Sub-surface investigation of ground water (Continued...): Geographical/resistivity/spontaneous potential/radiation of methods of logging

Lecture 30 - Radiation method of logging (Continued...); Temperature/caliper/fluid conductivity/fluid velocity/miscellaneous logging methods

Lecture 31 - Saline Water Intrusion in Aquifers:Occurence, Features affecting aquifers,Bodon - Ghyben - Hergberg Principle

Lecture 32 - Saline Water Intrusion in Aquifers : Bodon - Ghyben - Hergberg principle (Continued...), Analytical Solution of Saline Water Intrusion in Coastal Aquifer

Lecture 33 - Saline Water Intrusion in Aquifers : Analytical Solution of Saline Water Intrusion in Coastal Aquifer (Continued...), Density dependent salt water intrusion model

Lecture 34 - Saline Water Intrusion in Aquifers : Geochemical Investigations, Control of salt water intrusion, Practical Modeling of salt water intrusion

Lecture 35 - Modeling and Management of Ground Water : Ground Water Simulation Models, Ground Water Management Model : Confined Aquifer

Lecture 36 - Modeling and Management of Ground Water : Ground Water Management Model : Confined and Unconfined Aquifer, Linked Simulation - Optimization, Meta Model Based Approach

Lecture 37 - Modeling and Management of Ground Water : Contaminant Source Identification , Monitoring Network Design

Lecture 38 - Modeling and Management of Ground Water : Aquifer Yield and Ground Water Availability, Effects of Ground Water Development, Regional Scale Development of Ground Water

Lecture 39 - Modeling and Management of Ground Water : Conjunctive Surface - Subsurface Modeling of Overland Flow including flow through Vadose zone

Lecture 40 - Modeling and Management of Ground Water : Ground Water - Surface Water Interaction

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Mineral Resources - Geology, Exploration, Economics and Environment (Civil Engineering)

Co-ordinators : Prof. M.K.Panigrahi

Lecture 1 - Introduction

Lecture 2 - Mineral Deposits in Space and Time

Lecture 3 - Mineral Deposits in Space and Time (Continued...)

Lecture 4 - Mineral Deposits in Time, Attributes of Mineral Deposits and Theories of Mineral Deposits

Lecture 5 - Classification of Mineral Deposits

Lecture 6 - Magmatic Processes

Lecture 7 - Magmatic Processes

Lecture 8 - Magmatic Processes

Lecture 9 - Magmatic Processes

Lecture 10 - Sedimentary Processes and Resultant Mineral Deposits

Lecture 11 - Sedimentary Processes and Resultant Deposits

Lecture 12 - Sedimentary Processes and Resultant Deposits

Lecture 13 - Sedimentary Processes and Resultant Deposits

Lecture 14 - Sedimentary Processes and Resultant Deposits

Lecture 15 - Morphology of Ore Deposits

Lecture 16 - Hydrothermal Processes

Lecture 17 - Hydrothermal Processe (Continued...)

Lecture 18 - Hydrothermal Processes

Lecture 19 - Hydrothermal Processes

Lecture 20 - Hydrothermal Processes

Lecture 21 - Hydrothermal Processes (Continued...)

Lecture 22 - Hydrothermal Processes (Continued...)

Lecture 23 - Hydrothermal Processes (Continued...)

Lecture 24 - Hydrothermal Systems

Lecture 25 - Hydrothermal Systems (Continued...)

Lecture 26 - Hydrothermal Processes and Resultant Deposits

Lecture 27 - Hydrothermal Processes and Resultant Deposits (Continued...)

Lecture 28 - Hydrothermal Processes and Resultant Mineralization

Lecture 29 - Indian Mineral Deposits

Lecture 30 - Indian Mineral Deposits (Continued...)

Lecture 31 - Indian Mineral Deposits (Continued...)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Mineral Exploration

Lecture 33 - Mineral Exploration (Continued...)

Lecture 34 - Mineral Exploration (Continued...)

Lecture 35 - Mineral Exploration (Continued...)

Lecture 36 - Mineral Exploration (Continued...)

Lecture 37 - Mineral Exploration (Continued...)

Lecture 38 - Mineral Exploration (Continued...)

Lecture 39 - Mineral Exploration (Continued...)

Lecture 40 - Mineral Exploration (Continued...)

Lecture 41 - Mineral Exploration (Continued...)

Lecture 42 - Mineral Exploration (Continued...)

Lecture 43 - Mineral Exploration (Continued...)

Lecture 44 - Mineral Exploration (Continued...)

Lecture 45 - Mineral Inventory Estimation

Lecture 46 - Mineral Inventory Estimation (Continued...)

Lecture 47 - Mineral Inventory Estimation (Continued...)

Lecture 48 - Mineral Inventory Estimation (Continued...)

Lecture 49 - Geostatistical Method of Mineral Inventory Estimation

Lecture 50 - Geostatistical Method of Mineral Inventory Estimation (Continued...)

Lecture 51 - Mineral Economics

Lecture 52 - Mineral Economics (Continued...)

Lecture 53 - Mineral Economics (Continued...)

Lecture 54 - Mineral Economics (Continued...)

Lecture 55 - Mineral Economics (Continued...)

Lecture 56 - Environmental Impact of Mineral Resource Exploitation

Lecture 57 - Environmental Impact of Mineral Resource Exploitation (Continued...)

Lecture 58 - Environmental Impact of Mineral Resource Exploitation (Continued...)

Lecture 59 - Environmental Impact of Mineral Resource Exploitation (Continued...)

Lecture 60 - Environmental Impact of Mineral Resource Exploitation (Continued...)

NPTEL : NOC:Introduction to Mineral Processing (Civil Engineering)

Co-ordinators : Prof. Arun Kumar Majumder

Lecture 1 - Importance of Mineral Processing

Lecture 2 - Importance to Mineral Processing (Continued...)

Lecture 3 - Importance of Mineral Processing (Continued...)

Lecture 4 - Importance of Mineral Processing (Continued...)

Lecture 5 - Importance of Mineral Processing (Continued...)

Lecture 6 - Particle Characterization

Lecture 7 - Particle Characterization (Continued...)

Lecture 8 - Particle Characterization (Continued...)

Lecture 9 - Particle Characterization (Continued...)

Lecture 10 - Particle Characterization (Continued...)

Lecture 11 - Particle Characterization (Continued...)

Lecture 12 - Sampling

Lecture 13 - Sampling (Continued...)

Lecture 14 - Plant Sampling

Lecture 15 - Plant Sampling (Continued...)

Lecture 16 - Comminution

Lecture 17 - Comminution (Continued...)

Lecture 18 - Comminution Fundamentals

Lecture 19 - Comminution Fundamentals (Continued...)

Lecture 20 - Crushers

Lecture 21 - Crushers (Continued...)

Lecture 22 - Crushers (Continued...)

Lecture 23 - Grinding

Lecture 24 - Grinding (Continued...)

Lecture 25 - Grinding (Continued...)

Lecture 26 - Grinding (Continued...)

Lecture 27 - Grinding (Continued...)

Lecture 28 - Industrial Screening

Lecture 29 - Industrial Screening (Continued...)

Lecture 30 - Industrial Screening (Continued...)

Lecture 31 - Industrial Screening (Continued...)

Lecture 32 - Industrial Screening (Continued...)

Lecture 33 - Industrial Screening (Continued...)

Lecture 34 - Industrial Screening (Continued...)

Lecture 35 - Movement of Solids in Fluids

Lecture 36 - Movement of Solids in Fluids (Continued...)

Lecture 37 - Movement of Solids in Fluids (Continued...)

Lecture 38 - Classifier

Lecture 39 - Classifier (Continued...)

Lecture 40 - Hydrocyclone

Lecture 41 - Hydrocyclone (Continued...)

Lecture 42 - Hydrocyclone (Continued...)

Lecture 43 - Hydrocyclone (Continued...)

Lecture 44 - Hydrocyclone (Continued...)

Lecture 45 - Mass Balancing

Lecture 46 - Mass Balancing (Continued...)

Lecture 47 - Closed-Circuit Grinding

Lecture 48 - Gravity Concentration

Lecture 49 - Gravity Concentration (Continued...)

Lecture 50 - Gravity Concentration (Continued...)

Lecture 51 - Gravity Concentration (Continued...)

Lecture 52 - Gravity Concentration (Continued...)

Lecture 53 - Flotation

Lecture 54 - Flotation (Continued...)

Lecture 55 - Flotation (Continued...)

Lecture 56 - Flotation Chemicals

Lecture 57 - Flotation Chemicals (Continued...)

Lecture 58 - Flotation Chemicals (Continued...)

Lecture 59 - Flotation Machines

Lecture 60 - Flotation Machines (Continued...)

Lecture 61 - Magnetic Separation

Lecture 62 - Electric Separation

Lecture 63 - Flow Sheets

Lecture 64 - Flow Sheets (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Foundation Engineering (Civil Engineering)

Co-ordinators : Prof. Koushik Deb

Lecture 1 - Introduction

Lecture 2 - Introduction (Continued...)

Lecture 3 - Shear Strength

Lecture 4 - Soil Exploration - Boring

Lecture 5 - Standard Penetration Test

Lecture 6 - Standard Penetration Test and Cone Penetration Test

Lecture 7 - Cone Penetration Test and Other In-Situ Tests

Lecture 8 - Types of Samples

Lecture 9 - Geophysical Exploration - I

Lecture 10 - Geophysical Exploration - II

Lecture 11 - Shallow Foundation - Bearing Capacity I

Lecture 12 - Shallow Foundation - Bearing Capacity II

Lecture 13 - Shallow Foundation - Bearing Capacity III

Lecture 14 - Shallow Foundation - Bearing Capacity IV

Lecture 15 - Shallow Foundation - Bearing Capacity V

Lecture 16 - Shallow Foundation - Settlement I

Lecture 17 - Shallow Foundation - Settlement II

Lecture 18 - Shallow Foundation - Settlement III

Lecture 19 - Shallow Foundation - Settlement IV

Lecture 20 - Shallow Foundation - Settlement V

Lecture 21 - Shallow Foundation - Design I

Lecture 22 - Shallow Foundation - Design II

Lecture 23 - Shallow Foundation - Design III

Lecture 24 - Shallow Foundation - Design IV

Lecture 25 - Shallow Foundation - Design V

Lecture 26 - Shallow Foundation - Design VI

Lecture 27 - Pile Foundation - I

Lecture 28 - Pile Foundation - II

Lecture 29 - Pile Foundation - III

Lecture 30 - Pile Foundation - IV

Lecture 31 - Pile Foundation - V

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Pile Foundation - VI

Lecture 33 - Pile Foundation - VII

Lecture 34 - Pile Foundation - VIII

Lecture 35 - Pile Foundation - IX

Lecture 36 - Pile Foundation - X

Lecture 37 - Pile Foundation - XI

Lecture 38 - Pile Foundation - XII

Lecture 39 - Pile Foundation - XIII

Lecture 40 - Pile Foundation - XIV

Lecture 41 - Earth Pressure - I

Lecture 42 - Earth Pressure - II

Lecture 43 - Earth Pressure - III

Lecture 44 - Earth Pressure - IV

Lecture 45 - Earth Pressure - V

Lecture 46 - Earth Pressure - VI

Lecture 47 - Earth Pressure - VII

Lecture 48 - Earth Pressure and Retaining Wall

Lecture 49 - Retaining Wall - II

Lecture 50 - Retaining Wall - III

Lecture 51 - Retaining Wall - IV

Lecture 52 - Retaining Wall - V and Sheet Piles - I

Lecture 53 - Sheet Piles - II

Lecture 54 - Sheet Piles - III

Lecture 55 - Sheet Piles - IV

Lecture 56 - Sheet Piles - V

Lecture 57 - Sheet Piles - VI

Lecture 58 - Sheet Piles and Braced Excavation

Lecture 59 - Braced Excavation and Underground Conduits

Lecture 60 - Underground Conduits - II

NPTEL : NOC:Theory of Elasticity (Civil Engineering)

Co-ordinators : Prof. Biswanath Banjerjee, Prof. Amit Shaw

Lecture 1 - Introduction

Lecture 2 - Introduction to Tensor

Lecture 3 - Introduction to Tensor (Continued...)

Lecture 4 - Introduction to Tensor (Continued...)

Lecture 5 - Introduction to Tensor (Continued...)

Lecture 6 - Introduction to Tensor (Continued...)

Lecture 7 - Concept of Stress and Strain

Lecture 8 - Concept of Stress and Strain (Continued...)

Lecture 9 - Concept of Stress and Strain (Continued...)

Lecture 10 - Concept of Stress and Strain (Continued...)

Lecture 11 - Concept of Stress and Strain (Continued...)

Lecture 12 - Constitutive Relation - I

Lecture 13 - Constitutive Relation - I (Continued...)

Lecture 14 - Constitutive Relation - I (Continued...)

Lecture 15 - Constitutive Relation - I (Continued...)

Lecture 16 - Constitutive Relation - I (Continued...)

Lecture 17 - Constitutive Relation - II

Lecture 18 - Constitutive Relation - II (Continued...)

Lecture 19 - Constitutive Relation - II (Continued...)

Lecture 20 - Constitutive Relation - II (Continued...)

Lecture 21 - Constitutive Relation - II (Continued...)

Lecture 22 - Formulation of Boundary Value Problems

Lecture 23 - Formulation of Boundary Value Problems (Continued...)

Lecture 24 - Formulation of Boundary Value Problems (Continued...)

Lecture 25 - Formulation of Boundary Value Problems (Continued...)

Lecture 26 - Formulation of Boundary Value Problems (Continued...)

Lecture 27 - Solution of Boundary Value Problems

Lecture 28 - Solution of Boundary Value Problems (Continued...)

Lecture 29 - Solution of Boundary Value Problems (Continued...)

Lecture 30 - Solution of Boundary Value Problems (Continued...)

Lecture 31 - Solution of Boundary Value Problems (Continued...)

Lecture 32 - Solution of Boundary Value Problems (Continued...)

Lecture 33 - Problems in Flexure

Lecture 34 - Problems in Flexure (Continued...)

Lecture 35 - Problems in Flexure (Continued...)

Lecture 36 - Problems in Flexure (Continued...)

Lecture 37 - Problems in Flexure (Continued...)

Lecture 38 - Boundary Value Problems in Elasticity

Lecture 39 - Boundary Value Problems in Elasticity (Continued...)

Lecture 40 - Boundary Value Problems in Elasticity (Continued...)

Lecture 41 - Boundary Value Problems in Elasticity (Continued...)

Lecture 42 - Boundary Value Problems in Elasticity (Continued...)

Lecture 43 - Complex Variable Method

Lecture 44 - Complex Variable Method (Continued...)

Lecture 45 - Complex Variable Method (Continued...)

Lecture 46 - Complex Variable Method (Continued...)

Lecture 47 - Complex Variable Method (Continued...)

Lecture 48 - Complex Variable Method (Continued...)

Lecture 49 - Thermoelasticity

Lecture 50 - Thermoelasticity (Continued...)

Lecture 51 - Thermoelasticity (Continued...)

Lecture 52 - Thermoelasticity (Continued...)

Lecture 53 - Thermoelasticity (Continued...)

Lecture 54 - Photo-Elasticity

Lecture 55 - Photo-Elasticity (Continued...)

Lecture 56 - Photo-Elasticity (Continued...)

Lecture 57 - Photo-Elasticity (Continued...)

Lecture 58 - Photo-Elasticity (Continued...)

Lecture 59 - Introduction to Nonlinear Elasticity

Lecture 60 - Closure

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Wastewater Treatment and Recycling (Civil Engineering)

Co-ordinators : Prof. Manoj Kumar Tiwari

Lecture 1 - Course Introduction

Lecture 2 - Sources and Types of Wastewater

Lecture 3 - Pollutants in Wastewater: Point and Non-point Sources

Lecture 4 - Wastewater Management: Concept of Treatment and Recycling

Lecture 5 - Wastewater Management: Issues and Challenges

Lecture 6 - Wastewater Generation and Quantity Estimation

Lecture 7 - Quantity Estimation of Sewage

Lecture 8 - Population Forecasting Methods

Lecture 9 - Quantity Estimation of Sewage Flow

Lecture 10 - Sewage Quantity Estimation: Practice Problems

Lecture 11 - Wastewater Characteristics: Quality Parameters

Lecture 12 - Wastewater Characteristics: Quality Parameters (Continued...)

Lecture 13 - Wastewater Characteristics: Quality Parameters (Continued...)

Lecture 14 - Wastewater Characteristics: Quality Parameters (Continued...)

Lecture 15 - Wastewater Characteristics: Practice Problems

Lecture 16 - Fate and Transport of Contaminants Discharged in River

Lecture 17 - Effects on DO and BOD Natural Purification in Rivers: Effects on DO and BOD

Lecture 18 - BOD and Variations in streams Receiving Waste water

Lecture 19 - Natural Purification: Practice Problems

Lecture 20 - Engineered Treatment of Waste water:Concept of mass balance

Lecture 21 - Mass Balance: Application in Specific Cases

Lecture 22 - Mass Balance in Reactors: Application and Practice Problems

Lecture 23 - Basic of Municipal Wastewater Treatment

Lecture 24 - Wastewater Treatment Units: Screening

Lecture 25 - Wastewater Treatment Units: Grit Removal and Equalization

Lecture 26 - Watsewater Treatment Units: Primary Sedimentation

Lecture 27 - Wastewater Treatment Units: Primary Sedimentation

Lecture 28 - Secondary Treatment Processes: Introduction to Biological Treatment of Wastewater

Lecture 29 - Biological Treatment of Wastewater: Microbial Growth and its Kinetics

Lecture 30 - Biological Treatment of Wastewater: Microbial Growth Kinetics

Lecture 31 - Biological Treatment of Wastewater: Activated Sludge Process

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Biological Treatment of Wastewater: ASP, TF and RCB

Lecture 33 - Secondary Treatment Processes: Introduction to Anaerobic Treatment of Wastewater

Lecture 34 - Anaerobic Degradation Processes

Lecture 35 - Anaerobic Degradation: Characteristics and Applications

Lecture 36 - Anaerobic Treatment of Wastewater: UASB Reactor

Lecture 37 - Anaerobic Treatment of Wastewater: Other High Rate Anaerobic Processes

Lecture 38 - Introduction to Sludge Management

Lecture 39 - Wastewater Sludge: Quantity and Characteristics

Lecture 40 - Wastewater Sludge Processing and Treatment: Sludge Thickening

Lecture 41 - Wastewater Sludge Processing and Treatment: Sludge Stabilization and Conditioning

Lecture 42 - Wastewater Sludge Processing and Treatment: Dewatering, Hygienisation, Disposal/Reuse

Lecture 43 - Tertiary (Advanced) Treatment of Wastewater

Lecture 44 - Tertiary Treatment: Nutrients Removal

Lecture 45 - Tertiary Treatment: Adsorption and Ion Exchange

Lecture 46 - Tertiary Treatment: Membrane Processes

Lecture 47 - Tertiary Treatment: Disinfection and Chemical Treatments

Lecture 48 - Wastewater Treatment Systems: Options and Conventional Approach

Lecture 49 - Wastewater Treatment Systems: Integrated Systems: Wetlands

Lecture 50 - Alternate Wastewater Treatment Systems: SBR and SBBR

Lecture 51 - Alternate Wastewater Treatment Systems: MBR and MBBR

Lecture 52 - Concept of Wastewater Reuse and Recycling

Lecture 53 - Wastewater Reuse and Recycling Opportunities

Lecture 54 - Wastewater Reuse and Recycling Potential and Requirements

Lecture 55 - Wastewater Reuse and Recycling Regulatory Guidelines

Lecture 56 - Wastewater Reuse and Recycling: Centralized Vs Decentralized Recycling

Lecture 57 - Wastewater Reuse and Recycling: Challenges, Risks and Research Trends

Lecture 58 - Decision Making in Wastewater Reuse and Recycling

Lecture 59 - Public Acceptance for Recycled Water Use

Lecture 60 - Wastewater Reuse and Recycling: Global Practices and Case Studies

Lecture 61 - Course Summary

Lecture 62 - Course Summary (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fluid Inclusion in Mineral Principles, Methodology, Practice and Application (Civil Engineering)

Co-ordinators : Prof. M.K.Panigrahi

Lecture 1 - Introduction

Lecture 2 - Introduction (Continued...)

Lecture 3 - Introduction (Continued...)

Lecture 4 - Introduction (Continued...)

Lecture 5 - Introduction (Continued...)

Lecture 6 - Microthermometry

Lecture 7 - Microthermometry: Principles

Lecture 8 - Microthermometry: Principles (Continued...)

Lecture 9 - Microthermometry: Principles (Continued...)

Lecture 10 - Fluid Inclusion Petrography

Lecture 11 - Aqueous Fluid Inclusions

Lecture 12 - Aqueous Fluid Inclusions (Continued...)

Lecture 13 - Response to Heating Experiment

Lecture 14 - Aqueous Fluid Inclusions (Continued...)

Lecture 15 - Aqueous Fluid Inclusions (Continued...)

Lecture 16 - Pure Carbonic Inclusion

Lecture 17 - Pure Carbonic Inclusion (Continued...)

Lecture 18 - Microthermometry of Aqueous-Carbonic Inclusion

Lecture 19 - Microthermometry of Aqueous-Carbonic Inclusion (Continued...)

Lecture 20 - Microthermometry of Aqueous-Carbonic Fluid Inclusion

Lecture 21 - Application of Fluid Inclusion to Ore Environment

Lecture 22 - Application of Fluid Inclusion Studies to Ore Environment

Lecture 23 - Application of fluid Inclusion to Ore Forming Environments

Lecture 24 - Application of fluid Inclusion to Ore Forming Environments (Continued...)

Lecture 25 - Application of fluid Inclusion to Ore Forming Environments (Continued...)

Lecture 26 - Application of fluid Inclusion to Deformation, Metamorphism

Lecture 27 - Application of fluid Inclusion to Deformation, Metamorphism (Continued...)

Lecture 28 - Application of fluid Inclusion to Deformation, Metamorphism (Continued...)

Lecture 29 - Application of fluid Inclusion to Deformation, Metamorphism (Continued...)

Lecture 30 - Application of fluid Inclusion to Deformation, Metamorphism (Continued...)

Lecture 31 - Analysis of Fluid Inclusion

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Analysis of Fluid Inclusion (Continued...)

Lecture 33 - Analysis of Fluid Inclusion (Continued...)

Lecture 34 - Analysis of Fluid Inclusion (Continued...)

Lecture 35 - Analysis of Fluid Inclusion (Continued...)

Lecture 36 - Computer Software for Fluid Inclusion Data

Lecture 37 - Computer Software for Fluid Inclusion Data (Continued...)

Lecture 38 - Computer Software for Fluid Inclusion Data (Continued...)

Lecture 39 - Review of the Course

Lecture 40 - Review of the Course (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Matrix Method of Structural Analysis (Civil Engineering)

Co-ordinators : Prof. Biswanath Banjerjee, Prof. Amit Shaw

Lecture 1 - Introduction

Lecture 2 - Review of Structural Analysis - I

Lecture 3 - Review of Structural Analysis - I (Continued...)

Lecture 4 - Review of Structural Analysis - I (Continued...)

Lecture 5 - Review of Structural Analysis - I (Continued...)

Lecture 6 - Review of Structural Analysis - I (Continued...)

Lecture 7 - Review of Structural Analysis - I (Continued...)

Lecture 8 - Review of Structural Analysis - I (Continued...)

Lecture 9 - Review of Structural Analysis - I (Continued...)

Lecture 10 - Review of Structural Analysis - I (Continued...)

Lecture 11 - Matrix Algebra Review

Lecture 12 - Matrix Algebra Review (Continued...)

Lecture 13 - Matrix Algebra Review (Continued...)

Lecture 14 - Matrix Algebra Review (Continued...)

Lecture 15 - Matrix Algebra Review (Continued...)

Lecture 16 - Matrix Method of Analysis of Trusses

Lecture 17 - Matrix Method of Analysis of Trusses (Continued...)

Lecture 18 - Matrix Method of Analysis of Trusses (Continued...)

Lecture 19 - Matrix Method of Analysis of Trusses (Continued...)

Lecture 20 - Matrix Method of Analysis of Trusses (Continued...)

Lecture 21 - Matrix Method of Analysis: Beams

Lecture 22 - Matrix Method of Analysis: Beams (Continued...)

Lecture 23 - Matrix Method of Analysis: Beams (Continued...)

Lecture 24 - Matrix Method of Analysis: Beams (Continued...)

Lecture 25 - Matrix Method of Analysis: Beams (Continued...)

Lecture 26 - Matrix Method of Analysis: Frame (2D)

Lecture 27 - Matrix Method of Analysis: Frame (2D) (Continued...)

Lecture 28 - Matrix Method of Analysis: Frame (2D) (Continued...)

Lecture 29 - Matrix Method of Analysis: Frame (2D) (Continued...)

Lecture 30 - Matrix Method of Analysis: Frame (2D) (Continued...)

Lecture 31 - Computer Implementation

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Computer Implementation (Continued...)

Lecture 33 - Analysis of 3D Truss

Lecture 34 - Analysis of 3D Truss (Continued...)

Lecture 35 - Analysis of Beam

Lecture 36 - Introduction to Finite Element Method

Lecture 37 - Introduction to Finite Element Method (Continued...)

Lecture 38 - Introduction to Finite Element Method (Continued...)

Lecture 39 - Introduction to Finite Element Method (Continued...)

Lecture 40 - Introduction to Finite Element Method (Continued...)

Lecture 41 - Introduction to Finite Element Method (Continued...)

Lecture 42 - Introduction to Finite Element Method (Continued...)

NPTEL : NOC:Plastic Waste Management (Civil Engineering)

Co-ordinators : Prof. Brajesh Kumar Dubey

Lecture 1 - Plastics - What is Plastic

Lecture 2 - Plastics - Types

Lecture 3 - Plastics - Types (Continued...)

Lecture 4 - Plastics - Uses and Global Statistics

Lecture 5 - Plastics - Global Statistics

Lecture 6 - Plastic Waste Sources

Lecture 7 - Plastic Waste Sources (Continued...)

Lecture 8 - Plastic Waste Sources and Production

Lecture 9 - Global Sources

Lecture 10 - Global and Indian data

Lecture 11 - Plastic Waste Management Rules 2016 (India)

Lecture 12 - Plastic Waste Management Rules (Continued...)

Lecture 13 - Plastic Waste Management Rules (Continued...)

Lecture 14 - Plastic Waste Management Rules (Continued...)

Lecture 15 - Global Rules and Regulations

Lecture 16 - Plastic Bans including China Sword Policy Implication on Global Plastic Waste Management

Lecture 17 - Plastic Bans - Global Examples

Lecture 18 - Plastic Bans - China Sword Policy

Lecture 19 - Plastic Bans - China Sword Policy Impacts

Lecture 20 - Plastic Bans - Impact on Global Plastic Waste Management

Lecture 21 - Impact of Plastic Pollution on Marine Life

Lecture 22 - Impact of Plastic Pollution on Marine Life (Continued...)

Lecture 23 - Plastic Pollution Impacts on Marine and Wildlife

Lecture 24 - Plastic Pollution : Health and Environmental Impact

Lecture 25 - Plastic Pollution : Health and Environmental Impact (Continued...)

Lecture 26 - Plastic Waste Management Practices : Recycling and Waste Plastics

Lecture 27 - Plastic Waste Management : Mechanical and Feedstock Recycling

Lecture 28 - Plastic Waste Management : Feedstock Recycling - Pyrolysis and Waste to Energy

Lecture 29 - Plastic Waste Management : Landfilling, Other Applications

Lecture 30 - Use of Waste Plastics in Road Construction

Lecture 31 - Possible Alternate Materials to Plastics - Greener Alternatives

Lecture 32 - Biodegradable Plastics

Lecture 33 - Greener Plastic Products

Lecture 34 - Biobased Plastic Products

Lecture 35 - How to Quantify Something is Green

Lecture 36 - Plastics Resource Recovery and Circular Economy

Lecture 37 - Plastics Resource Recovery and Intro to Circular Economy

Lecture 38 - Plastics and Circular Economy

Lecture 39 - Plastics and Circular Economy - Case Studies

Lecture 40 - Plastics and Circular Economy - Case Studies (Continued...)

NPTEL : NOC:Geotechnical Engineering-II Foundation Engineering (Civil Engineering)

Co-ordinators : Prof. Dilip Kumar Baidya

Lecture 1 - Quick Review of Soil Mechanics

Lecture 2 - Quick Review of Soil Mechanics (Continued...)

Lecture 3 - Quick Review of Soil Mechanics (Continued...)

Lecture 4 - Quick Review of Soil Mechanics (Continued...)

Lecture 5 - Quick Review of Soil Mechanics (Continued...)

Lecture 6 - Foundation Engineering Introduction

Lecture 7 - Foundation Engineering Introduction (Continued...)

Lecture 8 - Foundation Engineering Introduction (Continued...)

Lecture 9 - Shallow Foundation and Bearing Capacity

Lecture 10 - Shallow Foundation and Bearing Capacity (Continued...)

Lecture 11 - Shallow Foundation and Bearing Capacity (Continued...)

Lecture 12 - Shallow Foundation

Lecture 13 - Shallow Foundation (Continued...)

Lecture 14 - Shallow Foundation (Continued...)

Lecture 15 - Shallow Foundation (Continued...)

Lecture 16 - Shallow Foundation (Continued...)

Lecture 17 - Settlement of Foundation

Lecture 18 - Settlement of Foundation (Continued...)

Lecture 19 - Settlement of Foundation (Continued...)

Lecture 20 - Settlement of Foundation (Continued...)

Lecture 21 - Settlement of Foundation (Continued...)

Lecture 22 - Settlement of Foundation (Continued...)

Lecture 23 - Geotechnical Investigation

Lecture 24 - Geotechnical Investigation (Continued...)

Lecture 25 - Geotechnical Investigation (Continued...)

Lecture 26 - Geotechnical Investigation (Continued...)

Lecture 27 - Geotechnical Investigation (Continued...)

Lecture 28 - Earth Pressure Theories

Lecture 29 - Earth Pressure Theories (Continued...)

Lecture 30 - Earth Pressure Theories (Continued...)

Lecture 31 - Earth Pressure Theories (Continued...)

Lecture 32 - Earth Pressure Theories (Continued...)

Lecture 33 - Stability analysis of earth retaining wall

Lecture 34 - Stability analysis of earth retaining wall (Continued...)

Lecture 35 - Stability analysis of earth retaining wall (Continued...)

Lecture 36 - Stability of earth retaining wall

Lecture 37 - Pile foundation

Lecture 38 - Pile foundation (Continued...)

Lecture 39 - Pile foundation (Continued...)

Lecture 40 - Pile foundation (Continued...)

Lecture 41 - Pile foundation (Continued...)

Lecture 42 - Pile foundation (Continued...)

Lecture 43 - Pile foundation (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Water Supply Engineering (Civil Engineering)

Co-ordinators : Prof. Manoj Kumar Tiwari

Lecture 1 - Backgroung and Course Introduction

Lecture 2 - Water Sources and Availability

Lecture 3 - Water Uses

Lecture 4 - Water Supply Key Issues and Concerns

Lecture 5 - Urban water services and water supply systems

Lecture 6 - Urban water services and water supply systems

Lecture 7 - Components of Water Demand

Lecture 8 - Fluctuations in Water Demand

Lecture 9 - Concept of Design Period and Design Population Need to Forecast Population Population Forecasting Methods

Lecture 10 - Demand Forecasting and Design Capacities

Lecture 11 - Water Sources and Collection of Water

Lecture 12 - Surface Water Intakes

Lecture 13 - Surface Water Intakes Systems

Lecture 14 - Groundwater Intake

Lecture 15 - Well Interferences, Well losses and Efficiency

Lecture 16 - Raw water Conveyance and Pumping

Lecture 17 - Practice Problems

Lecture 18 - Raw Water Storage

Lecture 19 - Treated Water Storage

Lecture 20 - Placement, Design and Construction of Storage Reservoirs

Lecture 21 - Practice Problems on Reservoir Capacity Estimation

Lecture 22 - Water Quality and Water Pollutants

Lecture 23 - Water Quality Parameters

Lecture 24 - Philosophy of Water Treatment

Lecture 25 - Water Treatment Units Screening and Aeration

Lecture 26 - Water Treatment Units Sedimentation

Lecture 27 - Practice Problems On Sedimentation

Lecture 28 - Coagulation and Flocculation: Theory

Lecture 29 - Coagulation and Flocculation: Selection and Application

Lecture 30 - Coagulation and Flocculation: Design Operation and Process Control

Lecture 31 - Filtration Theory and Slow Sand Filters

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Rapid Sand Filter: Filter Media and Components

Lecture 33 - Rapid Sand Filters and Pressure Filters

Lecture 34 - Practice Problems Coagulation Flocculation and Filtration

Lecture 35 - Disinfection Basic

Lecture 36 - Chlorination

Lecture 37 - Other Disinfection Method: Ozone and UV Disinfection

Lecture 38 - Sluge Management

Lecture 39 - Advanced and Alternate Treatment Systems

Lecture 40 - Advanced Oxidation Processes and Membrane Process

Lecture 41 - Practice Problems

Lecture 42 - Basic of Water Distribution System

Lecture 43 - Water Distribution Networks

Lecture 44 - Analysis of Water Distribution Networks

Lecture 45 - Problems onPipe Flow and Water Distribution Network

Lecture 46 - Water Losses in Water Distribution System

Lecture 47 - Water Balance for Water Loss Assessment and Performance Indicators

Lecture 48 - Water Loss Detection and Control

Lecture 49 - Practice Problems on Water Audit and Water Loss Estimation

Lecture 50 - Continuous (24*7) water supply systems

Lecture 51 - District metered area (DMA) for zoning in water distribution networks

Lecture 52 - Software for water distribution networks design and analysis

Lecture 53 - Demonstration on EPANET and GEMS

Lecture 54 - Concept of smart water supply systems

Lecture 55 - Smart Metering and sensing devices

Lecture 56 - IoT and Automation in Water Supply

Lecture 57 - Example of Automation and Smart Water Supply Systems

Lecture 58 - Economics of Water Supply Systems

Lecture 59 - Capital and Operational Cost of Water Supply System

Lecture 60 - Pricing Waters

Lecture 61 - Pricing Waters (Continued...)

Lecture 62 - Case studies and Practice Problem on Water Pricing

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Engineering Geology (Civil Engineering)

Co-ordinators : Prof. R. K. Dubey

Lecture 1 - Introduction and significance

Lecture 2 - Enginnering geological ground, concept and categorization

Lecture 3 - Geomaterial: Rock, rock material and rock strata, concept of stress, deformation ...

Lecture 4 - Stress-strain behaviour and mechanical parameters of rocks

Lecture 5 - Geomorphology of river valley and mountainous regions and landforms

Lecture 6 - Different types of water and distribution of water, different type of rocks and ...

Lecture 7 - Surface and subsurface water and their interaction with geoground

Lecture 8 - Weathering processes and classification

Lecture 9 - Chemical weathering and impact of weathering

Lecture 10 - Weatherability and weathering indices

Lecture 11 - Characteristic of rocks and rock strata and some physical property

Lecture 12 - Common physical attributes of geomaterials

Lecture 13 - Engineering properties of rocks

Lecture 14 - Geotechnical characteristic of joint and approach for rock mass classification

Lecture 15 - Rock mass classification

Lecture 16 - About construction materials and dimensional stone

Lecture 17 - Crushed stone and suitability of rocks as construction materials

Lecture 18 - Aggregate and deleterious materials

Lecture 19 - Pozzolan and soil

Lecture 20 - Cement-aggregate reaction

Lecture 21 - Concept and classification of dams

Lecture 22 - Classification of dams based on materials used

Lecture 23 - Classification of dam based on design and function

Lecture 24 - Arch dams and classification dams based on use and function and technical ...

Lecture 25 - Forces acting on dam and engineering geological characteristics for dam construction

Lecture 26 - About tunnels and classification of tunnels

Lecture 27 - Tunnelling methods

Lecture 28 - Treatments

Lecture 29 - Anchoring of rock strata : grouting

Lecture 30 - Anchoring of rock strata : rock bolting

Lecture 31 - Categorization of major geological structures affecting stability of engineering ...

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Major geological structures Fold, Faults, joints

Lecture 33 - Major geological structures: sedimentary structures, unconformity and effect ...

Lecture 34 - Effects of beddings, folds, faults, joints and unconformity on stability of dams

Lecture 35 - Effects of beddings, folds, faults, joints and unconformity on ground control ...

Lecture 36 - Rock-load/ground pressure, factors affecting ground pressure

Lecture 37 - Methods for determination of rock load: empirical approaches

Lecture 38 - Methods for determination of rock load: empirical, semi-empirical approaches

Lecture 39 - Methods for determination of rock load: Structural defect and rock-support ...

Lecture 40 - Unified approach, support system, and mechanics of rock bolt working

Lecture 41 - About road and highway features and pavement

Lecture 42 - Stress distributions and engineering geological facets of new road/highway alignments

Lecture 43 - About bridges, classifications and working mechanism

Lecture 44 - Engineering geological facets of bridges and material quality

Lecture 45 - Building, building foundation and foundation strata

Lecture 46 - Landslide

Lecture 47 - Landslide Hazards Zonation, causes and mitigation

Lecture 48 - Slope stability aspects of landslide

Lecture 49 - Earthquakes

Lecture 50 - Induced seismicity

Lecture 51 - Sea, seacoast, features and agents

Lecture 52 - Wave propagations and concept of surf zones and breaking of waves

Lecture 53 - Waves propagation in different depth and wave mechanics

Lecture 54 - Erosion induced and deposition assisted sea landforms

Lecture 55 - Sea shore hazards, mitigation and protective structures

Lecture 56 - Energy and introductory aspects of geothermal energy

Lecture 57 - Geothermal resources and enhanced geothermal systems

Lecture 58 - Geotechnical facets of gas hydrate

Lecture 59 - Engineering geological facets of CBM and shale gas

Lecture 60 - Engineering geological aspect of carbon capture, usage and storage (CCUS)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Reservoir Geophysics for Hydrocarbon Exploration (Civil Engineering)

Co-ordinators : Prof. Saurabh Datta Gupta

Lecture 1 - Discussion on the background of Reservoir Geophysics in the Upstream Oil and Gas Sector

Lecture 2 - Lectuer on the requirements of advancement of Seismic Data Interpretation towards Reservoir Geophysics study related to the Integrated workflow to describe the Reservoir

Lecture 3 - Lectuer on the basic understanding of Borehole Geophysics and establishment of the Requirements related to the Exploratory Data Analysis

Lecture 4 - Discussion related to the basic understanding of Geocellular Modelling in line with High Resolution Geological Model

Lecture 5 - Lectuer on the Integrated workflow for Development of Geocellular Modelling

Lecture 6 - The key components of Integrated Reservoir Engineering for Reservoir Geophysics study

Lecture 7 - Discussion on the fundamental concept and applications of Petrophysical in Reservoir

Lecture 8 - Lectuer on comprehensive analysis of Petrophysical Properties of the various Reservoir

Lecture 9 - Lectuer on the understanding on Geomechanically property of the reservoir and Reservoir

Lecture 10 - Lectuer on Hydrocarbon Phase behavior and Flow Dynamics: Key Principles and Diagrams

Lecture 11 - Discussion on Reservoir Geophysics uses advanced seismic methods to identify reservoirs

Lecture 12 - Lectuer on advancements seismic studies Reservoir Geophysics and quantitative analysis

Lecture 13 - Studies Reservoir Geophysics based on AVO/AVA analysis multicomponent seismic techniques

Lecture 14 - Comparative discussion between conventional and multicomponent seismic on wave properties

Lecture 15 - Lectuer on multicomponent seismic: Processing Challenges, Binning, and Techniques

Lecture 16 - Lectuer on the Advanced Seismic Techniques for Reservoir Characterization

Lecture 17 - Discussion on the Applications of Multicomponent the Purpose of Seismic Attribute Study

Lecture 18 - Lectuer on Seismic Attribute Study: Types, Post-Stack Examples, and Applications

Lecture 19 - Lectuer on Seismic Attribute Applications

Lecture 20 - Lectuer on Inversion: Workflow, QC, Case Studies, Challenges, of P-Elastic Parameters

Lecture 21 - Lectuer on Introduction to Vertical Seismic Profile (VSP): Basics and Beyond

Lecture 22 - Lectuer on Exploring Vertical Seismic Profile (VSP): Methods, Applications, and Equipment

Lecture 23 - Lectuer on Examples and Techniques in Vertical Seismic Profile (VSP) Data Acquisition

Lecture 24 - Lectuer on Vertical Seismic Profile (VSP) Data Processing and Interpretation Techniques

Lecture 25 - Lectuer on Comprehensive Guide to Passive Seismic Imaging: Techniques, Applications

Lecture 26 - Discussion on VSP Techniques towards Reservoir Characterization

Lecture 27 - Lectuer on VSP data acquisition workflow and its interpretation

Lecture 28 - Discussion of Walkaway VSP technique in complex geological structure

Lecture 29 - Lectuer on 3D and Far Offset VSP in connection with Advantages and Disadvantages

Lecture 30 - Discussion on Passive Seismic Data and its application towards the study of Reservoir

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Discussion on basic understanding of Crosswell Seismic Tomography

Lecture 32 - Lectuer on Crosswell Seismic Tomography for Reservoir Characterization and Management

Lecture 33 - Discussion AVO Analysis and Tomography for Enhanced Reservoir Characterization (EOR)

Lecture 34 - Implication of Crosswell Seismic Tomography and AVO for Reservoir Imaging

Lecture 35 - Lectuer on AVO Analysis: Seismic Signatures, Techniques, and Case Study

Lecture 36 - Discussion on Approach and Principal Causes of Low-Resistivity and (LRLC) Reservoirs

Lecture 37 - Lectuer on LRLC Reservoirs: Causes, Traits, Challenges, Evaluation and Solutions

Lecture 38 - Discussion on Clay Distribution Modes and Core-Well Log Integration in LRLC Reservoirs

Lecture 39 - Discussion on Wireline Logging and Petrophysical Techniques for LRLC Reservoirs

Lecture 40 - Lectuer on Gas Condensate Reservoirs: Properties, Sampling, Production and Performance

Lecture 41 - Discussion on 4D Seismic: Requirements, Planning, and Reservoir Monitoring

Lecture 42 - Lectuer on 4D Seismic: Acquisition, Processing, Interpretation, and History Matching

Lecture 43 - Discussion on The Marlim field: A case study

Lecture 44 - Discussion on Reservoir Modeling: Importance, Pore-Scale Mechanisms, and Carbonate Rocks

Lecture 45 - Discussion on Pore-Scale Displacement Mechanism in Carbonate Reservoirs: A Case Study

Lecture 46 - Discussion on Comprehensive Overview of Deepwater, and Production Implications

Lecture 47 - Lectuer on Deepwater Depositional Systems: Architecture, and Exploration Challenges

Lecture 48 - Discussion on Deepwater Exploration: Importance, Challenges, Frontiers, Global Impact

Lecture 49 - Discussion on Deepwater Exploration and Sedimentation: Trends, Sustainable Approaches

Lecture 50 - Discussion on Deepwater Exploration: Challenges, Innovations, Strategies for Advancement

Lecture 51 - Discussion on Comprehensive Overview of Seismic Imaging and Data Processing in Deep

Lecture 52 - Lectuer on Challenges in Deep-Water Seismic Imaging: Data Acquisition, Geological

Lecture 53 - Discussion on Sediment Variability, Technological Innovations, Seismic Exploration

Lecture 54 - Discussion on Risk Identification, Assessment, and Management in Deepwater Exploration

Lecture 55 - Discussion on Risk Analysis and Management in Deepwater the Macondo Blowout Case Study

Lecture 56 - Discussion on Clastic Reservoirs: Pore Structure, Challenges, and Depletion Effects

Lecture 57 - Lectuer on Enhanced Recovery and Characterization of Deep Clastic Reservoirs

Lecture 58 - Discussion on a Case Study of Depleted Clastic Reservoirs

Lecture 59 - Discussion on Basalt Formation, Sub-Basalt Exploration, and Seismic Challenges

Lecture 60 - Discussion on Case Study: Use of Converted Waves for Sub-Basalt Imaging

Lecture 2 - Objectives of a Project, Scientific Way of Managing of Objectives

Lecture 3 - Course Scope and Plan, Questions and Discussions

Lecture 4 - Construction Industry and National Growth

Lecture 5 - Project Stakeholders, Project Phases, Project Organization

Lecture 6 - Project Scheduling Levels (Scheduling Engineer Responsibilities)

Lecture 7 - Time Management - Overview

Lecture 8 - Basics of Work Breakdown Structure (WBS)

Lecture 9 - Tools for Time Management

Lecture 10 - Gantt / Bar Chart - History, Representation, Progress Monitoring, Uses, Steps to draw a Bar Chart

Lecture 11 - Develop a Bar Chart (Exercise)

Lecture 12 - Bar Charts for Resource Usage, Pros and Cons

Lecture 13 - Duration Estimation - Types, Inputs, Methods, Parametric Estimation

Lecture 14 - Factors influencing Productivity, Example for Ideal Productivity, Factored Productivity and Working Time Factor

Lecture 15 - Piling Activity Example, Applicability of different methods to Estimate Activity Duration

Lecture 16 - Summary of Key Topics, Types of Networks

Lecture 17 - Networks - Introduction, Techniques

Lecture 18 - Representing Results in a Bar Chart, AON Example-2

Lecture 19 - Introduction to Floats, Types of Floats and Example-1 Discussion

Lecture 20 - Example 4, Usage of Floats for Project Decisions

Lecture 21 - Two-Span Bridge : Activity Identification and Duration Estimation (Continued...)

Lecture 22 - Two-Span Bridge : Activity Identification and Duration Estimation

Lecture 23 - Two-Span Bridge : Activity- Duration- Predecessors

Lecture 24 - Review Network Analysis Concepts, Apply Network Analysis to Two-Span Bridge (Continued...)

Lecture 25 - Two-Span Bridge : Network Analysis

Lecture 26 - Two-Span Bridge : Resource Constraints in Network Logic

Lecture 27 - Fast-Tracking vs Crashing, Relationship between Activity Direct Cost and Activity Duration - Assumptions

Lecture 28 - Time-Cost trade-off : ABCD Example Project, Steps for Crashing

Lecture 29 - Time-Cost trade-off : Class Exercise-2

Lecture 30 - Time-Cost trade-off : Problem-3, Tabulation Approach

Lecture 31 - Incorporating Factors such as Bonus and Penalty; Problem-4

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - What is Resource?, Influence of Resources on Schedule, Two-Span Bridge Example, Resource Decisions; ABCD Example Project; Resource Over-Allocation; Example-2

Lecture 33 - Projects and Resources, Example of Two Resources, Exercise, Two-Span Bridge Example

Lecture 34 - Review Problem-1; Problem-2 (Cash Resource); Resolving Over-Allocation

Lecture 35 - Problem 1 - Two Resources; Resolving Resource Allocation Problems

Lecture 36 - Resource Profile Requirements

Lecture 37 - Resource Leveling - Example Network

Lecture 38 - Minimum Moment Concept

Lecture 39 - Applying Improvement Factor - Illustration

Lecture 40 - Introduction to Precedence Diagramming Method (PDM)

Lecture 41 - PDM network representation and its issues, Network Calculation

Lecture 42 - PDM Â– Problem #1

Lecture 43 - Issues in PDM, Negative Lags, Problem #2 Solution

Lecture 44 - PDM Â– Analysis with non-continuous duration, Floats

Lecture 45 - Defining Relationship (Based on Construction Method) - Simple Shed

Lecture 46 - Project Monitoring & Control Â– Typical Project Time Monitoring Process, Levels and Frequency of updates

Lecture 47 - Project Control Process, Daily Progress Report, Macro Level Update- Data Need, Standard Progress Reports

Lecture 48 - Application: Two Span Bridge Â– ES Schedule

Lecture 49 - Review of Key Issues in Project Monitoring, Earned Value Concept Through Examples

Lecture 50 - Basic Earned Value Definitions and Terminology, Summary

Lecture 51 - Uncertainty in Project Schedules

Lecture 52 - PERT Background & Assumptions, Stepwise Procedure

Lecture 53 - PERT Example Problem, Summary

Lecture 54 - Course Conclusion

Lecture 55 - Emerging Trends / Tools in Project Planning

Lecture 56 - Industry Perspective Â– Prof. N. Raghavan

Lecture 57 - Final Exam Pattern, Acknowledgements

NPTEL : NOC:Structural Dynamics (Civil Engineering)

Co-ordinators : Prof. Ramancharala Pradeep Kumar

Lecture 1 - Module 1: Introduction of Structural Dynamics

Lecture 2 - Module 2: Types of Analysis

Lecture 3 - Module 3: Degrees of Freedom

Lecture 4 - Module 4: Vibrations of SDOF Systems

Lecture 5 - Module 5: Methods Solution of Equilibrium Equation

Lecture 6 - Module 6: UnDamped free Vibration

Lecture 7 - What is MATLAB?

Lecture 8 - Getting Started with MATLAB Online

Lecture 9 - MATLAB Variables

Lecture 10 - MATLAB as a Calculator

Lecture 11 - MATLAB Functions

Lecture 12 - Creating Vectors

Lecture 13 - Creating Uniformly Spaced Vectors (Colon Operator)

Lecture 14 - Creating Uniformly Spaced Vectors (LINSPACE)

Lecture 15 - Accessing Elements of a Vector

Lecture 16 - Calculations with Vectors

Lecture 17 - Creating Matrices

Lecture 18 - Matrix Creation Functions

Lecture 19 - Accessing Elements of a Matrix

Lecture 20 - Matrix Multiplication

Lecture 21 - Logical Operators

Lecture 22 - Writing a FOR Loop

Lecture 23 - If - Else Statements

Lecture 24 - While Loop

Lecture 25 - Line Plots

Lecture 26 - Annotating Graphs

Lecture 27 - Exploring Figures in MATLAB Online

Lecture 28 - Damped Free Vibration

Lecture 29 - Types of Damping

Lecture 30 - Logarithmic Decrement

Lecture 31 - Dynamic Equilibrium Equation Using Energy Method

Lecture 32 - Module 1: UnDamped Forced Vibration

Lecture 33 - Module 2: Damped Forced Vibration

Lecture 34 - Module 3: Relationship between Rd, Rv & Ra

Lecture 35 - Module 4: Resonant Frequency & Half Power Band Width

Lecture 36 - Module 5: Transmissibility

Lecture 37 - Module 1: Response to Arbitrary Force

Lecture 38 - Module 2: Special Cases in Arbitrary Force

Lecture 39 - Module 3: Fourier Transformation

Lecture 40 - Module 1: Numerical Methods

Lecture 41 - Module 2: Methods Based on Interpolation of Excitation

Lecture 42 - Module 3: Central Difference Method

Lecture 43 - Module 4: Numerical Methods based on Variation of Acceleration: NewmarkÂ's Method

Lecture 44 - Central Difference Method (Tutorial)

Lecture 45 - Module 1: Response Spectrum

Lecture 46 - Module 2: Special Cases of Response Spectrum

Lecture 47 - Module 3: Development of Tripartite Plot

Lecture 48 - Module 1: Multi-Degree of Freedom System

Lecture 49 - Module 2: Multi-Degree of Freedom System: Solution of Equilibrium Equation

Lecture 50 - Module 3: Multi-Degree of Freedom System: Modal Orthogonality

Lecture 51 - Module 4: Approximate Methods For Finding Natural Frequency

Lecture 52 - Tutorial 01: Generation of Mass Matrix

Lecture 53 - Tutorial 2: Eigen vector and Modal Orthogonality

Lecture 54 - Module 1: Time History Analysis

Lecture 55 - Module 2: Response Spectrum Analysis

Lecture 56 - Module 1: Three Dimensional Dynamic Analysis

Lecture 57 - Module 2: Generation of Elastic Design Response Spectra

Lecture 58 - W09T01: Centre of Mass & Centre of Stiffness

Lecture 59 - Module 1: Vibration of Continuous Systems

Lecture 60 - Module 2: Example Problem on Continuous system

Lecture 61 - Module 3: Theory of Seismometer

Lecture 62 - Module 1: Dynamics of Non Structural Elements

Lecture 63 - Module 2: Non Structural Elements Example

Lecture 64 - W11T: Non Structural Elements

Lecture 65 - Module 1: Classical and Non-classical Damping

Lecture 66 - Module 2: Vibration Control

Lecture 67 - Module 3: Base Isolation

Lecture 68 - Module 4: Tuned Mass Damper

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Mechanics of Materials (Civil Engineering)

Co-ordinators : Dr. U. Saravanan

Lecture 1 - Why this course?

Lecture 2 - Concepts and equations in this course

Lecture 3 - Objectives and prerequisite

Lecture 4 - Linear Algebra

Lecture 5 - Vector Algebra

Lecture 6 - Representation of Vector

Lecture 7 - Concept of Force

Lecture 8 - Definition of a body

Lecture 9 - Motion and Displacement field

Lecture 10 - Traction

Lecture 11 - Properties of traction

Lecture 12 - Defnition of stress tensor and linear function

Lecture 13 - Tensor Algebra

Lecture 14 - Meaning of components of the stress tensor

Lecture 15 - Transformation of stress components

Lecture 16 - Mohr's Circle derivaion

Lecture 17 - Example 1: Construction of Mohr's circle

Lecture 18 - Example 2: Extremum normal and shear stress

Lecture 19 - Example 3: Transformation of stress components

Lecture 20 - Uniaxial stress

Lecture 21 - Hydrostatic, pure shear and deviatoric stress

Lecture 22 - Biaxial and Plane state of stress

Lecture 23 - Extreme stress for 3D stresses

Lecture 24 - Extremum shear stress

Lecture 25 - Stresses in the Octahedral plane

Lecture 26 - 2D Equilibrium equations

Lecture 27 - 3D Equilibrium equations

Lecture 28 - Stretch ratio and strain

Lecture 29 - Curves and arc Length

Lecture 30 - Gradient

Lecture 31 - Deformation and displacement Gradient

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Right Cauchy Green Deformation tensor

Lecture 33 - Homogeneous deformation

Lecture 34 - Engineering strain

Lecture 35 - Change in Angle

Lecture 36 - Transformation of strain components/ Strain Rosette

Lecture 37 - Compatibility condition

Lecture 38 - Constitutive relation

Lecture 39 - Young's Modulus and Poisson's Ratio

Lecture 40 - Shear Modulus

Lecture 41 - Bulk Modulus

Lecture 42 - Restriction on material parameters

Lecture 43 - Thermal strain

Lecture 44 - Strain energy, load potential and total potential

Lecture 45 - Stepped shaft subjected to axial force

Lecture 46 - Inhomogeneous bar subjected to axial force

Lecture 47 - Stepped shaft subjected to raise in temperature

Lecture 48 - Traction in member subjected to bending

Lecture 49 - Governing equilibrium equations

Lecture 50 - Displacement field

Lecture 51 - Bending equation

Lecture 52 - Radius of curvature

Lecture 53 - Shear force and bending moment diagram

Lecture 54 - Variation of axial stress

Lecture 55 - Deflected shape and rotation of cross section

Lecture 56 - Expression to find shear stress

Lecture 57 - Finding centroid of a cross section

Lecture 58 - Parallel axis theorem and its application

Lecture 59 - Vertical shear stress in I section

Lecture 60 - Horizontal shear stress in I section

Lecture 61 - Connection design

Lecture 62 - Definition of shear center

Lecture 63 - Shear center of Channel section

Lecture 64 - Expression to find shear center

Lecture 65 - Shear force and bending moment diagram

Lecture 66 - Deflected shape and rotation of cross section

Lecture 67 - Finding allowable load

Lecture 68 - Modified bending equation

Lecture 69 - Bending of a composite beam

Lecture 70 - Connection design

Lecture 71 - Moment of Intertia about arbitrarily oriented axis

Lecture 72 - Example: Angle section

Lecture 73 - Bending equation for bending about principal axis

Lecture 74 - Bending equation about arbitrary axis

Lecture 75 - Neutral axis

Lecture 76 - Load not about principal axis

Lecture 77 - Load about principal axis

Lecture 78 - Displacement field

Lecture 79 - Torsion equation

Lecture 80 - Example problems

Lecture 81 - Expression relating angle of twist with torsion and shear stress

Lecture 82 - Example problems: Open sections

Lecture 83 - Thin walled closed sections

Lecture 84 - Example problems: Thin walled sections

Lecture 85 - Cylindrical polar coordinate system

Lecture 86 - Displacement field

Lecture 87 - Governing differential equation and solution

Lecture 88 - Example problems : Thick walled cylindrical vessel

Lecture 89 - Thin walled pressure vessels

Lecture 90 - General Principals

Lecture 91 - Different failure modes

Lecture 92 - Tresca Condition

Lecture 93 - vonMises condition

Lecture 94 - Maximum normal stress or rankine condition

Lecture 95 - Mohr - Columb condition

Lecture 96 - Drucker-Prager Condition

Lecture 97 - General Concepts

Lecture 98 - Euler critical load for simply supported column

Lecture 99 - Euler critical load for column with any boundary condition

Lecture 100 - Secant formula

Lecture 101 - Pressure vessel and failure theory

Lecture 102 - Determination of maximum load carrying capacity of a simple truss

Lecture 22 - Design of Masonry Components and Systems - Part I

Lecture 23 - Design of Masonry Components and Systems - Part II

Lecture 24 - Design of Masonry Components and Systems - Part III

Lecture 25 - Design of Masonry Components and Systems - Part IV

Lecture 26 - Design of Masonry Components and Systems - Part V

Lecture 27 - Design of Masonry Components and Systems - Part VI

Lecture 28 - Design of Masonry Components and Systems - Part VII

Lecture 29 - Design of Masonry Components and Systems - Part VIII

Lecture 30 - Design of Masonry Components and Systems - Part IX

Lecture 31 - Design of Masonry Components and Systems - Part X

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Design of Masonry Components and Systems - Part XI

Lecture 33 - Design of Masonry Components and Systems - Example I

Lecture 34 - Design of Masonry Components and Systems - Example II

Lecture 35 - Design of Masonry Components and Systems - Example III

Lecture 36 - Special Topics - Confined Masonry

Lecture 37 - Special Topics - Masonry Infill in RC Frames

Lecture 38 - Special Topics - Assessment of Existing Masonry Structures - Part I

Lecture 39 - Special Topics - Assessment of Existing Masonry Structures - Part II

Lecture 40 - Special Topics - Assessment of Existing Masonry Structures - Part III

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Characterization of Construction Materials (Civil Engineering)

Co-ordinators : Prof. Manu Santhanam, Prof. Piyush Chaunsali

Lecture 1 - Characterization of Construction Materials: An Introduction - Part 1

Lecture 2 - Characterization of Construction Materials: An Introduction - Part 2

Lecture 3 - Structure of Contruction Materials: An Overview - Part 1

Lecture 4 - Structure of Contruction Materials: An Overview - Part 2

Lecture 5 - Structure of Contruction Materials: An Overview - Part 3

Lecture 6 - Structure of Contruction Materials: An Overview - Part 4

Lecture 7 - Calorimetry: Introduction and types of Calorimeters - Part 1

Lecture 8 - Calorimetry: Introduction and types of Calorimeters - Part 2

Lecture 9 - Calorimetry: Sample preparation, Practical note and Heat of hydration - Part 1

Lecture 10 - Calorimetry: Sample preparation, Practical note and Heat of hydration - Part 2

Lecture 11 - Calorimetry: Applications of calorimetry - Part 1

Lecture 12 - X Ray diffraction: Introduction to X Rays and crystallography - Part 1

Lecture 13 - X Ray diffraction: Introduction to X Rays and crystallography - Part 2

Lecture 14 - X Ray diffraction: Crystal systems and History of XRD - Part 1

Lecture 15 - X Ray diffraction: Crystal systems and History of XRD - Part 2

Lecture 16 - X Ray diffraction: Diffractogram

Lecture 17 - X Ray diffraction: Diffractogram - Calculations - Part 1

Lecture 18 - X Ray diffraction: Diffractogram - Calculations - Part 2

Lecture 19 - X Ray Diffraction: Qualitative Phase Analysis - Part 1

Lecture 20 - X Ray Diffraction: Qualitative Phase Analysis - Part 2

Lecture 21 - X Ray Diffraction: Sample Preparation and Application in study of cements - Part 1

Lecture 22 - X Ray Diffraction: Sample Preparation and Application in study of cements - Part 2

Lecture 23 - Thermal Analysis - Part 1

Lecture 24 - Thermal Analysis - Part 2

Lecture 25 - Application of thermal analysis to study construction materials - Part 1

Lecture 26 - Application of thermal analysis to study construction materials - Part 2

Lecture 27 - Surface Area Measurement: Sampling and particle size distribution - Part 1

Lecture 28 - Surface Area Measurement: Sampling and particle size distribution - Part 2

Lecture 29 - Surface Area Measurement: Different techniques - Part 1

Lecture 30 - Surface Area Measurement: Different techniques - Part 2

Lecture 31 - Surface Area Measurement: calculation and applications

Lecture 33 - Optical and Scanning Microscopy- Introduction and specimen preperation - Part 2

Lecture 34 - Optical and Scanning Microscopy- Features and functions - Part 1

Lecture 35 - Optical and Scanning Microscopy- Features and functions - Part 2

Lecture 36 - Types of optical microsopy - Part 1

Lecture 37 - Types of optical microsopy - Part 2

Lecture 38 - Scanning electron microscope Part 1- Parts and Functioning - Part 1

Lecture 39 - Scanning electron microscope Part 1- Parts and Functioning - Part 2

Lecture 40 - Scanning electron microscope Part 2- Working Principles - Part 1

Lecture 41 - Scanning electron microscope Part 2- Working Principles - Part 2

Lecture 42 - Scanning electron microscope Part 3 - Analysis of cementitious systems 1 - Part 1

Lecture 43 - Scanning electron microscope Part 3 - Analysis of cementitious systems 1 - Part 2

Lecture 44 - Scanning electron microscope Part 4 - Analysis of cementitious system 2 - Part 1

Lecture 45 - Scanning electron microscope Part 4 - Analysis of cementitious system 2 - Part 2

Lecture 46 - Application of characterization techniques to assess composite binder with limestone-calcined clay: what, why and how? - Part 1

Lecture 47 - Application of characterization techniques to assess composite binder with limestone-calcined clay: what, why and how? - Part 2

Lecture 48 - Image analysis - Introduction and image mapping - Part 1

Lecture 49 - Image analysis - Introduction and image mapping - Part 2

Lecture 50 - Image analysis - Basic operations - Part 1

Lecture 51 - Image analysis - Basic operations - Part 2

Lecture 52 - Spectroscopy Techniques - Part 1 AAS, AES - Part 1

Lecture 53 - Spectroscopy Techniques - Part 1 AAS, AES - Part 2

Lecture 54 - Spectroscopy Techniques - Part 2 UV and IR spectroscopy - Part 1

Lecture 55 - Spectroscopy Techniques - Part 2 UV and IR spectroscopy - Part 2

Lecture 56 - Spectroscopy Techniques - Part 3 FTIR and NMR spectroscopy - Part 1

Lecture 57 - Spectroscopy Techniques - Part 3 FTIR and NMR spectroscopy - Part 2

Lecture 58 - Spectrocopy techniques - Part 4 Principle of NMR spectroscopy

Lecture 59 - Porosity and pore structure - Intoduction, significance of pore distribution

Lecture 60 - Porosity and pore structure - Woking of mercury intrusion porosimeter - Part 1

Lecture 61 - Porosity and pore structure - Woking of mercury intrusion porosimeter - Part 2

Lecture 62 - Electrical Impedance analysis - Principle and different methods - Part 1

Lecture 63 - Electrical Impedance analysis - Principle and different methods - Part 2

Lecture 64 - Electrical Impedance analysis - Deliverables and Interpretation - Part 1

Lecture 65 - Electrical Impedance analysis - Deliverables and Interpretation - Part 2

Lecture 66 - Electrochemical testing (Corrosion) using Electrochemical Impedance Spectroscopy (EIS) - Part 1

Lecture 67 - Electrochemical testing (Corrosion) using Electrochemical Impedance Spectroscopy (EIS) - Part 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Civil Engineering Profession (Civil Engineering)

Co-ordinators : Dr. Ravindra Gettu, Prof. Subhadeep Banerjee

Lecture 1 - What is Civil Engineering - Part 1

Lecture 2 - What is Civil Engineering - Part 2

Lecture 3 - Structural Conservation of Built Heritage

Lecture 4 - Introduction to Environmental Engineering

Lecture 5 - Interesting Environmental Projects

Lecture 6 - Hydraulic and Water Resources Engineering

Lecture 7 - Geotechnical Engineering

Lecture 8 - Construction Materials and Methods

Lecture 9 - Infrastructure Management

Lecture 10 - Structural Engineering - 1

Lecture 11 - Structural Engineering - 2

Lecture 12 - Structural Engineering - Analysis and Design

Lecture 13 - Structural Modeling

Lecture 14 - Scope for Highway Engineers in Civil Engineering Profession - 1

Lecture 15 - Scope for Highway Engineers in Civil Engineering Profession - 2

Lecture 16 - Introduction to Civil Engineering Profession

Lecture 17 - Hydrology and Water Security

Lecture 18 - An Overview of Computational Science and Engineering

Lecture 19 - Sustainability

Lecture 20 - The Big Picture

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Maintenance and Repair of Concrete Structures (Civil Engineering)

Co-ordinators : Prof. Radhakrishna G. Pillai

Lecture 1 - Prologue

Lecture 2 - Corrosion of embedded metal; Significance and fundamentals of corrosion

Lecture 3 - Corrosion of embedded metal; Carbonation-induced and chloride-induced corrosion

Lecture 4 - Corrosion of embedded metal; Types of reinforcement - Bare steels

Lecture 5 - TM - Ring Test For Assessing The Quality of TMT/QST Steel Rebars

Lecture 6 - Corrosion of embedded metal; Types of reinforcement - Metallic and non metallic coated rebars

Lecture 7 - Corrosion in prestressed concrete

Lecture 8 - Deterioration of cementitious systems - Introduction, sulphate attack, biofouling and acid attack

Lecture 9 - Deterioration of cementitious systems - frost attack, freeze-thaw and alkali-silica reaction

Lecture 10 - Deterioration of cementitious systems - Shrinkage and Creep

Lecture 11 - Deterioration of cementitious systems - Fire attack, abrasion and erosion

Lecture 12 - Condition assessment of concrete structures: Exposure conditions, visual inspection, on-site Concrete testing

Lecture 13 - Condition assessment of concrete structures: Testing of concerete in laboratory

Lecture 14 - Condition assessmennt of concrete structures; mechanical and corrosion testing of rebars

Lecture 15 - Strategies and materials for surface repair

Lecture 16 - Strategies and materials for surface repair

Lecture 17 - Strategies and materials for surface repair

Lecture 18 - Surface preparation and protective treatment

Lecture 19 - Surface preparation and Protective treatments

Lecture 20 - Surface preparation and Protective treatments

Lecture 21 - Surface preparation and Protective treatments

Lecture 22 - Surface preparation and Protective treatments

Lecture 23 - Coatings on concrete infrastructures

Lecture 24 - Waterproofing of concrete structures - 1

Lecture 25 - Waterproofing of concrete structures - 2

Lecture 26 - Structural Strengthening and Stabilization - Load effects and Introduction to S&S

Lecture 27 - Structural Strengthening and Stabilization - Beams and Slabs

Lecture 28 - Structural Strengthening and Stabilization - Columns and Walls

Lecture 29 - Structural strengthening - 4 (Joints and connections)

Lecture 30 - Injection Grouts for concrete repair

Lecture 31 - Structural repair of prestressed concrete systems

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Case studies on structural repair (Right methodologies and systematic approach / case studies)

Lecture 33 - Cathodic Protection in Concrete Structures - Laboratory and field studies

Lecture 34 - Service life estimation - 1

Lecture 35 - Service life estimation - 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Mechanical Characterization of Bituminous Materials (Civil Engineering)

Co-ordinators : Dr. J. Murali Krishnan, Prof. M. R. Nivitha, Prof. Neethu Roy, Prof. A. Padmarekha

Lecture 1 - Mechanical Characterization of Bituminous Materials-Introduction - Part 1

Lecture 2 - Mechanical Characterization of Bituminous Materials-Introduction - Part 2

Lecture 3 - Linear Viscoelastic Response - Part 1

Lecture 4 - Linear Viscoelastic Response - Part 2

Lecture 5 - Linear Viscoelastic Response - Part 3

Lecture 6 - Linear Viscoelastic Response - Part 4

Lecture 7 - Linear Viscoelastic Response - Part 5

Lecture 8 - Small Amplitude Oscillatory Shear - Part 1

Lecture 9 - Small Amplitude Oscillatory Shear - Part 2

Lecture 10 - Small Amplitude Oscillatory Shear - Part 3

Lecture 11 - Small Amplitude Oscillatory Shear - Part 4

Lecture 12 - Time temperature superposition principle - Part 1

Lecture 13 - Time temperature superposition principle - Part 2

Lecture 14 - Master curve models

Lecture 15 - Asphalt Usage and Processing - Part 1

Lecture 16 - Asphalt Usage and Processing - Part 2

Lecture 17 - Chemical composition of bitumen - Part 1

Lecture 18 - Chemical composition of bitumen - Part 2

Lecture 19 - Chemical composition of bitumen - Part 3

Lecture 20 - Chemical composition of bitumen - Part 4

Lecture 21 - Chemical composition of bitumen - Part 5

Lecture 22 - Aging of Bituminous Binders and Mixtures - Part I

Lecture 23 - Aging of Bituminous Binders and Mixtures - Part II

Lecture 24 - Aging of Bituminous Binders and Mixtures - Part III

Lecture 25 - Dynamic Shear Rheometer - Part I

Lecture 26 - Dynamic Shear Rheometer - Part II

Lecture 27 - Viscosity Grading - Part 1

Lecture 28 - Viscosity Grading - Part 2

Lecture 29 - Performance Grading - Part 1

Lecture 30 - Performance Grading - Part 2

Lecture 31 - PG-Theoretical Basis

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Low-temperature PG

Lecture 33 - Modifiers for Bitumen - Part 1

Lecture 34 - Modifiers for Bitumen - Part 2

Lecture 35 - Modifiers for Bitumen - Part 3

Lecture 36 - Modifiers for Bitumen - Part 4

Lecture 37 - Mixing and Compaction Temperature - Part 1

Lecture 38 - Mixing and Compaction Temperature - Part 2

Lecture 39 - Mixing and Compaction Temperature - Part 3

Lecture 40 - Dynamic Modulus of Bituminous Mixtures - Part 1

Lecture 41 - Dynamic Modulus of Bituminous Mixtures - Part 2

Lecture 42 - Resilient Modulus of Bituminous Mixtures - Part 1

Lecture 43 - Resilient Modulus of Bituminous Mixtures - Part 2

Lecture 44 - Rutting Characterisation - Different approaches

Lecture 45 - Dry Rut Wheel Testing of Bituminous Mixtures

Lecture 46 - Laboratory investigation for rutting of bituminous mixtures - Part 1

Lecture 47 - Laboratory investigation for rutting of bituminous mixtures - Part 2

Lecture 48 - Fatigue of Bituminous mixtures - Part 1

Lecture 49 - Fatigue of Bituminous mixtures - Part 2

Lecture 50 - Fatigue of Bituminous mixtures - Part 3

Lecture 51 - Fatigue of Bituminous mixtures - Part 4

Lecture 52 - Fatigue of Bituminous mixtures - Part 5

Lecture 53 - Introduction to curve fitting using Matlab - Part 1

Lecture 54 - Introduction to curve fitting using Matlab - Part 2

Lecture 55 - MSCR Analysis using Matlab

Lecture 56 - Summary

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Colloids and Surfaces (Chemical Engineering)

Co-ordinators : Prof. Basavaraj Madivala Gurappa

Lecture 1 - Introduction and motivation

Lecture 2 - Colloidal dispersions, terminology and classification

Lecture 3 - Stability in colloids

Lecture 4 - Source, synthesis and characterisation of colloids

Lecture 5 - Characterisation of colloidal particles - I

Lecture 6 - Characterisation of colloidal particles - II

Lecture 7 - Introduction to forces acting on an individual colloidal particle

Lecture 8 - Introduction to interaction between colloidal particles

Lecture 9 - Application of Brownian force: Measument of diffusivity and size

Lecture 10 - Radiation used to study colloidal systems

Lecture 11 - Radiation used to study colloidal systems

Lecture 12 - Molecular origin of Van der waals forces

Lecture 13 - Vanderwaal interactions between particles

Lecture 14 - Problem on scaling of Vanderwaal interactions

Lecture 15 - Calculation of Vanderwaal's forces between semi-infinite blocks and Hamaker constant - I

Lecture 16 - Calculation of Vanderwaal's forces between semi-infinite blocks and Hamaker constant - II

Lecture 17 - Theories of Vanderwaal forces based on bulk properties and calculation of Hamaker constant using bulk properties

Lecture 18 - Effect of medium on Vanderwaal's interactions - I

Lecture 19 - Effect of medium on Vanderwaal's interactions - II

Lecture 20 - Colloid Polymer mixtures

Lecture 21 - Colloid polymer mixtures: colloid-solvent interactions and colloid-polymer interactions

Lecture 22 - Colloid polymer mixtures: Depletion flocculation

Lecture 23 - Colloid polymer mixtures: Depletion stabilisation

Lecture 24 - Depletion interactions

Lecture 25 - Steric interactions/osmotic repulsion

Lecture 26 - Tutorial problem on depletion interactions

Lecture 27 - Colloidal Interactions: Introduction to electrostatic interactions/electrical double layer interactions

Lecture 28 - Introduction to models of electrical double layer: Helmholtz model/capacitor model

Lecture 29 - Review and summary of Helmholtz model (or capacitor model) of electrical double layer

Lecture 30 - Models of electrical double layer: Diffuse double layer model/Gouy-Chapman model

Lecture 31 - Potential distribution near planar surfaces: Derivation of the Poisson-Boltzmann equation

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Potential distribution near planar surfaces: Solution to the linearised Poisson-Boltzmann equation

Lecture 33 - Potential distribution near spherical surfaces: Solution to linearised Poisson-Boltzmann equation

Lecture 34 - Comparison of Capacitor model and Diffuse double layer model

Lecture 35 - Models of electrical double layer: Gouy Chapman Theory - I

Lecture 36 - Models of electrical double layer: Gouy Chapman Theory - II

Lecture 37 - Structure of Electrical double layer

Lecture 38 - Force of Repulsion between interacting surfaces

Lecture 39 - Potential Energy of repulsion between Planar double layers and DLVO Theory

Lecture 40 - Zeta Potential and Electrophoretic mobility of an ion

Lecture 41 - Electrokinetic Phenomena

Lecture 42 - Relation between Electrophoretic mobility and Zeta potential - I

Lecture 43 - Relation between Electrophoretic mobility and Zeta potential - II

Lecture 44 - Colloidal particles at interfaces:Introduction

Lecture 45 - Characterization of Particles at interface

Lecture 46 - Experimental Observations -Concept of Electrostatic interactions and Stability at interfaces

Lecture 47 - Implications from Surface energy balances and Estimation of energy required for detachment

Lecture 48 - Colloidal interactions at interface

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Polymers: Concepts, Properties, Uses and Sustainability (Chemical Engineering)

Co-ordinators : Dr. Abhijit P. Deshpande

Lecture 1 - Why are polymers so common?

Lecture 2 - Polymers: Molecular structure

Lecture 3 - Process, structure, property

Lecture 4 - Biopolymers

Lecture 5 - Molecular weight and distribution

Lecture 6 - Polymerization

Lecture 7 - Macromolecular nature

Lecture 8 - Renewable sources for polymers

Lecture 9 - Polymerization/depolymerization

Lecture 10 - States of interest

Lecture 11 - Application based terms

Lecture 12 - Reuse and repurpose

Lecture 13 - Molecular conformations

Lecture 14 - Size, mobility and flexibility

Lecture 15 - Polyelectrolytes

Lecture 16 - Structures in biopolymers

Lecture 17 - Amorphous/crystalline states - 1

Lecture 18 - Amorphous/crystalline states - 2

Lecture 19 - Orientation

Lecture 20 - Interactions

Lecture 21 - Kinetics of crystallization

Lecture 22 - Glass transition - 1

Lecture 23 - Glass transition - 2

Lecture 24 - States in environment

Lecture 25 - Liquid crystalline polymers

Lecture 26 - Copolymers - 1

Lecture 27 - Copolymers - 2

Lecture 28 - Blends - 1

Lecture 29 - Blends - 2

Lecture 30 - Microstructure in polymers

Lecture 31 - Composites

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Stress strain response

Lecture 33 - Additives for polymeric systems

Lecture 34 - Blends/composites in recycling

Lecture 35 - Physical/chemical crosslinking

Lecture 36 - Mechanical properties - I

Lecture 37 - Mechanical properties - II

Lecture 38 - Physical and chemical aging

Lecture 39 - Solutions: properties

Lecture 40 - Conducting polymers

Lecture 41 - Dielectric response - I

Lecture 42 - Dielectric response - II

Lecture 43 - Plasticity

Lecture 44 - Properties of composites

Lecture 45 - Viscoelasticity: introduction

Lecture 46 - Thermal response

Lecture 47 - Viscoelasticity: characterization

Lecture 48 - Viscoelasticity: simple models

Lecture 49 - Dynamic Mechanical analysis

Lecture 50 - Damping Applications

Lecture 51 - Time Temperature superposition

Lecture 52 - Impact and energy absorption

Lecture 53 - Testing for applications

Lecture 54 - Properties of blends

Lecture 55 - Biomimetic polymers

Lecture 56 - Advanced mechanics

Lecture 57 - Viscoelastic response: examples

Lecture 58 - Polymer packaging

Lecture 59 - Porous polymers/membranes

Lecture 60 - Polymer at interfaces

Lecture 61 - Diffusion in polymers

Lecture 62 - Compatibilizers

Lecture 63 - Biopolymer applications

Lecture 64 - Adhesives and Paints

Lecture 65 - Dissolution and recovery

Lecture 66 - Polymerization kinetics

Lecture 67 - Polymerization reactors

Lecture 68 - Polymer processing - I

Lecture 69 - Polymer processing - II

Lecture 70 - Polymer processing - III

Lecture 71 - Flow simulations

Lecture 72 - Processing for recycling

Lecture 73 - Recycle, up-down cycling - I

Lecture 74 - Recycle, up-down cycling - II

Lecture 75 - Flow behaviour - rheology

Lecture 76 - Crosslinking

Lecture 77 - Conversion of polymers

Lecture 78 - Rheology and entanglement

Lecture 79 - Rheological models

Lecture 80 - Rheology and processing

Lecture 81 - Absorption and leaching

Lecture 82 - Swelling of polymers

Lecture 83 - Viscosity for polymer processing

Lecture 84 - Microplastics, aerosols, sediments

Lecture 85 - Biodegradation of polymers

Lecture 86 - Biodegradable polymers - 1

Lecture 87 - Biodegradable polymers - 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Lean Construction (Civil Engineering)

Co-ordinators : Prof. Koshy Varghese, Prof. N Raghavan

Lecture 1 - Course Contents, Long-term Goals, Structure and Module 1 Topics

Lecture 2 - Pedagogy, Approach, Institutions, Instructors, Audience and Pre-requisites

Lecture 3 - ILCE, Conferences, Resources, Further Work Possible

Lecture 4 - Lean Implementation in India from ILCE Directors and other Talks/Testimonials

Lecture 5 - Status of Lean Implementation in India through Industry Panel Discussion with ILCE Directors

Lecture 6 - History of Lean and other Management Philosophies; Toyota Production System (TPS); What is Lean?

Lecture 7 - Lean Construction Timeline; Lean Project Delivery vs LC; Project Management vs LC

Lecture 8 - Key Lean Concepts#1 (Wastes)

Lecture 9 - Key Lean Concepts#1 (Value, Value Stream, Flow, Pull, Perfection)

Lecture 10 - Key Lean Concepts#2 (Continuous Improvement, Collaborative working, Production System, Lean Culture)

Lecture 11 - Key Lean Tools#1 (Productivity Measurement System, Work Sampling, Value Stream Mapping)

Lecture 12 - Lean Overview - Key Lean Tools#2 (5S, CPS/ LPS, Big Room Approach)

Lecture 13 - Lean Overview - Future module

Lecture 14 - Productivity Measurement and Improvement, Construction Productivtiy, Productivity levels

Lecture 15 - What is Productivity, Production?; Illustration

Lecture 16 - Productivity and Production Impact; Visualizing Activity Productivity and Production Performance

Lecture 17 - Profit, ROCE, Influences on Operational Productivity; Operational view vs. System view, Summary

Lecture 18 - Outline, Planning and monitoring levels; Productivity Measurement System

Lecture 19 - Measuring Output - Level of Effort (LOE)

Lecture 20 - Productivity and Production Calculations: daily, weekly, cumulative

Lecture 21 - Productivity and Production Calculations: Performance Evaluation

Lecture 22 - Productivity and Production Calculations: Workhour Forecast and Analysis of Trends

Lecture 23 - Factors Influencing Productivity, Productivity Improvement Approach, Summary

Lecture 24 - Sampling/ Surveying Techniques - Data Sources in Construction

Lecture 25 - Construction Activity with Workers doing VA/ NVAN/ NVA; WS vs PMS; Work Sampling

Lecture 26 - Sampling basics, Sampling in construction

Lecture 27 - Steps to Conduct a Work Sampling Study; WS Outcomes

Lecture 28 - Illustration of Tour-based Work Sampling Approach

Lecture 29 - Illustration of Crew-based Work Sampling Approach

Lecture 30 - Explore relationship between WS Categories and Productivity; Summary

Lecture 31 - Sampling/ Surveying Techniques - Foreman delay survey

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Sampling/ Surveying Techniques - Foreman delay survey - Implementation

Lecture 33 - Foreman delay survey - Illustrations; Comparison - PMS vs WS vs FDS - discussion

Lecture 34 - Value Stream, Value Stream Mapping (VSM), System vs Process, References

Lecture 35 - Illustration: Value and Value Stream in Food Delivery

Lecture 36 - Value, Value Stream, VSM/PM, Language, Basic VSM - current state and future state

Lecture 37 - Key steps for VSM, Work: Degrees of Granularity, Measurement Metrics

Lecture 38 - VSM - Example 1 (Reinforcement)

Lecture 39 - VSM - Example 2 (Blockwork); Summary

Lecture 40 - Flow Process Chart, Symbols, Process mapping - steps and timing, Measurement metrics

Lecture 41 - Process mapping - Illustration: Reinforcement shifting

Lecture 42 - VSM vs PM; Process Flow chart - variations; Swim-lane diagrams; Summary

Lecture 43 - Understand the Basics of 5S, Explanations and 5S Steps

Lecture 44 - Understand Each -S- in Detail - Sort, Set in Order, Shine

Lecture 45 - Understand Each -S- in Detail - Standardize, Sustain

Lecture 46 - 5S: Key Points, Benefits, Signs of a 5S Site

Lecture 47 - Experiment 5S with Yourself First, Project Implementation, Facilitations, Why 5S May Fail?, Recap

Lecture 48 - Understand the Applications of 5S through Case Studies_2 cases

Lecture 49 - Understand the Applications of 5S through Case Studies_3 cases

Lecture 50 - Understand the Applications of 5S through Case Study - Ms Diamond Barretto (Godrej Construction)

Lecture 51 - Current Project Performance, Workflow Variation, Traditional PM vs Lean Production Management

Lecture 52 - Some Key Lean Concepts, Focusing on frontline Execution, CPS - Collaborative Planning System

Lecture 53 - CPS Process, Overall Schedules (Master Schedule,Phase Schedule,LAP, Weekly Plan),Constraint Analysis

Lecture 54 - Collaborative -Pull- Planning, Percentage Plan Completed (PPC), Daily Huddle, Variance Analysis, RCA

Lecture 55 - Lean Work Structuring

Lecture 56 - Impact of PPC on Productivity, Key aspects,Advantages,The Necessary Conditions,Blocks - CPS,Summary

Lecture 57 - COLPLASSE: Look-Ahead Plan, Constraint Analysis, Weekly Plan, Summary

Lecture 58 - Lean Project Delivery System, Conclusion

Lecture 59 - Understand the Applications of CPS/LPS through Case Studies

Lecture 60 - CPS/LPS implementation in Construction Projects through a Panel of Experts - Part 1

Lecture 61 - CPS/LPS implementation in Construction Projects through a Panel of Experts - Part 2

Lecture 62 - CPS/LPS implementation in Construction Projects through a Panel of Experts - Part 3

Lecture 63 - Introduction of Big Room Approach, Some Requirements for Efficient Working, Virtual BR Meetings

Lecture 64 - Big Room Approach through Case Studies

Lecture 65 - Big Room Approach - Implementation case from URC Construction

Lecture 66 - Future Construction Site, Lean Tools and Processes, Automation strategies and impact, Programming

Lecture 67 - Document Management, Workflow Process, Communication/Collab./Authen., Sensing

Lecture 68 - Mechanisation/ Robots, Visualization, AI/ Analytics, BIM, CPS/ IOT/ Industry 4.0, Digital Twin

Lecture 69 - Challenges and Causes, Problem?, Lean, BIM?, Traditional vs BIM, Tools/Technology providers

Lecture 70 - BIM uses; Metrics

Lecture 71 - BIM and Lean, Implementation Framework, BIM Execution Plan, Evidence Cases, Key takeaway

Lecture 72 - How to Start Practicing Lean Tools in Project Sites-1: Work Sampling

Lecture 73 - How to Start Practicing Lean Tools in Project Sites-1: VSM

Lecture 74 - How to Start Practicing Lean Tools in Project Sites-1: 5S

Lecture 75 - How to Start Practicing Lean Tools in Project Sites-1: CPS/ LPS

Lecture 76 - How to Start Practicing Lean Tools in Project Sites-1: Big Room Approach

Lecture 77 - Acknowledgement

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Design of Connections in Steel Structures (Civil Engineering)

Lecture 1 - Bolts: dimensions and material

Lecture 2 - Bolts: installation techniques and clearances

Lecture 3 - Design of Bearing type bolts in shear: Basic design principle

Lecture 4 - Correction factors for bolts for long joints, long grip lengths, and thick packing plate

Lecture 5 - Design of friction grip bolts in shear and design of bolts in tension

Lecture 6 - Structural Welding Process

Lecture 7 - Groove/Butt Welds

Lecture 8 - Fillet Welds - 1

Lecture 9 - Fillet Welds - 2

Lecture 10 - Weld symbols, defects, and filler material

Lecture 11 - Design of groove welds

Lecture 12 - Design of fillet welds - 1

Lecture 13 - Design of fillet welds - 2

Lecture 14 - Design example of a bolt group

Lecture 15 - Design example of a weld group

Lecture 16 - Simple and rigid frame connections

Lecture 17 - Design of double angle connections

Lecture 18 - Design of seated angle connections

Lecture 19 - End-plate rigid connection: Introduction

Lecture 20 - End-plate connection: Design example

Lecture 21 - Welded-flange rigid connection

Lecture 22 - Ductile detailed beam-column connections - 1

Lecture 23 - Ductile detailed beam-column connections - 2

Lecture 41 - IRC design steps

Lecture 42 - Design Input and IITPAVE software

Lecture 43 - Pavement design with granular base

Lecture 44 - Pavement design with CTB

Lecture 45 - Pavement design with RAP Base

Lecture 46 - Overview of Mechanistic-Empirical Pavement Design Methods - IRC

Lecture 47 - Overview of Mechanistic-Empirical Pavement Design Methods - South Africa - Part I

Lecture 48 - Overview of Mechanistic-Empirical Pavement Design Methods - South Africa - Part II

Lecture 49 - Overview of Mechanistic-Empirical Pavement Design Methods - South Africa - Part III

Lecture 50 - Overview of Mechanistic-Empirical Pavement Design Methods - Australia - Part I

Lecture 51 - Overview of Mechanistic-Empirical Pavement Design Methods - Australia - Part II

Lecture 52 - Overview of Mechanistic-Empirical Pavement Design Methods - AASHTO - Part I

Lecture 53 - Overview of Mechanistic-Empirical Pavement Design Methods - AASHTO - Part II

Lecture 54 - Summary of the course and design projects

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:FEM and Constitutive Modelling in Geomechanics (Civil Engineering)

Co-ordinators : Prof. K Rajagopal

Lecture 1 - Introductory lecture and course outline

Lecture 2 - Matrix algebra and Gauss elimination method

Lecture 3 - Development of equilibrium equations for 1-d systems

Lecture 4 - Development of equilibrium equations for 2-d bar elements and truss structures

Lecture 5 - Development of equilibrium equations for beam elements

Lecture 6 - Virtual work and principle of stationary potential energy

Lecture 7 - Introduction to Rayleigh-Ritz Method

Lecture 8 - Use of GEOFEM finite element program - Part I

Lecture 9 - Use of GEOFEM finite element program - Part II

Lecture 10 - Stresses and strains in continuum

Lecture 11 - 2-dimensional approximations of continuum

Lecture 12 - Analysis of continuum systems

Lecture 13 - 3-node Constant Strain Triangle

Lecture 14 - Classical methods for developing shape functions

Lecture 15 - Numerical integration techniques

Lecture 16 - Isoparametric Elements - Part I

Lecture 17 - Isoparametric Elements - Part II

Lecture 18 - Isoparametric calculations for stiffness and load vectors

Lecture 19 - Force vector due to surface traction

Lecture 20 - Patch test and Finite Element Modelling

Lecture 21 - GEOFEM - Part III

Lecture 22 - In situ earth pressures, construction and excavation sequences

Lecture 23 - Joint and interface element modelling

Lecture 24 - Modelling of interfaces - Joint Elements

Lecture 25 - Mapped infinite elements for semi-infinite soil medium

Lecture 26 - Some observations of soil behaviour and stress invariants

Lecture 27 - Nonlinear analysis technique - 1

Lecture 28 - Nonlinear analysis technique - 2

Lecture 29 - Nonlinear analysis technique - 3

Lecture 30 - Bilinear elastic models

Lecture 31 - Nonlinear elastic and hyperbolic models

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Modified hyperbolic model and determination of material parameters

Lecture 33 - Stress correction procedures in finite element analysis

Lecture 34 - Numerical examples on working with modified hyperbolic models

Lecture 35 - Some Limit solutions in geotechnical engineering

Lecture 36 - Elastic - Plastic Constitutive Matrix

Lecture 37 - Nonassociated Elastic - Plastic Joint Element

Lecture 38 - Introduction to consolidation and dynamic analysis

Lecture 39 - Cam Clay models

Lecture 40 - Modified cam clay models

Lecture 41 - FEM in Geotechnical applications

Lecture 42 - Soil behaviour and An Introduction to the Existing Soil Models

Lecture 43 - Simulation of soil liquefaction using FLAC

Lecture 44 - Mitigation of soil liquefaction using granular columns

NPTEL : NOC:The Evolution of the Earth and life (Civil Engineering)

Co-ordinators : Prof. Devapriya Chattopadhyay

Lecture 1 - Course Structure

Lecture 2 - Introduction to Google Earth

Lecture 3 - How Does Earth Science Work ?

Lecture 4 - What is a Mineral

Lecture 5 - Minerals and Rock Cycle

Lecture 6 - Continental Drift

Lecture 7 - Plate Tectonics

Lecture 8 - What are Igneous Rocks ?

Lecture 9 - Compositional Variation of Igneous Rocks

Lecture 10 - Why Does the Rock Melt ?

Lecture 11 - Igneous Activity and Plate Tectonics

Lecture 12 - Igneous Structures

Lecture 13 - Volcanoes

Lecture 14 - Discussion on Posted Questions

Lecture 15 - What are Metamorphic Rocks

Lecture 16 - Types of Metamorphism

Lecture 17 - Metamorphism and Plate Tectonics

Lecture 18 - Weathering and Erosion

Lecture 19 - Detrital Sedimentary Rocks

Lecture 20 - Chemical and Organic Sedimentary Rocks

Lecture 21 - Sedimentary Environment and Plate Tectonics

Lecture 22 - Discussion on Conceptual Questions

Lecture 23 - Discussion on Posted Questions

Lecture 24 - Diversity of Life

Lecture 25 - Why Do Groups Change ?

Lecture 26 - Nature of Paleontological Data

Lecture 27 - Introduction to PaleoDB

Lecture 28 - Relative Age

Lecture 29 - Correlation

Lecture 30 - Attempts to Estimate Absolute Age

Lecture 31 - Radiometric Dating

Lecture 32 - Rocks Full of Life

Lecture 33 - Discussion on Posted Questions_3

Lecture 34 - The Beginning

Lecture 35 - The Formation of the Planets and Moon

Lecture 36 - The Formation of the Continents

Lecture 37 - The Formation of the Atmosphere and Ocean

Lecture 38 - Origin of Life: Initial Ideas

Lecture 39 - Origin of Life: Which Biomolecules Came First ?

Lecture 40 - Origin of Life: Where did it all Start ?

Lecture 41 - Evidence of Early Life

Lecture 42 - Proterozoic Events and Life

Lecture 43 - Discussion on Posted Questions_4

Lecture 44 - Cambrian Earth and Life

Lecture 45 - Cambrian Explosion

Lecture 46 - Journey to Land: Fishes and Tetrapods

Lecture 47 - Journey to Land: Transitional Forms

Lecture 48 - Appearance of Amniotes

Lecture 49 - Dinosaurs

Lecture 50 - Dinosaurs Footprints

Lecture 51 - Appearance of Feathers

Lecture 52 - Mass Extinctions and Their Impact

Lecture 53 - K-Pg Extinction: Patterns

Lecture 54 - K-Pg Extinction: Mechanisms

Lecture 55 - Paleoclimatic Reconstruction

Lecture 56 - Cenozoic Climate

Lecture 57 - Recovery from K-Pg: Paleogene Event

Lecture 58 - Who are Whales ?

Lecture 59 - Discussion on Posted Questions_5

Lecture 60 - Development of Bipedality

Lecture 61 - Early Hominids

Lecture 62 - Megafaunal Extinction

Lecture 63 - Recent Extinctions

Lecture 64 - Anthropocene and Future

Lecture 65 - Discussion on Posted Questions_6

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 4 - Comparison of Electrical and Hydraulic Properties

Lecture 5 - Array Advantages and Disadvantages - I

Lecture 6 - Electrical Resistivity Methods : Method of Field Operation, Electrical Profiling and Case Studies

Lecture 7 - Electrical Resistivity Methods : Vertical Electrical Sounding Methods

Lecture 8 - Electrical Resistivity Methods : Vertical Electrical Sounding Data interpretation Methods

Lecture 9 - Electrical Resistivity Methods : 3D Resistivity Tomography case study and Applications

Lecture 10 - Field Demonstration of Vertical Electrical Sounding

Lecture 11 - Application of VES and 3D Tomography for Identification of Seawater intrusion

Lecture 12 - Resistivity Methods for Estimation of Aquifer Properties

Lecture 13 - Expert Lectuer - Dr. V.Arulprakasam

Lecture 14 - Electrical Self Potential Method Introduction

Lecture 15 - Electrical Self Potential Method Field Procedure

Lecture 16 - Applications and Case studies - Self Potential method

Lecture 17 - Electrical Induced Polarization Method - 1

Lecture 18 - IP Time and Frequency Domain Methods

Lecture 19 - Electromagnetic Methods

Lecture 20 - Electromagnetic Method Field Demonstration

Lecture 21 - Expert Lectuers

Lecture 22 - Seismic Methods Introdcution

Lecture 23 - Seismic operation on land

Lecture 24 - Explosive Sources

Lecture 25 - Non-explosive Sources and Receiving Seismic Signals

Lecture 26 - Recording of Seismic Signals and Data Reduction

Lecture 27 - Seismic Method-Types : Refraction Method, Two layer case study

Lecture 28 - Refraction Method - Case study on Multi layer and Dipping layer

Lecture 29 - Borehole Seismics

Lecture 30 - Geophysics for tunneling and Dam Construction - Expert Lectuer by Dr Sanjay Rana - 1

Lecture 31 - Geophysics for tunneling and Dam Construction - Expert Lectuer by Dr Sanjay Rana - 2

Lecture 32 - Seismic Reflection Method

Lecture 33 - Seismic Reflection Applications and Case Studies - 1

Lecture 34 - Seismic Reflection Applications and Case Studies - 2

Lecture 35 - Expert Lectuer (Seismic Exploration) - Dr. N. Satyavani, NGRI

Lecture 36 - Multichannel Analysis of Surface Waves (MASW)

Lecture 37 - MASW - Case Studies

Lecture 38 - Expert Lectuer (MASW) - Dr.K. Satish Kumar, NGRI

Lecture 39 - Gravity Methods Introduction

Lecture 40 - Gravity Method Principle and Types of Gravity Measurements

Lecture 41 - Types of Gravimeters

Lecture 42 - Calibration and Drift Correction

Lecture 43 - Gravity data reduction or Correction - 1

Lecture 44 - Gravity data reduction or Correction - 2

Lecture 45 - Gravity Method (Interpretation) - Quantitative Methods

Lecture 46 - Gravity Method indirect interpretation

Lecture 47 - Gravity Method Application and Case Studies

Lecture 48 - Gravity Recovery and Climate Experiment (GRACE Mission)

Lecture 49 - GRACE - Case Studies

Lecture 50 - Magnetic Methods Introduction

Lecture 51 - Magnetometers

Lecture 52 - Interpretation and Case studies

Lecture 53 - Expert Lectuer - Prof.N. Sundararajan

Lecture 54 - Ground Penetrating Radar

Lecture 55 - GPR - Field Demonstration

Lecture 56 - Synthetic Aperture Radar (SAR)

Lecture 57 - Surface Nuclear Magnetic Resonance - 1

Lecture 58 - Surface Nuclear Magnetic Resonance - 2

Lecture 59 - Expert Lectuer - Dr. Pramod Kumar Sharma

Lecture 60 - Radioactive Methods

Lecture 61 - Geophysical Well Logging methods - I

Lecture 62 - Geophysical Well Logging Methods - II

Lecture 63 - Induction Log

Lecture 64 - Radiometric logging and applications

Lecture 65 - Other logging methods - Sonic, Caliper, Temperature

Lecture 66 - Fluid conductivity and NMR logging

Lecture 67 - Bore Hole Camera and Summary of Logging methods

Lecture 68 - Answers to the Questions

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Stability Aspects of Structural Steel Design: Concepts and Applications (Civil Engineering)

Co-ordinators : Prof. Mahendrakumar Madhavan

Lecture 1 - Introduction to Stability - 1

Lecture 2 - Introduction to Stability - 2

Lecture 3 - Introduction to Stability - 3

Lecture 4 - Introduction to Stability - 4

Lecture 5 - Classical Column Theory - 1

Lecture 6 - Classical Column Theory (Continued...)

Lecture 7 - Martix Method of Solving stability problems

Lecture 8 - Martix Method of Solving stability problems (Continued...)

Lecture 9 - Inelastic bucking theories of column

Lecture 10 - Shanley's Theory

Lecture 11 - Imperfect Columns

Lecture 12 - Residual Stresses and its effects on column design curves

Lecture 13 - Perry Robertson approach

Lecture 14 - European multiple column curves

Lecture 15 - American column curves

Lecture 16 - Introduction to beams

Lecture 17 - Solution for Uniform torsion or St.Venant's torsion

Lecture 18 - Torsional constant for open sections

Lecture 19 - Torsional constant for closed sections

Lecture 20 - Solution for Non-Uniform torsion or Vlasov's torsionv

Lecture 21 - Elastic critical moment for simply supprted beam subjected to unifrm bending using differential mthd

Lecture 22 - Solution for elastic critical moment of simply supported beam subjected to uniform bending using

Lecture 23 - Solution for elastic critical moment of simply supported beam subjected to non-uniform bending

Lecture 24 - Solution for elastic critical moment of simply supported beam subjected to concentrated load at

Lecture 25 - Elastic critical moment for fixed ended beam subjected to uniform bending

Lecture 26 - Critical loads for a cross-section under axial compression

Lecture 27 - Problem solving on Torsion

Lecture 28 - Problem solving on Beams

Lecture 29 - Deriving Von Karman's partial differential equation for thin plates

Lecture 30 - Strain energy method for obtaining critical stress for plates

Lecture 31 - Strain energy method for obtaining critical stress for plates under different loading conditions

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Generic equations for elastic plate buckling coefficient, k

Lecture 33 - Development of width-to-thickness ratio limits

Lecture 34 - Concept of post critical buckling

Lecture 35 - Deriving the effective width of a plate under uniform compression as per AISI S100

Lecture 36 - Problem solving: Effective Width Method (EWM)

Lecture 37 - Tension Field Action in Plate girder - An application of post-critical buckling in thin plates

Lecture 38 - Deriving the design equations in IS 800:2007 for Simple post-critical method and Tension field method

Lecture 39 - Design of a plate girder-A design example - Part 1

Lecture 40 - Design of a plate girder-A design example - Part 2

Lecture 41 - Curved plate girders: An overview of fabrication and construction

Lecture 42 - Importance of steel structures

NPTEL : Foundation Engineering (Civil Engineering)

Lecture 63 - Enhanced Aquifer Flushing Technologies

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Global Navigation Satellite Systems and Applications (Civil Engineering)

Co-ordinators : Prof. Arun K. Saraf

Lecture 1 - Introduction to Global Navigation Satellite System (GNSS)

Lecture 2 - How position is determined by the GNSS? - Part I

Lecture 3 - How position is determined by the GNSS? - Part II

Lecture 4 - How position is determined by the GNSS? - Part III

Lecture 5 - NAVSTAR - Global Positioning System

Lecture 6 - Global Navigation Satellite System (GLONASS)

Lecture 7 - BeiDou Navigation Satellite System (BDS)

Lecture 8 - Indian Regional Navigation Satellite System (IRNSS)

Lecture 9 - GALILEO

Lecture 10 - Quasi-Zenith Satellite System (QZSS)

Lecture 11 - Differential Global Navigation Satellite System (DGNSS)

Lecture 12 - Real-Time Kinematic (RTK)

Lecture 13 - Satellite Based Augmentation System (SBAS)

Lecture 14 - GNSS Errors

Lecture 15 - GNSS Correction Methods

Lecture 16 - Why altitude estimated by GNSS receivers is not very accurate

Lecture 17 - Global Navigation Satellite Systems (GNSS) Applications - I

Lecture 18 - Global Navigation Satellite Systems (GNSS) Applications - II

Lecture 19 - GNSS: Current Trends and Future

Lecture 20 - GNSS: Opportunities in India

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Geomorphology (Civil Engineering)

Co-ordinators : Prof. Pitambar Pati

Lecture 1 - Introduction to Geomorphology and Concept of Time Scale in a Geomorphic System

Lecture 2 - Process of Landform Development

Lecture 3 - Energy Flow in Geomorphic System and Role of Uniformitarianism Vs Catastrophism

Lecture 4 - Landform Development - Equilibrium and Evolution

Lecture 5 - Process Geomorphology - I

Lecture 6 - Process Geomorphology - II

Lecture 7 - Weathering and soil Formation Introduction - I

Lecture 8 - Weathering and soil Formation Introduction - II

Lecture 9 - Weathering and Soil Formation (Types of Weathering)

Lecture 10 - Weathering and Soil Formation (Mechanical Weathering)

Lecture 11 - Weathering and Soil Formation (Mechanical and Chemical Weathering)

Lecture 12 - Weathering and Soil Formation (Chemical and Biological Weathering)

Lecture 13 - Weathering of Silicate rocks and Weathering Products

Lecture 14 - Factors of Weathering

Lecture 15 - Soil Formation

Lecture 16 - Soil Formation Processes

Lecture 17 - Soil Classification

Lecture 18 - Mass Wasting

Lecture 19 - Classification of Mass Wasting - I

Lecture 20 - Classification of Mass Wasting - II

Lecture 21 - Hill Slope Evolution - I

Lecture 22 - Hill Slope Evolution - II

Lecture 23 - Arid Zone Geomorphology

Lecture 24 - Landforms in Dry Region

Lecture 25 - Pediment Evolution

Lecture 26 - Aeolian Processes and Landforms - I

Lecture 27 - Aeolian Processes and Landforms - II

Lecture 28 - Wind Erosional Landforms - I

Lecture 29 - Wind Erosional Landforms - II

Lecture 30 - Dune Classification - I

Lecture 31 - Dune Classification - II

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Coastal Geomorphology - I

Lecture 33 - Coastal Geomorphology and Landforms

Lecture 34 - Coastal Geomorphology - II

Lecture 35 - Coastal Geomorphology - III

Lecture 36 - Shoreline Platform

Lecture 37 - Coastal Geomorphology - IV

Lecture 38 - Coastal Geomorphology - V

Lecture 39 - Coastal Geomorphology - VI

Lecture 40 - Coastal Geomorphology - VII

Lecture 41 - Coastal Geomorphology - VIII

Lecture 42 - Coastal Geomorphology - IX

Lecture 43 - Tectonic Geomorphology

Lecture 44 - Fluvial Process

Lecture 45 - Fluvial Process - I

Lecture 46 - Fluvial Process - II

Lecture 47 - Fluvial Process - III

Lecture 48 - Fluvial Process - IV

Lecture 49 - Fluvial Process - V and Drainage Analysis

Lecture 50 - Fluvial Process - VI and Drainage Analysis

Lecture 51 - Fluvial Geomorphology River System - I

Lecture 52 - Fluvial Geomorphology River System - II

Lecture 53 - Glacial Geomorphology - I

Lecture 54 - Glacial Geomorphology - II (Valley Glacier)

Lecture 55 - Glacial Geomorphology - III

Lecture 56 - Glacial Geomorphology - IV (Geomorphic Changes by Glacier)

Lecture 57 - Exploration Geomorphology in Oil field Sandbody Geometry - I

Lecture 58 - Exploration Geomorphology in Oil Field Sandbody Geometry - II

Lecture 59 - Seismic Geomorphology - I

Lecture 60 - Seismic Geomorphology - II

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Remote Sensing Essentials (Civil Engineering)

Co-ordinators : Dr.Arun K.Saraf

Lecture 1 - Rudiments of Remote Sensing and Advantages

Lecture 2 - Historical Perspective of development of remote sensing technology

Lecture 3 - EM spectrum, solar reflection and thermal emission

Lecture 4 - Interaction of EM radiation with atmosphere including atmospheric scattering, absorption and emission

Lecture 5 - Interaction mechanisms of EM radiation with ground, spectral response curves

Lecture 6 - Laws of Radiation and their relevance in Remote Sensing

Lecture 7 - Basis of remote sensing image representation

Lecture 8 - Various Remote Sensing Platforms

Lecture 9 - Multi-spectral scanners and imaging devices

Lecture 10 - Significant characteristics of LANDSAT, SPOT, Sentinel sensors

Lecture 11 - Prominent characteristics of IRS, Cartosat, ResourceSat sensors

Lecture 12 - Unmanned Aerial Vehicle/Drone

Lecture 13 - Passive Microwave Remote Sensing

Lecture 14 - Image characteristics and different resolutions in Remote Sensing

Lecture 15 - Different techniques of Image acquisition

Lecture 16 - Importance of digital image processing

Lecture 17 - Digital Image Processing Software

Lecture 18 - Basic image enhancement techniques

Lecture 19 - Colour representations and transformtions

Lecture 20 - Image Histograms and statistics

Lecture 21 - Atmospheric errors and corrections

Lecture 22 - Geometric transformations/Geo-referencing Technique

Lecture 23 - Digital Image Processing Software Demonstration - 1

Lecture 24 - Image enhancement techniques - 1

Lecture 25 - Image enhancement techniques - 2

Lecture 26 - Digital Image Processing Software Demonstration - 2

Lecture 27 - Spatial Filtering Techniques, Band rationing and PCA

Lecture 28 - Frequency Doman Fourier Transformation

Lecture 29 - Digital Image Processing Software Demonstration - 3

Lecture 30 - Unsupervised image classification and density slicing techniques

Lecture 31 - Supervised image classification techniques and limitations

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Digital Image Processing Software Demonstration - 4

Lecture 33 - LiDAR Technique and applications

Lecture 34 - Mosaicking, subsets, sub-sampling techniques and applications

Lecture 35 - False Topographic Phenomena and correction techniques - 1

Lecture 36 - False Topographic Phenomena and correction techniques - 2

Lecture 37 - High Spatial Resolution Satellite Images and limitations

Lecture 38 - Basic Image Compression techniques and different image file formats

Lecture 39 - Hyperspectral Remote Sensing

Lecture 40 - Digital Image vs Digital Photograph

Lecture 41 - NDVI and other indices

Lecture 42 - Active Microwave Remote Sensing - 1

Lecture 43 - Active Microwave Remote Sensing - 2

Lecture 44 - Radar Images interpretation and applications

Lecture 45 - SAR Interferometry (InSAR) Technique - 1

Lecture 46 - SAR Interferometry (InSAR) Technique - 2

Lecture 47 - Principles of image interpretation

Lecture 48 - Image interpretation of different geological landforms, rock types and structures

Lecture 49 - Remote Sensing of Moon and Mars

Lecture 50 - Google Earth and its Applications

Lecture 51 - Integrated applications of RS and GIS in groundwater studies - 1

Lecture 52 - Integrated applications of RS and GIS in groundwater studies - 2

Lecture 53 - Applications of Remote Sensing in Earthquake Studies - 1

Lecture 54 - Applications of Remote Sensing in Earthquake Studies - 2

Lecture 55 - Different sources of free satellite images

Lecture 56 - Limitations of Remote Sensing Techniques

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Earthquake Resistant Design of Foundations (Civil Engineering)

Co-ordinators : Prof. B. K. Maheshwari

Lecture 1 - Introduction

Lecture 2 - Shallow Foundations: General Requirements

Lecture 3 - Shallow Foundations: Bearing Capacity

Lecture 4 - Shallow Foundations: Settlement

Lecture 5 - Shallow Foundations: Numerical Examples

Lecture 6 - Combined Footings

Lecture 7 - Raft Foundations: General Requirements

Lecture 8 - Raft Foundations: Methods of Analysis

Lecture 9 - Footings under Dynamic Loads: Eccentric and Inclined Loads, A New Method

Lecture 10 - Footings under Dynamic Loads: Design Procedure and Example on a New Method

Lecture 11 - Footings under Dynamic Loads: Analytical Approaches

Lecture 12 - Footings under Dynamic Loads: Numerical on Analytical Approaches

Lecture 13 - Pile Foundations subjected to Static Vertical Load

Lecture 14 - Pile Foundations: Group Action of Piles and Numerical

Lecture 15 - Pile Foundations under Lateral Loads: Conventional and Elastic Methods

Lecture 16 - Pile Foundations under Lateral Loads: Elastic Method for Cohesionless Soils

Lecture 17 - Pile Foundations under Lateral Loads: Elastic Method for Cohesive Soils including degradation of modulus of subgrade reaction (k)

Lecture 18 - Pile Foundations under Lateral Loads: Numerical Examples

Lecture 19 - Dynamic Analysis of Piles under Vertical and Horizontal Vibrations

Lecture 20 - Dynamic Analysis of Piles under Horizontal Vibration: Continue with Numerical Example

Lecture 21 - Seismic Response of Pile Foundations - 1

Lecture 22 - Seismic Response of Pile Foundations - 2

Lecture 23 - Combined Pile-Raft Foundations (CPRF) - General

Lecture 24 - Geotechnical and Seismic Analyses of CPRF

Lecture 25 - Design of Piles in Liquefiable Soils - 1

Lecture 26 - Design of Piles in Liquefiable Soils - 2

Lecture 27 - Introduction to Well Foundations

Lecture 28 - Lateral Stability of Well Foundations

Lecture 29 - Lateral Stability, Construction and Sinking of Well Foundation

Lecture 30 - Titling and Shifting of Wells, Numerical Problems

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Introduction to Soil-Structure Interaction

Lecture 32 - Effects of Soil-Structure Interaction

Lecture 33 - SGM and Wave Propagation

Lecture 34 - Dispersion, Attenuation of Waves and Damping

Lecture 35 - Ground Response Analysis (GRA)

Lecture 36 - Soil-Pile Interaction (SPI)

Lecture 37 - Raft Foundations â€“ Numerical Examples

Lecture 38 - Foundations on Slopes - 1

Lecture 39 - Foundations on Slopes - 2

Lecture 40 - Codal Provisions

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Geographic Information Systems (Civil Engineering)

Co-ordinators : Prof. Arun K. Saraf

Lecture 1 - What is Geographic Information Systems ?

Lecture 2 - Essential Components of GIS

Lecture 3 - Different types of vector data

Lecture 4 - Concept of topology

Lecture 5 - Demonstration through GIS software

Lecture 6 - Raster data model and comparisons with vector

Lecture 7 - TIN data model and comparisons with raster

Lecture 8 - Non-spatial data (attributes) and their types

Lecture 9 - Vector data compression techniques

Lecture 10 - Demonstration through GIS software

Lecture 11 - Raster data compression techniques - 1

Lecture 12 - Raster data compression techniques - 2

Lecture 13 - Georeferencing

Lecture 14 - Pre-processing of spatial datasets - 1

Lecture 15 - Demonstration through GIS software

Lecture 16 - Pre-processing of spatial datasets - 2

Lecture 17 - Pre-processing of spatial datasets - 3

Lecture 18 - Spatial Interpolation Techniques - 1

Lecture 19 - Spatial Interpolation Techniques - 2

Lecture 20 - GIS ANALYSIS - 1

Lecture 21 - GIS Analysis - 2

Lecture 22 - GIS Analysis - 3

Lecture 23 - GIS Analysis - 4

Lecture 24 - GIS Analysis - 5

Lecture 25 - Demonstration through GIS software

Lecture 26 - GIS Analysis - 6

Lecture 27 - GIS Analysis - 7

Lecture 28 - Attributes Classification Methods

Lecture 29 - Special database systems and their types - 1

Lecture 30 - Demonstration through GIS software

Lecture 31 - Spatial database systems and their types - 2

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Concept of NoData in Raster

Lecture 33 - Different map projections

Lecture 34 - Concept of digital elevation model (DEM) and how it is represented

Lecture 35 - Demonstration through GIS software

Lecture 36 - Various techniques to generate digital elevation model - 1

Lecture 37 - Various techniques to generate digital elevation model - 2

Lecture 38 - Various techniques to generate digital elevation model - 3

Lecture 39 - Digital Elevation Models and different types of resolutions

Lecture 40 - Demonstration through GIS software

Lecture 41 - How to assess quality of a DEM?

Lecture 42 - Integration of DEMs with satellite data

Lecture 43 - Demonstration through GIS software...

Lecture 44 - Common derivatives of DEMs - Slope and aspect - 1

Lecture 45 - Common derivatives of DEMs - Slope and aspect - 2

Lecture 46 - Common derivatives of DEMs - Slope and aspect - 3

Lecture 47 - Demonstration through GIS software

Lecture 48 - DEMs derivatives - 1

Lecture 49 - DEMs derivatives - 2

Lecture 50 - DEMs derivatives - 3

Lecture 51 - DEMs derivatives - 4

Lecture 52 - Shaded relief models and their applications

Lecture 53 - DEM based Surface Hydrologic Modelling - 1

Lecture 54 - DEM based Surface Hydrologic Modelling - 2

Lecture 55 - DEMs and Dam Simulation and its application in groundwater hydrology

Lecture 56 - Applications of DEMs in Viewshed and Flood Hazard Mapping

Lecture 57 - Applications of DEMs in solar and wind energy potential estimations

Lecture 58 - DEMs Sources, limitations and future of Digital Elevation Models

Lecture 59 - Errors in GIS and key elements of maps

Lecture 60 - Limitations of GIS

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Water and Waste Water Treatment (Civil Engineering)

Co-ordinators : Prof. Bhanu Prakash Vellanki

Lecture 1 - Importance of water and wastewater treatment

Lecture 2 - Life expectancy and real-world scenario

Lecture 3 - Course outline

Lecture 4 - Review of fundamentals

Lecture 5 - Mass balance

Lecture 6 - Mass Balance: Batch reactor, CSTR, and Plug flow reactors

Lecture 7 - Mass balance: Comparison of CSTR and Plug flow reactor

Lecture 8 - Mass Balance: Non ideal system and Water quality parameters

Lecture 9 - Water quality: DO and ways to measure it

Lecture 10 - Water quality: Nutrients in water

Lecture 11 - Water quality: Total suspended solids and Pathogens

Lecture 12 - Wastewater treatment plant: basic principals

Lecture 13 - Wastewater treatment plant: Preliminary treatment

Lecture 14 - Wastewater treatment plant: Sedimentation and basics

Lecture 15 - Sedimentation: Discrete and Flocculant settling

Lecture 16 - Design of primary settling tank

Lecture 17 - Biological treatment: BOD and Nutrient removal

Lecture 18 - Analysis of biological removal process(ASP)

Lecture 19 - Activated sludge process: Material balance for aeration basin

Lecture 20 - Oxygen transfer: types and basic principals

Lecture 21 - Relevance of F/M ratio and Design Parameters of Activated Sludge Process

Lecture 22 - Sludge Bulking and Activated Sludge Variations

Lecture 23 - Sequencing Batch Reactor

Lecture 24 - Nitrogen Removal - I

Lecture 25 - Nitrogen Removal - II and Phosphorus Removal - I

Lecture 26 - Phosphorus Removal - II

Lecture 27 - Secondary Clarifiers and Attached Growth System

Lecture 28 - Disinfection

Lecture 29 - Chlorination Disinfection

Lecture 30 - Disinfection By-products (DBPs) and Disinfectant Removal

Lecture 31 - Water demand

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Water Quality Parameters

Lecture 33 - Overview of Water Treatment

Lecture 34 - Physico-Chemical treatment

Lecture 35 - Coagulation - I

Lecture 36 - Coagulation - II

Lecture 37 - Rapid Mixing

Lecture 38 - Flocculation - I

Lecture 39 - Flocculation - II

Lecture 40 - Flocculent settling

Lecture 41 - Filtration

Lecture 42 - Depth filtration

Lecture 43 - Design of Sand filter and Surface filtration

Lecture 44 - Disinfection

Lecture 45 - Hardness - I

Lecture 46 - Hardness - II

Lecture 47 - Lime-Soda softening - I

Lecture 48 - Lime-Soda softening - II

Lecture 49 - Recarbonation

Lecture 50 - Types of Softening Basin and Adsorption

Lecture 51 - Adsorption

Lecture 52 - Adsorption Isotherms

Lecture 53 - Ion Exchange

Lecture 54 - Nanofiltration and RO

Lecture 55 - Aeration: Removal of Fe and Mn

Lecture 56 - Residual Management

Lecture 57 - Sludge Thickening

Lecture 58 - Stabilization of Sludge

Lecture 59 - Anaerobic and Aerobic digestion of sludge

Lecture 60 - Conditioning, Dewatering and Disposal of Sludge

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Rock Engineering (Civil Engineering)

Co-ordinators : Prof. Priti Maheshwari

Lecture 1 - Introduction

Lecture 2 - Minerals and Rock Classes

Lecture 3 - Mineral Identification Procedure

Lecture 4 - Rock Identification Procedure

Lecture 5 - Geological Structures and Discontinuities

Lecture 6 - Spherical Representation of Geological Data - 1

Lecture 7 - Spherical Representation of Geological Data - 2

Lecture 8 - Spherical Representation of Geological Data - 3

Lecture 9 - Application of Graphical Representation of Geological Data

Lecture 10 - Laboratory Testing of Rocks - Sampling

Lecture 11 - Laboratory testing of Rocks - Preperations and UCS

Lecture 12 - Factors Influencing UCS and Modes of Failure in Compression

Lecture 13 - Failure Mechanism and Post-Failure Behaviour in Compression, Indirect Method for UCS

Lecture 14 - Indirect Method for UCS, Brazilian Test, Schnidt Rebound Hardness Test

Lecture 15 - Sound Velocity Test, Slake Durability Test, Swelling Pressure and Free Swell Test and Void Index Test

Lecture 16 - Shear Tests - 1

Lecture 17 - Shear Tests - 2

Lecture 18 - Engineering Classification of Intact Rocks, Concept of Rock Mass, RQD

Lecture 19 - Concept of Rock Mass, Factors Affecting Discontinuities

Lecture 20 - Factors Affecting Discontinuities

Lecture 21 - Classification of Rock Mass: Rock Mass Rating (RMR) - 1

Lecture 22 - Classification of Rock Mass: Rock Mass Rating (RMR) - 2

Lecture 23 - Classification of Rock Mass: Rock Mass Quality (Q-system) - 1

Lecture 24 - Classification of Rock Mass: Rock Mass Quality (Q-system) - 2

Lecture 25 - Classification of Rock Mass: Geological Strength Index (GSI)

Lecture 26 - Strength Criteria for Isotropic and Anisotropic Rock - 1

Lecture 27 - Strength Criteria for Isotropic and Anisotropic Rocks -2, Mohrâ€™s Failure Theory

Lecture 28 - Mohr-Coulomb Failure Criterion

Lecture 29 - Mohr-Coulomb Failure Criterion, Coulomb Navier Failure Criterion

Lecture 30 - Concept of Instantaneous c and Ï†: Balmer Approach

Lecture 31 - Empirical Failure Criteria: Basics of Regression Analysis

Lecture 49 - Air Pollution Legislations and Regulations

Lecture 50 - National Policies for Managing the Ambient Air Quality (AAQ)

Lecture 51 - International Environmental Treaties to Reduce Air Pollution and GHG Emissions

Lecture 52 - Impact of Lockdown on Air Quality

Lecture 53 - Sector Wise Mitigation Measures to Control Air Pollution

Lecture 54 - Challenges and the Way Forward

Lecture 55 - Sampling and Analysis of PM10 in Ambient Air

Lecture 56 - Sampling and Analysis of PM2.5 in Ambient Air

Lecture 57 - Sampling and Analysis of SO2 and NO2 in Ambient Air

Lecture 58 - Stack Emission Monitoring using Isokinetic Sampling

Lecture 59 - Indoor Air Quality Assessment using Multi Gas Monitor

Lecture 60 - Sampling and Analysis of PM10 and PM2.5 using Spectrometer

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Underground Space Technology (Civil Engineering)

Co-ordinators : Prof. Priti Maheshwari

Lecture 1 - Basics of Rock Engineering: Introduction

Lecture 2 - Basics of Rock Engineering: coring, sampling, UCS of intact rock

Lecture 3 - Basics of Rock Engineering: Tensile strength and shear strength of intact rock

Lecture 4 - Basics of Rock Engineering: Classification of intact rocks, concept of rock mass, RQD

Lecture 5 - Basics of Rock Engineering: Classification of rock mass - 1

Lecture 6 - Basics of Rock Engineering: Classification of rock mass: Q-system and GSI

Lecture 7 - Basics of Rock Engineering: Failure criteria for rocks - 1

Lecture 8 - Basics of Rock Engineering: Empirical failure criteria

Lecture 9 - Tunneling: Underground excavations

Lecture 10 - Tunneling: Ground conditions

Lecture 11 - Planning of and exploration for underground construction projects

Lecture 12 - Underground excavation failure mechanisms

Lecture 13 - Application of stereographic projection method: roof failure

Lecture 14 - Application of stereographic projection method: sidewall failures - 1

Lecture 15 - Application of stereographic projection method: sidewall failures - 2

Lecture 16 - Elastic stress distribution around circular tunnels - 1

Lecture 17 - Elastic stress distribution around circular tunnels - 2

Lecture 18 - Elastic analysis of circular tunnels-displacements

Lecture 19 - Thick wall cylinder in biaxial stress field

Lecture 20 - Stress distribution around non-circular openings in elastic ground conditions - 1

Lecture 21 - Stress distribution around non-circular openings in elastic ground conditions - 2

Lecture 22 - Stress distribution under different in-situ stress conditions: design principles

Lecture 23 - Stress distribution for multiple openings

Lecture 24 - Openings in laminated rocks - 1

Lecture 25 - Openings in laminated rocks - 2

Lecture 26 - Openings in laminated rocks - 3

Lecture 27 - Openings in laminated rocks - 4

Lecture 28 - Elasto-plastic analysis of tunnels: Tresca yield criterion - 1

Lecture 29 - Elasto-plastic analysis of tunnels: Tresca yield criterion - 2

Lecture 30 - Elasto-plastic analysis of tunnels: Mohr-Coulomb criterion

Lecture 31 - Application of rock mass classification system: TerzaghiÃ¢s rock load theory - 1

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Application of rock mass classification system: TerzaghiÃ¢s rock load theory - 2

Lecture 33 - Application of rock mass classification system: rock mass rating (RMR)

Lecture 34 - Tunnel hazards

Lecture 35 - Tunnel hazards: squeezing ground conditions

Lecture 36 - Application of rock mass classification system: rock mass quality system - 1

Lecture 37 - Application of rock mass classification system: rock mass quality system - 2, NATM, NMT

Lecture 38 - Modulus of deformation of rock mass using Q-system, rock mass number, plate loading test

Lecture 39 - Modulus of deformation of rock mass: uni-axial jacking/plate jacking test

Lecture 40 - Modulus of deformation of rock mass: radial jacking test and Goodman jack test

Lecture 41 - Rock mass support interaction analysis: ground response and support reaction curves - 1

Lecture 42 - Rock mass support interaction analysis: ground response and support reaction curves - 2

Lecture 43 - Rock mass support interaction analysis: influencing factors, LadanyiÃ¢s E-P analysis

Lecture 44 - LadanyiÃ¢s elasto-plastic analysis of tunnels: analysis of stresses and deformations

Lecture 45 - Rock-support interaction analysis: required support line, analysis of available support

Lecture 46 - Rock-support interaction analysis: for shotcrete/concrete lining and blocked steel sets

Lecture 47 - Rock-support interaction analysis: for ungrouted rock bolts, grouted rock bolts/cables

Lecture 48 - Calculation sequence for rock-support interaction analysis - 1

Lecture 49 - Calculation sequence for rock-support interaction analysis - 2

Lecture 50 - Calculation sequence for rock-support interaction analysis - example

Lecture 51 - Methods of tunnel excavation, various support systems: shotcrete

Lecture 52 - Shotcrete

Lecture 53 - Various support systems: rock bolts

Lecture 54 - Permeability and groutability - 1

Lecture 55 - Permeability and groutability - 2

Lecture 56 - Rock stress determination: flat jack test

Lecture 57 - Rock stress determination: hydraulic fracturing technique

Lecture 58 - Instrumentation and monitoring of tunnels - 1

Lecture 59 - Instrumentation and monitoring of tunnels - 2

Lecture 60 - Few case studies

Lecture 47 - Virahanka Numbers - Part 2 : Recursive Program

Lecture 48 - Virahanka Numbers - Part 3 : Iterative Program and Conclusion

Lecture 49 - Program Organization and Functions - Part 1 : Introduction

Lecture 50 - Program Organization and Functions - Part 2 : Splitting into files

Lecture 51 - Program Organization and Functions - Part 3 : Namespaces

Lecture 52 - Program Organization and Functions - Part 4 : How to use C++ without simplecpp

Lecture 53 - Advanced Features of Functions - Part 1 : Introduction and passing one function to another

Lecture 54 - Advanced Features of Functions - Part 2 : Lambda expressions

Lecture 55 - Advanced Features of Functions - Part 3 : Default values to parameters

Lecture 56 - Advanced Features of Functions - Part 4 : Function overloading and lecture conclusion

Lecture 57 - Array Part-1 - Part 1 : Introduction

Lecture 58 - Array Part-1 - Part 2 : Marks averaging problem

Lecture 59 - Array Part-1 - Part 3 : Histogram computation

Lecture 60 - Array Part-1 - Part 4 : Marks display variation

Lecture 61 - Array Part-1 - Part 5 : Polynomial multiplication

Lecture 62 - Array Part-1 - Part 6 : Queues in dispatching taxis

Lecture 63 - Array Part-1 - Part 7 : More efficient Queues in dispatching taxis

Lecture 64 - Array Part-1 - Part 8 : Disk intersection

Lecture 65 - Array Part-1 - Part 9 : Arrays of graphical objects and conclusion

Lecture 66 - Array Part-2 - Part 1 : Introduction

Lecture 67 - Array Part-2 - Part 2 : Interpretation of aname[index]

Lecture 68 - Array Part-2 - Part 3 : Arrays and function calls

Lecture 69 - Array Part-2 - Part 4 : A function to sort an array

Lecture 70 - More on Arrays - Part 1 : Textual data

Lecture 71 - More on Arrays - Part 2 : Functions on character strings

Lecture 72 - More on Arrays - Part 3 : Two dimensional arrays

Lecture 73 - More on Arrays - Part 4 : Command Line Arguments

Lecture 74 - Arrays and recursion - Part 1 : Binary Search Introduction

Lecture 75 - Arrays and recursion - Part 2 : Binary search analysis

Lecture 76 - Arrays and recursion - Part 3 : Mergesort overview

Lecture 77 - Arrays and recursion - Part 4 : Merge function

Lecture 78 - Arrays and recursion - Part 5 : Mergesort conclusion

Lecture 79 - Structures - Part 1 : Definition and instantiation

Lecture 80 - Structures - Part 2 : Operations on structures

Lecture 81 - Structures - Part 3 : An example program

Lecture 82 - Structures - Part 4 : Pointers and lecture conclusion

Lecture 83 - Structures Part 2 - Part 1 : Introduction to Member functions

Lecture 84 - Structures Part 2 - Part 2 : Vectors from Physics

Lecture 85 - Structures Part 2 - Part 3 : Taxi dispatch

Lecture 86 - Classes - Part 1 : Introduction

Lecture 87 - Classes - Part 2 : Constructors

Lecture 88 - Classes - Part 3 : Operator overloading

Lecture 89 - Classes - Part 4 : Access control

Lecture 90 - Classes - Part 5 : Classes for graphics and input output

Lecture 91 - Classes - Part 6 : General remarks

Lecture 92 - Representing variable length entities - Part 1 : Introduction

Lecture 93 - Representing variable length entities - Part 2 : Heap memory basics

Lecture 94 - Representing variable length entities - Part 3 : Pitfalls of using heap memory

Lecture 95 - Representing variable length entities - Part 4 : Automating memory management

Lecture 96 - Representing variable length entities - Part 5 : Implementing a class with automated memory management - 1

Lecture 97 - Representing variable length entities - Part 6 : Implementing a class with automated memory management - 2

Lecture 98 - Representing variable length entities - Part 7 : Using the implemented class and conclusion

Lecture 99 - The Standard Library - Part 1 : Class string

Lecture 100 - The Standard Library - Part 2 : Class vector

Lecture 101 - The Standard Library - Part 3 : Sorting vectors and arrays

Lecture 102 - The Standard Library - Part 4 : Classes map and unordered_map

Lecture 103 - The Standard Library - Part 5 : Iterators

Lecture 104 - Data structure based programming - Part 1 : Introduction

Lecture 105 - Data structure based programming - Part 2 : Set and pair classes

Lecture 106 - Data structure based programming - Part 3 : Implementation of standard library data structures

Lecture 107 - Data structure based programming - Part 4 : Composing data structures

Lecture 108 - Data structure based programming - Part 5 : typedef and lecture conclusion

Lecture 109 - Medium size programs - Part 1 : The new marks display program

Lecture 110 - Medium size programs - Part 2 : Manual algorithm for new marks display

Lecture 111 - Medium size programs - Part 3 : RSMTAB and rest of the program

Lecture 112 - Medium size programs - Part 4 : Sophisticated solutions to marks display

Lecture 113 - A graphical editor and solver for circuits - Part 1 : Outline

Lecture 114 - A graphical editor and solver for circuits - Part 2 : Main program and organization

Lecture 115 - A graphical editor and solver for circuits - Part 3 : Mathematical representation of the circuit

Lecture 116 - A graphical editor and solver for circuits - Part 4 : Extensions and concluding remarks

Lecture 117 - Cosmological simulation - Part 1 : Introduction and First order Euler method

Lecture 118 - Cosmological simulation - Part 2 : Second order Euler method

Lecture 119 - Cosmological simulation - Part 3 : The program

Lecture 120 - Cosmological simulation - Part 4 : Concluding remarks

Lecture 26 - Range Searching : Introduction

Lecture 27 - Orthogonal Range searching

Lecture 28 - Priority Search Trees

Lecture 29 - Non - Orthogonal Range Searching

Lecture 30 - Half - Plane Range Query

Lecture 31 - Well Separated Partitioning

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Quadtrees Epsilon -WSPD

Lecture 33 - Construction of Epsilon - WSPD

Lecture 34 - Epsilon - WSPD to Geometric Spanner

Lecture 35 - Epsilon-Nets & VC Dimension

Lecture 36 - Epsilon-Nets & VC Dimension contd

Lecture 37 - Geometric Set Cover

Lecture 38 - Geometric Set Cover (with Bounded VC Dimension)

Lecture 39 - Shape Representation

Lecture 40 - Shape Comparison

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Logic for CS (Computer Science and Engineering)

Co-ordinators : Prof. S. Arun Kumar

Lecture 1 - Introduction

Lecture 2 - Propositional Logic Syntax

Lecture 3 - Semantics of Propositional Logic

Lecture 4 - Logical and Algebraic Concepts

Lecture 5 - Identities and Normal forms

Lecture 6 - Tautology Checking

Lecture 7 - Propositional Unsatisfiability

Lecture 8 - Analytic Tableaux

Lecture 9 - Consistency and Completeness

Lecture 10 - The Completeness Theorem

Lecture 11 - Maximally Consistent Sets

Lecture 12 - Formal Theories

Lecture 13 - Proof Theory : Hilbert-style

Lecture 14 - Derived Rules

Lecture 15 - The Hilbert System : Soundness

Lecture 16 - The Hilbert System : Completeness

Lecture 17 - Introduction to Predicate Logic

Lecture 18 - The Semantic of Predicate Logic

Lecture 19 - Subsitutions

Lecture 20 - Models

Lecture 21 - Structures and Substructures

Lecture 22 - First-Order Theories

Lecture 23 - Predicate Logic: Proof Theory (Continued...)

Lecture 24 - Existential Quantification

Lecture 25 - Normal Forms

Lecture 26 - Skalemization

Lecture 27 - Substitutions and Instantiations

Lecture 28 - Unification

Lecture 29 - Resolution in FOL

Lecture 30 - More on Resolution in FOL

Lecture 31 - Resolution : Soundness and Completeness

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Resolution and Tableaux

Lecture 33 - Completeness of Tableaux Method

Lecture 34 - Completeness of the Hilbert System

Lecture 35 - First-Order Theories

Lecture 36 - Towards Logic Programming

Lecture 37 - Verification of Imperative Programs

Lecture 38 - Verification of WHILE Programs

Lecture 39 - References

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Computer Architecture (Prof. Anshul Kumar) (Computer Science and Engineering)

Co-ordinators : Prof. Anshul Kumar

Lecture 1 - Introduction to Computer Architecture

Lecture 2 - History of Computers

Lecture 3 - Instruction Set Architecture - I

Lecture 4 - Instruction Set Architecture - II

Lecture 5 - Instruction Set Architecture - III

Lecture 6 - Recursive Programs

Lecture 7 - Architecture Space

Lecture 8 - Architecture Examples

Lecture 9 - Performance

Lecture 10 - Performance

Lecture 11 - Binary Arithmetic, ALU Design

Lecture 12 - ALU Design, Overflow

Lecture 13 - Multiplier Design

Lecture 14 - Divider Design

Lecture 15 - Fast Addition , Multiplication

Lecture 16 - Floating Point Arithmetic

Lecture 17 - Processor Design - Introduction

Lecture 18 - Processor Design

Lecture 19 - Processor Design - Simple Design

Lecture 20 - Processor Design - Multi Cycle Approach

Lecture 21 - Processor Design - Control for Multi Cycle

Lecture 22 - Processor Design - Micro programmed Control

Lecture 23 - Processor Design - Exception Handling

Lecture 24 - Pipelined Processor Design Basic Idea

Lecture 25 - Pipelined Processor Design: Data path

Lecture 26 - Pipelined Processor Design: Handling Data

Lecture 27 - Pipelined Processor Design

Lecture 28 - Memory Hierarchy : Basic Idea

Lecture 29 - Memory Hierarchy : Cache Organization

Lecture 30 - Memory Hierarchy : Cache Organization

Lecture 31 - Memory Hierarchy : Virtual Memory

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Memory Hierarchy : Virtual Memory

Lecture 33 - Input / Output Subsystem: Introduction

Lecture 34 - Input / Output Subsystem: Interfaces and buses

Lecture 35 - Input / Output Subsystem: Interfaces and buses

Lecture 36 - Input / Output Subsystem: I/O Operations

Lecture 37 - Input / Output Subsystem: Designing I/O Systems

Lecture 38 - Concluding Remarks

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Data Structures And Algorithms (Computer Science and Engineering)

Co-ordinators : Prof. Naveen Garg

Lecture 1 - Introduction to Data Structures and Algorithms

Lecture 2 - Stacks

Lecture 3 - Queues and Linked Lists

Lecture 4 - Dictionaries

Lecture 5 - Hashing

Lecture 6 - Trees

Lecture 7 - Tree Walks / Traversals

Lecture 8 - Ordered Dictionaries

Lecture 9 - Deletion

Lecture 10 - Quick Sort

Lecture 11 - AVL Trees

Lecture 12 - AVL Trees

Lecture 13 - Trees

Lecture 14 - Red Black Trees

Lecture 15 - Insertion in Red Black Trees

Lecture 16 - Disk Based Data Structures

Lecture 17 - Case Study: Searching for Patterns

Lecture 18 - Tries

Lecture 19 - Data Compression

Lecture 20 - Priority Queues

Lecture 21 - Binary Heaps

Lecture 22 - Why Sorting

Lecture 23 - More Sorting

Lecture 24 - Graphs

Lecture 25 - Data Structures for Graphs

Lecture 26 - Two Applications of Breadth First Search

Lecture 27 - Depth First Search

Lecture 28 - Applications of DFS

Lecture 29 - DFS in Directed Graphs

Lecture 30 - Applications of DFS in Directed Graphs

Lecture 31 - Minimum Spanning Trees

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - The Union

Lecture 33 - Prims Algorithm for Minimum Spanning Trees

Lecture 34 - Single Source Shortest Paths

Lecture 35 - Correctness of Dijkstras Algorithm

Lecture 36 - Single Source Shortest Paths

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Introduction to Computer Graphics (Computer Science and Engineering)

Co-ordinators : Prof. Prem K Kalra

Lecture 1 - Introduction

Lecture 2 - Raster Graphics

Lecture 3 - Raster Graphics (Continued...)

Lecture 4 - Clipping

Lecture 5 - Polygon Clipping and Polygon Scan Conversion

Lecture 6 - Transformations

Lecture 7 - Transformations (Continued...)

Lecture 8 - 3D Viewing

Lecture 9 - 3D Viewing (Continued...)

Lecture 10 - Curves

Lecture 11 - Assignment - I

Lecture 12 - Curves (Continued...)

Lecture 13 - Curves (Continued...)

Lecture 14 - Curves (Continued...)

Lecture 15 - Curves (Continued...)

Lecture 16 - Surfaces

Lecture 17 - Surfaces (Continued...)

Lecture 18 - Surfaces (Continued...)

Lecture 19 - Surfaces (Continued...)

Lecture 20 - Hierarchical Models

Lecture 21 - Rendering

Lecture 22 - Rendering (Continued...)

Lecture 23 - Rendering (Continued...)

Lecture 24 - Ray Tracing

Lecture 25 - Ray Tracing (Continued...)

Lecture 26 - Ray Tracing (Continued...)

Lecture 27 - Assignment: Ray Tracing

Lecture 28 - Hidden Surface Elimination

Lecture 29 - Hidden Surface Elimination (Continued...)

Lecture 30 - Hidden Surface Elimination (Continued...)

Lecture 31 - Fractals

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Fractals (Continued...)

Lecture 33 - Computer Animation

Lecture 34 - Animation (Continued...)

Lecture 35 - Animation (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Principles of Programming Languages (Computer Science and Engineering)

Co-ordinators : Prof. S. Arun Kumar

Lecture 1 - Introduction

Lecture 2 - Syntax

Lecture 3 - Grammars

Lecture 4 - Ambiguity

Lecture 5 - PLO:Syntax

Lecture 6 - Semantics

Lecture 7 - Syntactic Classes

Lecture 8 - Transition Systems

Lecture 9 - PL0 : Expressions

Lecture 10 - Binding

Lecture 11 - Environments

Lecture 12 - Declarations

Lecture 13 - Commands

Lecture 14 - Stores

Lecture 15 - Summary

Lecture 16 - Declarations and Commands

Lecture 17 - Blocks

Lecture 18 - Qualification

Lecture 19 - Pragmatics

Lecture 20 - Data

Lecture 21 - Structured Data

Lecture 22 - Sequences

Lecture 23 - Control

Lecture 24 - Non-Determinacy

Lecture 25 - Programming Languages

Lecture 26 - Programming Languages

Lecture 27 - Programming Languages

Lecture 28 - Data as Functions

Lecture 29 - Data and Fixpoints
