Lecture 4 - Language and Linguistics

Lecture 5 - Aspects of Language

Lecture 6 - Language of Continuum

Lecture 7 - I-Language and E-Language

Lecture 8 - Language Acquisition

Lecture 9 - Learning and Acquisition

Lecture 10 - Structure of Language (Sounds)

Lecture 11 - Vocal Apparatus and Salient Features of Sounds

Lecture 12 - Places and Manners of Articulations of Sounds

Lecture 13 - Phonotactic Rules and Word Formation

Lecture 14 - Making of a Word: Rules and Constraints

Lecture 15 - What Makes a Sentence?

Lecture 16 - Components of a Sentence

Lecture 17 - Grammaticality vs Acceptability

Lecture 18 - Subject and Predicate

Lecture 19 - Verb and Object

Lecture 20 - Phrase Structure

Lecture 21 - X Bar Theory

Lecture 22 - Specifier and Complement

Lecture 23 - Complements and Adjuncts

Lecture 24 - Components of a Verb Phrase

Lecture 25 - Categories and Selectional Restrictions on Verbs

Lecture 26 - Thematic Relations

Lecture 27 - Concept of Case in Natural Language

Lecture 28 - Morphological and Abstract Case

Lecture 29 - Structural Case

Lecture 30 - Exceptional Case Marking

Lecture 31 - Movement (Displacement of Constituents) in Natural Language

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Motivation for Movement of Language Constituents

Lecture 33 - Movement of Constituents in Interrogative Sentences

Lecture 34 - Displacement of Noun Phrases in Passive Constructions

Lecture 35 - NP Movement and Raising of Constituents

Lecture 36 - Noun Phrase Interpretations in Binding Theory

Lecture 37 - Principles of Binding Theory

Lecture 38 - Constraints on Displacement of Constituents

Lecture 39 - Negation in the Structure of Language

Lecture 40 - Negation and Negative Polarity Items in Natural Language

Lecture 41 - Understanding Cognition and Pragmatics in the Structure of Language

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Globalization: Theoretical Perspectives (Humanities and Social Sciences)

Co-ordinators : Prof. R. Santhosh

Lecture 1 - Introduction to the Course

Lecture 2 - Globalization - Key Debates - 1

Lecture 3 - Globalization - Key Debates - 2

Lecture 4 - What is Globalization?

Lecture 5 - Globalization - Major Players

Lecture 6 - Cultural Globalization

Lecture 7 - Cultural Globalization - Introduction II

Lecture 8 - The Clash of Civilizations?

Lecture 9 - The Cultural Construction of Neoliberal Globalization

Lecture 10 - McDonaldization thesis by George Ritzer

Lecture 11 - Arjun Appadurai

Lecture 12 - Arjun Appadurai - II

Lecture 13 - Production of Localities - Arjun Appadurai

Lecture 14 - Appadurai on Violence

Lecture 15 - Rooted Cosmopolitanism: Emerging From a Rivalry of Distinctions

Lecture 16 - Globalization and modernity debate

Lecture 17 - Globalization and modernity: Anthony Giddens the consequences of modernity

Lecture 18 - Globalization and modernity: Anthony Giddens the consequences of modernity (Continued...)

Lecture 19 - Globalization and modernity: Anthony Giddens the consequences of modernity (Continued...)

Lecture 20 - Giddens : Consequences of Modernity Globalization : Key Thinkers by William Jones

Lecture 21 - Giddens and the 'runaway world'

Lecture 22 - David Harvey : Conditions of Postmodernity

Lecture 23 - Reflexive Modernity : Ulrich Beck -1

Lecture 24 - Continuation of Reflexive Modernity : Ulrich Beck - 1

Lecture 25 - Continuation of Reflexive Modernity : Ulrich Beck - 1

Lecture 26 - Space, time, place and flows David Harvey, Saskia Sassen and Manuel Castells

Lecture 27 - Time-Space Compression: David Harvey

Lecture 28 - Saskia Sassen and Spatiality

Lecture 29 - The city: localizations of the global: Saskia Sassen

Lecture 30 - Manuel Castells: Introduction

Lecture 31 - Manuel Castells: Theory of Space and Flows

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Manuel Castells: Time of Flows

Lecture 33 - Castells : Information Age

Lecture 34 - Globalized Space Centres Cities - Solly Benjamin

Lecture 35 - Globalized Space Centres Cities - Solly Benjamin

Lecture 36 - Ulrich Beck- The Nation-state and Globalizaation - Part I

Lecture 37 - Ulrich Beck- The Nation-state and Globalizaation - Part II

Lecture 38 - Ulrich Beck- The Risk Society - Part I

Lecture 39 - Ulrich Beck- The Risk Society - Part II

Lecture 40 - Ulrich Beck- The Risk Society - Part III

Lecture 41 - Anti-Globalization: The Empire Thesis - Part I

Lecture 42 - Anti-Globalization: The Empire Thesis - Part II

Lecture 43 - Globalization and its Discontents: Joseph Stigiliz

Lecture 44 - Imaginations of Alternate Globalization - Part I

Lecture 45 - Imaginations of Alternate Globalization - Part II

Lecture 46 - Globalization and the Environment

Lecture 47 - Media and Global Culture

Lecture 48 - Religion and Globalization - Part I

Lecture 49 - Religion and Globalization - Part II

Lecture 50 - Religion and Globalization - Part III

Lecture 51 - The Modernity of caste and the Market Economy - Part I

Lecture 52 - The Modernity of caste and the Market Economy - Part II

Lecture 53 - Gender, Dowry and the Migration System of Indian IT professionals

Lecture 54 - Employment, Exclusion and 'Merit' in the Indian IT Industry

Lecture 55 - Medical Tourism in India: Progress or Predicament?

Lecture 56 - Globalisation, Class and Work in India

Lecture 57 - The New Middle class and Employment

Lecture 58 - Consuming Goa: Tourist site as Dispensable Space

Lecture 59 - The regional identity politics of India's new land wars: Land, Food and Popular Mobilisation in Goa and West Bengal

Lecture 60 - Conclusion

NPTEL : NOC:Appreciating Hindustani Music (Humanities and Social Sciences)

Co-ordinators : Prof. Lakshmi Sreeram

Lecture 1 - Hindustani Music - A World of Colour, Romance and History

Lecture 2 - Classical or Shastriya - What's in a Name!

Lecture 3 - Dhrupad, Khayal and Instrumental Music: A Bird's-eye View

Lecture 4 - Hindustani Music is Raga Sangeet

Lecture 5 - The Textual Tradition

Lecture 6 - Swara and Shruti: Tone and Microtone

Lecture 7 - Swara and Shruti in the Textual Tradition

Lecture 8 - Tanpura - The King of Overtones

Lecture 9 - Entering the World of Raga - Raga and Swara

Lecture 10 - The World of Raga-2: Strong and Weak Notes

Lecture 11 - The World of Raga-3: Ornament

Lecture 12 - The World of Raga-4: Paths of a Raga

Lecture 13 - Raga and Time Association

Lecture 14 - Raga-Lakshana or Features of Raga

Lecture 15 - Defining Raga

Lecture 16 - Classification of Ragas - The Mela or Thaat System

Lecture 17 - Classification of Ragas - The Raagaanga System

Lecture 18 - Classification of Ragas - Raga Ragini System

Lecture 19 - Extending the Raga Corpus - Winds from the South

Lecture 20 - Extending the Raga Corpus - Jod Ragas

Lecture 21 - Principles of Time in Hindustani Music - Tala and Laya

Lecture 22 - Some Aspects of Tala and a Few Important Talas

Lecture 23 - Tabla as Keeper of Tala in Khayal

Lecture 24 - Khayal, A Compositional Form - 1

Lecture 25 - Khayal, A Compositional Form - 2

Lecture 26 - Khayal Compositions by Contemporary Composers

Lecture 27 - The Vilambit Khayal

Lecture 28 - Tarana and Trivat

Lecture 29 - Raga Vistaar or Badhat - Improvisation in Khayal

Lecture 30 - Ashtaanga of Khayal - The Many Limbs of a Khayal Presentation

Lecture 31 - A Typical Khayal Concert

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Gharanas - Schools/Styles of Khayal

Lecture 33 - Gharanas of Khayal - An Introduction

Lecture 34 - Gharanas of Khayal - Early Masters

Lecture 35 - Gharanas of Khayal - Twentieth Century Masters

Lecture 36 - Lectuer Demonstration by Pt.Sathyasheel Deshpande

Lecture 37 - Melodic Accompaniment in Khayal

Lecture 38 - The Harmonium as Accompaniment for Khayal-Guest Lectuer

Lecture 39 - Dhrupad and Khayal - Some Comparative Remarks

Lecture 40 - Dhrupad - An Overview

Lecture 41 - Dhrupad - Style and Structure

Lecture 42 - Dhrupad - Aalaap

Lecture 43 - Dhrupad - Song Texts in Different Talas

Lecture 44 - Dhamaar - A Compositional Form

Lecture 45 - Sadra - A Compositional Form

Lecture 46 - The Enchanting World of Thumri

Lecture 47 - Instrumental Music - A Brief Overview

Lecture 48 - The Sitar - The Instrument, Technique and Presentation

Lecture 49 - The Sarod - A Lecdem

Lecture 50 - Art of the Tabla - Introduction

Lecture 51 - Art of the Tabla - The Instrument, Its Vocabulary and Diverse Roles

Lecture 52 - Art of the Tabla - Gharanas and Repertoire: Peshkaar and Quaaidaa

Lecture 53 - Art of the Tabla - Gharanas and Repertoire: Qaaidaa, Relaa, Gat, Tukdaa

Lecture 54 - Art of the Tabla - Non Extendable Compositions

Lecture 55 - Bhakthande and Paluskar - The 20th Century Reformers of Hindustani Music

Lecture 56 - Hindustani Music in a World of Millions of Views

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:An Introduction to Indian Literary Theory (Humanities and Social Sciences)

Co-ordinators : Prof. Sreenath V.S

Lecture 1 - The Social History of Sanskrit and the Origin of KÃ„vya

Lecture 2 - The RÃ„mÃ„yaÃ¡Â¹â€¡a and Sanskrit Literary Theory

Lecture 3 - The Genesis and Evolution of Sanskrit Literary Theory

Lecture 4 - The Actual Relation Between KÃ„vyaÃ…â€ºÃ„stra or KÃ„vya

Lecture 5 - Sanskrit KÃ„vyaÃ…â€ºÃ„stra in the Medieval Period

Lecture 6 - Sanskrit Literary Theoreticians - Early Period

Lecture 7 - Sanskrit Literary Theoreticians - Medieval Period A

Lecture 8 - Sanskrit Literary Theoreticians - Medieval Period B

Lecture 9 - Sanskrit Literary Theory in the Colonial Period

Lecture 10 - Sanskrit poetics in the Postcolonial Phase

Lecture 11 - Reader in Sanskritic kÃ„vya tradition

Lecture 12 - Who is the ideal spectator for nÃ„Ã¡Â¹Âya?

Lecture 13 - DaÃ…â€ºarÃ…Â«paka: Ten dramatic forms - Part I

Lecture 14 - DaÃ…â€ºarÃ…Â«paka: Ten dramatic forms - Part II

Lecture 15 - UparÃ…Â«pakas

Lecture 16 - KÃ„vya and the Three Languages

Lecture 17 - KÃ„vyasvarÃ…Â«pa or the Ontology of Poetry

Lecture 18 - Bharata and the Idea of Rasa

Lecture 19 - The Beginning of Rasa Discourse in Literary Theory

Lecture 20 - Rasa Theory and Ã„â,¬nandavardhana

Lecture 21 - Rasa Theory and BhaÃ¡Â¹ÂÃ¡Â¹Â LollaÃ¡Â¹Âa

Lecture 22 - Rasa Theory and Ã…Å¡ri Ã…Å¡aÃ¡Â¹â€¦kuka

Lecture 23 - Rasa Theory and BhaÃ¡Â¹ÂÃ¡Â¹Âa Tauta

Lecture 24 - Rasa Theory and BhaÃ¡Â¹ÂÃ¡Â¹Âa NÃ„yaka

Lecture 25 - Rasa Theory and Abhinavagupta

Lecture 26 - Rasa Theory, RÃ„macandra and GuÃ¡Â¹â€¡acandra

Lecture 27 - Rasa Theory and VidyÃ„dhara

Lecture 28 - The Theory of Alamkara

Lecture 29 - The Concept of Aucitya: An Introduction

Lecture 30 - The Concept of Aucitya and KÃ¡Â¹Â£emendra

Lecture 31 - Two Ways of Implementing Aucitya - Part 1

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Two Ways of Implementing Aucitya - Part 2

Lecture 33 - Aucitya and KaviÃ…â€ºikÃ¡Â¹Â£a

Lecture 34 - Aucitya and the Readers

Lecture 35 - Aucitya and the Opinion of Literary Theoreticians

Lecture 36 - Aucitya and Ã„â,¬nandavardhana

Lecture 37 - Guna or Poetic Merit: Bharata and Bhamaha

Lecture 38 - Guna or Poetic Merit: DaÃ¡Â¹â€¡Ã¡Â¸in and UdbhaÃ¡Â¹Âa

Lecture 39 - Guna or Poetic Merit: VÃ„man's Contribution

Lecture 40 - Guna or Poetic Merit: Ã„â,¬nandavardhana, NamidÃ„shu and PratihÃ„renduraja

Lecture 41 - Guna or Poetic Merit: Bhoja

Lecture 42 - Guna or Poetic Merit: ViÃ…â€ºveÃ…â€ºvara and the author of AgnipurÃ„Ã¡Â¹â€¡a

Lecture 43 - Guna or Poetic Merit: MammaÃ¡Â¹Â's View

Lecture 44 - RÃ„Â«ti or the Theory of Poetic Styles

Lecture 45 - Theory of Dosa or Poetic Blemish: Bharat's View

Lecture 46 - Theory of DoÃ¡Â¹Â£a or Poetic Blemish: BhÃ„mah's View

Lecture 47 - Theory of DoÃ¡Â¹Â£a or Poetic Blemish: DaÃ¡Â¹â€¡dinÃ¢â,¬â„¢s View

Lecture 48 - Theory of DoÃ¡Â¹Â£a or Poetic Blemish: VÃ„man's View

Lecture 49 - Theory of DoÃ¡Â¹Â£a or Poetic Blemish: Ã„â,¬nandavardhana and MammaÃ¡Â¹Â's Views

Lecture 50 - Theory of DoÃ¡Â¹Â£a or Poetic Blemish: MammaÃ¡Â¹Â's View II

Lecture 51 - Theory of DoÃ¡Â¹Â£a or Poetic Blemish: Ã„â,¬nandavardhana and MammaÃ¡Â¹Â's View III

Lecture 52 - Vakrokti: An Introduction

Lecture 53 - Vakrokti: Pada-pÃ…Â«rvÃ„rtha-vakrata - I

Lecture 54 - Vakrokti: Pada-pÃ…Â«rvÃ„rtha-vakrata - II

Lecture 55 - Vakrokti: Pada-pÃ…Â«rvÃ„rtha-vakrata - III

Lecture 56 - Vakrokti: PadaparÃ„rddha vakratÃ„

Lecture 57 - Vakrokti: VÃ„kya-vakratÃ„

Lecture 58 - Vakrokti: PrakaraÃ¡Â¹â€¡a-vakratÃ„

Lecture 59 - Vakrokti: Prabandha vakratÃ„

Lecture 60 - Dhvani: AvivakÃ¡Â¹Â£ita-vÃ„cya

Lecture 61 - VivakÃ¡Â¹Â£itÃ„nya-paravÃ„cya

NPTEL : NOC:Host-Pathogen Interaction (Immunology) (Humanities and Social Sciences)

Co-ordinators : Prof. Himanshu Kumar

Lecture 1 - History of Immunology - 1

Lecture 2 - History of Immunology - 2

Lecture 3 - History of Immunology - 3

Lecture 4 - History of Immunology - 4 (Nobel Prizes in Immunology)

Lecture 5 - Branches of Immunology

Lecture 6 - An Introduction of Immune system-immunity properties

Lecture 7 - An Introduction of Immune system-link between innate and adaptive immunity

Lecture 8 - An Introduction of immune organs

Lecture 9 - Immune organs - 1

Lecture 10 - Immune organs - 2

Lecture 11 - Immune organs - 3

Lecture 12 - Cells of Immune System - Hematopoiesis

Lecture 13 - Cells of Immune System - Transgenesis - 1

Lecture 14 - Cells of Immune System - Transgenesis - 2

Lecture 15 - Cells of Immune System and and its role in Host Defense - PBMC isolation

Lecture 16 - Cells of Immune System and and its role in Host Defense - Neutrophils

Lecture 17 - Cells of Immune System and and its role in Host Defense - Eosinophils, Basophils, Mast cells

Lecture 18 - Cells of Immune System and and its role in Host Defense - Dendritic cells

Lecture 19 - Cells of Immune System and and its role in Host Defense - Macrophages

Lecture 20 - Cells of Immune System and and its role in Host Defense - Natural Killer cells and NK T cells

Lecture 21 - Cells of Immune System and and its role in Host Defense - B and T cells

Lecture 22 - Basics of Cytokines

Lecture 23 - Basics of Cytokines-Cytokine function and other Immune Mediators

Lecture 24 - Inflammation and Signature of Inflammation

Lecture 25 - Signatures of Inflammation

Lecture 26 - Application of Interferons in Therapies

Lecture 27 - Application of Cytokines in Therapies and Research

Lecture 28 - Introduction of Innate Immunity

Lecture 29 - Introduction of Innate Immunity - Physical, Bio-chamical and Microbiological Barriers

Lecture 30 - Introduction of Innate Immunity - skin

Lecture 31 - Introduction of Innate Immunity - Mucosal Surfaces and Microbiological Barrier

Lecture 32 - Concept of Pattern - recognition receptors (PRRs)

Lecture 33 - Pattern-recognition receptors - TLRs and TLR Ligand

Lecture 34 - Pattern-recognition receptors - TLRs Signaling and MyD88 and TRIF-dependent signalling

Lecture 35 - Pattern-recognition receptors - TLRs and Diseases

Lecture 36 - Pattern-recognition receptors - TLRs and Therapeutics

Lecture 37 - Pattern-recognition receptors - RLR

Lecture 38 - Pattern-recognition receptors - RLR Signaling pathways

Lecture 39 - Pattern-recognition receptors - RLR associated-Diseases and therapeutics

Lecture 40 - Pattern-recognition receptors - NLR and NLR Signaling pathways

Lecture 41 - Pattern-recognition receptors - NLR and Diseases

Lecture 42 - Pattern-recognition receptors - Discovery of DNA Sensor

Lecture 43 - Pattern-recognition receptors - DNA Sensor and Signaling pathway

Lecture 44 - Pattern-recognition receptors - DNA Sensor and Diseases

Lecture 45 - Innate Immunity - Complement Introduction

Lecture 46 - Complement - Classical Pathway

Lecture 47 - Complement - Alternative and Lectin Pathway

Lecture 48 - Complement - Regulation and Diseases

Lecture 49 - Introduction to the adaptive Immunity

Lecture 50 - Adaptive Immunity - Antigen

Lecture 51 - Adaptive Immunity - Antigen/Immunogen Properties

Lecture 52 - Adaptive Immunity - B and T cells Antigenic epitopes

Lecture 53 - Adaptive Immunity - Antibodies

Lecture 54 - Adaptive Immunity - Antibody types

Lecture 55 - Adaptive Immunity - Antibody Diversity

Lecture 56 - Adaptive Immunity - T cells and T cell-mediated Immune responses

Lecture 57 - Host-virus interaction

Lecture 58 - Innate Immunity during virus infection - Type I Interferon-dependent

Lecture 59 - Innate Immunity during virus infection - Type I Interferon-independent

Lecture 60 - Innate immune evasion by viruses

Lecture 61 - Adaptive Immune Responses Against Viruses

Lecture 62 - Adaptive immune evasion by viruses

Lecture 63 - Influenza Virus and Disease - 1

Lecture 64 - Influenza Virus and Disease - 2

Lecture 65 - Influenza Virus and Disease - 3

Lecture 66 - Influenza Virus and Disease - 4

Lecture 67 - Influenza Virus and Disease - 5

Lecture 68 - Influenza Virus and Disease - 6

Lecture 69 - Arbovirus and Aroboviral diseases

Lecture 70 - Arbovirus and Dengue virus infection

Lecture 71 - Arbovirus and Zika virus infection

Lecture 72 - Introduction to Bacterial Infection

Lecture 73 - Virulence factor during Bacterial Infection

Lecture 74 - Bacterial Infection - Tuberculosis - 1

Lecture 75 - Bacterial Infection - Tuberculosis - 2

Lecture 76 - Bacterial Infection - Tuberculosis - 3

Lecture 77 - Fungal Infection - 1

Lecture 78 - Fungal Infection - 2

Lecture 79 - Introduction to the parasite infection and Malaria

Lecture 80 - Parasite infection - Trpanosomiasis (African Sleeping Sickness)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Indian Feminisms: Concepts and Issues (Humanities and Social Sciences)

Co-ordinators : Prof. Anandita Pan

Lecture 1 - What is Feminism ?

Lecture 2 - Making of Indian Feminism - Part 1

Lecture 3 - Making of Indian Feminism - Part 2

Lecture 4 - Women's Activism

Lecture 5 - Gender and Anti-caste movements

Lecture 6 - Dalit Women's Activism

Lecture 7 - Identity, Difference and Intersectionality - Part 1

Lecture 8 - Identity, Difference and Intersectionality - Part 2

Lecture 9 - Nation and the Construction of Woman

Lecture 10 - Social Reformation - Part 1

Lecture 11 - Social Reformation - Part 2

Lecture 12 - Nationalism and the 'Women's Question

Lecture 13 - Nationalism and the New Patriarchy

Lecture 14 - Concept of Endogamy

Lecture 15 - Nation through the Lens of Women's Autobiographies

Lecture 16 - Gender and Violence

Lecture 17 - Theorising Violence - Dowry

Lecture 18 - Theorising Violence - Domestic Violence

Lecture 19 - Theorising Violence - Rape

Lecture 20 - Theorising Violence - Heteronormativity and Sexuality

Lecture 21 - Resisting Violence

Lecture 22 - Gender and Labour

Lecture 23 - Women's Labour in India - The 20th Century

Lecture 24 - Gender and Class

Lecture 25 - Sexual Harassment in Workplace

Lecture 26 - Gender, Labour, and Agency - Part 1

Lecture 27 - Gender, Labour, and Agency - Part 2

Lecture 28 - Through the Lens of Gender - Textual Analysis

Lecture 29 - Feminist Futures

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

NPTEL : NOC:United Nations Sustainable Development Goals (Humanities and Social Sciences)

Co-ordinators : Prof. Shiva Ji

Lecture 1 - Introduction, United Nations and a World in Order

Lecture 2 - Scenario of Current Model of Growth and Development

Lecture 3 - Need for Change

Lecture 4 - Definition of Sustainability, Aspects of Sustainability, Transition from MDGs to SDGs - Part 1

Lecture 5 - Definition of Sustainability, Aspects of Sustainability, Transition from MDGs to SDGs - Part 2

Lecture 6 - The Role of UN and the Need for SDGs and Adoption by the World

Lecture 7 - Scope and Inclusion and Agenda 2030

Lecture 8 - Our Common Future and Philosophy behind SDGs

Lecture 9 - Distinction between Development and Sustainable Development

Lecture 10 - Circular economy

Lecture 11 - Design for sustainability

Lecture 12 - Thinking Alternatives and Innovation

Lecture 13 - Causal Mapping, Systemic Mapping and Problem Identification

Lecture 14 - Identifying probable interventions for SD, Framework and Structuring of Seventeen SDGs

Lecture 15 - No Poverty - Part 1

Lecture 16 - No Poverty - Part 2

Lecture 17 - Zero Hunger - Part 1

Lecture 18 - Zero Hunger - Part 2

Lecture 19 - Good Health and Well-being - Part 1

Lecture 20 - Good Health and Well-being - Part 2

Lecture 26 - Coaching implications in HMS

Lecture 27 - Fundamental movement skills - Part 1

Lecture 28 - Fundamental movement skills - Part 2

Lecture 29 - Fundamental movement skills - Part 3

Lecture 30 - Gait Analysis

Lecture 31 - Exercises - Part 1

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Exercises - Part 2

Lecture 33 - Exercises - Part 3

Lecture 34 - Injury Patterns - Part 1

Lecture 35 - Injury Patterns - Part 2

Lecture 36 - Sports - Part 1

Lecture 37 - Sports - Part 2

Lecture 38 - Biomechanical characteristics of various sports - Part 1

Lecture 39 - Biomechanical characteristics of various sports - Part 2

Lecture 40 - Data Science

Lecture 41 - AI and ML

Lecture 42 - Technological advancements and Research in HMS - Part 1

Lecture 43 - Technological advancements and Research in HMS - Part 2

Lecture 44 - Career Opportunities

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Sports and Performance Nutrition (Humanities and Social Sciences)

Co-ordinators : Prof. Geetha Ghaliyavar

Lecture 1 - Introduction to sports and performance nutrition

Lecture 2 - Introduction to energy availability

Lecture 3 - Fundamentals of carbohydrates

Lecture 4 - Carbohydrate manipulation for sports performance

Lecture 5 - Myths around carbohydrates

Lecture 6 - Dr Sola Athletes with celiac disease and gluten sensitivity

Lecture 7 - Importance of proteins in performance

Lecture 8 - Introduction to protein and protein supplements

Lecture 9 - Introduction to fats and its importance in performance

Lecture 10 - Hydration and electrolytes

Lecture 11 - Practical implications of hydration

Lecture 12 - Mineral - Iron

Lecture 13 - Minerals - Calcium, Magnesium Zinc and Selenium

Lecture 14 - Antioxidants

Lecture 15 - Water soluble vitamins

Lecture 16 - Fat soluble vitamins

Lecture 17 - Energy systems and biochemical pathways

Lecture 18 - Anabolic window period for nutrient intake

Lecture 19 - Introduction to nutrient periodization

Lecture 20 - Applied aspects of nutrient periodization

Lecture 21 - Competition nutrition

Lecture 22 - Carbohydrate loading for sports performance

Lecture 23 - Weight making and weight cycling

Lecture 24 - Travel guidelines for athletes

Lecture 25 - Supplements and ergogenic aids

Lecture 26 - Three R principal

Lecture 27 - Lifestyle practices to enhance recovery

Lecture 28 - Sleep hygiene

Lecture 29 - Immunity and gut health

Lecture 30 - Sports injury and dietary interventions

Lecture 31 - Vegetarian and vegan athletes

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Diabetic athletes

Lecture 33 - Female athletes

Lecture 34 - Young and adolescent athletes

Lecture 35 - Food intolerances in athletes

Lecture 36 - Sports nutrition in Indian context

Lecture 37 - Nutrigenomics

Lecture 38 - Personal hygiene and sanitation

Lecture 39 - Connections of sports nutrition

Lecture 40 - Food psychology

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Sports Psychology (Humanities and Social Sciences)

Co-ordinators : Prof. Chaitanya Sridhar, Prof. Nivedita Rajan, Prof. Priyanka Prabhakar

Lecture 1 - Becoming a Sport Psychologist: Lessons from the field An introduction to field of Sports Psychology

Lecture 2 - Becoming a Sport Psychologist: Lessons from the field Mental health issues in athletes

Lecture 3 - Lessons from the field Learning Sport Science - An integrated approach to learning Sport Psychology

Lecture 4 - Becoming a Sport Psychologist: Lessons from the field Challenges faced by sport psychologists

Lecture 5 - Becoming a Sport Psychologist: Lessons from the field Sport psychology - Working with coaches

Lecture 6 - Introduction to flow

Lecture 7 - Flow in sport and competition

Lecture 8 - Practical approach to flow state: Discussion

Lecture 9 - Developing a Champion mindset: Tools to aid competitive mindset

Lecture 10 - Discussion on Champion and Competitive Mindset

Lecture 11 - Psychological Skills training and Goal setting

Lecture 12 - Goal setting - Part 1

Lecture 13 - Goal setting - Part 2

Lecture 14 - Developing Goal setting systems

Lecture 15 - Discussion on Mental training and Goal setting

Lecture 16 - Imagery in sport - Introduction

Lecture 17 - Models of Imagery and usefulness of Imagery

Lecture 18 - Psychological factors important for PST

Lecture 19 - Imagery in Team - A practical demonstration

Lecture 20 - Discussion on Goal setting and Imagery in sports

Lecture 21 - Communication in sports

Lecture 22 - Intracommunication with self: instinct and animal lessons, body language and tactile communication

Lecture 23 - Discussion on communication and performance

Lecture 24 - Resilience in Sports Teams and Organizations

Lecture 25 - Resilience and Mindfulness in sports

Lecture 26 - Psychological factors in sport

Lecture 27 - Strategies to work with young athletes

Lecture 28 - Working with young children

Lecture 29 - Burnout in sports

Lecture 30 - Burnout in coaches, Discussion with coach

Lecture 31 - Building teams and team culture

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Discussion on building high performance teams

Lecture 33 - Channeling emotions in sports

Lecture 34 - Discussion on transformational leadership

Lecture 35 - Stress management in sports

Lecture 36 - Psychology of Injury - Introduction

Lecture 37 - Psychological Strategies for Injury

Lecture 38 - Integrated approach to injury - A discussion

Lecture 39 - Career transition in sports - Sports retirement and coping

Lecture 40 - Discussion on Sports career transition

Lecture 41 - Conclusion Video

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Strength and Conditioning for the Indian Population (Humanities and Social Sciences)

Co-ordinators : Prof. Varun Suresh Kumar, Prof. Deckline Leitao

Lecture 1 - Fundamentals of Sports Performance

Lecture 2 - Major Components of Fitness

Lecture 3 - Difference between Fitness and Sport

Lecture 4 - Defining S&C and Sports S&C

Lecture 5 - Defining S&C and Physios Roles and Responsibilities

Lecture 6 - Player Interview - Lakshya Sen

Lecture 7 - Player Interview - Avani Prashanth

Lecture 8 - Principle of Individuality

Lecture 9 - Principle of Progressive Overload

Lecture 10 - Principle of Specificity

Lecture 11 - Principle of -Indianization-

Lecture 12 - Principle of Reversibility

Lecture 13 - Sports Specific Training

Lecture 14 - Safety in the Gym

Lecture 15 - Exercise and the Female Athlete

Lecture 16 - Working with Female Athletes - Do's and Dont's

Lecture 17 - Training Youth Athletes - Part 1

Lecture 18 - Training Youth Athletes - Part 2

Lecture 19 - Training Masters Athletes

Lecture 20 - Training Para Athletes

Lecture 21 - Bodybuilding

Lecture 22 - Powerlifting

Lecture 23 - Weightlifting

Lecture 24 - Effective over Impressive Excercises

Lecture 25 - Anabolic Steriods, Muscle Building, and Sports Performance

Lecture 26 - Free Weight Training

Lecture 27 - Warm Up and Cool Down

Lecture 28 - Free Weights Training (Demonstration) - Part 1

Lecture 29 - Free Weights Training (Demonstration) - Part 2

Lecture 30 - Free Weights Training (Demonstration) - Part 3

Lecture 31 - Free Weights Training (Demonstration) - Part 4

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Warm up Demonstration

Lecture 33 - Cool Down Demonstration

Lecture 34 - Weight Training Using Machines

Lecture 35 - Training with Machines (Demonstration) - Part 1

Lecture 36 - Training with Machines (Demonstration) - Part 2

Lecture 37 - Training with Machines (Demonstration) - Part 3

Lecture 38 - Training with Machines (Demonstration) - Part 4

Lecture 39 - Training with Machines (Demonstration) - Part 5

Lecture 40 - Bodyweight and Functional Training

Lecture 41 - Bodyweight and Functional Training Demonstration

Lecture 42 - Plyometrics Training

Lecture 43 - Plyometrics Demonstration

Lecture 44 - Cardiovascular Training

Lecture 45 - Cardiovascular Training Demonstration - Part 1

Lecture 46 - Cardiovascular Training Demonstration - Part 2

Lecture 47 - Cardiovascular Training Demonstration - Part 3

Lecture 48 - Stability and Endurance Training

Lecture 49 - Stability and Endurance Training Demonstration - Part 1

Lecture 50 - Stability and Endurance Training Demonstration - Part 2

Lecture 51 - Flexibility training and types of stretches - Part 1

Lecture 52 - Flexibility training and types of stretches - Part 2

Lecture 53 - Periodization of Indian Athlete

Lecture 54 - Sports Specific Program Design

Lecture 55 - Assessments- How, When, Why

Lecture 56 - Opportunities and Challenges of an S&C

Lecture 57 - Training Celebrities/Elite Athletes

Lecture 58 - Role of Social Media in Sport

Lecture 59 - Scope of Technology in Sport

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Essentials of Sports Injury Prevention and Rehabilitation (Humanities and Social Sciences)

Co-ordinators : Prof. Col (Dr) Anup Krishnan (Retd), Prof. Wg Cdr (Dr) CS Guru, Prof. Lt Col (Dr) Atul Sharma

Lecture 1 - Sports Injuries and Prevention

Lecture 2 - Rehabilitation and Reconditioning

Lecture 3 - Joints of the Upper Limb

Lecture 4 - Joints of the Lower Limb

Lecture 5 - The Back In Sports

Lecture 6 - Pre Medical Examination

Lecture 7 - Lab Investigations

Lecture 8 - Flexibility

Lecture 9 - Conditioning

Lecture 10 - Anatomy of Upper Limb

Lecture 11 - Anatomy of Lower Limb

Lecture 12 - Common Injuries Of Lower Limb

Lecture 13 - Common Causes of Upper Limb and Lower Limb

Lecture 14 - Treatments for Various Injuries

Lecture 15 - Head, Face and Neck Injuries

Lecture 16 - Spine Injuries

Lecture 17 - Concussion in Sports

Lecture 18 - Management of Sports Concussion

Lecture 19 - Emergency Action Plan

Lecture 20 - Risk Factors in Injury

Lecture 21 - Prehabilitation and Rehabilitation

Lecture 22 - Periodisation of Rehabilitation - I

Lecture 23 - Periodisation of Rehabilitation - II

Lecture 24 - Team Roles in Sports Injuries

Lecture 25 - Sport-Specific Rehabilitation, Principles and Techniques - I

Lecture 26 - Sport-Specific Rehabilitation, Principles and Techniques - II

Lecture 27 - Sport-Specific Rehabilitation, Principles and Techniques - III

Lecture 28 - Rehabilitation

Lecture 29 - Management of common sports injuries

Lecture 30 - Injury prevention in adolescent athletes and Women athletes - Part 1

Lecture 31 - Injury prevention in adolescent athletes and Women athletes - Part 2

Lecture 6 - Diagnostic for Organization Development and Change

Lecture 7 - Steps in Successful Organizational Change

Lecture 8 - Design of Effective Interventions and their prerequisites

Lecture 9 - Individual Level OD Interventions: A Rationale

Lecture 10 - Different kinds of Individual level OD Interventions

Lecture 11 - Group or Team Level OD Interventions

Lecture 12 - Design of Specific Interventions to Tackle Different Challenges of Different Teams

Lecture 13 - Organization Level OD Interventions

Lecture 14 - Discussion on various large group Interventions

Lecture 15 - Appreciative Inquiry - â€˜Positiveâ€™ Turn of OD

Lecture 16 - Managing OD and Change through Restructuring Organizations

Lecture 17 - Different Types of Organization Designs

Lecture 18 - New Forms of Organization Design

Lecture 19 - Change in the Organization Design

Lecture 20 - Change in Organization Culture

Lecture 21 - Can Organization Culture be Managed?: A Case Analysis

Lecture 22 - Organization Development in Digital Transformation

Lecture 23 - Mergers and Acquisitions - A Special Case of OD

Lecture 24 - Stages of Mergers and Acquisitions: A Case Study

Lecture 25 - Transorganizational OD Intervention

Lecture 26 - OD Interventions through Human Resource Functions

Lecture 27 - Talent Management as OD Intervention

Lecture 28 - Organization Learning - Relevance and Possibility

Lecture 29 - Learning Organization - Experimentation, Knowledge Management and Innovation

Lecture 30 - Organizational Development - Cultural and Economic Contexts

Lecture 31 - Organization Development - Global and Trans-organizational Setting

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Organizational Development in the Entrepreneurial Firms

Lecture 33 - OD Interventions in Family Owned Entrepreneurial Firms

Lecture 34 - Organizational Development in the Not for Profit Organizations (NPOs) and Social Enterprises (SEs)

Lecture 35 - Organizational Development in Non-Industrial Settings

Lecture 36 - Organizational Development in Educational Institutions

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Managerial Economics (Management)

Co-ordinators : Prof. Trupti Mishra

Lecture 1 - Introduction to Economics and Managerial Economics

Lecture 2 - Introduction to the Managerial Economics- Economics and Managerial economics, Review of Economic Terms and Economic Rationality

Lecture 3 - Introduction to the Managerial Economics- Opportunity Cost, Measuring and Maximizing Profit

Lecture 4 - Introduction to the Managerial Economics- Understanding Incentive and Marginal Analysis

Lecture 5 - Introduction to the Managerial Economics- Marginal and Incremental Analysis, Model of an Economy

Lecture 6 - Basic Tools of Economic Analysis and Optimization Techniques- Functional relationship between economic variables, Important Economic functions

Lecture 7 - Basic Tools of Economic Analysis and Optimization Techniques- Important Economic Function (Continued...)

Lecture 8 - Basic Tools of Economic Analysis and Optimization Techniques- Slope and its use in Economic Analysis, Derivatives of various functions

Lecture 9 - Basic Tools of Economic Analysis and Optimization Techniques- Derivative of various functions

Lecture 10 - Basic Tools of Economic Analysis and Optimization Techniques- Optimization Technique

Lecture 11 - Basic Tools of Economic Analysis and Optimization Techniques- Constrained optimization

Lecture 12 - Basic Tools of Economic Analysis and Optimization Techniques- Regression Technique

Lecture 13 - Basic Tools of Economic Analysis and Optimization Techniques- Regression Technique (Continued...)

Lecture 14 - Basic Tools of Economic Analysis and Optimization Techniques- Ordinary Least Square (OLS) method

Lecture 15 - Theory of Demand- Defining Demand, Law of Demand

Lecture 16 - Theory of Demand- Demand Schedule/Demand Curve/ Demand Function, Factors affecting Demand, Market Demand

Lecture 17 - Theory of Demand- Change in Demand Curve, Supply/ Law of Supply, Factors affecting Supply

Lecture 18 - Theory of Demand- Change/Shift in the Supply, Market Equilibrium, Change in Equilibrium

Lecture 19 - Theory of Demand- A Shift in both Supply and Demand, Elasticity of Demand, Types of Elasticity of Demand

Lecture 20 - Theory of Demand- Price elasticity of demand, Degree of price elasticity of demand, Elasticity and revenue, Factors influencing price elasticity of demand

Lecture 21 - Theory of Demand- Income Elasticity of Demand, Cross-Price Elasticity of Demand, Advertising Elasticity of Demand

Lecture 22 - Theory of Demand- Numerical for each Elasticity of Demand

Lecture 23 - Consumer Behaviour- Consumer Preferences, Utility Analysis (Total and Marginal Utility)

Lecture 24 - Consumer Behaviour- Numerical for Utility analysis, Law of Diminishing Marginal Utility, Indifference Curve Analysis

Lecture 25 - Consumer Behaviour- Budget line and Consumer equilibrium, Law of Equi-Marginal utility

Lecture 26 - Consumer Behaviour- Price, Income and Substitution Effects, Consumer Surplus

Lecture 27 - Elasticity of Supply- Numerical example to understand Consumer Surplus, Elasticity of Supply

Lecture 28 - Elasticity of Supply- Impact of Tax on Price and Quantity, Price fixed by Law

Lecture 29 - Demand Forecasting

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 30 - Methods of Demand Forecasting- Subjective methods of demand forecasting

Lecture 31 - Demand Forecasting-Quantitative method of Demand forecasting

Lecture 32 - Demand Forecasting- Quantitative method of Demand forecasting (Continued...)

Lecture 33 - Theory of Production- Introduction

Lecture 34 - Theory of Production- Law of Diminishing Return

Lecture 35 - Theory of Production- long Run Production Analysis, Return to Scale, Isoquants

Lecture 36 - Theory of Production- Isocost, Optimal Combination of Inputs, Expansion path, Economic Region of Production

Lecture 37 - Theory of Production- Different kind of Production Functions: Cobb Douglas Production function, Optimal input combination

Lecture 38 - Theory of Production- Effect of Changes in Input Prices, Law of Diminishing returns, Return to Scale

Lecture 39 - Theory of Cost- Cost of Production, Types of Cost: Accounting/Economic Analysis

Lecture 40 - Theory of Cost- Cost-Output Relationship, Short run cost Analysis

Lecture 41 - Long Run Cost Analysis

Lecture 42 - Long-Run Marginal Cost Curve

Lecture 43 - Theory of Cost: Breakeven Analysis and Contribution Analysis

Lecture 44 - Theory of Cost: Profit Volume Ratio, Margin of Safety and Learning Curve

Lecture 45 - Theory of Cost: Application of Cost Analysis & Economies of Scale

Lecture 46 - Theory of Cost: Production Economies

Lecture 47 - Theory of Cost: Managerial and Transport Economies of Scale

Lecture 48 - Theory of Market: Introduction

Lecture 49 - Theory of Market: Perfect Competition

Lecture 50 - Theory of Market: Short-run Profit Maximization under Perfect Competition

Lecture 51 - Theory of Market: Short-run Market Supply and Firm Supply under Perfect Competition

Lecture 52 - Theory of Market: Long-run Profit Maximization under Perfect Competition

Lecture 53 - Theory of Market: Real World Application of Perfect Competition & Introduction to Monopoly

Lecture 54 - Theory of Market: Types of Monopoly

Lecture 55 - Theory of Market: Supply Curve of Monopoly Firm

Lecture 56 - Theory of Market: Effect of shift of Cost in case of Monopoly

Lecture 57 - Theory of Market: Social cost of Monopoly Power

Lecture 58 - Theory of Market: Regulation of Monopoly Power and Monopsony

Lecture 59 - Theory of Market: Bilateral Monopoly

Lecture 60 - Theory of Market: Monopolistic Competition

Lecture 61 - Theory of Market: Monopolistic Competition- Non-Price Competition and Introduction to Oligopoly

Lecture 62 - Theory of Market: Characteristics of Oligopoly Market

Lecture 63 - Theory of Market: Oligopoly Market (Continued...)

Lecture 64 - Theory of Market: Oligopoly Market- Stackelbergâ€™s Model

Lecture 65 - Theory of Market: Collusive Oligopoly

Lecture 66 - Theory of Market: Collusive Oligopoly (Continued...)

Lecture 67 - Theory of Market: Collusive Oligopoly (Continued...)

Lecture 68 - Theory of Market: Collusive Oligopoly-Price Leadership Model

Lecture 69 - Oligopoly and Game Theory

Lecture 70 - Oligopoly and Game Theory (Continued...)

Lecture 71 - Oligopoly and Game Theory- Nash Equilibrium

Lecture 72 - Oligopoly and Game Theory â€“ The Prisonerâ€™s Dilemma and Types of Games

Lecture 73 - Applications of Game Theory in Economics

Lecture 74 - Product pricing- Price Discrimination

Lecture 75 - Product pricing- Price Discrimination (Continued...)

Lecture 76 - Types of Product pricing

Lecture 77 - Types of Product pricing (Continued...1)

Lecture 78 - Types of Product pricing (Continued...2)

Lecture 79 - Types of Product pricing (Continued...3)

Lecture 80 - Summary of Course

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Quality Control and Improvement with MINITAB (Management)

Co-ordinators : Prof. Indrajit Mukherjee

Lecture 1 - Introduction of Quality

Lecture 2 - Voice of the Customer and Kano Model

Lecture 3 - Quality Function Deployment

Lecture 4 - Critical to Quality Characteristics

Lecture 5 - Data Visualization for Quality Control and Improvement

Lecture 6 - Importance of Pareto Chart and Cause and Effect Diagram

Lecture 7 - Design Failure Mode and Effect Analysis

Lecture 8 - Introduction to Statistical Process Control

Lecture 9 - X-bar and R Chart

Lecture 10 - X-bar and S Chart

Lecture 11 - Individual Moving Range Chart and Attribute Chart

Lecture 12 - Attribute Control Charts and Process Capability

Lecture 13 - Process Capability Index

Lecture 14 - Process Performance and Sigma Level

Lecture 15 - Process Capability for Attribute data

Lecture 16 - Basic Statistics and Confidence Interval

Lecture 17 - Hypothesis Testing

Lecture 18 - One-sample t Test

Lecture 19 - Two-sample t Test

Lecture 20 - Paired t Test and ANOVA

Lecture 21 - One-way ANOVA

Lecture 22 - One-way ANOVA (Continued...)

Lecture 23 - ANCOVA and Nonparametric Test

Lecture 24 - Linear Regression

Lecture 25 - Linear Regression (Continued...) and Multiple Regression

Lecture 26 - Best Subset Regression, Multicollinearity

Lecture 27 - Multicollinearity, Best Subset Regression, Multiple Regression, Basics on Design of Experiment

Lecture 28 - Design of Experiment, One-factor-at-a-time experiment

Lecture 29 - Two-factor asymmetric Design, Symmetric Factorial Design, Two-way ANOVA

Lecture 30 - Two-factor symmetric Design, Robust setting, Two-way ANOVA

Lecture 31 - Measurement System Analysis

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Measurement System Analysis (Continued...)

Lecture 33 - Measurement System Analysis (Continued...), Introduction to Factorial Experiments

Lecture 34 - Factorial Experiments

Lecture 35 - Factorial Experiments (Continued...)

Lecture 36 - Factorial Experiments (Continued...)

Lecture 37 - Blocking in Factorial Design.

Lecture 38 - Multiple response Optimization and RSM

Lecture 39 - Fractional Factorial Design

Lecture 40 - Taguchi Method

NPTEL : NOC:Business and Sustainable Development (Management)

Co-ordinators : Prof. Trupti Mishra

Lecture 1 - Introduction to Sustainable Development and Sustainability

Lecture 2 - Evolution of Sustainable Development

Lecture 3 - Importance of Sustainability

Lecture 4 - Sustainability - A mega trend

Lecture 5 - Environment, Human and Economy

Lecture 6 - Robert Solowâ€™s Conceptualization of Sustainability

Lecture 7 - Introduction to Firmâ€™s Response

Lecture 8 - Sustainable Products

Lecture 9 - Cleaner Production

Lecture 10 - Cleaner Production Illustrations

Lecture 11 - Life Cycle Assessment

Lecture 12 - Understanding LCA Through Examples

Lecture 13 - Design for Environment

Lecture 14 - Sustainability Reporting

Lecture 15 - Current Status of ESG in Indian Companies

Lecture 16 - Corporate Strategy

Lecture 17 - Competitive Environment Strategies

Lecture 18 - Eco-Branding

Lecture 19 - Competitive Environmental Strategy Matrix

Lecture 20 - CSR and Social Sustainability

Lecture 21 - Sustainable Development Goal (SDG)

Lecture 22 - Sustainability Standards

Lecture 23 - Sustainability Standards

Lecture 24 - Green Supply Chain

Lecture 25 - Examples of Green Supply Chain

Lecture 26 - Environmental Regulations and Policy Instruments

Lecture 27 - Market based instruments in India

Lecture 28 - Environmental Laws and Disclosure Regulations

Lecture 29 - Risks and Opportunities

Lecture 30 - Sustainable financial product and services

Lecture 31 - Sustainable Value Framework

Lecture 32 - Course Summary

NPTEL : NOC:Advances in Strategic Human Resource Management (Management)

Co-ordinators : Prof. Ashish Pandey

Lecture 1 - The Evolution and Role of HR Function

Lecture 2 - Evolution and Nature of Strategic Human Resource Management

Lecture 3 - Contributions of and Trends in HR Function

Lecture 4 - Measuring Effectiveness of HR Function

Lecture 5 - Competence Maturity Model and People Competence Maturity Model

Lecture 6 - Organizational Healing: An Introduction

Lecture 7 - Working with Remote Teams

Lecture 8 - Restoring Social and Psychological Well-being

Lecture 9 - Employee Assistance Program

Lecture 10 - Talent Management: An Introduction

Lecture 11 - Potential Matrix: A Tool for Talent Management

Lecture 12 - HR Digitization for Talent Management

Lecture 13 - Positive Employee Relation: The Introduction

Lecture 14 - Positive Work Practices in Organization

Lecture 15 - Humanistic Management Model

Lecture 16 - Link of Humanistic Model and HR Processes

Lecture 17 - Process to make organization great place to work

Lecture 18 - Diversity Management: The Introduction

Lecture 19 - Significance of a Diverse and Inclusive Workplace

Lecture 20 - Significance of a Diverse and Inclusive Workplace

Lecture 21 - Biases in Organization and Ways of their Resolution

Lecture 22 - Intergenerational Relationships in Organization: The Introduction

Lecture 23 - Classifications of Generations at Workforce

Lecture 24 - Types and Attributes of Generations at Workplace

Lecture 25 - Ways of Synergizing Across Generations

Lecture 26 - Ways of enhancing Intergeneration Synergy

Lecture 27 - Intergenerational Relationships in Organization: The Introduction

Lecture 28 - Classifications of Generations at Workforce

Lecture 29 - Types and Attributes of Generations at Workplace

Lecture 30 - Ways of Synergizing Across Generations

Lecture 31 - Intergenerational Relationships in Organization: The Introduction

Lecture 32 - Classifications of Generations at Workforce

Lecture 33 - Types and Attributes of Generations at Workplace

Lecture 34 - Ways of Synergizing Across Generations

Lecture 35 - Role and Challenges of Sustainable HRM

Lecture 36 - Contribution of HRM in Corporate Sustainability and Corporate Social Responsibility

Lecture 37 - Ways to integrate Corporate Sustainability and Corporate Social Responsibility with HRM

Lecture 38 - Important HR Metrics and Ratios in HRM Function

Lecture 39 - HR Analytics explained through Case Examples

Lecture 40 - Tools for Effective Decision Making and Factors for Success in Future at Work

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Yoga and Positive Psychology for Managing Career and Life (Management)

Co-ordinators : Prof. Ashish Pandey

Lecture 1 - Why the Course on Managing Self and Career

Lecture 2 - Present Context of Professional Work

Lecture 3 - State of Wellbeing of Indian Youth

Lecture 4 - Link between Self-Management and Career Management

Lecture 5 - Journey of Positive Psychology

Lecture 6 - Can there be a Universal Positive Psychology ?

Lecture 7 - Difference in Good Life and Life Satisfaction

Lecture 8 - Why Yoga with Positive Psychology ?

Lecture 9 - Genesis of this Course

Lecture 10 - Using Stories to Understand Optimal Experiences

Lecture 11 - Fundamental Questions in Positive Psychology

Lecture 12 - What Positive Psychology is Not

Lecture 13 - Positive-Negative Dialects of Well-Being

Lecture 14 - Positive Psychology: The Second Wave

Lecture 15 - Positivity and Human Potential in Yogic Traditions

Lecture 16 - Holistic Life Goals

Lecture 17 - Embracing Emotions and Positive Behavior

Lecture 18 - Discovering Dharma

Lecture 19 - Distinction with Negative Human Potential

Lecture 20 - Positive Events: 16 Sanskaras

Lecture 21 - Four Ashrams or Stations in Life

Lecture 22 - Yagna - Positive Event

Lecture 23 - Positive Institutions

Lecture 24 - Family - A Positive Institution

Lecture 25 - Yoga and Governance

Lecture 26 - Positive Governance

Lecture 27 - Macro and Micro Integration in Yogic Perspective

Lecture 28 - Self and Society

Lecture 29 - Point for Action and Reflection

Lecture 30 - Health and Wellbeing

Lecture 31 - How does wellbeing affect life ?

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Yogic Perspectives of Health and Wellbeing

Lecture 33 - Doshas

Lecture 34 - Mind-body Complex

Lecture 35 - Diseases in Yogic Perspective

Lecture 36 - Panch Kosha or Five Layers of Self

Lecture 37 - Managing Mind

Lecture 38 - Factors to Enhance Well-being

Lecture 39 - Self-Realization - The Ultimate Joy

Lecture 40 - What is the Indian Worldview ?

Lecture 41 - Ways of Attaining Well-Being

Lecture 42 - TattvaBodh and Wisdom

Lecture 43 - Indriyajaya or Self-Control

Lecture 44 - Indriyajaya in Positive Psychology

Lecture 45 - Dharmic Drishti (Vision)

Lecture 46 - Dharmic Desires and Pursuits

Lecture 47 - Dharmahkriya in Positive Psychology

Lecture 48 - Sukhayu-Hitayu

Lecture 49 - DharmahKriya, Sukhayu-Hitayu and Career Success ?

Lecture 50 - What is our real nature ?

Lecture 51 - How the Mind Works: A Yogic Perspective

Lecture 52 - Obstacles in Attaining Wellbeing

Lecture 53 - Reflection on Functioning of the Mind

Lecture 54 - How to avoid Klisht Vrittis ?

Lecture 55 - Crossing Obstacles to Well-Being

Lecture 56 - Six Inner Treasures

Lecture 57 - How are the Six Inner Treasures Valuable

Lecture 58 - Mental, Vital and Physical Consciousness

Lecture 59 - Major Forms of Yoga in Indian Tradition

Lecture 60 - Ashtanga Yoga or Raj Yoga

Lecture 61 - Yoga for Panch Koshas

Lecture 62 - Three Pillars of Health

Lecture 63 - Spiritual Significance of Food

Lecture 64 - Eight Factors about Food

Lecture 65 - Seasons with Revolving Sun and Impact on Physiology

Lecture 66 - Contemporary Knowledge about Food and Mental Health

Lecture 67 - Food and Activities during the Cycle of the Day

Lecture 68 - Yogasanas to Integrate Body and Emotions

Lecture 69 - Interoception, Asanas and Well-Being

Lecture 70 - Characteristics of Asanas

Lecture 71 - Process for Moving into Posture

Lecture 72 - Asanas for Different Body Constitution

Lecture 73 - Notes on Pranayama

Lecture 74 - Contemporary Evidences of Prana

Lecture 75 - Prana Vayu, Nadi System and Chakras

Lecture 76 - Pranayama Practices and Conscious Breathing

Lecture 77 - Process and Benefits of Diaphragmatic Breathing

Lecture 78 - Guidelines for Pranayama

Lecture 79 - Nadi Shodhana Pranayama (Alternate Nostril Breathing)

Lecture 80 - Tranquilizing Pranayamas

Lecture 81 - Organizational Suffering and Dysfunctional Behaviors

Lecture 82 - Introduction to Pratyahara

Lecture 83 - Indriya-Pratyahara: Control of the Senses

Lecture 84 - Methods of Pratyahara

Lecture 85 - Understanding Emotional Intelligence

Lecture 86 - Emotional Intelligence and its Relation to Everyday Behavior

Lecture 87 - How Yoga Helps in Emotional Balance

Lecture 88 - Positive and Negative Emotions

Lecture 89 - Dealing with Negative Emotions

Lecture 90 - How Yoga Helps in Equanimity of Mind

Lecture 91 - What are the 7 Stages of Wisdom

Lecture 92 - What Yoga does for Balancing Emotions and Cognitions

Lecture 93 - How Yoga Impacts Student's Performance: Empirical Studies

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Multivariate Procedures with R (Management)

Co-ordinators : Prof. Narendra K Sharma

Lecture 0 - How to Learn and Follow the Course

Lecture 1 - R Software and its Installation

Lecture 2 - Help, Documentation, Examples, Packages and Libraries

Lecture 3 - Command Line and Data Editor

Lecture 4 - Introduction to R Studio

Lecture 5 - R as a Calculator

Lecture 6 - Calculation with Data Vectors and Built-in Function

Lecture 7 - Matrix Operations

Lecture 8 - Matrix Operations

Lecture 9 - Univariate Data-Central Tendency and Variability

Lecture 10 - Bivariate Data

Lecture 11 - Missing Data Handling

Lecture 12 - Measuring Central Tendency with Missing Data

Lecture 13 - Measuring Variation with Missing Data

Lecture 14 - Coefficient of Variation and Summary

Lecture 15 - Boxplots and Grouped Boxplots

Lecture 16 - Bar Diagram, Subdivided and Multiple Bar Diagrams

Lecture 17 - Pie Diagram, Histogram and Multiple Histogram

Lecture 18 - Scatter Plots, Smooth Scatter Plots and Matrix Plots

Lecture 19 - Three Dimensional Plots, Star Plots and Chernoff Faces

Lecture 20 - Continuous and Discrete

Lecture 21 - Probability Functions

Lecture 22 - Probability Functions for Continuous Bivariate and Multivariate Random Variables

Lecture 23 - Theoretical Properties

Lecture 24 - Application in R Software

Lecture 25 - Bivariate Normal and Multivariate Normal Distributions in R

Lecture 26 - Chi Square (X2), t and F Distribution

Lecture 27 - Point and Interval Estimation

Lecture 28 - Maximum Likelihood Estimation

Lecture 29 - Basics of Tests of Hypothesis

Lecture 30 - Test and Confidence Interval for Mean in One Sample with Known Variance in Univariate Data

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Test and Confidence Interval for Mean in One Sample with Unknown Variance in Univariate Data

Lecture 32 - Tests for Mean in Two Samples with Univariable Data

Lecture 33 - Analysis of Variance and Homogeneity of Variances with Univariate Data

Lecture 34 - Tests for Mean Vector with Multivariate Data in One Sample

Lecture 35 - Tests for Mean Vector with Multivariate Data in Two Sample

Lecture 36 - Centering, Scaling and Z-Scores

Lecture 37 - Introduction and Basic Concepts

Lecture 38 - Estimation of Parameters

Lecture 39 - Model Fitting with R Software

Lecture 40 - Test of Hypothesis and Confidence Interval Estimation on Individual Regression Coefficients

Lecture 41 - Analysis of Variance and Implementation in R Software

Lecture 42 - Goodness of Fit and Testing of Normality

Lecture 43 - Logistic Regression Model

Lecture 44 - Introduction to Classification

Lecture 45 - Bayes Procedure for Classification

Lecture 46 - Classification Procedure for Multivariate Normal Distributions

Lecture 47 - Classification Procedure and Analysis in R

Lecture 48 - Basic Concepts and Definitions

Lecture 49 - Hierarchical Classification

Lecture 50 - Hierarchical Classification and Analysis with R

Lecture 51 - Hierarchical Classification with Examples in R

Lecture 52 - Concepts and Theoretical Setup

Lecture 53 - Principle Component and Its Graphical Analysis in R

Lecture 54 - Canonical Variables and Concepts

Lecture 55 - Statistical Analysis of Canonical Variables

Lecture 56 - Canonical Variables Analysis in R

NPTEL : NOC:Business Marketing - Technology Focus (Management)

Co-ordinators : Prof. Jayanta Chatterjee

Lecture 1 - Introduction to B2B Marketing

Lecture 2 - Tech Marketing

Lecture 3 - Technology life cycle, networks and platforms

Lecture 4 - Organization Markets and Competition

Lecture 5 - Organization Buying decsions

Lecture 6 - Researching Business Markets

Lecture 7 - Design and Tech Market

Lecture 8 - Customer Driven Innovation, New Product Management

Lecture 9 - Market Segments - Technology Focus

Lecture 10 - PLC and TALC

Lecture 11 - Crossing the Chasm

Lecture 12 - B2B Brands - 1

Lecture 13 - B2B Brands - 2

Lecture 14 - B2B Pricing Basics

Lecture 15 - Critical Underpinning Concepts

Lecture 16 - Pricing (Continued...)

Lecture 17 - Pricing Summary

Lecture 18 - B2B Sales

Lecture 19 - Supply Chain

Lecture 20 - Marketing Communicaion

Lecture 21 - Digital Marketing

Lecture 22 - Digital Relationship Management

Lecture 23 - E-Marketing Tools

Lecture 24 - E-Market Place

Lecture 25 - B2B E-Commerce

Lecture 26 - Electronic Auction

Lecture 27 - E-Procurement

Lecture 28 - Marketing as Strategy - I

Lecture 29 - Marketing as Strategy - II

Lecture 30 - LIVE Session (JCB, TATA Steel, THERMAX)

Lecture 31 - Marketing Orientation

Lecture 32 - Marketing - R&D interaction

Lecture 33 - Marketing Metrics

Lecture 34 - Sample Question and Answers

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Advanced R Programming for Data Analytics in Business (Management)

Co-ordinators : Prof. Abhinava Tripathi

Lecture 1 - Fundamentals of R

Lecture 2 - Data cleaning

Lecture 3 - Data Visualization - Part 1

Lecture 4 - Data Visualization - Part 2

Lecture 5 - Introduction to Probability Theory

Lecture 6 - Conditional Probabilities and Bayes Theorem

Lecture 7 - Random Variables and Probability Distributions

Lecture 8 - Binomial Distribution

Lecture 9 - Continuous Random Variables and Normal Distribution

Lecture 10 - Descriptive Analytics: Measures of Central Tendency

Lecture 11 - Descriptive Analytics: Measures of Variability and Shape

Lecture 12 - Statistical Inference: Sampling

Lecture 13 - Statistical Inference: Central Limit Theorem and Confidence Intervals

Lecture 14 - Statistical Inference: Hypothesis testing

Lecture 15 - Introduction to R

Lecture 16 - Inferential statistics: R Implementation

Lecture 17 - Statistical Inference: Sampling

Lecture 18 - Hypothesis Testing: R Implementation

Lecture 19 - Regression Modelling - Part 1

Lecture 47 - Forms of Ownership

Lecture 48 - Starting a New Company and Small - scale Industrial Undertakings

Lecture 49 - Capital Financing

Lecture 50 - Entrepreneurship - Final Words

NPTEL : NOC:Principles of Human Resource Management (Management)

Co-ordinators : Prof. A Malik

Lecture 1 - Introduction to HRM

Lecture 2 - Job Analysis and Design

Lecture 3 - Employee testing and selection

Lecture 4 - Performance appraisal

Lecture 5 - Performance evaluation and feedback

Lecture 6 - The Training process: Assessment of training needs and Training methods

Lecture 7 - General and Specific Training and Evaluation of Training

Lecture 8 - Career Management and planning

Lecture 9 - Career Development

Lecture 10 - Compensation

Lecture 11 - Pay for performance systems

Lecture 12 - Pay and Reward systems

Lecture 13 - Benefits

Lecture 14 - Separation and Administration of Benefits

Lecture 15 - Business Ethics

Lecture 16 - Ethical Aspects of HRM Activities

Lecture 17 - Employee Health

Lecture 18 - Employee Wellbeing in the Workplace

Lecture 19 - Organized Labor

Lecture 20 - Managing the Labor Relations Process

Lecture 21 - International HRM

Lecture 22 - Global Employment Law, Industrial Relations and International Ethics

Lecture 23 - Challenges to International HRM

Lecture 24 - Strategic HRM

Lecture 25 - Multilevel Model of Strategic HRM

Lecture 26 - Strategic HRM in a Networked World

Lecture 27 - Sustainable HRM

Lecture 28 - HR Measurement and Accountability

Lecture 29 - Types of Score Cards

Lecture 30 - Discipline in Organizations

Lecture 31 - Dealing with Difficult Employees

Lecture 32 - Using HRM to Prevent the Need for Discipline

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Commodity Derivatives and Risk Management (Management)

Co-ordinators : Dr. Prabina Rajib

Lecture 1 - Introduction to Commodity Derivatives and Risk Management

Lecture 2 - Introduction to Commodity Derivatives and Risk Management (Continued...)

Lecture 3 - Futures Contract Specifications

Lecture 4 - Futures Contract Specifications (Continued...)

Lecture 5 - Futures Contract - Mark-to-Market Margin

Lecture 6 - Commodity Options and Commodity Spreads

Lecture 7 - Pricing and Valuations of Futures Contract

Lecture 8 - Pricing and Valuations of Futures Contract (Continued...)

Lecture 9 - Convenience Field, Contango-Backwardation

Lecture 10 - Commodity Basic Risk - Part I

Lecture 11 - Commodity Basic Risk - Part II

Lecture 12 - Minimum Variance Hedge Ratio - Part I

Lecture 13 - Minimum Variance Hedge Ratio - Part II

Lecture 14 - Commodity Indexes - Part I

Lecture 15 - Commodity Indexes - Part II

Lecture 16 - Agri-Commodity Price Risk Management - Part I

Lecture 17 - Agri-Commodity Price Risk Management - Part II

Lecture 18 - Seasonality in Agri-Commodity, Contango and Backwardation - Part I

Lecture 19 - Seasonality in Agri-Commodity, Contango and Backwardation - Part II

Lecture 20 - Commodity Prices Determination - Part I

Lecture 21 - Commodity Prices Determination - Part II

Lecture 22 - Crude Oil Derivatives - Part I

Lecture 23 - Crude Oil Price Determination

Lecture 24 - Spot-Futures Relationship in Crude Oil - Part I

Lecture 25 - Spot-Futures Relationship in Crude Oil - Part II

Lecture 26 - Hedging of Crude Oil and Refined Product Price Risk - Part I

Lecture 27 - Hedging of Crude Oil and Refined Product Price Risk - Part II

Lecture 28 - Introduction to Gold and Gold Derivatives

Lecture 29 - LBMA, Gold Spot Price and Gold Derivatives

Lecture 30 - OTC Contracts on Gold and Gold Dehedge

Lecture 31 - Spot Trading of Electricity in India - Part I

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Spot Trading of Electricity in India - Part II

Lecture 33 - Weather Derivatives - Part I

Lecture 34 - Weather Derivatives - Part II

Lecture 35 - Introduction to Carbon Credit Market

Lecture 36 - Carbon Derivatives

Lecture 37 - Physical Market for Freight, Freight Exchanges, Freight Indexes

Lecture 38 - Hedging Freight rate Risk with Freight Rate Derivatives

Lecture 39 - Metal Derivatives and London Metal Exchange (LME)

Lecture 40 - Real Estate Derivatives

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Strategic Communication for Sustainable Development (Management)

Co-ordinators : Prof. A Malik

Lecture 1 - Introduction

Lecture 2 - Models for Public Participation in Sustainable Development

Lecture 3 - Role of Communication in Sustainable Development

Lecture 4 - Sustainability Communication

Lecture 5 - Approaches to Sustainability Communication : Strong Sustainability

Lecture 6 - Approaches to Sustainability Communication : Integrative Approach

Lecture 7 - Sociological Perspectives on Sustainability Communication

Lecture 8 - Psychological Perspectives on Sustainability Communication

Lecture 9 - Psychological Perspectives on Sustainability Communication (Continued...)

Lecture 10 - Steyn and Puth's Model for Communication Strategy

Lecture 11 - Application of Steyn and Puth's Model to Development

Lecture 12 - Tools of Strategic Communication for Sustainable Development

Lecture 13 - Role of Strategic Communication for Sustainable Development

Lecture 14 - Role of Stakeholders in Strategic Communication for Sustainable Development

Lecture 15 - Systems Approach to Identifying Decisive Information

Lecture 16 - Adapting CSR Communication Strategies to Sustainable Development

Lecture 17 - Strategic Conversations

Lecture 18 - Creating a Strategic Communication Plan

Lecture 19 - Communication for Behavioral Impact (COMBI) for Sustainable Development

Lecture 20 - Media and Sustainability Communication

Lecture 21 - ICTs in Sustainable Development

Lecture 22 - Community Informatics

Lecture 23 - Challenges to the use of ICTs in Sustainable Development Efforts

Lecture 22 - Fundamentals of statistics

Lecture 23 - Probability theory

Lecture 24 - Process capability analysis: Key Concepts

Lecture 25 - Process capability analysis: Measures and Indices

Lecture 26 - Process capability analysis: Minitab Application

Lecture 27 - Non-normal process capability analysis

Lecture 28 - Hypothesis testing: Fundamentals

Lecture 29 - Hypothesis Testing: Single Population Test

Lecture 30 - Hypothesis Testing: Two Population Test

Lecture 31 - Hypothesis Testing: Two Population: Minitab Application

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Correlation and Regression Analysis

Lecture 33 - Regression Analysis: Model Validation

Lecture 34 - One-Way ANOVA

Lecture 35 - Two-Way ANOVA

Lecture 36 - Multi-vari Analysis

Lecture 37 - Failure Mode Effect Analysis (FMEA)

Lecture 38 - Introduction to Design of Experiment

Lecture 39 - Randomized Block Design

Lecture 40 - Randomized Block Design: Minitab Application

Lecture 41 - Factorial Design

Lecture 42 - Factorial Design: Minitab Application

Lecture 43 - Fractional Factorial Design

Lecture 44 - Fractional Factorial Design: Minitab Application

Lecture 45 - Taguchi Method: Key Concepts

Lecture 46 - Taguchi Method: Illustrative Application

Lecture 47 - Seven QC Tools

Lecture 48 - Statistical Process Control: Key Concepts

Lecture 49 - Statistical Process Control: Control Charts for Variables

Lecture 50 - Operating Characteristic (OC) Curve for Variable Control charts

Lecture 51 - Statistical Process Control: Control Charts for Attributes

Lecture 52 - Operating Characteristic (OC) Curve for Attribute Control charts

Lecture 53 - Statistical Process Control: Minitab Application

Lecture 54 - Acceptance Sampling: Key Concepts

Lecture 55 - Acceptance Sampling Plans for Attributes: Key Concepts

Lecture 56 - Design of Acceptance Sampling Plans for Attributes

Lecture 57 - Acceptance Sampling Plans for Variables

Lecture 58 - Acceptance Sampling: Minitab Application

Lecture 59 - Design for Six Sigma (DFSS): DMADV, DMADOV

Lecture 60 - Design for Six Sigma (DFSS): DFX

Lecture 61 - Team Management

Lecture 62 - Six Sigma: Case study

Lecture 63 - Six Sigma: Summary of key concepts

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Performance and Reward Management (Management)

Co-ordinators : Dr. Susmita Mukhopadhyay

Lecture 1 - Understanding meaning of performance management and reward systems management with performance management process

Lecture 2 - Understanding meaning of performance management and reward systems management with performance management process (Continued...)

Lecture 3 - Understanding meaning of performance management and reward systems management with performance management process (Continued...)

Lecture 4 - Understanding meaning of performance management and reward systems management with performance management process (Continued...)

Lecture 5 - Understanding meaning of performance management and reward systems management with performance management process (Continued...)

Lecture 6 - Developing an understanding as to why performance management and reward management are of strategic importance and their role in strategic planning

Lecture 7 - Developing an understanding as to why performance management and reward management are of strategic importance and their role in strategic planning (Continued...)

Lecture 8 - Developing an understanding as to why performance management and reward management are of strategic importance and their role in strategic planning (Continued...)

Lecture 9 - Developing an understanding as to why performance management and reward management are of strategic importance and their role in strategic planning (Continued...)

Lecture 10 - Developing an understanding as to why performance management and reward management are of strategic importance and their role in strategic planning (Continued...)

Lecture 11 - Implementation of a performance management system, defininig performance and choosing a measurement approach and understanding the meaning of results

Lecture 12 - Implementation of a performance management system, defininig performance and choosing a measurement approach and understanding the meaning of results (Continued...)

Lecture 13 - Implementation of a performance management system, defininig performance and choosing a measurement approach and understanding the meaning of results (Continued...)

Lecture 14 - Implementation of a performance management system, defininig performance and choosing a measurement approach and understanding the meaning of results (Continued...)

Lecture 15 - Implementation of a performance management system, defininig performance and choosing a measurement approach and understanding the meaning of results (Continued...)

Lecture 16 - Implementing a performance management system in your organization

Lecture 17 - Implementing a performance management system in your organization (Continued...)

Lecture 18 - Implementing a performance management system in your organization (Continued...)

Lecture 19 - Implementing a performance management system in your organization (Continued...)

Lecture 20 - Implementing a performance management system in your organization (Continued...)

Lecture 21 - Role of performance management in employee development, addressing performance management skills and team reward management

Lecture 22 - Role of performance management in employee development, addressing performance management skills and team reward management (Continued...)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 23 - Role of performance management in employee development, addressing performance management skills and team reward management (Continued...)

Lecture 24 - Role of performance management in employee development, addressing performance management skills and team reward management (Continued...)

Lecture 25 - Role of performance management in employee development, addressing performance management skills and team reward management (Continued...)

Lecture 26 - Overview,reward system, understanding total, strategic and international reward

Lecture 27 - Overview,reward system, understanding total, strategic and international reward (Continued...)

Lecture 28 - Overview,reward system, understanding total, strategic and international reward (Continued...)

Lecture 29 - Overview,reward system, understanding total, strategic and international reward (Continued...)

Lecture 30 - Overview,reward system, understanding total, strategic and international reward (Continued...)

Lecture 31 - Understanding linkage between performance management and reward, an overview of various types of reward; financial reward, non-financial reward; contingent pay scheme; bonus scheme; team pay ; rewarding for business performance; recognition sc

Lecture 32 - Understanding linkage between performance management and reward, an overview of various types of reward; financial reward, non-financial reward; contingent pay scheme; bonus scheme; team pay ; rewarding for business performance; recognition sc

Lecture 33 - Understanding linkage between performance management and reward, an overview of various types of reward; financial reward, non-financial reward; contingent pay scheme; bonus scheme; team pay ; rewarding for business performance; recognition sc

Lecture 34 - Understanding linkage between performance management and reward, an overview of various types of reward; financial reward, non-financial reward; contingent pay scheme; bonus scheme; team pay ; rewarding for business performance; recognition sc

Lecture 35 - Understanding linkage between performance management and reward, an overview of various types of reward; financial reward, non-financial reward; contingent pay scheme; bonus scheme; team pay ; rewarding for business performance; recognition sc

Lecture 36 - Understanding linkage between performance management and reward, an overview of various types of reward; financial reward, non-financial reward; contingent pay scheme; bonus scheme; team pay ; rewarding for business performance; recognition sc

Lecture 37 - Valuing and grading jobs, understanding pay levels, job evaluation schemes, equal pay, market rate analysis, designing of grade and pay structure

Lecture 38 - Valuing and grading jobs, understanding pay levels, job evaluation schemes, equal pay, market rate analysis, designing of grade and pay structure (Continued...)

Lecture 39 - Valuing and grading jobs, understanding pay levels, job evaluation schemes, equal pay, market rate analysis, designing of grade and pay structure (Continued...)

Lecture 40 - Valuing and grading jobs, understanding pay levels, job evaluation schemes, equal pay, market rate analysis, designing of grade and pay structure (Continued...)

Lecture 41 - Valuing and grading jobs, understanding pay levels, job evaluation schemes, equal pay, market rate analysis, designing of grade and pay structure (Continued...)

Lecture 42 - Rewarding Special Groups, rewarding directors and senior executives, sales and customer service staff, knowledge workers and manual workers

Lecture 43 - Rewarding Special Groups, rewarding directors and senior executives, sales and customer service staff, knowledge workers and manual workers (Continued...)

Lecture 44 - Rewarding Special Groups, rewarding directors and senior executives, sales and customer service staff, knowledge workers and manual workers (Continued...)

Lecture 45 - Rewarding Special Groups, rewarding directors and senior executives, sales and customer service staff, knowledge workers and manual workers (Continued...)

Lecture 46 - Rewarding Special Groups, rewarding directors and senior executives, sales and customer service staff, knowledge workers and manual workers (Continued...)

Lecture 47 - Rewarding Special Groups, rewarding directors and senior executives, sales and customer service staff, knowledge workers and manual workers (Continued...)

Lecture 48 - Understanding relevance of employee benefits and pension schemes, employee benefits, flexible benefits, pension scheme, 7th Pay Commission

Lecture 49 - Understanding relevance of employee benefits and pension schemes, employee benefits, flexible benefits, pension scheme, 7th Pay Commission (Continued...)

Lecture 50 - Understanding relevance of employee benefits and pension schemes, employee benefits, flexible benefits, pension scheme, 7th Pay Commission (Continued...)

Lecture 51 - Understanding relevance of employee benefits and pension schemes, employee benefits, flexible benefits, pension scheme, 7th Pay Commission (Continued...)

Lecture 52 - Understanding relevance of employee benefits and pension schemes, employee benefits, flexible benefits, pension scheme, 7th Pay Commission (Continued...)

Lecture 53 - Developing and Implementing Reward Systems

Lecture 54 - Developing and Implementing Reward Systems (Continued...)

Lecture 55 - Developing and Implementing Reward Systems (Continued...)

Lecture 56 - Developing and Implementing Reward Systems (Continued...)

Lecture 57 - Developing and Implementing Reward Systems (Continued...)

Lecture 58 - Understanding the implications of performance and reward management in present organizational dynamics through case studies

Lecture 59 - Understanding the implications of performance and reward management in present organizational dynamics through case studies (Continued...)

Lecture 60 - Understanding the implications of performance and reward management in present organizational dynamics through case studies (Continued...)

Lecture 61 - Understanding the implications of performance and reward management in present organizational dynamics through case studies (Continued...)

Lecture 62 - Understanding the implications of performance and reward management in present organizational dynamics through case studies (Continued...)

Lecture 63 - Understanding the implications of performance and reward management in present organizational dynamics through case studies (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:The Ethical Corporation (Management)

Co-ordinators : Prof. Chhanda Chakraborti

Lecture 1 - What is a Corporation

Lecture 2 - Ethical Corporation

Lecture 3 - What is Ethics

Lecture 4 - Law and Ethics, and Responsibilities

Lecture 5 - Why should a Corporation be Ethical

Lecture 6 - Normative Ethical Theories : Utilitarianism

Lecture 7 - Normative Ethical Theories : Deontological Ethics

Lecture 8 - Normative Ethical Theories : Rights and Justice

Lecture 9 - Normative Ethical Theories : Virtue Ethics

Lecture 10 - Normative Ethical Theories : Care Ethics

Lecture 11 - Managing Ethics within the Corporation

Lecture 12 - Managing Ethics within the Organization : Formal Approach

Lecture 13 - Managing Ethics within a Corporation : Formal and Informal Approach

Lecture 14 - How to Manage Inter - Personal Ethical Misconduct at Workplace

Lecture 15 - How to Apply Ethics

Lecture 16 - Understanding Corporate Governance

Lecture 17 - Conflicts and Key Elements in Corporate Governance

Lecture 18 - Specific Areas of Concern in Corporate Governance and Countermeasures - I

Lecture 19 - Specific Areas of Concern in Corporate Governance and Countermeasures - II

Lecture 20 - Concluding Session on Corporate Governance

Lecture 21 - Investing in Human relations: Employees as stakeholders and Investors of Human Capital

Lecture 22 - Employer-employee: Duties and rights from both sides

Lecture 23 - Organization model and employer-employee relation

Lecture 24 - Some specific issues in employer-employee relationship

Lecture 25 - Employees All Over the World

Lecture 26 - The Ethical Corporation : Natural Environment

Lecture 27 - Corporate Obligations to Natural Environment through the Laws

Lecture 28 - Corporate Obligations to Natural Environment through Appeal to Business Sense and Strategy

Lecture 29 - Corporate Obligations to Natural Environment on Ethical Grounds

Lecture 30 - Environmental Obligations : What Can an Ethical Corporation Do?

Lecture 31 - Consumers as Stakeholders and Consumer Protection

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Ethics of Consumer Protection

Lecture 33 - Consumer ethics: Duty of a Corporation in marketing communication and promotion

Lecture 34 - Consumer ethics: Ethical issues in Marketing Management

Lecture 35 - Consumer Ethics: Duty of the Consumers

Lecture 36 - Competitors as Stakeholders and Fiar Competition

Lecture 37 - What is NOT Fair Competition

Lecture 38 - Competitors as Stakeholders; Global Competition

Lecture 39 - Suppliers as Stakeholders : Ethics in Supply Chain

Lecture 40 - Competitors and Suppliers : What can an Ethical Corporation Do?

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Intellectual Property Rights and Competition Law (Management)

Co-ordinators : Prof. Niharika Sahoo Bhattacharya

Lecture 1 - Concept of Intellectual Property Law Patents

Lecture 2 - Trademark

Lecture 3 - Geographical Indications

Lecture 4 - Copyright

Lecture 5 - Industrial Designs

Lecture 6 - Integrated Circuits Layout Designs

Lecture 7 - Trade Secrets or Undisclosd Information

Lecture 8 - Information Competition Law

Lecture 9 - Introduction to Competition Law (Continued...)

Lecture 10 - Introduction Competieion Low Anti-Competitive Practices

Lecture 11 - Bid-Rigging

Lecture 12 - Introduction Competition Law - Vertical Agreements

Lecture 13 - Abuse of Dominance, Combinations

Lecture 14 - Regulation of Combinations

Lecture 15 - Economic Theory of Ip And Competition

Lecture 16 - Interface Between Ip And Competition

Lecture 17 - The United States Anti-Trust Law

Lecture 18 - Tying Arrangements And Intellectual Property Under Sharman Act

Lecture 19 - Unites States Jurisprudence: Unilateral Refusal To License Or Deal

Lecture 20 - Price Fixing And Antitrust Law

Lecture 21 - Market Allocation And Ipr

Lecture 22 - Vertical Restraints

Lecture 23 - Vertical Restraints (Contd)

Lecture 24 - Enforcement of Anti-Trust Law in United States

Lecture 25 - Introduction To EU Competition Policy And IPR

Lecture 26 - IP Based Conduct under Article 101

Lecture 27 - IP Based Conduct under Article 102

Lecture 28 - IP Based Conduct under Article 102

Lecture 29 - Technology Transfer Agreements

Lecture 30 - TTBER and safe harbor provisions

Lecture 31 - Standard Essential Patents and FRAND Terms

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Principles of Management (Management)

Co-ordinators : Prof. S. Srinivasan, Dr. Susmita Mukhopadhyay

Lecture 1 - Definition, Nature, Purpose and Scope of Management

Lecture 2 - Skills, Roles and Functions of Management

Lecture 3 - Principles of Management

Lecture 4 - Scientific Management

Lecture 5 - Evolution of Management Thought

Lecture 6 - Concept, Types, Importance and Process of Planning

Lecture 7 - Characteristics, Nature and Scope and Principles of Planning

Lecture 8 - Traditional objective setting and methods of Planning

Lecture 9 - Strategic Management and Planning

Lecture 10 - Premising and Forecasting of Planning

Lecture 11 - Concept, Types, Importance and Process of Decision Making

Lecture 12 - Different Models of Decision Making

Lecture 13 - Decision Making Styles and Cognitive biases in decision making

Lecture 14 - Barriers of Effective Decision Making

Lecture 15 - Group Decision Making

Lecture 16 - Concept,Importance and Steps of Management by Objectives

Lecture 17 - Concept,Importance and Steps of Management by exception

Lecture 18 - Style of Management (American, Japanese and Indian)

Lecture 19 - Approaches of management including McKinseyâ€™s 7â€™s approach

Lecture 20 - Introduction, strategies, techniques, benefits and rules of Self Management

Lecture 21 - Concept, Importance, Process, Nature, and Principle of Organisation

Lecture 22 - Organisational Design and Structure

Lecture 23 - Coordination in Management

Lecture 24 - Differentiation in management

Lecture 25 - Concept, Types, Importance, Steps, Factors and Advantages of Integration

Lecture 26 - Concept, Types, Importance and Process of Span of Management

Lecture 27 - Concept, types, factors, advantages and disadvantages of Centralisation and Decentralisation

Lecture 28 - Delegation

Lecture 29 - Different issues relating to authority and power

Lecture 30 - Different aspects of line and staff organisation

Lecture 31 - Concept, importance, process and methods of Staffing and HRM

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Recruitment and Selection

Lecture 33 - Recruitment and Selection (Continued...)

Lecture 34 - Performance Appraisal

Lecture 35 - Performance Appraisal (Continued...)

Lecture 36 - Concept, Types, Importance, Techniques of Career strategy

Lecture 37 - Concept, Types, Importance, Techniques of Career strategy (Continued...)

Lecture 38 - Concept, Types, Importance, Techniques of Career strategy (Continued...)

Lecture 39 - Coordination-Concept, Issues and Techniques

Lecture 40 - Coordination-Concept, Issues and Techniques (Continued...)

Lecture 41 - Concept, importance, elements of organisational change

Lecture 42 - Concept, importance, elements of organisational change (Continued...)

Lecture 43 - Forces and factors of organisational change

Lecture 44 - Resistance to change

Lecture 45 - Theories of change and resistance to change

Lecture 46 - Methods of dealing with change

Lecture 47 - Methods of dealing with change (Continued...)

Lecture 48 - Behavioural reaction to organisational Change

Lecture 49 - Approaches to manage organisational Change

Lecture 50 - Approaches to manage organisational Change

Lecture 51 - Action Research model to manage organisational change

Lecture 52 - Organisational development

Lecture 53 - Leadership, and Its Theories

Lecture 54 - Team and Team Work in Management

Lecture 55 - Human factors and Motivation

Lecture 56 - Communication and Its Barriers

Lecture 57 - Controlling: Issues, Types, Techniques and Importance

Lecture 58 - Budgeting, concept, importance, process and benefits

Lecture 59 - Reporting- concepts, types, importance and advantages

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Decision Support System for Managers (Management)

Co-ordinators : Prof Sujoy Bhattacharya, Prof. Anupam Ghosh, Prof. Kunal Kanti Ghosh

Lecture 1 - Introduction to decision support systems

Lecture 2 - Components of a decision support systems

Lecture 3 - Components of a decision support systems (Continued...)

Lecture 4 - Models in decision support systems

Lecture 5 - Models in decision support systems (Continued...)

Lecture 6 - Structured, Semi-Structured and Unstructured problems; Models

Lecture 7 - Purpose of models; classification of models

Lecture 8 - Solution Techniques - Optimization : Linear Programming

Lecture 9 - Solution Techniques - Optimization : Linear Programming (Continued...)

Lecture 10 - Solution Techniques - Optimization : Integer Programming

Lecture 11 - Decision Support Systems for Forecasting

Lecture 12 - Decision Support Systems for Forecasting (Continued...)

Lecture 13 - Decision Support Systems for Forecasting (Continued...)

Lecture 14 - Decision Support Systems for Forecasting (Continued...)

Lecture 15 - Decision Support Systems for Forecasting (Continued...)

Lecture 16 - Decision Making for Warehouse Location : Factor Rating and Break - Even Method

Lecture 17 - Decision Making for Warehouse Location (Continued..): Centre of gravity; Ardalan heuristic and transportation cost models

Lecture 18 - Estimation of space requirement in a warehouse and concept of economic order quantity (EOQ)

Lecture 19 - Economic order quantity (EOQ) (Continued...)

Lecture 20 - ABC-FSN-VED Analysis; space calculation in a warehouse - for Staging area

Lecture 21 - Space calculation in a warehouse : Space calculation for racks

Lecture 22 - Order Picking; Material handling equipment's

Lecture 23 - Material Safety and Safety Equipment's

Lecture 24 - Automated storage and replenishment systems (AS/RS)

Lecture 25 - Managerial Decision making in the context of warehousing and materials management

Lecture 26 - Issues in HR; Employee Selection

Lecture 27 - Employee Selection, Promotion and Deployment Method - Lp Method

Lecture 28 - Employee Selection, Promotion and Deployment Method - Rating and ranking Method ; Clustering

Lecture 29 - Employee Selection, Promotion and Deployment Method - BCG

Lecture 30 - Strategizing for Business, the SWOT and Porter's Framwork Revisited

Lecture 31 - Fortune at the Bottom of the Pyramid, GE, Rule of Three

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Self Actualisation Needs, Rural Marketing Challenges

Lecture 33 - Rural Marketing; Balanced ScoreCard

Lecture 34 - Evaluating Investment Proposls : NPV, IRR

Lecture 35 - Costing and Pricing for Public Transport

Lecture 36 - Costing and Pricing for Hospitals

Lecture 37 - Decision Support Systems for Marketing : Decision Support Systems for Media Selection Model

Lecture 38 - Decision Support Systems for Marketing : Decision Support Systems for Media Selection Model (Continued...)

Lecture 39 - Decision Support Systems for Marketing : Decision Support Systems for Product Pricing Model

Lecture 40 - Pricing : Model Selection Using Cross - Validation

Lecture 41 - Taxation and the Distribution Network

Lecture 42 - Transhipment; Flexibility and Six Sigma

Lecture 43 - Flexibility and Total Cost of the Network

Lecture 44 - Risk Analysis for the Distribution Network

Lecture 45 - Echelons in the Network

Lecture 46 - Concept of Variability and Six Sigma

Lecture 47 - Concept of Variability and Six Sigma (Continued...)

Lecture 48 - Roadmap to Six Sigma; Ishikawa Diagram and SIPOC

Lecture 49 - Service Systems : Characteristics; Failure and Recovery

Lecture 50 - Decision Support Systems for Inventory

Lecture 51 - Decision Support Systems for Inventory (Continued...)

Lecture 52 - Decision Support Systems for Inventory (Continued...)

Lecture 53 - Decision Support Systems for Inventory (Continued...)

Lecture 54 - Decision Support Systems for Inventory (Continued...)

Lecture 55 - Decision Support Systems for Operations Management

Lecture 56 - Decision Support Systems for Operations Management (Continued...)

Lecture 57 - Decision Support Systems for Operations Management (Continued...)

Lecture 58 - Decision Support Systems for Operations Management (Continued...)

Lecture 59 - Decision Support Systems for Operations Management (Continued...)

Lecture 60 - DSS for Multi - Item Production - Distribution Planning

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Management Information System (Management)

Co-ordinators : Prof. Kunal Kanti Ghosh, Prof. Surojit Mukherjee, Prof. Saini Das

Lecture 1 - Introduction - Part 1

Lecture 2 - Introduction - Part 2

Lecture 3 - Dimensions of Information System

Lecture 4 - Information Management in the digital world

Lecture 5 - Class discussions and conclusion

Lecture 6 - Data bases and information management

Lecture 7 - Data warehouse and business intelligence

Lecture 8 - Introduction to data mining

Lecture 9 - Data analytics tools and techniques

Lecture 10 - What is ERP ?

Lecture 11 - ERP - Evolution and Benefits

Lecture 12 - Business Benrfits of ERP

Lecture 13 - ERP project management: Challenge, risks and best practices

Lecture 14 - Change management and conclusion

Lecture 15 - Customer relationship management

Lecture 16 - Supply Chain Management - Part 1

Lecture 17 - Supply Chain Management - Part 2

Lecture 18 - Supplier relationship management

Lecture 19 - Product lifecycle maintenance

Lecture 20 - Information Systems for manufacturing management

Lecture 21 - Information Systems for manufacturing management (Continued...)

Lecture 22 - Information Systems for materials management

Lecture 23 - Information Systems for quality management

Lecture 24 - Information Systems for marketing

Lecture 25 - Information Systems for marketing (Continued...)

Lecture 26 - Information Systems for sales and distribution

Lecture 27 - Information Systems for finance and accounting

Lecture 28 - Information Systems for human resource management

Lecture 29 - Information Systems for human resource management (Continued...)

Lecture 30 - Information Systems (IS) strategy

Lecture 31 - Aligning IT with business objectives

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Balanced Score Card

Lecture 33 - Data Centers, Virtualization and cloud computing

Lecture 34 - Cloud computing and selection of cloud vendor

Lecture 35 - Introduction to E-Commerce

Lecture 36 - B2C Business Models

Lecture 37 - B2C Business Models (Continued...)

Lecture 38 - Unique E-Commerce Business Models

Lecture 39 - Social Commerce and M-Commerce

Lecture 40 - Cloud Computing - Part I

Lecture 41 - Cloud Computing - Part II

Lecture 42 - Internet of Things - Part I

Lecture 43 - Internet of Things - Part II

Lecture 44 - Internet of Things - Part III

Lecture 45 - Big Data and other Emerging Technologies

Lecture 46 - Knowledge Management Systems (KMS)

Lecture 47 - Decision Support Systems

Lecture 48 - Executive Support Systems

Lecture 49 - Expert Systems

Lecture 50 - Learning Management Systems (LMS)

Lecture 51 - Ethical and Social Issues in MIS - I

Lecture 52 - Ethical and Social Issues in MIS - II

Lecture 53 - Security Issues in MIS - I

Lecture 54 - Security Issues in MIS - II

Lecture 55 - Security Issues in MIS - III

Lecture 56 - Managing Global Organization - Globalization - Part 1

Lecture 57 - Global Strategies and Business Organization

Lecture 58 - Shared Services

Lecture 59 - Offshoring/Transitioning Global IT Systems

Lecture 60 - Globalization of Corporates in a Flat World

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Applied Econometrics (Management)

Co-ordinators : Prof. Tutan Ahmed

Lecture 1 - Overview of Module 1 and Introduction of Causality

Lecture 2 - Correlation and Causality

Lecture 3 - Correlation and Causality (Continued...)

Lecture 4 - Correlation and Causality (Continued...)

Lecture 5 - Probability Theory

Lecture 6 - Probability Theory (Continued...)

Lecture 7 - Probability Theory (Continued...)

Lecture 8 - Probability Theory (Continued...)

Lecture 9 - Posterior Probability

Lecture 10 - Bayesian Theorem

Lecture 11 - Bayesian Theorem (Continued...): Repeated Trial

Lecture 12 - Bayesian Theorem (Continued...): Example of Diamond Identification

Lecture 13 - Probability Distribution

Lecture 14 - Double Structure of Variable

Lecture 15 - Probability Distribution (Discrete/Continuous Variable) Random Variable

Lecture 16 - Probability Mass Function (PMF) Probability Density Function (PDF)

Lecture 17 - Expectation, Variance, Covariance

Lecture 18 - Expectation, Variance, Covariance (Continued...)

Lecture 19 - Covariance Rule

Lecture 20 - Bernoulli Distribution

Lecture 21 - Bernoulli Distribution (Continued...)

Lecture 22 - Normal Approximation of Bernoulli Distribution

Lecture 23 - Sampling

Lecture 24 - Sampling (Continued...)

Lecture 25 - Central Limit Theorem

Lecture 26 - Law of Large Numbers LLN

Lecture 27 - Properties of Estimator

Lecture 28 - Conflict Between Unbiasedness and Min Variance

Lecture 29 - T-Distribution

Lecture 30 - Normal Distribution

Lecture 31 - Normal Distribution (Continued...)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Hypothesis Testing

Lecture 33 - Decision Rules

Lecture 34 - Level of Significance

Lecture 35 - P Value

Lecture 36 - Power of a Test

Lecture 37 - Confidence Interval

Lecture 38 - Confidence Interval Example

Lecture 39 - Properties of Power of a Test

Lecture 40 - Introduction to Module II

Lecture 41 - Error Term, Coefficient of Determination, Regression Coefficient

Lecture 42 - Error Term, Coefficient of Determination, Regression Coefficient (Continued...)

Lecture 43 - Error Term, Coefficient of Determination, Regression Coefficient (Continued...)

Lecture 44 - Definition : Variable, Parameter and Coefficient

Lecture 45 - Introduction to Regression: Recapitulating Correlation and Causal Thinking

Lecture 46 - Adjusted R-Squared

Lecture 47 - Degrees of Freedom

Lecture 48 - Multiple Regression

Lecture 49 - Multiple Regression (Continued...)

Lecture 50 - Regression Table

Lecture 51 - Regression Table (Continued...)

Lecture 52 - Multicollinearity

Lecture 53 - Multicollinearity (Continued...)

Lecture 54 - Multicollinearity (Continued...)

Lecture 55 - Multicollinearity (Continued...)

Lecture 56 - Multicollinearity (Continued...)

Lecture 57 - Dummy Variable

Lecture 58 - Dummy variable (Continued...)

Lecture 59 - Dummy variable (Continued...)

Lecture 60 - Dummy variable (Continued...)

Lecture 61 - Dummy variable (Continued...)

Lecture 62 - Dummy variable (Continued...)

Lecture 63 - Dummy variable (Continued...)

Lecture 64 - Heteroscedasticity

Lecture 65 - Heteroscedasticity (Continued...)

Lecture 66 - Heteroscedasticity (Continued...)

Lecture 67 - Heteroscedasticity (Continued...)

Lecture 68 - Heteroscedasticity (Continued...)

Lecture 69 - Heteroscedasticity (Continued...)

Lecture 70 - Autocorrelation

Lecture 71 - Autocorrelation (Continued...)

Lecture 72 - Autocorrelation (Continued...)

Lecture 73 - Autocorrelation (Continued...)

Lecture 74 - Autocorrelation (Continued...)

Lecture 75 - Autocorrelation (Continued...)

Lecture 76 - Autocorrelation (Continued...)

Lecture 77 - Autocorrelation (Continued...)

Lecture 78 - Autocorrelation (Continued...)

Lecture 79 - Autocorrelation (Continued...)

Lecture 80 - Autocorrelation (Continued...)

Lecture 81 - Autocorrelation (Continued...)

Lecture 82 - Remedy for Autocorrelation

Lecture 83 - Model Specification

Lecture 84 - Model Specification (Continued...)

Lecture 85 - Model Specification (Continued...)

Lecture 86 - Model Specification (Continued...)

Lecture 87 - Model Specification (Continued...)

Lecture 88 - Model Specification (Continued...)

Lecture 89 - Model Specification (Continued...)

Lecture 90 - Model Specification (Continued...)

Lecture 91 - Continuation with Proxy Variable

Lecture 92 - Ramsey Reset Test

Lecture 93 - Introduction to Module III

Lecture 94 - Non Stochastic Regressor

Lecture 95 - Stochastic Regressor

Lecture 96 - Assumptions for Regression Models with Non-Stochastic Regressor

Lecture 97 - Assumptions for Regression Model with Stochastic Regressor

Lecture 98 - Instrumental Variable

Lecture 99 - Instrumental Variable (Continued...)

Lecture 100 - Asymptotic Property

Lecture 101 - Problem of Endogeneity

Lecture 102 - Simultaneous Equation Model

Lecture 103 - Instrumental Variable for Endogeneity Bias Problem

Lecture 104 - Good Bad and Weak Instrumental Variable

Lecture 105 - Overidentification Underidentification Exact Identification - Instrumental Variable

Lecture 106 - Two Stage Least Square and Instrumental Variable

Lecture 107 - 2SLS and IV with Stata

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Organizational Behaviour - II (Management)

Co-ordinators : Prof. Susmita Mukhopadyay

Lecture 1 - Group and Types, Characteristics

Lecture 2 - Group Properties and Determinants of Group Behaviour

Lecture 3 - Stages, Theories and Models of Group Development

Lecture 4 - Effectiveness of Work Group Behaviour

Lecture 5 - Group Decision Making and Limitations of Group Behaviour

Lecture 6 - Concept and Types of Team

Lecture 7 - How to improve team performance, difference between Team and Group

Lecture 8 - Effectiveness of Teamwork

Lecture 9 - Teamwork Process

Lecture 10 - Teamwork and Leadership

Lecture 11 - Concept and Types of Cooperation and Competition

Lecture 12 - Factors leading to Competition and Cooperation

Lecture 13 - Functions of Cooperation and Competition

Lecture 14 - Models on Competition and Cooperation

Lecture 15 - Benefits and drawbacks of competition and cooperation

Lecture 35 - Decision making (Continued...)

Lecture 36 - Leadership Concept Types and Importance

Lecture 37 - Team Leadership Context, Actions

Lecture 38 - Theories of Leadership: Trait, Behavioural, Contingency, LMX, Three Dimensional

Lecture 39 - Leadership Qualities, Techniques and Skills

Lecture 40 - Leadership and Management

Lecture 41 - Problem Solving-Concept, Types and Importance

Lecture 42 - Problem Solving Process, Decision Making and Comparison between

Lecture 43 - Creativity

Lecture 44 - Problem Solving and Creativity in Team

Lecture 45 - Creativity Across Different Paradigms

Lecture 46 - Team and Organization

Lecture 47 - Organizational Culture

Lecture 48 - International Organizational Behaviour

Lecture 49 - Interpersonal Behaviour Across Cultures

Lecture 50 - Organizational Characteristics in Global Context

Lecture 51 - Virtual Team-Concept and importance

Lecture 52 - Virtual Team Models

Lecture 53 - Skills and Competencies of Virtual Team Members

Lecture 54 - Process of Virtual Team Development

Lecture 55 - Factors of Success, Advantages and Disadvantages of Virtual Teams

Lecture 56 - Evaluating Teams

Lecture 57 - Steps of Evaluation

Lecture 58 - Tools, Techniques and Methods of Evaluation

Lecture 59 - Rewarding Teams

Lecture 60 - Rewarding Teams (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Automation in Production Systems and Management (Management)

Co-ordinators : Prof. Pradip Kumar Ray

Lecture 1 - Basic Concepts of Manufacturing Systems, Evolution of Manufacturing Systems

Lecture 2 - Types of Manufacturing Systems and Role of Automation

Lecture 3 - Product-Process-Flexibility Matrices, Four-Plane Concept of Manufacturing

Lecture 4 - Product Design and Manufacturing Systems

Lecture 5 - Definitions and Design Criteria for Production Systems

Lecture 6 - Manufacturing System Components - I

Lecture 7 - Manufacturing System Components - II

Lecture 8 - Industry 4.0

Lecture 9 - Automation Principles and Strategies for Process Improvement

Lecture 10 - Automated Production System Framework

Lecture 11 - Product Development Process: Approaches and stages

Lecture 12 - Mathematical Models for Interaction between Design and Manufacturing

Lecture 13 - Sequential and Concurrent Engineering Approaches for Product Development

Lecture 14 - Characterization of Concurrent Engineering Framework

Lecture 15 - Concurrent Engineering Techniques

Lecture 16 - Introduction to Concept and Application of Numerical Control (NC) Technology

Lecture 17 - Basic Concepts of an NC System

Lecture 18 - NC Coordinate System, NC Motion Control System

Lecture 19 - Features of CNC, Configuration of CNC Machine Control System

Lecture 20 - Numerical Examples

Lecture 21 - Distributed Numerical Control (DNC) and its Configuration

Lecture 22 - NC Part Programming-I (Manual, Computer-assisted)

Lecture 23 - NC Part Programming-II (CAD/CAM, MDI)

Lecture 24 - Interpolation and Part Programming

Lecture 25 - Numerical Examples

Lecture 26 - Group Technology (GT): Concept and Definition

Lecture 27 - Methods and Implementation of GT for Automation

Lecture 28 - Part Family Formation: Tools and Techniques

Lecture 29 - Numerical Examples on Part Family Formation

Lecture 30 - Application of GT for Designing Flexible and Programmable Automation

Lecture 31 - Concept and Definition of Cellular Manufacturing System (CMS)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Cell Formation Approaches - I

Lecture 33 - Cell Formation Approaches - II

Lecture 34 - Evaluation of Cell Design, Numerical Examples

Lecture 35 - Production Planning and Control in CMS, Assessment of Solution by Heuristics

Lecture 36 - Types and Definitions of of Flexibility in Manufacturing Systems

Lecture 37 - Volume-Variety Relationships in Production Systems, What is FMS?

Lecture 38 - Basic Features of FMS: PhysicalSsubsystems

Lecture 39 - Basic Features of FMS: Control Subsystems and Manufacturing Control Activities.

Lecture 40 - Types of Problems in FMS

Lecture 41 - Operational Problems in FMS: Tools and Techniques - 1, Problem Formulation

Lecture 42 - Operational Problems in FMS: Tools and Techniques - 2, Numerical Examples

Lecture 43 - Tool Allocation Policies in FMS, Numerical Examples

Lecture 44 - Fixture and Pallet Selection Problems: Numerical Examples

Lecture 45 - Types of FMS Layout, Relative Advantages

Lecture 46 - Fundamentals of Robotics and its Applications

Lecture 47 - Robot Movement and Precision

Lecture 48 - Robot Motion Analysis, Robotic Joints and Links

Lecture 49 - Robot Classification System, Industrial Robot Applications

Lecture 50 - Numerical Examples

Lecture 51 - Definition of Process Planning: Function of Process Plan

Lecture 52 - Basic Steps in Process Plan Development

Lecture 53 - Process Planning Approaches: Manual Experience-based Process Planning

Lecture 54 - Process Planning Approaches: Computer-aided Process Planning

Lecture 55 - CIN and CAPP, Process Optimization and CAPP

Lecture 56 - Process Optimization and CAPP

Lecture 57 - FMS and CAPP

Lecture 58 - Process Optimization and CAPP: Numerical Examples

Lecture 59 - Process Planning and Concurrent Engineering

Lecture 60 - Autonomation (and other TPS Areas and Approaches)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Corporate Finance (Management)

Co-ordinators : Prof. Abhijeet Chandra

Lecture 1 - Introduction to Corporate Finance

Lecture 2 - Corporate Finance and Corporate Governance

Lecture 3 - Sources of Finance for a Firm

Lecture 4 - Return and Risk

Lecture 5 - Return, Risk and Portfolio Theory

Lecture 6 - Time Value of Money

Lecture 7 - Valuation of Future Cash Flows

Lecture 8 - Valuation of Future Cash Flows (Continued...)

Lecture 9 - Valuation of Bonds

Lecture 10 - Valuation of Stocks

Lecture 11 - Capital Budgeting Decisions

Lecture 12 - Capital Budgeting Decisions (Continued...)

Lecture 13 - Capital Budgeting Techniques - I

Lecture 14 - Capital Budgeting Techniques - II

Lecture 15 - Capital Budgeting Techniques - III

Lecture 28 - Setting Communication Objectives and Rossiter and Percy Grid

Lecture 29 - Marketing Objectives

Lecture 30 - Problems in Implementing Advertising and Promotions Objective

Lecture 31 - Introduction to Advertising Budgets

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Budgeting Approaches - I

Lecture 33 - Budgeting Approaches - II

Lecture 34 - Advertising Budgets - III

Lecture 35 - Creative Strategy

Lecture 36 - Creative Execution

Lecture 37 - Introduction to Media Planning

Lecture 38 - Media Planning Process

Lecture 39 - Media Planning Decision and Media Types

Lecture 40 - Art of Copywriting

Lecture 41 - Copy Testing and Diagnosis

Lecture 42 - Advertising Campaign - I

Lecture 43 - Advertising Campaign - II

Lecture 44 - Advertising Research Technique - I

Lecture 45 - Advertising Research Technique - II

Lecture 46 - Introduction to the Advertising Agency - I

Lecture 47 - Advertising Agency - II

Lecture 48 - Advertising Agency - III

Lecture 49 - Advertising Agency - IV

Lecture 50 - Advertising Agencies - V

Lecture 51 - Introduction to Public Relations - I

Lecture 52 - Introduction to Public Relations - II

Lecture 53 - Introduction to Public Relations - III

Lecture 54 - The Process of Public Relations

Lecture 55 - Publicity and Corporate Advertising

Lecture 56 - Advertising Laws and Ethics

Lecture 57 - Intellectual Property Rights and Advertising

Lecture 58 - Social Aspects of Advertising

Lecture 59 - Economic Aspects of Advertising

Lecture 60 - Advertising the Way Forward: Insights for Tomorrowâ€™s Journey

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Infrastructure Finance (Management)

Co-ordinators : Dr. A. Thillai Rajan

Lecture 1 - Introduction

Lecture 2 - Overview on Infrastructure Financing Sources

Lecture 3 - Basics of Financial Management - Part-1

Lecture 4 - Basics of Financial Management - Part-2

Lecture 5 - Basics of Financial Management - Part-3

Lecture 6 - Basics of Financial Management - Part-4

Lecture 7 - Analysis of company Performance - Part-1

Lecture 8 - Analysis of company Performance - Part-2

Lecture 9 - Analysis of Project Viability Time value of money

Lecture 10 - Analysis of Project Viability Cost of Capital

Lecture 11 - Analysis of Project Viability Capital Budgeting Techniques - I

Lecture 12 - Analysis of Project Viability Capital Budgeting Guidelines - II

Lecture 13 - Analysis of Project Viability Capital Budgeting Guidelines - III

Lecture 14 - Analysis of Project Viability Capital Budgeting Guidelines - IV

Lecture 15 - Overview and introduction to project finance

Lecture 16 - Project Financing Attributes and Motivations - I

Lecture 17 - Project Financing Attributes and Motivations - II

Lecture 18 - Project Finance Markets - I

Lecture 19 - Project Finance Markets - II

Lecture 20 - Project Finance Markets - III

Lecture 21 - Project Finance Markets Mezzanine / Sub-ordinated Debt

Lecture 22 - Project Finance Markets - Type of Dept and Leasing

Lecture 23 - Project Finance Markets - Financial Intermediation

Lecture 24 - Project Finance Markets - Loan Refinancing

Lecture 25 - Project Finance Markets - Project Bonds - I

Lecture 26 - Project Finance Markets - Project Bonds - II

Lecture 27 - Public Private Partnerships

Lecture 28 - Risk Management - I

Lecture 29 - Risk Management - II

Lecture 30 - Risk Management - III

Lecture 31 - Risk Management - Market Risks

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Risk Management - Country / Political risks - I

Lecture 33 - Risk Management - Country / Political risks - II

Lecture 34 - Risk Management - Country / Political risks - III

Lecture 35 - Risk Management - Country / Political risks - IV

Lecture 36 - Context of infrastructure development - I

Lecture 37 - Context of infrastructure development - II

Lecture 38 - Context of infrastructure development - III

Lecture 39 - Context of infrastructure development - IV

Lecture 40 - Context of infrastructure development - V

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Manufacturing Systems Management (Management)

Co-ordinators : Prof. G. Srinivasan

Lecture 1 - Introduction to Manufacturing Systems Management

Lecture 2 - Different types of Manufacturing Systems

Lecture 3 - Introduction to Cellular Manufacturing

Lecture 4 - Cellular Manufacturing Applications, Production Flow Analysis

Lecture 5 - Production Flow Analysis

Lecture 6 - Cellular Manufacturing - Unidirectional flow, Capacity Planning, Layout

Lecture 7 - Exercise on Production Flow Analysis

Lecture 8 - Rank Order Clustering, Similarity Coefficient based algorithm

Lecture 9 - Similarity Coefficient based clustering algorithm

Lecture 10 - Hierarchical and Non hierarchical clustering algorithms

Lecture 11 - Optimization based algorithms

Lecture 12 - Optimization based algorithms, Assignment based algorithm

Lecture 13 - Assignment model, Algorithm considering sequence of visit of machines

Lecture 14 - Algorithm considering sequence of visit of machines

Lecture 15 - Algorithm considering cell load data, alternate process plans

Lecture 16 - Reducing Intercell moves

Lecture 17 - Part subcontracting, Incremental cell formation

Lecture 18 - Product based cells

Lecture 19 - Branching algorithm for product based cells, Operator and task assignment

Lecture 20 - Operator and task assignment

Lecture 21 - Operator and task assignment continued

Lecture 22 - Static and dynamic Operator allocation, Multiple products and incremental cells

Lecture 23 - Cell scheduling and sequencing

Lecture 24 - Cell scheduling and sequencing continued

Lecture 25 - Single piece transportation

Lecture 26 - Cell Layout, Introduction to Just-in-time manufacturing

Lecture 27 - Cell control and JIT

Lecture 28 - Basic elements of JIT, Kanban systems

Lecture 29 - Role of basic elements, Critical success factors

Lecture 30 - Models in JIT

Lecture 31 - Models in JIT continued

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - CONWIP, Introduction to synchronous manufacturing

Lecture 33 - Theory of constraints, Product mix problem

Lecture 34 - Statistical Fluctuations, Random events, principles of SM

Lecture 35 - Scheduling in SM

Lecture 36 - Drum Buffer Rope system

Lecture 37 - Flexible Manufacturing System, Part selection problem

Lecture 38 - FMS Loading problem

Lecture 39 - FMS Loading, multiple batches and changeover times

Lecture 40 - FMS Loading and scheduling, Summary of the course contents

NPTEL : Operations and Supply Chain Management (Management)

Co-ordinators : Prof. G. Srinivasan

Lecture 1 - Introduction - (Challenges, Methodologies)

Lecture 2 - Forecasting - Time series models - Simple Exponential smoothing

Lecture 3 - Forecasting - Linear Models, Regression, Holtâ€™s , seasonality

Lecture 4 - Forecasting - Winterâ€™s model, causal models, Goodness of forecast, Aggregate Planning, Tabular method

Lecture 5 - Aggregate Planning, Tabular method, Linear Programming

Lecture 6 - Aggregate Planning, Transportation model

Lecture 7 - Aggregate Planning, Dynamic Programming, backordering

Lecture 8 - Aggregate Planning, Quadratic model, Demand and capacity planning

Lecture 9 - Inventory Models - Costs, EOQ model

Lecture 10 - Inventory - EOQ model graphs, with backordering

Lecture 11 - Inventory - Models for all quantity and marginal quantity Discount

Lecture 12 - Multiple Quantity Discount, Multiple item inventory - Constraint on numbers of orders

Lecture 13 - Multiple item inventory - Constraint on money value, space, equal number of orders

Lecture 14 - Multiple item inventory - combining orders, production consumption model

Lecture 15 - Inventory - Production consumption model with backordering, Economic lot scheduling problem

Lecture 16 - Economic lot scheduling problem, Supply Chain inventory

Lecture 17 - Lot sizing

Lecture 18 - Lot sizing - heuristics

Lecture 19 - Disaggregation

Lecture 20 - Disaggregation - time varying demand, Safety stock - ROL for discrete demand distribution

Lecture 21 - Safety stock - ROL for normal distribution of lead time demand

Lecture 22 - Integrated model, ROL for normal distribution of LTD and given mean

Lecture 23 - Safety stock reduction â€“ delayed Product differentiation, substitution. MOM

Lecture 24 - Sequencing and scheduling â€“ Assumptions, objectives and shop settings

Lecture 25 - Single machine sequencing. Two machine flow shop â€“ Johnsonâ€™s algorithm

Lecture 26 - Flow shop scheduling - Three machines, Johnsonâ€™s algorithm and Branch and bound algorithm

Lecture 27 - Flow shop scheduling - heuristics â€“ Palmer, Campbell Dudek Smith algorithm

Lecture 28 - Job shop scheduling - Gantt chart, Different dispatching rules

Lecture 29 - Job shop scheduling - Shifting bottleneck heuristic

Lecture 30 - Job shop scheduling - Shifting bottleneck heuristic. Line Balancing

Lecture 31 - Line Balancing

Lecture 32 - Location problems - p median problem, Fixed charge problem

Lecture 33 - Location allocation problems in supply chain. Layout

Lecture 34 - Quantitative models for layout, Summary

Lecture 35 - Introduction to Supply Chain Management

Lecture 36 - Location Problems

Lecture 37 - Transportation and Distribution Models

Lecture 38 - Transportation and Distribution Models(continued)

Lecture 39 - Bin Packing and Travelling Salesman Problems

Lecture 40 - Vehicle Routeing Problems

Lecture 41 - Value of Information

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Business Analysis for Engineers (Management)

Co-ordinators : Dr. S. Vaidhyasubramaniam

Lecture 1 - Introduction to Business Analysis for Engineers

Lecture 2 - Introduction to Accounting

Lecture 3 - Accounting Principles - 1

Lecture 4 - Balance Sheet Fundamentals

Lecture 5 - Balance Sheet Fundamentals

Lecture 6 - Accounting Principles - 2

Lecture 7 - Introduction to Income Statement & Double Entry

Lecture 8 - Double Entry Examples - 1

Lecture 9 - Double Entry Examples - 2

Lecture 10 - Preparation of Financial Statement

Lecture 11 - Cash Flow Statement - 1

Lecture 12 - Cash Flow Statement - 2

Lecture 13 - Special Accounts Illustrations

Lecture 14 - Final Illustrative Example

Lecture 15 - Summary of Financial Accounting

Lecture 16 - Introduction to Management Accounting & Behaviour of Cost

Lecture 17 - Cost-Volume Relationship

Lecture 18 - Cost-Objects & Variance

Lecture 19 - Labour & Over Heads Variance Analysis

Lecture 20 - Cash Conversion Cycle

Lecture 21 - Inventory Management

Lecture 22 - What is Strategy?

Lecture 23 - Poter's Diamond Model

Lecture 24 - Industry Analysis

Lecture 25 - Industry Analysis & Sources of Strategy

Lecture 26 - The Need for Value

Lecture 27 - Value Chain Analysis

Lecture 28 - Corporate Portfolio Analysis

Lecture 29 - External & Internal Environ Analysis

Lecture 30 - Models for Strategy,Ansoff matrix

Lecture 31 - Porter's Generic Strategy

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Prahlad's Core Competency

Lecture 33 - Case study to understand strategy

Lecture 34 - Case study to understand strategy

Lecture 35 - Blue ocean and conclusion

Lecture 36 - Introduction to Economics

Lecture 37 - Introduction to GDP

Lecture 38 - Supply vs Demand

Lecture 39 - Price & Income Elasticity and Utility

Lecture 40 - Macroeconomic Variables

Lecture 41 - Fiscal & Monetary Policy

Lecture 42 - Union Budget & Conclusion

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Operations Research (Management)

Co-ordinators : Prof. G. Srinivasan

Lecture 1 - Linear Programming Introduction and formulations - Product Mix problem and Notations

Lecture 2 - Linear Programming Introduction and formulations - Manpower and Production planning formulations

Lecture 3 - Linear Programming Introduction and formulations - Media selection problem and Bicycle problem

Lecture 4 - Linear Programming Introduction and formulations - Caterer problem

Lecture 5 - Linear Programming Introduction and formulations - Maximum flow and bin packing problems

Lecture 6 - Graphical and Algebraic methods - Graphical method (maximization)

Lecture 7 - Graphical and Algebraic methods - Graphical method (minimization)

Lecture 8 - Graphical and Algebraic methods - Algebraic method (maximization)

Lecture 9 - Graphical and Algebraic methods - Algebraic method (minimization)

Lecture 10 - Graphical and Algebraic methods - Comparing graphical and algebraic methods

Lecture 11 - Simplex Algorithm - Algebraic form of simplex algorithm

Lecture 12 - Simplex Algorithm - Tabular form of simplex (maximization)

Lecture 13 - Simplex Algorithm - Tabular form (minimization)

Lecture 14 - Simplex Algorithm - Unboundedness

Lecture 15 - Simplex Algorithm - Infeasibility

Lecture 16 - Dual - Motivation to the dual

Lecture 17 - Dual - Writing the dual for a general LP

Lecture 18 - Dual - Writing the dual for a general LP (Continued...)

Lecture 19 - Dual - Duality theorems

Lecture 20 - Dual - Complimentary slackness theorem

Lecture 21 - Primal dual relationships - Dual solution using complimentary slackness

Lecture 22 - Primal dual relationships - Dual solution from simplex table; economic interpretation of dual

Lecture 23 - Primal dual relationships - Economic Interpretation of the dual; Dual Simplex algorithm

Lecture 24 - Primal dual relationships - Solving LPs with mixed type of constraints

Lecture 25 - Primal dual relationships - Matrix method for LP problems

Lecture 26 - Introducing the transportation problem

Lecture 27 - North West corner Rule and minimum cost method

Lecture 28 - Penalty cost method

Lecture 29 - Stepping stone method and Modified Distribution method

Lecture 30 - MODI method; Dual of the transportation problem and the optimality of the MODI method

Lecture 31 - Introducing the Assignment problem

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Solving the Assignment problem

Lecture 33 - Hungarian algorithm; Alternate optimum

Lecture 34 - Unequal number of rows and columns; Dual of the assignment problem

Lecture 35 - Optimality of the Hungarian algorithm

Lecture 36 - Setting up the problem and solving simple LP problems

Lecture 37 - Unboundedness and infeasibility

Lecture 38 - Solving other formulations

Lecture 39 - Solving a transportation problem

Lecture 40 - Solving an assignment problem

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 44 - Supply risk management

Lecture 45 - Risk management framework

Lecture 46 - Supply risk examples

Lecture 47 - Assessment of risk

Lecture 48 - Risk metrics

NPTEL : NOC:Fundamentals of Cost Accounting (Management)

Co-ordinators : Prof. Arindam Banerjee

Lecture 1 - Introduction to Cost Accounting - Part I

Lecture 2 - Introduction to Cost Accounting - Part II

Lecture 3 - Material Cost - Part I

Lecture 4 - Material Cost - Part II

Lecture 5 - Labour Cost - Part I

Lecture 6 - Labour Cost - Part II

Lecture 7 - Overhead - Part I

Lecture 8 - Overhead - Part II

Lecture 9 - Cost Sheet - Part I

Lecture 10 - Cost Sheet - Part II

Lecture 11 - Job Costing - Part I

Lecture 12 - Job Costing - Part II

Lecture 13 - Service / Operating Costing - Part I

Lecture 14 - Service / Operating Costing - Part II

Lecture 15 - Contract Costing - Part I

Lecture 16 - Contract Costing - Part II

Lecture 17 - Process Costing - Part I

Lecture 18 - Process Costing - Part II

Lecture 19 - Cost Volume Profit Analysis - Part I

Lecture 20 - Cost Volume Profit Analysis - Part II

Lecture 21 - Cost Volume Profit Analysis - Part III

Lecture 22 - Cost Volume Profit Analysis - Part IV

Lecture 23 - Decision Making - Part I

Lecture 24 - Decision Making - Part II

Lecture 25 - Decision Making - Part III

Lecture 26 - Decision Making - Part IV

Lecture 27 - Decision Making - Part V

Lecture 28 - Budgetary Control - Part I

Lecture 29 - Budgetary Control - Part II

Lecture 30 - Budgetary Control - Part III

Lecture 31 - Budgetary control - Part IV

Lecture 32 - Budgetary control - Part V

Lecture 33 - Budgetary control - Part VI

Lecture 34 - Standard Costing - Part I

Lecture 35 - Variance Analysis - Part I

Lecture 36 - Variance Analysis - Part II

Lecture 37 - Variance Analysis - Part III

Lecture 38 - Variance Analysis - Part IV

Lecture 39 - Variance Analysis - Part V

Lecture 40 - Interaction with CFO

NPTEL : NOC:Introduction to GST (Management)

Co-ordinators : Prof. Anil Sharma

Lecture 1 - Concept of GST and difference between Direct tax and Indirect tax - Part 1

Lecture 2 - Concept of GST and difference between Direct tax and Indirect tax - Part 2

Lecture 3 - Concept of GST and difference between Direct tax and Indirect tax - Part 3

Lecture 4 - Concept of GST and difference between Direct tax and Indirect tax - Part 4

Lecture 5 - Registration - Part 1

Lecture 6 - Registration - Part 2

Lecture 7 - Registration - Part 3

Lecture 8 - Registration - Part 4

Lecture 9 - Place of Supply - Part 1

Lecture 10 - Place of Supply - Part 2

Lecture 11 - Place of Supply - Part 3

Lecture 12 - Place of Supply - Part 4

Lecture 13 - Place of Supply - Part 5

Lecture 14 - Value of Supply - Part 1

Lecture 15 - Value of Supply - Part 2

Lecture 16 - Value of Supply - Part 3

Lecture 17 - Value of Supply - Part 4

Lecture 18 - Value of Supply - Part 5

Lecture 19 - Input Tax Credit 1 - Part 1

Lecture 20 - Input Tax Credit 1 - Part 2

Lecture 21 - Input Tax Credit 1 - Part 3

Lecture 22 - Input Tax Credit 1 - Part 4

Lecture 23 - Input Tax Credit 1 - Part 5

Lecture 24 - Input Tax Credit 2 - Part 1

Lecture 25 - Input Tax Credit 2 - Part 2

Lecture 26 - Payment of Taxes - Part 1

Lecture 27 - Payment of Taxes - Part 2

Lecture 28 - Returns - Part 1

Lecture 29 - Returns - Part 2

Lecture 30 - Returns - Part 3

Lecture 31 - Returns - Part 4

Lecture 32 - Overview of GST portal - Part 1

Lecture 33 - Overview of GST portal - Part 2

Lecture 34 - Overview of GST portal - Part 3

Lecture 35 - Overview of GST portal - Part 4

Lecture 36 - Overview of GST portal - Part 5

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Research for Marketing Decisions (Management)

Co-ordinators : Prof. Vaibhav Chawla

Lecture 1 - What is Market and Marketing?

Lecture 2 - Research, Marketing Research and its Types

Lecture 3 - Introduction to Marketing Research Process

Lecture 4 - Step #1 Problem Definition Discussion with Decision Maker

Lecture 5 - Step #1 Problem Definition Problem Audit, Interview with Experts, Qualitative Research

Lecture 6 - Step #1 Problem Definition Marketing Research Problem and an Example

Lecture 7 - Step #2 Developing an approach to the problem Understanding a Theory

Lecture 8 - Step #2 Developing an approach to the problem Components of an approach

Lecture 9 - Step #2 Developing an approach to the problem Examples

Lecture 10 - Case Studies for Problem Definition Process

Lecture 11 - Research Design: An Introduction

Lecture 12 - Exploratory and Descriptive Research Design: An Introduction

Lecture 13 - Exploratory Research Techniques: Secondary Data and Thematic Analysis

Lecture 14 - Exploratory Research Techniques: Secondary Data and Qualitative Research - Focus Group Discussion

Lecture 15 - Exploratory Research Techniques: Focus Group Discussion PDF

Lecture 16 - Exploratory Research Techniques: Depth Interviews

Lecture 17 - Exploratory Research Techniques: Projective Techniques

Lecture 18 - Descriptive Research Techniques

Lecture 19 - Causal Research Design: Experiments and Confounding Variables

Lecture 20 - Causal Research Design: Experiments and Related Terminologies

Lecture 21 - Causal Research Design: Experiments and its Types

Lecture 22 - Measurement and Scaling: Levels of Measurement

Lecture 23 - Measurement and Scaling: Comparative and Non Comparative Scaling

Lecture 24 - Measurement and Scaling: Non Comparative Scaling - Likert Item Scales

Lecture 25 - Measurement and Scaling: Semantic Differential Scale and Other Scale Decisions

Lecture 26 - Measurement and Scaling: Multi item Scales

Lecture 27 - Measurement and Scaling: Multi item Scales, Conceptual and Operational Definitions

Lecture 28 - Questionnaire Design: Initial Steps 1 to 5

Lecture 29 - Questionnaire Design: Steps 6 onwards and Other Issues

Lecture 30 - Questionnaire Design: Framing Common Demographic and Screener Questions

Lecture 31 - Data Analysis using SPSS: Entering the Data

Lecture 30 - State Transition Diagram and Examples

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Examples

Lecture 32 - Introduction to Classification of States and Periodicity

Lecture 33 - Closed set of States and Irreducible Markov Chain

Lecture 34 - First Passage time and Mean Recurrence Time

Lecture 35 - Recurrent State and Transient State

Lecture 36 - Introduction and example of Classification of states

Lecture 37 - Example of Classification of states (Continued...)

Lecture 38 - Example of Classification of states (Continued...)

Lecture 39 - Example of Classification of states (Continued...)

Lecture 40 - Introduction and Limiting Distribution

Lecture 41 - Example of Limiting Distribution and Ergodicity

Lecture 42 - Stationary Distribution and Examples

Lecture 43 - Examples of Stationary Distributions

Lecture 44 - Time Reversible Markov Chain and Examples

Lecture 45 - Definition of Reducible Markov Chains and Types of Reducible Markov Chains

Lecture 46 - Stationary Distributions and Types of Reducible Markov chains

Lecture 47 - Type of Reducible Markov Chains (Continued...)

Lecture 48 - Gambler's Ruin Problem

Lecture 49 - Introduction to Continuous time Markov Chain

Lecture 50 - Waiting time Distribution

Lecture 51 - Chapman-Kolmogorov Equation

Lecture 52 - Infinitesimal Generator Matrix

Lecture 53 - Introduction and Example Of Continuous time Markov Chain

Lecture 54 - Limiting and Stationary Distributions

Lecture 55 - Time reversible CTMC and Birth Death Process

Lecture 56 - Steady State Distributions, Pure Birth Process and Pure Death Process

Lecture 57 - Introduction to Poisson Process

Lecture 58 - Definition of Poisson Process

Lecture 59 - Superposition and Deposition of Poisson Process

Lecture 60 - Compound Poisson Process and Examples

Lecture 61 - Introduction to Queueing Systems and Kendall Notations

Lecture 62 - M/M/1 Queueing Model

Lecture 63 - Little's Law, Distribution of Waiting Time and Response Time

Lecture 64 - Burke's Theorem and Simulation of M/M/1 queueing Model

Lecture 65 - M/M/c Queueing Model

Lecture 66 - M/M/1/N Queueing Model

Lecture 67 - M/M/c/K Model, M/M/c/c Loss System, M/M/? Self Service System

Lecture 68 - Transient Solution of Finite Birth Death Process and Finite Source Markovian Queueing Model

Lecture 69 - Queueing Networks Characteristics and Types of Queueing Networks

Lecture 70 - Tandem Queueing Networks

Lecture 71 - Stationary Distribution and Open Queueing Network

Lecture 72 - Jackson's Theorem, Closed Queueing Networks, Gordon and Newell Results

Lecture 73 - Wireless Handoff Performance Model and System Description

Lecture 74 - Description of 3G Cellular Networks and Queueing Model

Lecture 75 - Simulation of Queueing Systems

Lecture 76 - Definition and Basic Components of Petri Net and Reachability Analysis

Lecture 77 - Arc Extensions in Petri Net, Stochastic Petri Nets and examples

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Stochastic Processes (Mathematics)

Co-ordinators : Dr. S. Dharmaraja

Lecture 1 - Introduction and motivation for studying stochastic processes

Lecture 2 - Probability space and conditional probability

Lecture 3 - Random variable and cumulative distributive function

Lecture 4 - Discrete Uniform Distribution, Binomial Distribution, Geometric Distribution, Continuous Uniform Distribution, Exponential Distribution, Normal Distribution and Poisson Distribution

Lecture 5 - Joint Distribution of Random Variables

Lecture 6 - Independent Random Variables, Covariance and Correlation Coefficient and Conditional Distribution

Lecture 7 - Conditional Expectation and Covariance Matrix

Lecture 8 - Generating Functions, Law of Large Numbers and Central Limit Theorem

Lecture 9 - Problems in Random variables and Distributions

Lecture 10 - Problems in Random variables and Distributions (Continued...)

Lecture 11 - Problems in Random variables and Distributions (Continued...)

Lecture 12 - Problems in Random variables and Distributions (Continued...)

Lecture 13 - Problems in Sequences of Random Variables

Lecture 14 - Problems in Sequences of Random Variables (Continued...)

Lecture 15 - Problems in Sequences of Random Variables (Continued...)

Lecture 16 - Problems in Sequences of Random Variables (Continued...)

Lecture 17 - Definition of Stochastic Processes, Parameter and State Spaces

Lecture 18 - Classification of Stochastic Processes

Lecture 19 - Examples of Discrete Time Markov Chain

Lecture 20 - Examples of Discrete Time Markov Chain (Continued...)

Lecture 21 - Bernoulli Process

Lecture 22 - Poisson Process

Lecture 23 - Poisson Process (Continued...)

Lecture 24 - Simple Random Walk and Population Processes

Lecture 25 - Introduction to Discrete time Markov Chain

Lecture 26 - Introduction to Discrete time Markov Chain (Continued...)

Lecture 27 - Examples of Discrete time Markov Chain

Lecture 28 - Examples of Discrete time Markov Chain (Continued...)

Lecture 29 - Introduction to Chapman-Kolmogorov equations

Lecture 30 - State Transition Diagram and Examples

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Examples

Lecture 32 - Introduction to Classification of States and Periodicity

Lecture 33 - Closed set of States and Irreducible Markov Chain

Lecture 34 - First Passage time and Mean Recurrence Time

Lecture 35 - Recurrent State and Transient State

Lecture 36 - Introduction and example of Classification of states

Lecture 37 - Example of Classification of states (Continued...)

Lecture 38 - Example of Classification of states (Continued...)

Lecture 39 - Example of Classification of states (Continued...)

Lecture 40 - Introduction and Limiting Distribution

Lecture 41 - Example of Limiting Distribution and Ergodicity

Lecture 42 - Stationary Distribution and Examples

Lecture 43 - Examples of Stationary Distributions

Lecture 44 - Time Reversible Markov Chain and Examples

Lecture 45 - Definition of Reducible Markov Chains and Types of Reducible Markov Chains

Lecture 46 - Stationary Distributions and Types of Reducible Markov chains

Lecture 47 - Type of Reducible Markov Chains (Continued...)

Lecture 48 - Gambler's Ruin Problem

Lecture 49 - Introduction to Continuous time Markov Chain

Lecture 50 - Waiting time Distribution

Lecture 51 - Chapman-Kolmogorov Equation

Lecture 52 - Infinitesimal Generator Matrix

Lecture 53 - Introduction and Example Of Continuous time Markov Chain

Lecture 54 - Limiting and Stationary Distributions

Lecture 55 - Time reversible CTMC and Birth Death Process

Lecture 56 - Steady State Distributions, Pure Birth Process and Pure Death Process

Lecture 57 - Introduction to Poisson Process

Lecture 58 - Definition of Poisson Process

Lecture 59 - Superposition and Deposition of Poisson Process

Lecture 60 - Compound Poisson Process and Examples

Lecture 61 - Introduction to Queueing Systems and Kendall Notations

Lecture 62 - M/M/1 Queueing Model

Lecture 63 - Little's Law, Distribution of Waiting Time and Response Time

Lecture 64 - Burke's Theorem and Simulation of M/M/1 queueing Model

Lecture 65 - M/M/c Queueing Model

Lecture 66 - M/M/1/N Queueing Model

Lecture 67 - M/M/c/K Model, M/M/c/c Loss System, M/M/? Self Service System

Lecture 68 - Transient Solution of Finite Birth Death Process and Finite Source Markovian Queueing Model

Lecture 69 - Queueing Networks Characteristics and Types of Queueing Networks

Lecture 70 - Tandem Queueing Networks

Lecture 71 - Stationary Distribution and Open Queueing Network

Lecture 72 - Jackson's Theorem, Closed Queueing Networks, Gordon and Newell Results

Lecture 73 - Wireless Handoff Performance Model and System Description

Lecture 74 - Description of 3G Cellular Networks and Queueing Model

Lecture 75 - Simulation of Queueing Systems

Lecture 76 - Definition and Basic Components of Petri Net and Reachability Analysis

Lecture 77 - Arc Extensions in Petri Net, Stochastic Petri Nets and examples

Lecture 78 - Generalized Stochastic Petri Net

Lecture 79 - Generalized Stochastic Petri Net (Continued...)

Lecture 80 - Conditional Expectation and Examples

Lecture 81 - Filtration in Discrete time

Lecture 82 - Remarks of Conditional Expectation and Adaptabilty

Lecture 83 - Definition and Examples of Martingale

Lecture 84 - Examples of Martingale (Continued...)

Lecture 85 - Examples of Martingale (Continued...)

Lecture 86 - Doob's Martingale Process, Sub martingale and Super Martingale

Lecture 87 - Definition of Brownian Motion

Lecture 88 - Definition of Brownian Motion (Continued...)

Lecture 89 - Properties of Brownian Motion

Lecture 90 - Processes Derived from Brownian Motion

Lecture 91 - Processes Derived from Brownian Motion (Continued...)

Lecture 92 - Processes Derived from Brownian Motion (Continued...)

Lecture 93 - Stochastic Differential Equations

Lecture 94 - Stochastic Differential Equations (Continued...)

Lecture 95 - Stochastic Differential Equations (Continued...)

Lecture 96 - Ito Integrals

Lecture 97 - Ito Integrals (Continued...)

Lecture 98 - Ito Integrals (Continued...)

Lecture 99 - Renewal Function and Renewal Equation

Lecture 100 - Renewal Function and Renewal Equation (Continued...)

Lecture 101 - Renewal Function and Renewal Equation (Continued...)

Lecture 102 - Generalized Renewal Processes and Renewal Limit Theorems

Lecture 103 - Generalized Renewal Processes and Renewal Limit Theorems (Continued...)

Lecture 104 - Generalized Renewal Processes and Renewal Limit Theorems (Continued...)

Lecture 105 - Markov Renewal and Markov Regenerative Processes

Lecture 106 - Markov Renewal and Markov Regenerative Processes (Continued...)

Lecture 107 - Markov Renewal and Markov Regenerative Processes (Continued...)

Lecture 108 - Markov Renewal and Markov Regenerative Processes (Continued...)

Lecture 109 - Non Markovian Queues

Lecture 110 - Non Markovian Queues (Continued...)

Lecture 111 - Non Markovian Queues (Continued...)

Lecture 112 - Stationary Processes

Lecture 113 - Stationary Processes (Continued...)

Lecture 114 - Stationary Processes (Continued...)

Lecture 115 - Stationary Processes (Continued...) and Ergodicity

Lecture 116 - G1/M/1 queue

Lecture 117 - G1/M/1 queue (Continued...)

Lecture 118 - G1/M/1/N queue and examples

Lecture 119 - Galton-Watson Process

Lecture 120 - Examples and Theorems

Lecture 121 - Theorems and Examples (Continued...)

Lecture 122 - Markov Branching Process

Lecture 123 - Markov Branching Process Theorems and Properties

Lecture 124 - Markov Branching Process Theorems and Properties (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Chaotic Dynamical Systems (Mathematics)

Co-ordinators : Dr. Anima Nagar

Lecture 1 - The beginning

Lecture 2 - Elementary Concepts

Lecture 3 - Elementary Concepts (Continued...)

Lecture 4 - More on orbits

Lecture 5 - Peiods of Periodic Points

Lecture 6 - Scrambled Sets

Lecture 7 - Sensitive Dependence on Initial Conditions

Lecture 8 - A Population Dynamics Model

Lecture 9 - Bifurcations

Lecture 10 - Nonlinear Systems

Lecture 11 - Horseshoe Attractor

Lecture 12 - Dynamics of the Horseshoe Attractor

Lecture 13 - Recurrence

Lecture 14 - Recurrence (Continued...)

Lecture 15 - Transitivity

Lecture 16 - Devaneyâ€™s Chaos

Lecture 17 - Transitivity = Chaos on Intervals

Lecture 18 - Stronger forms of Transitivity

Lecture 19 - Chaotic Properties of Mixing Systems

Lecture 20 - Weakly Mixing and Chaos

Lecture 21 - Strongly Transitive Systems

Lecture 22 - Strongly Transitive Systems (Continued...)

Lecture 23 - Introduction to Symbolic Dynamics

Lecture 24 - Shift Spaces

Lecture 25 - Subshifts of Finite Type

Lecture 26 - Subshifts of Finite Type (Continued...), Chatoic Dynamical Systems

Lecture 27 - Measuring Chaos - Topological Entropy

Lecture 28 - Topological Entropy - Adlerâ€™s Version

Lecture 29 - Bowenâ€™s Definition of Topological Entropy

Lecture 30 - Equivalance of the two definitions of Topological Entropy

Lecture 31 - Linear Systems in Two Dimentions

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Asymptotic Properties of Orbits of Linear Transformation in IR2

Lecture 33 - Hyperbolic Toral Automorphisms

Lecture 34 - Chaos in Toral Automorphisms

Lecture 35 - Chaotic Attractors of Henon Maps

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Probability Theory and Stochastic Processes (Mathematics)

Co-ordinators : Dr. S. Dharmaraja

Lecture 1 - Random experiment, sample space, axioms of probability, probability space

Lecture 2 - Random experiment, sample space, axioms of probability, probability space (Continued...)

Lecture 3 - Random experiment, sample space, axioms of probability, probability space (Continued...)

Lecture 4 - Conditional probability, independence of events.

Lecture 5 - Multiplication rule, total probability rule, Bayes's theorem.

Lecture 6 - Definition of Random Variable, Cumulative Distribution Function

Lecture 7 - Definition of Random Variable, Cumulative Distribution Function (Continued...)

Lecture 8 - Definition of Random Variable, Cumulative Distribution Function (Continued...)

Lecture 9 - Type of Random Variables, Probability Mass Function, Probability Density Function

Lecture 10 - Type of Random Variables, Probability Mass Function, Probability Density Function (Continued...)

Lecture 11 - Distribution of Function of Random Variables

Lecture 12 - Mean and Variance

Lecture 13 - Mean and Variance (Continued...)

Lecture 14 - Higher Order Moments and Moments Inequalities

Lecture 15 - Higher Order Moments and Moments Inequalities (Continued...)

Lecture 16 - Generating Functions

Lecture 17 - Generating Functions (Continued...)

Lecture 18 - Common Discrete Distributions

Lecture 19 - Common Discrete Distributions (Continued...)

Lecture 20 - Common Continuous Distributions

Lecture 21 - Common Continuous Distributions (Continued...)

Lecture 22 - Applications of Random Variable

Lecture 23 - Applications of Random Variable (Continued...)

Lecture 24 - Random vector and joint distribution

Lecture 25 - Joint probability mass function

Lecture 26 - Joint probability density function

Lecture 27 - Independent random variables

Lecture 28 - Independent random variables (Continued...)

Lecture 29 - Functions of several random variables

Lecture 30 - Functions of several random variables (Continued...)

Lecture 31 - Some important results

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Order statistics

Lecture 33 - Conditional distributions

Lecture 34 - Random sum

Lecture 35 - Moments and Covariance

Lecture 36 - Variance Covariance matrix

Lecture 37 - Multivariate Normal distribution

Lecture 38 - Probability generating function and Moment generating function

Lecture 39 - Correlation coefficient

Lecture 40 - Conditional Expectation

Lecture 41 - Conditional Expectation (Continued...)

Lecture 42 - Modes of Convergence

Lecture 43 - Mode of Convergence (Continued...)

Lecture 44 - Law of Large Numbers

Lecture 45 - Central Limit Theorem

Lecture 46 - Central Limit Theorem (Continued...)

Lecture 47 - Motivation for Stochastic Processes

Lecture 48 - Definition of a Stochastic Process

Lecture 49 - Classification of Stochastic Processes

Lecture 50 - Examples of Stochastic Process

Lecture 51 - Examples Of Stochastic Process (Continued...)

Lecture 52 - Bernoulli Process

Lecture 53 - Poisson Process

Lecture 54 - Poisson Process (Continued...)

Lecture 55 - Simple Random Walk

Lecture 56 - Time Series and Related Definitions

Lecture 57 - Strict Sense Stationary Process

Lecture 58 - Wide Sense Stationary Process and Examples

Lecture 59 - Examples of Stationary Processes (Continued...)

Lecture 60 - Discrete Time Markov Chain (DTMC)

Lecture 61 - DTMC (Continued...)

Lecture 62 - Examples of DTMC

Lecture 63 - Examples of DTMC (Continued...)

Lecture 64 - Chapman-Kolmogorov equations and N-step transition matrix

Lecture 65 - Examples based on N-step transition matrix

Lecture 66 - Examples (Continued...)

Lecture 67 - Classification of states

Lecture 68 - Classification of states (Continued...)

Lecture 69 - Calculation of N-Step - 9

Lecture 70 - Calculation of N-Step - 10

Lecture 71 - Limiting and Stationary distributions

Lecture 72 - Limiting and Stationary distributions (Continued...)

Lecture 73 - Continuous time Markov chain (CTMC)

Lecture 74 - CTMC (Continued...)

Lecture 75 - State transition diagram and Chapman-Kolmogorov equation

Lecture 76 - Infinitesimal generator and Kolmogorov differential equations

Lecture 77 - Limiting distribution

Lecture 78 - Limiting and Stationary distributions - 1

Lecture 79 - Birth death process

Lecture 80 - Birth death process (Continued...)

Lecture 81 - Poisson process - 1

Lecture 82 - Poisson process (Continued...)

Lecture 83 - Poisson process (Continued...)

Lecture 84 - Non-homogeneous and compound Poisson process

Lecture 85 - Introduction to Queueing Models and Kendall Notation

Lecture 86 - M/M/1 Queueing Model

Lecture 87 - M/M/1 Queueing Model (Continued...)

Lecture 88 - M/M/1 Queueing Model and Burke's Theorem

Lecture 89 - M/M/c Queueing Model

Lecture 90 - M/M/c (Continued...) and M/M/1/N Model

Lecture 91 - Other Markovian Queueing Models

Lecture 92 - Transient Solution of Finite Capacity Markovian Queues

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 32 - Calculus of Variations and Integral Equations

Lecture 33 - Calculus of Variations and Integral Equations

Lecture 34 - Calculus of Variations and Integral Equations

Lecture 35 - Calculus of Variations and Integral Equations

Lecture 36 - Calculus of Variations and Integral Equations

Lecture 37 - Calculus of Variations and Integral Equations

Lecture 38 - Calculus of Variations and Integral Equations

Lecture 39 - Calculus of Variations and Integral Equations

Lecture 40 - Calculus of Variations and Integral Equations

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Linear programming and Extensions (Mathematics)

Co-ordinators : Prof. Prabha Sharma

Lecture 1 - Introduction to Linear Programming Problems

Lecture 2 - Vector space, Linear independence and dependence, basis

Lecture 3 - Moving from one basic feasible solution to another, optimality criteria

Lecture 4 - Basic feasible solutions, existence & derivation

Lecture 5 - Convex sets, dimension of a polyhedron, Faces, Example of a polytope

Lecture 6 - Direction of a polyhedron, correspondence between bfs and extreme points

Lecture 7 - Representation theorem, LPP solution is a bfs, Assignment 1

Lecture 8 - Development of the Simplex Algorithm, Unboundedness, Simplex Tableau

Lecture 9 - Simplex Tableau & algorithm ,Cycling, Blandâ€™s anti-cycling rules, Phase I & Phase II

Lecture 10 - Big-M method,Graphical solutions, adjacent extreme pts and adjacent bfs

Lecture 11 - Assignment 2, progress of Simplex algorithm on a polytope, bounded variable LPP

Lecture 12 - LPP Bounded variable, Revised Simplex algorithm, Duality theory, weak duality theorem

Lecture 13 - Weak duality theorem, economic interpretation of dual variables, Fundamental theorem of duality

Lecture 14 - Examples of writing the dual, complementary slackness theorem

Lecture 15 - Complementary slackness conditions, Dual Simplex algorithm, Assignment 3

Lecture 16 - Primal-dual algorithm

Lecture 17 - Problem in lecture 16, starting dual feasible solution, Shortest Path Problem

Lecture 18 - Shortest Path Problem, Primal-dual method, example

Lecture 19 - Shortest Path Problem-complexity, interpretation of dual variables, post-optimality analysis-changes in the cost vector

Lecture 20 - Assignment 4, postoptimality analysis, changes in b, adding a new constraint, changes in {aij} , Parametric analysis

Lecture 21 - Parametric LPP-Right hand side vector

Lecture 22 - Parametric cost vector LPP

Lecture 23 - Parametric cost vector LPP, Introduction to Min-cost flow problem

Lecture 24 - Mini-cost flow problem-Transportation problem

Lecture 25 - Transportation problem degeneracy, cycling

Lecture 26 - Sensitivity analysis

Lecture 27 - Sensitivity analysis

Lecture 28 - Bounded variable transportation problem, min-cost flow problem

Lecture 29 - Min-cost flow problem

Lecture 30 - Starting feasible solution, Lexicographic method for preventing cycling ,strongly feasible solution

Lecture 31 - Assignment 6, Shortest path problem, Shortest Path between any two nodes,Detection of negative cycles

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Min-cost-flow Sensitivity analysis Shortest path problem sensitivity analysis

Lecture 33 - Min-cost flow changes in arc capacities , Max-flow problem, assignment 7

Lecture 34 - Problem 3 (assignment 7), Min-cut Max-flow theorem, Labelling algorithm

Lecture 35 - Max-flow - Critical capacity of an arc, starting solution for min-cost flow problem

Lecture 36 - Improved Max-flow algorithm

Lecture 37 - Critical Path Method (CPM)

Lecture 38 - Programme Evaluation and Review Technique (PERT)

Lecture 39 - Simplex Algorithm is not polynomial time- An example

Lecture 40 - Interior Point Methods

NPTEL : Convex Optimization (Mathematics)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Probability Theory and Applications (Mathematics)

Co-ordinators : Prof. Prabha Sharma

Lecture 1 - Basic principles of counting

Lecture 2 - Sample space, events, axioms of probability

Lecture 3 - Conditional probability, Independence of events

Lecture 4 - Random variables, cumulative density function, expected value

Lecture 5 - Discrete random variables and their distributions

Lecture 6 - Discrete random variables and their distributions

Lecture 7 - Discrete random variables and their distributions

Lecture 8 - Continuous random variables and their distributions

Lecture 9 - Continuous random variables and their distributions

Lecture 10 - Continuous random variables and their distributions

Lecture 11 - Function of random variables, Momement generating function

Lecture 12 - Jointly distributed random variables, Independent r. v. and their sums

Lecture 13 - Independent r. v. and their sums

Lecture 14 - Chi â€“ square r. v., sums of independent normal r. v., Conditional distr

Lecture 15 - Conditional disti, Joint distr. of functions of r. v., Order statistics

Lecture 16 - Order statistics, Covariance and correlation

Lecture 17 - Covariance, Correlation, Cauchy- Schwarz inequalities, Conditional expectation

Lecture 18 - Conditional expectation, Best linear predictor

Lecture 19 - Inequalities and bounds

Lecture 20 - Convergence and limit theorems

Lecture 21 - Central limit theorem

Lecture 22 - Applications of central limit theorem

Lecture 23 - Strong law of large numbers, Joint mgf

Lecture 24 - Convolutions

Lecture 25 - Stochastic processes: Markov process

Lecture 26 - Transition and state probabilities

Lecture 27 - State prob., First passage and First return prob

Lecture 28 - First passage and First return prob. Classification of states

Lecture 29 - Random walk, periodic and null states

Lecture 30 - Reducible Markov chains

Lecture 31 - Time reversible Markov chains

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Poisson Processes

Lecture 33 - Inter-arrival times, Properties of Poisson processes

Lecture 34 - Queuing Models: M/M/I, Birth and death process, Littleâ€™s formulae

Lecture 35 - Analysis of L, Lq ,W and Wq , M/M/S model

Lecture 36 - M/M/S , M/M/I/K models

Lecture 37 - M/M/I/K and M/M/S/K models

Lecture 38 - Application to reliability theory failure law

Lecture 39 - Exponential failure law, Weibull law

Lecture 40 - Reliability of systems

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Basic Calculus for Engineers, Scientists and Economists (Mathematics)

Co-ordinators : Dr. Joydeep Dutta

Lecture 1 - Numbers

Lecture 2 - Functions-1

Lecture 3 - Sequence-1

Lecture 4 - Sequence-2

Lecture 5 - Limits and Continuity-1

Lecture 6 - Limits and Continuity-2

Lecture 7 - Limits And Continuity-3

Lecture 8 - Derivative-1

Lecture 9 - Derivative-2

Lecture 10 - Maxima And Minima

Lecture 11 - Mean-Value Theorem And Taylors Expansion-1

Lecture 12 - Mean-Value Theorem And Taylors Expansion-2

Lecture 13 - Integration-1

Lecture 14 - Integration-2

Lecture 15 - Integration By Parts

Lecture 16 - Definite Integral

Lecture 17 - Riemann Integration-1

Lecture 18 - Riemann Integration-2

Lecture 19 - Functions Of Two Or More Variables

Lecture 20 - Limits And Continuity Of Functions Of Two Variable

Lecture 21 - Differentiation Of Functions Of Two Variables-1

Lecture 22 - Differentiation Of Functions Of Two Variables-2

Lecture 23 - Unconstrained Minimization Of Funtions Of Two Variables

Lecture 24 - Constrained Minimization And Lagrange Multiplier Rules

Lecture 25 - Infinite Series-1

Lecture 26 - Infinite Series-2

Lecture 27 - Infinite Series-3

Lecture 28 - Multiple Integrals-1

Lecture 29 - Multiple Integrals-2

Lecture 30 - Multiple Integrals-3

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Differential Calculus in Several Variables (Mathematics)

Co-ordinators : Prof. Sudipta Dutta

Lecture 1 - Introduction to Several Variables and Notion Of distance in Rn

Lecture 2 - Countinuity And Compactness

Lecture 3 - Countinuity And Connectdness

Lecture 4 - Derivatives: Possible Definition

Lecture 5 - Matrix Of Linear Transformation

Lecture 6 - Examples for Differentiable function

Lecture 7 - Sufficient condition of differentiability

Lecture 8 - Chain Rule

Lecture 9 - Mean Value Theorem

Lecture 10 - Higher Order Derivatives

Lecture 11 - Taylor's Formula

Lecture 12 - Maximum And Minimum

Lecture 13 - Second derivative test for maximum, minimum and saddle point

Lecture 14 - We formalise the second derivative test discussed in Lecture 2 and do examples

Lecture 15 - Specialisation to functions of two variables

Lecture 16 - Implicit Function Theorem

Lecture 17 - Implicit Function Theorem -a

Lecture 18 - Application of IFT: Lagrange's Multipliers Method

Lecture 19 - Application of IFT: Lagrange's Multipliers Method - b

Lecture 20 - Application of IFT: Lagrange's Multipliers Method - c

Lecture 21 - Application of IFT: Inverse Function Theorem - c

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Curves and Surfaces (Mathematics)

Co-ordinators : Prof. Sudipta Dutta

Lecture 1 - Level curves and locus, definition of parametric curves, tangent, arc length, arc length parametrisation

Lecture 2 - How much a curve is Â‘curvedÂ’, signed unit normal and signed curvature, rigid motions, constant curvature

Lecture 3 - Curves in R^3, principal normal and binormal, torsion

Lecture 4 - Frenet-Serret formula

Lecture 5 - Simple closed curve and isoperimetric inequality

Lecture 6 - Surfaces and parametric surfaces, examples, regular surface and non-example of regular surface, transition maps.

Lecture 7 - Transition maps of smooth surfaces, smooth function between surfaces, diffeomorphism

Lecture 8 - Reparameterization

Lecture 9 - Tangent, Normal

Lecture 10 - Orientable surfaces

Lecture 11 - Examples of Surfaces

Lecture 12 - First Fundamental Form

Lecture 13 - Conformal Mapping

Lecture 14 - Curvature of Surfaces

Lecture 15 - Euler's Theorem

Lecture 16 - Regular Surfaces locally as Quadratic Surfaces

Lecture 17 - Geodesics

Lecture 18 - Existence of Geodesics, Geodesics on Surfaces of revolution

Lecture 19 - Geodesics on surfaces of revolution; Clairaut's Theorem

Lecture 20 - Pseudosphere

Lecture 21 - Classification of Quadratic Surface

Lecture 22 - Surface Area and Equiareal Map

Lecture 10 - Set Theory and Events using Venn Diagrams

Lecture 11 - Relative Frequency and Probability

Lecture 12 - Probability and Relative Frequency - An Example

Lecture 13 - Axiomatic Definition of Probability

Lecture 14 - Some Rules of Probability

Lecture 15 - Basic Principles of Counting - Ordered Set, Unordered Set, and Permutations

Lecture 16 - Basic Principles of Counting - Combination

Lecture 17 - Conditional Probability

Lecture 18 - Multiplication Theorem of Probability

Lecture 19 - Bayes' Theorem

Lecture 20 - Independent Events

Lecture 21 - Computation of Probability using R

Lecture 22 - Random Variables - Discrete and Continuous

Lecture 23 - Cumulative Distribution and Probability Density Function

Lecture 24 - Discrete Random Variables, Probability Mass Function and Cumulative Distribution Function

Lecture 25 - Expectation of Variables

Lecture 26 - Moments and Variance

Lecture 27 - Data Based Moments and Variance in R Software

Lecture 28 - Skewness and Kurtosis

Lecture 29 - Quantiles and Tschebyschevâ€™s Inequality

Lecture 30 - Degenerate and Discrete Uniform Distributions

Lecture 31 - Discrete Uniform Distribution in R

Lecture 32 - Bernoulli and Binomial Distribution

Lecture 33 - Binomial Distribution in R

Lecture 34 - Poisson Distribution

Lecture 35 - Poisson Distribution in R

Lecture 36 - Geometric Distribution

Lecture 37 - Geometric Distribution in R

Lecture 38 - Continuous Random Variables and Uniform Distribution

Lecture 39 - Normal Distribution

Lecture 40 - Normal Distribution in R

Lecture 41 - Normal Distribution - More Results

Lecture 42 - Exponential Distribution

Lecture 43 - Bivariate Probability Distribution for Discrete Random Variables

Lecture 44 - Bivariate Probability Distribution in R Software

Lecture 45 - Bivariate Probability Distribution for Continuous Random Variables

Lecture 46 - Examples in Bivariate Probability Distribution Functions

Lecture 47 - Covariance and Correlation

Lecture 48 - Covariance and Correlation â€ Examples and R Software

Lecture 49 - Bivariate Normal Distribution

Lecture 50 - Chi square Distribution

Lecture 51 - t-Distribution

Lecture 52 - F-Distribution

Lecture 53 - Distribution of Sample Mean, Convergence in Probability and Weak Law of Large Numbers

Lecture 54 - Central Limit Theorem

Lecture 55 - Needs for Drawing Statistical Inferences

Lecture 56 - Unbiased Estimators

Lecture 57 - Efficiency of Estimators

Lecture 58 - CramÃ©râ€“Rao Lower Bound and Efficiency of Estimators

Lecture 59 - Consistency and Sufficiency of Estimators

Lecture 60 - Method of Moments

Lecture 61 - Method of Maximum Likelihood and Rao Blackwell Theorem

Lecture 62 - Basic Concepts of Confidence Interval Estimation

Lecture 63 - Confidence Interval for Mean in One Sample with Known Variance

Lecture 64 - Confidence Interval for Mean and Variance

Lecture 65 - Basics of Tests of Hypothesis and Decision Rules

Lecture 66 - Test Procedures for One Sample Test for Mean with Known Variance

Lecture 67 - One Sample Test for Mean with Unknown Variance

Lecture 68 - Two Sample Test for Mean with Known and Unknown Variances

Lecture 69 - Test of Hypothesis for Variance in One and Two Samples

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 1 - Countable and Uncountable sets

Lecture 2 - Properties of Countable and Uncountable sets

Lecture 3 - Examples of Countable and Uncountable sets

Lecture 4 - Concepts of Metric Space

Lecture 5 - Open ball, Closed ball, Limit point of a set

Lecture 6 - Tutorial-I

Lecture 7 - Some theorems on Open and Closed sets

Lecture 8 - Ordered set, Least upper bound, Greatest lower bound of a set

Lecture 9 - Ordered set, Least upper bound, Greatest lower bound of a set (Continued...)

Lecture 10 - Compact Set

Lecture 11 - Properties of Compact sets

Lecture 12 - Tutorial-II

Lecture 13 - Heine Borel Theorem

Lecture 14 - Weierstrass Theorem

Lecture 15 - Cantor set and its properties

Lecture 16 - Derived set and Dense set

Lecture 17 - Limit of a sequence and monotone sequence

Lecture 18 - Tutorial-III

Lecture 19 - Some Important limits of sequences

Lecture 20 - Ratio Test CauchyÂ's theorems on limits of sequences of real numbers

Lecture 21 - Fundamental theorems on limits

Lecture 22 - Some results on limits and Bolzano-Weierstrass Theorem

Lecture 23 - Criteria for convergent sequence

Lecture 24 - Tutorial-IV

Lecture 25 - Criteria for Divergent Sequence

Lecture 26 - Cauchy Sequence

Lecture 27 - Cauchy Convergence Criteria for Sequences

Lecture 28 - Infinite Series of Real Numbers

Lecture 29 - Convergence Criteria for Series of Positive Real Numbers

Lecture 30 - Tutorial-V

Lecture 31 - Comparison Test for Series

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Absolutely and Conditionally Convergent Series

Lecture 33 - Rearrangement Theorem and Test for Convergence of Series

Lecture 34 - Ratio and Integral Test for Convergence of Series

Lecture 35 - Raabe's Test for Convergence of Series

Lecture 36 - Tutorial-VI

Lecture 37 - Limit of Functions and Cluster Point

Lecture 38 - Limit of Functions (Continued...)

Lecture 39 - Divergence Criteria for Limit

Lecture 40 - Various Properties of Limit of Functions

Lecture 41 - Left and Right Hand Limits for Functions

Lecture 42 - Tutorial-VII

Lecture 43 - Limit of Functions at Infinity

Lecture 44 - Continuous Functions (Cauchy's Definition)

Lecture 45 - Continuous Functions (Heine's Definition)

Lecture 46 - Properties of Continuous Functions

Lecture 47 - Properties of Continuous Functions (Continued...)

Lecture 48 - Tutorial-VIII

Lecture 49 - Boundness Theorem and Max-Min Theorem

Lecture 50 - Location of Root and Bolzano's Theorem

Lecture 51 - Uniform Continuity and Related Theorems

Lecture 52 - Absolute Continuity and Related Theorems

Lecture 53 - Types of Discontinuities

Lecture 54 - Tutorial-IX

Lecture 55 - Types of Discontinuities (Continued...)

Lecture 56 - Relation between Continuity and Compact Sets

Lecture 57 - Differentiability of Real Valued Functions

Lecture 58 - Local Max. - Min. Cauchy's and Lagrange's Mean Value Theorem

Lecture 59 - Rolle's Mean Value Theorems and Its Applications

Lecture 60 - Tutorial-X

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Modeling Transport Phenomena of Microparticles (Mathematics)

Co-ordinators : Dr. G.P. Raja Sekhar, Prof. Somnath Bhattacharyya

Lecture 1 - Preliminary concepts: Fluid kinematics, stress, strain

Lecture 2 - CauchyÂ's equation of motion and Navier-Stokes equations

Lecture 3 - Reduced forms of Navier-Stokes equations and Boundary conditions

Lecture 4 - Exact solutions of Navier-Stokes equations in particular cases

Lecture 5 - Dimensional Analysis Â– Non-dimensionalization of Navier-StokesÂ's equations

Lecture 6 - Stream function formulation of Navier-Stokes equations

Lecture 7 - Stokes flow past a cylinder

Lecture 8 - Stokes flow past a sphere

Lecture 9 - Elementary Lubrication Theory

Lecture 10 - Hydrodynamics of Squeeze flow

Lecture 11 - Solution of arbitrary Stokes flows

Lecture 12 - Mechanics of Swimming Microorganisms

Lecture 13 - Viscous flow past a spherical drop

Lecture 14 - Migration of a viscous drop under Marangoni effects

Lecture 15 - Singularities of Stokes flows

Lecture 16 - Introduction to porous media

Lecture 17 - Flow through porous media Â– elementary geometries

Lecture 18 - Flow through composite porous channels

Lecture 19 - Modeling transport of particles inside capillaries

Lecture 20 - Modeling transport of microparticles Â– some applications

Lecture 21 - Introduction to Elctrokietics

Lecture 22 - Basics on Electrostatics

Lecture 23 - Transport Equations for Electrokinetics, Part-I

Lecture 24 - Transport Equations for Electrokinetics, Part-II

Lecture 25 - Electric Double Layer

Lecture 26 - Electroosmotic flow (EOF) of ionized fluid

Lecture 27 - EOF in micro-channel

Lecture 28 - Non-linear EOF, Overlapping Debye Layer

Lecture 29 - Two-dimensional EOF

Lecture 30 - EOF near heterogeneous surface potential

Lecture 31 - Electroosmosis in hydrophobic surface

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Numerical Methods for Boundary Value Problems (BVP)

Lecture 33 - Numerical Methods for nonlinear BVP

Lecture 34 - Numerical Methods for coupled set of BVP

Lecture 35 - Numerical Methods for PDEs

Lecture 36 - Numerical Methods for transport equations, Part-I

Lecture 37 - Numerical Methods for transport equations, Part-II

Lecture 38 - Electrophoresis of charged colloids, Part-I

Lecture 39 - Electrophoresis of charged colloids, Part-II

Lecture 40 - Gel Electrophoresis

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 42 - Royden\'s Theorem on Normality Based On Growth Of Derivatives

Lecture 43 - Schottky\'s Theorem - Uniform Boundedness from a Point to a Neighbourhood & Problem Solving Session

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Basic Algebraic Geometry : Varieties, Morphisms, Local Rings, Function Fields and Nonsingularity (Mathematics)

Co-ordinators : Dr. T.E. Venkata Balaji

Lecture 1 - What is Algebraic Geometry?

Lecture 2 - The Zariski Topology and Affine Space

Lecture 3 - Going back and forth between subsets and ideals

Lecture 4 - Irreducibility in the Zariski Topology

Lecture 5 - Irreducible Closed Subsets Correspond to Ideals Whose Radicals are Prime

Lecture 6 - Understanding the Zariski Topology on the Affine Line; The Noetherian property in Topology and in Algebra

Lecture 7 - Basic Algebraic Geometry : Varieties, Morphisms, Local Rings, Function Fields and Nonsingularity

Lecture 8 - Topological Dimension, Krull Dimension and Heights of Prime Ideals

Lecture 9 - The Ring of Polynomial Functions on an Affine Variety

Lecture 10 - Geometric Hypersurfaces are Precisely Algebraic Hypersurfaces

Lecture 11 - Why Should We Study Affine Coordinate Rings of Functions on Affine Varieties ?

Lecture 12 - Capturing an Affine Variety Topologically From the Maximal Spectrum of its Ring of Functions

Lecture 13 - Analyzing Open Sets and Basic Open Sets for the Zariski Topology

Lecture 14 - The Ring of Functions on a Basic Open Set in the Zariski Topology

Lecture 15 - Quasi-Compactness in the Zariski Topology; Regularity of a Function at a point of an Affine Variety

Lecture 16 - What is a Global Regular Function on a Quasi-Affine Variety?

Lecture 17 - Characterizing Affine Varieties; Defining Morphisms between Affine or Quasi-Affine Varieties

Lecture 18 - Translating Morphisms into Affines as k-Algebra maps and the Grand Hilbert Nullstellensatz

Lecture 19 - Morphisms into an Affine Correspond to k-Algebra Homomorphisms from its Coordinate Ring of Functions

Lecture 20 - The Coordinate Ring of an Affine Variety Determines the Affine Variety and is Intrinsic to it

Lecture 21 - Automorphisms of Affine Spaces and of Polynomial Rings - The Jacobian Conjecture; The Punctured Plane is Not Affine

Lecture 22 - The Various Avatars of Projective n-space

Lecture 23 - Gluing (n+1) copies of Affine n-Space to Produce Projective n-space in Topology, Manifold Theory and Algebraic Geometry; The Key to the Definition of a Homogeneous Ideal

Lecture 24 - Translating Projective Geometry into Graded Rings and Homogeneous Ideals

Lecture 25 - Expanding the Category of Varieties to Include Projective and Quasi-Projective Varieties

Lecture 26 - Translating Homogeneous Localisation into Geometry and Back

Lecture 27 - Adding a Variable is Undone by Homogenous Localization - What is the Geometric Significance of this Algebraic Fact ?

Lecture 28 - Doing Calculus Without Limits in Geometry ?

Lecture 29 - The Birth of Local Rings in Geometry and in Algebra

Lecture 30 - The Formula for the Local Ring at a Point of a Projective Variety Or Playing with Localisations, Quotients, Homogenisation and Dehomogenisation !

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - The Field of Rational Functions or Function Field of a Variety - The Local Ring at the Generic Point

Lecture 32 - Fields of Rational Functions or Function Fields of Affine and Projective Varieties and their Relationships with Dimensions

Lecture 33 - Global Regular Functions on Projective Varieties are Simply the Constants

Lecture 34 - The d-Uple Embedding and the Non-Intrinsic Nature of the Homogeneous Coordinate Ring of a Projective Variety

Lecture 35 - The Importance of Local Rings - A Morphism is an Isomorphism if it is a Homeomorphism and Induces Isomorphisms at the Level of Local Rings

Lecture 36 - The Importance of Local Rings - A Rational Function in Every Local Ring is Globally Regular

Lecture 37 - Geometric Meaning of Isomorphism of Local Rings - Local Rings are Almost Global

Lecture 38 - Local Ring Isomorphism,Equals Function Field Isomorphism, Equals Birationality

Lecture 39 - Why Local Rings Provide Calculus Without Limits for Algebraic Geometry Pun Intended!

Lecture 40 - How Local Rings Detect Smoothness or Nonsingularity in Algebraic Geometry

Lecture 41 - Any Variety is a Smooth Manifold with or without Non-Smooth Boundary

Lecture 42 - Any Variety is a Smooth Hypersurface On an Open Dense Subset

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Commutative Algebra (Mathematics)

Co-ordinators : Prof. A.V.Jayanthan

Lecture 1 - Review of Ring Theory

Lecture 2 - Review of Ring Theory (Continued...)

Lecture 3 - Ideals in commutative rings

Lecture 4 - Operations on ideals

Lecture 5 - Properties of prime ideals

Lecture 6 - Colon and Radical of ideals

Lecture 7 - Radicals, extension and contraction of ideals

Lecture 8 - Modules and homomorphisms

Lecture 9 - Isomorphism theorems and Operations on modules

Lecture 13 - Convergence of distributions

Lecture 14 - Convergence of distributions

Lecture 15 - Calculus in the space of distributions

Lecture 16 - Further discussion on Distributions

Lecture 17 - Order and support of a distribution

Lecture 18 - Laplace and Poisson equations - Distributions with compact support

Lecture 19 - Validity of the definition of the support

Lecture 20 - Convolution and Fourier transform of distributions

Lecture 21 - The Schwartz space andAKN Lec 15 its dual

Lecture 22 - Fourier transform of a tempered distribution, convolution

Lecture 23 - Properties of Convolution

Lecture 24 - Further discussion on Fourier transform and convolution

Lecture 25 - Convolution of two distributions

Lecture 26 - Convolution of distributions

Lecture 27 - Introduction to Sobolev spaces

Lecture 28 - Properties of Sobloev Spaces

Lecture 29 - Extension and Density results

Lecture 30 - General Extension result

Lecture 31 - Integration on a smooth surface

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - A more general extension result

Lecture 33 - Notion of the trace

Lecture 34 - A compactness theorem

Lecture 35 - Equivalent norms

Lecture 36 - Sobolev lemma

Lecture 37 - Sobolev lemma (Continued...)

Lecture 38 - Analysis near the boundary

Lecture 39 - Trace in the upper half space

Lecture 40 - Trace in the upper half space

Lecture 41 - Supplementary lecture

Lecture 42 - Supplementary lecture

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Advanced Course on Partial Differential Equations - II (Mathematics)

Co-ordinators : Prof. A K Nandakumaran, Prof. P.S. Datti

Lecture 1 - Introduction and Outline

Lecture 2 - Review of Sobolev spaces - 1

Lecture 3 - Review of Sobolev spaces - 2

Lecture 4 - Review of Sobolev spaces - 3

Lecture 5 - Review of Sobolev spaces - 4

Lecture 6 - Review of Sobolev spaces - 5

Lecture 7 - Elliptic equations and weak formulation

Lecture 8 - Abstract Formulation

Lecture 9 - Variational Inequality

Lecture 10 - Babuska-Brezzi Theorem

Lecture 11 - Strong vs Weak Form of PDE

Lecture 12 - General Second Order Equations

Lecture 13 - Non-uniqueness of Neumann problem

Lecture 14 - Biharmonic equation, Stokes system

Lecture 15 - Stokes system (Continued...)

Lecture 16 - Regularity of Ellptic Equations

Lecture 17 - Regularity (Continued...)

Lecture 18 - Maximum and Minimum Principles for weak formulation

Lecture 19 - Spectrum of the Laplace operator

Lecture 20 - First eigenvalue of the Laplace operator and a brief discussion of a Galerkin method

Lecture 21 - Introduction to semi-groups and unbounded operators

Lecture 22 - Spectrum of an operator

Lecture 23 - Examples of operators and operators in a Hilbert space

Lecture 24 - Perturbation of an operator, Kato theorems. Definition of a semi-group

Lecture 25 - Semi-group and its infinitesimal generator

Lecture 26 - Examples of semi-groups; spectrum and resolvent of the infinitesimal generator

Lecture 27 - An application. Saturation theorem

Lecture 28 - Hille-Yosida Theorem

Lecture 29 - Lumer-Philips Theorem. Stone's theorem

Lecture 30 - Abstract Cauchy Problem

Lecture 31 - Semi-group arising from the heat equation

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Geneartor of the heat semi-group

Lecture 33 - Semi-group arising from the wave equation

Lecture 34 - Semi-group arising from the wave equation in energy space

Lecture 35 - Wave equation in energy space

Lecture 36 - Wave equation in energy space (Continued...)

Lecture 37 - Semi-group arising from the wave equation in H^1 x L^2

Lecture 38 - Schroedinger equation in free space

Lecture 39 - Schroedinger equation with a potential. Application of Kato's theorem

Lecture 40 - Equations in a bounded domain. Concluding remarks

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Group Theory (Mathematics)

Co-ordinators : Prof. R. Venkatesh

Lecture 1 - Motivation of group theory

Lecture 2 - Definition of a group

Lecture 3 - Examples of groups

Lecture 4 - The symmetric group

Lecture 5 - Subgroups of integers

Lecture 6 - Basic properties of groups

Lecture 7 - Subgroups of a group

Lecture 8 - Subgroup generated by subsets of a group

Lecture 9 - Group of integers modulo n

Lecture 10 - Some elementary number theory - I

Lecture 11 - Some elementary number theory - II

Lecture 12 - Order of an elements in a group

Lecture 13 - Cyclic groups and its subgroups

Lecture 14 - Characterization of cyclic groups

Lecture 15 - Examples of cosets of a subgroup in a group

Lecture 16 - Cosets of a subgroup of a group

Lecture 17 - Lagrange's Theorem

Lecture 18 - Number theoretic applications of Lagrange's Theorem

Lecture 19 - Normal subgroup

Lecture 20 - Some useful definitions

Lecture 21 - Internal direct product

Lecture 22 - More on normal subgroups

Lecture 23 - Normalizer of a subgroup

Lecture 24 - First Isomorphism Theorem

Lecture 25 - Second Isomorphism Theorem

Lecture 26 - Third Isomorphism Theorem

Lecture 27 - Group acting on a set

Lecture 28 - Group action - Examples

Lecture 29 - Isometries of the plane is a group

Lecture 30 - Orthogonal maps

Lecture 31 - Dihedral groups

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Mechanical Behavior of Polymers and Composites (Mechanical Engineering)

Co-ordinators : Dr. Naresh V Datla

Lecture 1 - Introduction to polymers

Lecture 2 - Polymer structure

Lecture 3 - Polymer classification

Lecture 4 - Polymer length, packing and tacticity

Lecture 5 - Glass transition temperature

Lecture 6 - Temperature effects, glassy regime

Lecture 7 - Viscoelastic, rubbery, viscous, decomposition

Lecture 8 - Relaxation and creep tests

Lecture 9 - Failure of polymers

Lecture 10 - Heaviside, Dirac delta, Laplace

Lecture 11 - Introduction to linear viscoelasticity

Lecture 12 - Phenomenological models for linear viscoelasticity

Lecture 13 - Maxwell model

Lecture 14 - Kelvin model

Lecture 15 - Three and four parameter models

Lecture 16 - Generalized Maxwell and Kelvin models

Lecture 17 - Boltzman superposition principle

Lecture 18 - Alfrey's correspondence principle

Lecture 19 - Analysis of viscoelastic bars

Lecture 20 - Analysis of viscoelastic beams

Lecture 21 - Dynamic mechanical analysis (DMA)

Lecture 22 - Dynamic mechanical thermal analysis (DMTA)

Lecture 23 - Time temperature superposition principle (TTSP)

Lecture 24 - Plastic design consideration and practices

Lecture 25 - What are composites?

Lecture 26 - Composite materials and types

Lecture 27 - Composite advantages and applications

Lecture 28 - Fabrication and other aspects of composites

Lecture 29 - 3D stress and strain components

Lecture 30 - Symmetry in stress, strain and stiffness matrix

Lecture 31 - Monoclinic, orthotropic and isotropic materials

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - 3D stress strain relation for orthotropic material

Lecture 33 - Plane stress: Specially orthotropic material

Lecture 34 - Plane stress: Generally orthotropic material

Lecture 35 - Lamina engineering constants

Lecture 36 - Lamina hygrothermal effects

Lecture 37 - Lamina fundamental strengths

Lecture 38 - Lamina failure criteria

Lecture 39 - Tsai-Hill and Hoffman failure criteria

Lecture 40 - Micromechanics: Assumptions, RVE

Lecture 41 - Micromechanics: Stiffness prediction

Lecture 42 - Micromechanics: Stiffness and strength

Lecture 43 - Macromechanics of laminate

Lecture 44 - Classical laminate theory

Lecture 45 - Classical laminate theory - II

Lecture 46 - Symmetric laminates, orthotropic laminates

Lecture 47 - Angle-ply, cross-ply and quasi-isotropic laminates

Lecture 48 - Hygrothermal stresses in laminates

Lecture 49 - Laminate failure

Lecture 50 - Design practices with laminates

Lecture 51 - Sandwich structures

Lecture 52 - Composites testing

Lecture 53 - Joining of composites

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Data-Enabled Tribological Engineering: From Experiments to Predictive Models (Mechanical Engineering)

Co-ordinators : Prof. (HAG) Harish Hirani

Lecture 1 - Introduction to Tribology

Lecture 2 - Tribological Interfaces

Lecture 3 - Fundamentals of Friction and Wear

Lecture 4 - Adhesion, Abrasion, and Surface Fatigue Mechanisms

Lecture 5 - Wear Measurement Techniques

Lecture 6 - Principles of Lubrication, types of Lubricants and their properties

Lecture 7 - Lubrication regimes and film thickness calculations

Lecture 8 - Mixed Lubrication

Lecture 9 - Hydrodynamic Lubrication Theory

Lecture 10 - Design Considerations for Hydrodynamic Lubrication Systems

Lecture 11 - Elastohydrodynamic Lubrication

Lecture 12 - Solid Lubrication

Lecture 13 - Surface modification techniques for tribological applications

Lecture 14 - Thin film coatings and their tribological properties

Lecture 15 - Nanotribology

Lecture 16 - Tribocorrosion

Lecture 17 - Wear testing techniques and standards

Lecture 18 - Measurement and analysis of wear debris

Lecture 19 - Experimental Design and Statistical Analysis

Lecture 20 - Introduction to Data-Enabled Engineering

Lecture 21 - Data Collection and Preprocessing

Lecture 22 - Feature Extraction and Selection

Lecture 23 - Introduction to Machine Learning Algorithms

Lecture 24 - Regression and Classification Algorithms for Tribological Modeling

Lecture 25 - Deep Learning for Tribological Engineering

Lecture 26 - Data-Driven Models for Friction Prediction

Lecture 27 - Data-Driven Models for Wear Prediction

Lecture 28 - Data-Driven Models for Lubricant Optimization

Lecture 29 - Data-Driven Models for Tribofilm Formation

Lecture 30 - Data-Driven Models for Tribocorrosion Prediction

Lecture 31 - Prediction of Coating and Surface Treatment Performance

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Optimization of Surface Engineering Processes using Machine Learning

Lecture 33 - Uncertainty Quantification and Sensitivity Analysis

Lecture 34 - Data Management and Ethics in Data-Enabled Engineering

Lecture 35 - Case Studies in Data-Enabled Tribological Engineering

Lecture 36 - Future Directions in Data-Enabled Tribological Engineering

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Nonlinear Vibration (Mechanical Engineering)

Co-ordinators : Prof. S.K. Dwivedy

Lecture 1 - Introduction of Nonlinear systems

Lecture 2 - Review of Linear vibrating systems

Lecture 3 - Phenomena associated with Nonlinear systems

Lecture 4 - Commonly observed Phenomena in Nonlinear systems

Lecture 5 - Force and Moment based Approach

Lecture 6 - Energy based approach Extended Hamiltonâ€™s principle and Lagrange Priciple

Lecture 7 - Derivation of Equation of motion of nonlinear discrete system (More examples)

Lecture 8 - Derivation of Equation of motion of nonlinear continuous system - 1

Lecture 9 - Derivation of Equation of motion of nonlinear continuous system - 2

Lecture 10 - Ordering of nonlinear Equation of motion

Lecture 11 - Qualitative Analysis Straight forward expansion

Lecture 12 - Numerical method Straight forward expansion

Lecture 13 - Lindstedt Poincareâ€™ technique

Lecture 14 - Method of multiple scales

Lecture 15 - Method of Harmonic balance

Lecture 16 - Method of averaging

Lecture 17 - Generalized Method of averaging

Lecture 18 - Krylov-Bogoliubov-Mitropolski technique

Lecture 19 - Incremental harmonic balance method and Intrinsic multiple scale harmonic balance method

Lecture 20 - Modified Lindstedt Poincareâ€™ technique

Lecture 21 - Stability and Bifurcation of Fixed-point response - 1

Lecture 22 - Stability and Bifurcation of Fixed-point response - 2

Lecture 23 - Stability and Bifurcation of Fixed-point response - 3

Lecture 24 - Stability and Bifurcation of Fixed-point response - 4

Lecture 25 - Stability Analysis of Periodic response

Lecture 26 - Bifurcation of Periodic response And Introduction to quasi-periodic and Chaotic response

Lecture 27 - Quasi-Periodic and Chaotic response

Lecture 28 - Numerical methods to obtain roots of characteristic equation and time response

Lecture 29 - Numerical methods to obtain time response

Lecture 30 - Numerical methods to obtain frequency response

Lecture 31 - Free Vibration of Single degree of freedom Nonlinear systems with Cubic and quadratic nonlinearities

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Free Vibration of Single degree of freedom Nonlinear systems with Cubic and quadratic nonlinearities: effect of damping

Lecture 33 - Free Vibration of multi- degree of freedom Nonlinear systems with Cubic and quadratic nonlinearities

Lecture 34 - Forced nonlinear Vibration Single degree of freedom Nonlinear systems with Cubic nonlinearities:

Lecture 35 - Forced nonlinear Vibration Single and multi- degree of freedom Nonlinear systems

Lecture 36 - Nonlinear Forced-Vibration of Single and Multi Degree-of-Freedom System

Lecture 37 - Analysis of Multi- degree of freedom system

Lecture 38 - Nonlinear Vibration of Parametrically excited system: Axially loaded sandwich beam

Lecture 39 - Nonlinear Vibration of Parametrically excited system: Elastic and Magneto-elastic beam

Lecture 40 - Nonlinear Vibration of Parametrically excited system with internal resonance

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Theory and Practice of Rotor Dynamics (Mechanical Engineering)

Co-ordinators : Prof. Rajiv Tiwari

Lecture 1 - Introduction

Lecture 2 - A Brief History of Rotor Dynamics

Lecture 3 - The State of the Art of Rotor Dynamics

Lecture 4 - Simple Rotor Models with Rigid Bearings

Lecture 5 - Jeffcott Rotor Model

Lecture 6 - Variant of Jeffcott Rotor Model

Lecture 7 - Rigid Rotor Mounted on Simple Anistropic Springs as Bearings

Lecture 8 - Rigid Rotor Mounted on Complex Anisotropic Bearings

Lecture 9 - Flexible Shaft with a Rigid Disc Mounted on Anistropic Supports

Lecture 10 - Gyroscopic Effects : Synchronous whirl of a Rotor Systems with a thin Disc

Lecture 11 - Gyroscopic Effects : Synchronous and Asynchronous pure wobbling motions

Lecture 12 - Gyroscopic Effects : Asynchronous whirl of a Rotor system with a thin Disc

Lecture 13 - Gyroscopic Effects : Asynchronous whirl analysis with Dynamic Approach

Lecture 14 - Torsional Vibrations: Simple Rotor Systems

Lecture 15 - Three Disc Rotor System

Lecture 16 - Transfer Matrix Approach - Part I

Lecture 17 - Transfer Matrix Approach - Part II

Lecture 18 - Transfer Matrix Approach - Part III

Lecture 19 - Geared and Branched Systems

Lecture 20 - Continuous System and Finite Element Method

Lecture 21 - Finite Element Method

Lecture 22 - Finite Element Analysis

Lecture 23 - Finite Element Analysis - Part III

Lecture 24 - Influence Coefficient Method

Lecture 25 - Transfer Matrix Method - Part I

Lecture 26 - Transfer Matrix Method - Part II

Lecture 27 - Transfer Matrix Method - Part III

Lecture 28 - Continuous System Approach

Lecture 29 - Finite Element Method - Part I

Lecture 30 - Finite Element Method - Part II

Lecture 31 - Finite Element Method - Part III

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Instability in Rotor Systems: Bearings

Lecture 33 - Fluid-Film Bearings

Lecture 34 - Internal Damping & Asymmetrical Shaft

Lecture 35 - Steam Whirl and Seals

Lecture 36 - Subcritical Speed Whirl

Lecture 37 - Introduction to Rigid Rotor Balancing

Lecture 38 - Dynamic Balancing of Rotors: Rigid Rotor Balancing

Lecture 39 - Dynamic Balancing of Rotors:Flexible Rotor Model Balancing

Lecture 40 - Dynamic Balancing of Rotors:Influence Coefficient Method for Flexible Rotor

Lecture 41 - Common Faults & Vibration signatures

Lecture 42 - Condition Based Monitoring

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Engineering Mechanics (Mechanical Engineering)

Co-ordinators : Prof. U.S. Dixit, Dr. G. Saravana Kumar

Lecture 1 - Fundamentals Of Engineering Mechanics

Lecture 2 - Equations of Equilibrium

Lecture 3 - Truss Analysis - Part 1

Lecture 4 - Truss Analysis - Part 2

Lecture 5 - Analysis of Frames Machines

Lecture 6 - Internal Forces

Lecture 7 - Internal Forces in Beams

Lecture 8 - Cables

Lecture 9 - Friction

Lecture 10 - Application of Friction - Part 1

Lecture 11 - Application of Friction - Part 2

Lecture 12 - Application of Friction - Part 3

Lecture 13 - Centroids Center of Mass

Lecture 14 - Centroids Area of Moments

Lecture 15 - Product of Inertia, Rotation of Axis and Principle Moments of Inertia

Lecture 16 - Principle Mass Moments of Inertia

Lecture 17 - Second Moment of Mass

Lecture 18 - Virtual Work of Ideal System

Lecture 19 - Principle of Virtual Work

Lecture 20 - Systems with Friction

Lecture 21 - Potential Energy

Lecture 22 - Stability of Equilibrium

Lecture 23 - Kinematics of a Particles

Lecture 24 - Kinematics of a Particle Moving on a Curve

Lecture 25 - Relative Motion

Lecture 26 - Plane Kinematics of Rigid Bodies

Lecture 27 - Kinematics of a Particle

Lecture 28 - Work and Energy

Lecture 29 - Impulse and Momentum

Lecture 30 - Direct and Oblique Impulse

Lecture 31 - Plane Kinetics of Rigid Bodies

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Kinetics of a Body

Lecture 33 - Method of Momentum and Analysis of Robot Manipulator

Lecture 34 - Kinematics in 3D

Lecture 35 - Kinetics in 3D

Lecture 36 - Free Vibration

Lecture 37 - Forced Vibration Damped Undamped

Lecture 38 - Vibration of Rigid Bodies - Part 1

Lecture 39 - Vibration of Rigid Bodies - Part 2

Lecture 40 - Some Problems of Vibration

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Mechanical Vibrations (Mechanical Engineering)

Co-ordinators : Prof. S.K. Dwivedy, Prof. Rajiv Tiwari

Lecture 1 - Overview of the Course, Practical and Research Trends

Lecture 2 - Harmonic and Periodic Motions, Vibration Terminology

Lecture 3 - Vibration Model, Equation of Motion-Natural Frequency

Lecture 4 - Energy Method, Principle of Virtual Work

Lecture 5 - Viscously Damped Free Vibration Special Cases: Oscillatory

Lecture 6 - Logarithmic Decrement Experimental Determination of Damping Coefficient Hystersis Loop

Lecture 7 - Coulomb Damping other Damping Models

Lecture 8 - Forced Harmonic Vibration, Magnification Factor

Lecture 9 - Laplace Transform, Superposition Theorem

Lecture 10 - Rotor Unbalance and Whirling of Shaft, Transmissibility

Lecture 11 - Support Motion, Vibration Isolation

Lecture 12 - Sharpness of Resonance, Vibration Measuring Instruments

Lecture 13 - Generalized and Principle Coordinates, Derivation of Equation of Motion

Lecture 14 - Lagranges's Equation

Lecture 15 - Coordinate Coupling

Lecture 16 - Forced Harmonic Vibration

Lecture 17 - Tuned Absorber, Determination of Mass Ratio

Lecture 18 - Tuned and Damped Absorber, Untuned Viscous Damper

Lecture 19 - Derivation of Equations of Motion, Influence Coefficient Method

Lecture 20 - Properties of Vibrating Systems: Flexibility & Stiffness Matrices, Reciprocity Theorem

Lecture 21 - Modal Analysis: Undamped

Lecture 22 - Modal Analysis: Damped

Lecture 23 - Simple Systems With One Two or Three Discs Geared System

Lecture 24 - Multi-Degree of Freedom Systems-Transfer Matrix Method Branched Systems

Lecture 25 - Derivation of Equations of Motion Part 1 - Newton

Lecture 26 - Derivation of Equations of Motion Part 2 - Newton

Lecture 27 - Vibration of Strings

Lecture 28 - Longitudinal and Torsional Vibration of Rods

Lecture 29 - Transverse Vibration of Beams, Equations of Motion and Boundary Conditions

Lecture 30 - Transverse Vibration of Beams: Natural Frequencies and Mode Shapes

Lecture 31 - Rayleigh's Energy Method

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Matrix Iteration Method

Lecture 33 - Durkerley, Rayleigh-Ritz and Galerkin Method

Lecture 34 - Finite Element Formulation for Rods, Gear Train and Branched System

Lecture 35 - Finite Element Formulation for Beams: Galerkin

Lecture 36 - Global Finite Element Assembly and Imposition of Boundary Conditions

Lecture 37 - Vibration Testing Equipments: Signal Measurements

Lecture 38 - Vibration Testing Equipments: Signal Analysis

Lecture 39 - Field Balancing of Rotors

Lecture 40 - Condition Monitoring

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Advanced Machining Processes (Mechanical Engineering)

Co-ordinators : Prof. Manas Das

Lecture 1 - Introduction to advanced machining processes

Lecture 2 - Ultrasonic machining - Part I

Lecture 3 - Ultrasonic machining - Part II

Lecture 4 - Abrasive jet machining

Lecture 5 - Water jet cutting and Abrasive water jet machining

Lecture 6 - Magnetic abrasive finishing

Lecture 7 - Abrasive Flow Finishing

Lecture 8 - Magnetorheological Finishing

Lecture 9 - Magnetorheological Abrasive Flow Finishing - Part I

Lecture 10 - Magnetorheological Abrasive Flow Finishing - Part II

Lecture 11 - Magnetorheological Abrasive Flow Finishing - Part III

Lecture 12 - Electric discharge machining (EDM)

Lecture 13 - Electric Discharge Grinding, Electric Discharge Diamond Grinding and Wire Electric Discharge Machining

Lecture 14 - Electrochemical Machining (ECM)

Lecture 15 - Electrochemical Grinding, Electrostream Drilling, Shaped Tube Electrolytic Machining

Lecture 16 - Plasma Arc Machining (PAM)

Lecture 17 - Electron Beam Machining (EBM) Edit Lesson

Lecture 18 - Laser Beam Machining (LBM)

Lecture 19 - Chemical Machining (ChM)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fundamentals of Nuclear Power Generation (Mechanical Engineering)

Co-ordinators : Prof. Dipankar N. Basu

Lecture 1 - Introduction of nuclear energy

Lecture 2 - Binding energy and mass defect

Lecture 3 - Radioactivity and radioactive decay

Lecture 4 - Different types of nuclear transmutation

Lecture 5 - Artificial radioactivity and neutron-nucleus interactions

Lecture 6 - Energy and momentum conservation

Lecture 7 - Fission and role of neutron energy

Lecture 8 - Theory of elastic scattering

Lecture 9 - Neutron multiplication factor

Lecture 10 - Neutron diffusion theory

Lecture 11 - Solution of one-group diffusion equation

Lecture 12 - Simple reactor theory

Lecture 13 - Nuclear fuel and simple energy consideration

Lecture 14 - Axial temperature distribution and heat transfer coefficient

Lecture 15 - Prompt and delayed neutrons

Lecture 16 - Delayed neutron kinetics

Lecture 17 - Different control mechanisms and various effects

Lecture 18 - Classical reactor designs

Lecture 19 - Evolution of reactors from Gen-I to Gen-IV

Lecture 20 - The concept of breeding

Lecture 21 - Fuel cycles and FBR

Lecture 22 - Gen-IV FBR designs

Lecture 23 - Hydrogen fusion reactions

Lecture 24 - Coulomb barrier and other critical factors

Lecture 25 - Radiation dose and gross biological effects

Lecture 26 - Stochastic and deterministic effects of human cells

Lecture 27 - Lessons from TMI and Chernobyl

Lecture 28 - Defence-in-depth Philosophy

Lecture 29 - Waste classification and Disposal of Mill Tailings

Lecture 30 - Disposal methodologies for HLW and IMW

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Advances in Welding and Joining Technologies (Mechanical Engineering)

Co-ordinators : Prof. Swarup bag

Lecture 1 - Fundamentals of Welding and Joining - Part I

Lecture 2 - Fundamentals of Welding and Joining - Part II

Lecture 3 - Fundamentals of Welding and Joining - Part III

Lecture 4 - Fundamentals of Welding and Joining - Part IV

Lecture 5 - Fundamentals of Welding and Joining - Part V

Lecture 6 - Laser and Electron Beam Welding - Part I

Lecture 7 - Laser and Electron Beam Welding - Part II

Lecture 8 - Solid State Welding Processes - Part I

Lecture 9 - Solid State Welding Processes - Part II

Lecture 10 - Solid State Welding Processes - Part III

Lecture 11 - Computational Welding Mechanics - Part I

Lecture 12 - Computational Welding Mechanics - Part II

Lecture 13 - Computational Welding Mechanics - Part III

Lecture 14 - Micro and Nano Joining Processes - Part I

Lecture 15 - Micro and Nano Joining Processes - Part II

Lecture 16 - Micro and Nano Joining Processes - Part III

Lecture 17 - Welding Metallurgy - Part I

Lecture 18 - Welding Metallurgy - Part II

Lecture 19 - Welding Metallurgy - Part III

Lecture 20 - Welding Metallurgy - Part IV

Lecture 21 - Welding and Joining of Non-Metals - Part I

Lecture 22 - Welding and Joining of Non-Metals - Part II

Lecture 23 - Metal Transfer in Welding and Metal Printing

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Machining and Machining Fluids (Mechanical Engineering)

Co-ordinators : Prof. Mamilla Ravi Sankar

Lecture 1 - Introduction

Lecture 2 - Introduction and Importance of Machining

Lecture 3 - Principles of Machining or Metal Cutting

Lecture 4 - Cutting Tools

Lecture 5 - Forces in Machining

Lecture 6 - Tribology in Machining

Lecture 7 - Lubrication surface roughness in Machining

Lecture 8 - Machinability and Thermal Aspects

Lecture 9 - Tool Wear and Tool life - Part 1

Lecture 10 - Tool Wear and Tool life - Part 2

Lecture 11 - Tool Wear and Tool life - Part 3

Lecture 12 - Tool Materials and Coatings

Lecture 13 - Machining Fluids / Cutting Fluids and its Additives - Part 1

Lecture 14 - Machining Fluids / Cutting Fluids and its Additives - Part 2

Lecture 15 - Machining Fluids / Cutting Fluids and its Emissions

Lecture 16 - Eco Friendly Cutting Fluids - Part 1

Lecture 17 - Eco Friendly Cutting Fluids - Part 2

Lecture 18 - Rheology and Thermal Characterization of Machining / Cutting Fluids

Lecture 19 - Bio-degradation Studies of Machining / Cutting Fluids

Lecture 20 - Cutting Fluid Application in Machining Region

Lecture 21 - Practical Machining Processes - 1

Lecture 22 - Practical Machining Processes - 2

Lecture 23 - Introduction to Abrasive Processes - Grinding

Lecture 24 - Cutting fluids in Grinding Process

Lecture 25 - Unbonded Conventional Abrasive Processes

Lecture 26 - Advances in Metal Cutting_Machining Processes

Lecture 27 - Advances in Metal Cutting_Machining Processes - 2

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Mechanics of Machining (Mechanical Engineering)

Co-ordinators : Dr. Uday S. Dixit

Lecture 1 - Deformation of Metals

Lecture 2 - Mechanism of Plastic Deformation

Lecture 3 - Machining Processes: Single Edge Tool, Types of Chips

Lecture 4 - Tool Geometry: Single Point Cutting Tool Specifications

Lecture 5 - Tool Specifications, Conversion Of Tool Angles, Multi-Point Cutting Tools

Lecture 6 - Mechanics of Orthogonal Cutting, Force Relationships

Lecture 7 - Determination of Stress, Strain, and Strain Rate

Lecture 8 - Measurement of Shear Angle

Lecture 9 - Other Analysis for Force Relationships

Lecture 10 - Mechanics of Oblique Cutting

Lecture 11 - Measurement of Cutting Forces

Lecture 12 - Thermal Aspects Of Machining: Temperatures in Orthogonal Cutting

Lecture 13 - Tool Wear and Tool Life and Tool Life Equations

Lecture 14 - Economics in Machining

Lecture 15 - Practical Machining Operations: Turning And Shaping and Planning Operation

Lecture 16 - Practical Machining Operations: Milling And Drilling

Lecture 17 - Grinding of Metals and Mechanics of Grinding Process

Lecture 18 - Abrasive Machining and Finishing Operations

Lecture 19 - CNC Machines and CNC Programming

Lecture 20 - Introduction to Advanced Machining Processes

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Principle of Hydraulic Machines and System Design (Mechanical Engineering)

Co-ordinators : Prof. Pranab K. Mondal

Lecture 1 - Introduction to hydraulic machines: classifications and operational principles

Lecture 2 - Euler equation for turbomachines: net head developed by the pump/turbines

Lecture 3 - Velocity triangles of pumps, effect of inlet swirl on pump operation

Lecture 4 - Velocity triangles of pumps, effect of inlet swirl on pump operation

Lecture 5 - Pump casings, Efficiencies and Problems - I

Lecture 6 - Pump casings, Efficiencies and Problems - II

Lecture 7 - Pump casings, Efficiencies and Problems - III

Lecture 8 - Axial flow pump, HQ curve, System Resistance Curve - I

Lecture 9 - Axial flow pump, HQ curve, System Resistance Curve - II

Lecture 10 - HQ Curve, System Resistance Curve - I

Lecture 11 - HQ Curve, System Resistance Curve - II

Lecture 12 - Introduction to Cavitation

Lecture 13 - Condition for Cavitation and NPSH

Lecture 14 - Net Positive Suction Head (NPSH)

Lecture 15 - Suction number and Introduction to off design condition

Lecture 16 - Cavitation: The effect of off-design Conditions

Lecture 17 - Cavitation: Preventive Measures

Lecture 18 - Cavitation: Preventive Measures, Effect on Pump Characteristic

Lecture 19 - Problems on Cavitation

Lecture 20 - Introduction to Slip : Stodola Slip Model

Lecture 21 - Departure from Euler theory

Lecture 22 - Slip Velocity - I

Lecture 23 - Slip Velocity - II

Lecture 24 - Problem on slip

Lecture 25 - Degree of reaction of pump

Lecture 26 - Degree of reaction and axial pump design

Lecture 27 - Testing of radial flow pump - I

Lecture 28 - Testing of radial flow pump - II

Lecture 29 - Problem on radial flow pump testing

Lecture 30 - Radial equilibrium of axial flow pump - I

Lecture 31 - Radial equilibrium of axial flow pump - II

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Pump operation: series and parallel connection

Lecture 33 - Series and parallel operation of dissimilar pumps

Lecture 34 - Pumping system design

Lecture 35 - Design of parellel pumping system

Lecture 36 - Numerical problem on pumps - I

Lecture 37 - Numerical problem on pumps - II

Lecture 38 - Numerical problem on pumps - III

Lecture 39 - Working principle and Indicator diagram of PD pump

Lecture 40 - Working principle and Indicator diagram of PD pump (Continued...)

Lecture 41 - Modified indicator diagram and Head-Discharge curve

Lecture 42 - Analysis and Head-Discharge curve of PD pump

Lecture 43 - Analysis and efficiencies of PD pump

Lecture 44 - Requirement of air chamber in PD pump

Lecture 45 - Numerical problem on PD pump with air chamber

Lecture 46 - Similarity and dimensional analysis of hydraulic machines

Lecture 47 - Dimensional analysis of hydraulic machines: Buckingham's theorem

Lecture 48 - Buckingham's theorem: Specific speed of hydraulic machines

Lecture 49 - Turbine Classification and Operational principle of Pelton wheel

Lecture 50 - Velocity Tiangles and analysis

Lecture 51 - Operational Principle of Reaction turbine

Lecture 52 - Degree of Reaction and Introduction to axial flow turbine

Lecture 53 - Kaplan Turbine: Operational Principle, Turbine efficiencies

Lecture 54 - Draft Tube for Reaction Turbine and Cavitation

Lecture 55 - Energy Balance and NPSH

Lecture 56 - Thoma Cavitation Factor

Lecture 57 - Reaction Turbine: Design aspects and Characteristic Curves

Lecture 58 - Problems on Impulse and Reaction Turbines

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Abrasive Machining and Finishing Processes (Mechanical Engineering)

Co-ordinators : Prof. Mamilla Ravi Sankar

Lecture 1 - Introduction to Abrasive Machining and Finishing Processes

Lecture 2 - Grinding Process

Lecture 3 - Grinding Fluids and Its Additives

Lecture 4 - Grinding Fluids and its Emissions

Lecture 5 - Sustainable Grinding Process: Biodegradation of Grinding Fluids

Lecture 6 - Sustainable Grinding Process: MQL in Grinding Process

Lecture 7 - Honing Process

Lecture 8 - Lapping Process

Lecture 9 - Super Finishing and Sand Blasting

Lecture 10 - Vibratory Bowl Finishing,Rotary Barrel Finishing or Tumbling

Lecture 11 - Drag Finishing, Ice-bonded Abrasive Finishing, Pitch Polishing, Pad Polishing

Lecture 12 - Introduction to Surface Texture in abrasive Process

Lecture 13 - Representation of Surface Roughness

Lecture 14 - Abrasive Jet Machining (AJM)

Lecture 15 - Abrasive Water Jet Machining (AWJM)

Lecture 16 - Ultrasonic Machining (USM)

Lecture 17 - EDM, Wire-EDM, EDG, EDDG, AW-EDG

Lecture 18 - Elastic Emission Machining

Lecture 19 - PMEDM and ECD and ELID, ECH

Lecture 20 - Abrasive Flow Finishing: Part 1

Lecture 21 - Abrasive Flow Finishing: Part 2

Lecture 22 - Magnetic Field Assisted Abrasive Finishing: MAF, MADe, MFP

Lecture 23 - Magneto Rheological Finishing and BE-MRF

Lecture 24 - Magnetic Field Assisted Abrasive Finishing:CNP,CMMRF,MRAFF,R-MRAFF

Lecture 25 - Summary of the Course

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Principles of Mechanical Measurement (Mechanical Engineering)

Co-ordinators : Prof. Dipankar N. Basu

Lecture 1 - Introduction to measurement

Lecture 2 - Generalized measurement system and static characteristics

Lecture 3 - Uncertainties in measurement

Lecture 4 - Statistical treatment of random errors

Lecture 5 - System response to periodic inputs

Lecture 6 - Zeroth and first order systems

Lecture 7 - First and second order systems

Lecture 8 - Basics of digitization and number systems

Lecture 9 - Binary logic gates and binary codes

Lecture 10 - Analog-to-digital conversion

Lecture 11 - Digital-to-analog conversion

Lecture 12 - Electromagnetic indicators

Lecture 13 - Electronic amplifiers and filters

Lecture 14 - Resistive devices

Lecture 15 - Inductive, capacitive and optical devices

Lecture 16 - Piezoelectric and nozzle-flapper transducers

Lecture 17 - Resistive strain gages and associated circuitry

Lecture 18 - Strain gage rosettes and gage orientation

Lecture 19 - Elastic and strain gage load cells

Lecture 20 - Various load cells and dynamometers

Lecture 21 - Principles of manometry

Lecture 22 - Piezometer and elastic pressure transducer

Lecture 23 - Electric pressure transducer and high and low pressure measurement

Lecture 24 - Bernoulli's equation in obstruction meters

Lecture 25 - Obstruction meters and volume flowmeters

Lecture 26 - Mass flowmeters and velocity probes

Lecture 27 - Expansion-based devices

Lecture 28 - RTD, Thermistor and Thermocouple

Lecture 29 - Introduction to pyrometers

Lecture 30 - Basic seismic transducer

Lecture 31 - Vibro-, velo- and accelerometer

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Introduction to acoustic measurement

Lecture 33 - Radioactivity and its biological effects

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:IC Engines and Gas Turbines (Mechanical Engineering)

Co-ordinators : Dr. Vinayak Kulkarni, Prof. Pranab K. Mondal

Lecture 1 - External and Internal combustion engines, Engine components, SI and CI engines

Lecture 2 - Four-stroke and Two-stroke engines, Comparison between SI and CI engines, and Four-stroke and Two-stroke engines

Lecture 3 - Classification of IC engines

Lecture 4 - Engine operating characteristics

Lecture 5 - Otto, Diesel and Dual cycles

Lecture 6 - Otto, Diesel and Dual cycles (Continued...)

Lecture 7 - Otto, Diesel and Dual cycles (Continued...)

Lecture 8 - Otto, Diesel and Dual cycles (Continued...)

Lecture 9 - Comparison between the cycles, Actual cycles and their analysis

Lecture 10 - Carburetor, Mixture requirements

Lecture 11 - Carburetor, Mixture requirements (Continued...)

Lecture 12 - Idling, cruising and power ranges

Lecture 13 - Idling, cruising and power ranges (Continued...)

Lecture 14 - Classification, types of nozzles, Ignition system, Battery and Magneto ignition systems

Lecture 15 - Classification, types of nozzles, Ignition system, Battery and Magneto ignition systems (Continued...)

Lecture 16 - Classification, types of nozzles, Ignition system, Battery and Magneto ignition systems (Continued...)

Lecture 17 - Engine friction, Lubrication systems, forces on piston

Lecture 18 - Lubricating oils, Thermochemistry and Fuels, Self-ignition

Lecture 19 - Octane and Cetane Numbers, Alternative Fuels - Methanol, Ethanol, hydrogen, Natural Gas

Lecture 20 - Octane and Cetane Numbers, Alternative Fuels - Methanol, Ethanol, hydrogen, Natural Gas (Continued...)

Lecture 21 - Combustion in SI and CI Engines, Pressure Crank Angle Diagram

Lecture 22 - Combustion in SI and CI Engines, Pressure Crank Angle Diagram (Continued...)

Lecture 23 - Combustion in SI and CI Engines, Pressure Crank Angle Diagram (Continued...)

Lecture 24 - SI engine injection system, Energy distribution, Engine temperatures, Heat transfer in combustion chambers

Lecture 25 - SI engine injection system, Energy distribution, Engine temperatures, Heat transfer in combustion chambers (Continued...)

Lecture 26 - CI engine injection systems, Air-cooled and liquid-cooled engines, Modern trends

Lecture 27 - CI engine injection systems, Air-cooled and liquid-cooled engines, Modern trends (Continued...)

Lecture 28 - CI engine injection systems, Air-cooled and liquid-cooled engines, Modern trends (Continued...)

Lecture 29 - Problems on IC engine

Lecture 30 - Turbomachines, Gas Turbine theory

Lecture 31 - Open Cycle Gas Turbine Power Plant, Twin Shaft Arrangement

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Closed Cycle, Multi-Spool Arrangement, Steam Power Plant

Lecture 33 - Basic Thermodynamics

Lecture 34 - Brayton Cycle: Introducton and General Relationships

Lecture 35 - Brayton Cycle: Efficiency, Work Ratio and Optimum Work Output Condition

Lecture 36 - Brayton Cycle with Heat Exchanger/Reheater

Lecture 37 - Brayton Cycle with Intercooler

Lecture 38 - Real Brayton Cycle, Solved Example for Ideal Cycle

Lecture 39 - Solved Examples for Real Brayton Cycle

Lecture 40 - Introduction and Performance Parameters of Propulsion System

Lecture 41 - Basics of Various Aircraft Engine

Lecture 42 - Eular Turbomachinary Equation

Lecture 43 - Introduction and Flow Analysis of Centrifugal Compressors

Lecture 44 - Thermodynamics Analysis of Centrifugal Compressors

Lecture 45 - Axial Compressor: Basics, Velocity triangles, T-S diagram and Work Intraction

Lecture 46 - Axial Compressor: Different factors, Degree of Reaction and Free Vortex Condition

Lecture 47 - Complete Analysis of Axial Flow Gas Turbine

Lecture 48 - Solved Examples for Axial Compressors,Centrifugal Compressors and Turbine

Lecture 49 - Radial Flow Turbine, Solved Example of Free vortex Condition

Lecture 50 - Nozzles and Diffuers: Introduction, Intake efficiency,Nozzle efficiency

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fundamental of Welding Science and Technology (Mechanical Engineering)

Co-ordinators : Prof. Pankaj Biswas

Lecture 1 - Introduction of welding

Lecture 2 - Classification of welding and joints

Lecture 3 - Parts of weld joint

Lecture 4 - Welding Symbol

Lecture 5 - welding power source - 1

Lecture 6 - Welding power source - 2

Lecture 7 - Welding Power sources characteristics - 1

Lecture 8 - Welding Power sources characteristics - 2

Lecture 9 - Physics of welding - 1

Lecture 10 - Physics of welding - 2

Lecture 11 - Physics of welding - 4 (Arc Stability and Arc Blow)

Lecture 12 - Physics of welding - 3

Lecture 13 - Physics of welding - 5 (Metal Transfer-1)

Lecture 14 - Physics of welding - 6 (Metal Transfer-2)

Lecture 15 - Physics of welding - 7 (Metal Transfer-3)

Lecture 16 - Physics of welding - 8 (Metal Transfer-4)

Lecture 17 - Physics of welding - 9 (Metal Transfer-5)

Lecture 18 - Physics of welding - 10 (Metalting Efficiency)

Lecture 19 - Oxy-Fuel Gas Welding

Lecture 20 - Shielded Metal Arc Welding

Lecture 21 - Gas Tungsten Arc Welding

Lecture 22 - Gas Metal Arc Welding

Lecture 23 - Submerged Arc Welding

Lecture 24 - Welding Defects and Inspection

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Mathematical Modeling of Manufacturing Processes (Mechanical Engineering)

Co-ordinators : Prof. Swarup bag

Lecture 1 - Materials and manufacturing Processes - 1

Lecture 2 - Materials and manufacturing Processes - 2

Lecture 3 - Physics based modeling approach at different scale

Lecture 4 - Evaluation of properties and process modelling

Lecture 5 - Thermofluid and electromagnetic analysis

Lecture 6 - Solid-state deformation and residual stress - 1

Lecture 7 - Solid-state deformation and residual stress - 2

Lecture 8 - Meltiing, solidification and additive manufacturing

Lecture 9 - Force and velocity diagram - 1

Lecture 10 - Force and velocity diagram - 2

Lecture 11 - Heat transfer analysis

Lecture 12 - Principal and mechanism at different processes - 1

Lecture 13 - Principal and mechanism at different processes - 2

Lecture 14 - Mechanics of bulk metal forming

Lecture 15 - Mechanics of sheet metal forming - 1

Lecture 16 - Mechanics of sheet metal forming - 2

Lecture 17 - Heat transfer and thermomechanical processing

Lecture 18 - Fusion welding processes - 1

Lecture 19 - Fusion welding processes - 2

Lecture 20 - Physics of welding and metal transfer

Lecture 21 - Heat source model in fusion welding

Lecture 22 - Heat transfer and material flow

Lecture 23 - Solidification in welding - 1

Lecture 24 - Solidification in welding - 2

Lecture 25 - Solid state welding - 1

Lecture 26 - Solid state welding - 2

Lecture 27 - Hybrid welding, residual stress and distortion

Lecture 28 - Cooling and solidification at different casting processes

Lecture 29 - Powder metallurgy

Lecture 30 - Principle of surface and coating technologies

Lecture 31 - Principle and development of additive manufacturing technologies - 1

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Principle and development of additive manufacturing technologies - 2

Lecture 33 - Fundamentals of heat treatment

Lecture 34 - Evaluation of microstructural properties and residual stress

Lecture 35 - Down-scaling of conventional manufacturing processes and Micro-to-nano manufacturing

Lecture 36 - Packaging, micro-finishing and micro-manufacturing processes

Lecture 37 - Processing and shaping of non-metals and bio-materials

Lecture 38 - Principle of glass and ceramics processing and their shaping

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Two-Phase flow with phase change in Conventional and Miniature Channels (Mechanical Engineering)

Co-ordinators : Prof. Manmohan Pandey

Lecture 1 - Introduction and Notation

Lecture 2 - Flow Regimes and Flow Regime Maps

Lecture 3 - The Homogeneous Model

Lecture 4 - The Separated Flow Model

Lecture 5 - The Separated Flow Model (Continued...)

Lecture 6 - The Drift Flux Model

Lecture 7 - Estimation of pressure drop in two phase flow

Lecture 8 - Two phase flow and pressure drop in miniature channels

NPTEL : NOC:Finite Element Method: Variational Methods to Computer Programming (Mechanical Engineering)

Co-ordinators : Prof. Arup Nandy, Prof. Atanu Banerjee

Lecture 1 - Functional, First variation, Euler Lagrange equation; Several Dependent variables

Lecture 2 - Functional with higher order derivatives; Variational statement

Lecture 3 - Differential equation, Variational statement and Minimization problem; Rayleigh-Ritz method

Lecture 4 - FEM steps: Explained with discrete linear springs; Gaussian Quadrature rule for integration

Lecture 5 - Solving one Ordinary Differential Equation using Linear Finite Element

Lecture 6 - Solving one Ordinary Differential Equation using Quadratic Finite Element

Lecture 7 - Bar Element: Elemental equation; Matlab Implementation with Example

Lecture 8 - Bar Element: Postprocessing; Comparison with Analytical Solution; Bar with linear springs

Lecture 9 - Truss Element: Elemental equation; Matlab Implementation with Example

Lecture 10 - Beam Element: Variational statement; Hermite shape function

Lecture 11 - Beam Element: Elemental equation; Matlab implementation with Example

Lecture 12 - Beam Element: Matlab implementation for the example with Non-uniform distributed load

Lecture 13 - Frame Element: Derivation of elemental equation in global reference frame

Lecture 14 - Frame Element: Matlab implementation with one Example

Lecture 15 - Generalization of Geometry data; Stiffness matrix, Load vector formation at element level

Lecture 16 - Generalization of Assembly, Imposition of Boundary condition and Load information

Lecture 17 - Indicial Notation: Summation convention, Kronecker delta, Permutation symbol

Lecture 18 - Second order tensor; Gradient, Divergence, Curl and Laplacian in Indicial notation

Lecture 19 - Gauss Divergence theorem and its application in Heat transfer and Structural analysis

Lecture 20 - Derivation of weak form of 2D steady-state heat conduction problem

Lecture 21 - Triangular element, calculating element stiffness and element force vector

Lecture 22 - Numerical example, assembly, mapping

Lecture 23 - Numerical integration, Neumann boundary, and higher order shape functions

Lecture 24 - Quadrilateral element, Lagrange shape functions, Serendipity elements

Lecture 25 - Development of a MATLAB code for solving 2D steady-state heat conduction problem

Lecture 26 - Demonstration of the MATLAB code

Lecture 27 - Elasticity problems in two dimension and obtaining the weak form

Lecture 28 - Deriving element stiffness matrix and element force vector, numerical example

Lecture 29 - Development of a MATLAB code for solving planar elasticity problems

Lecture 30 - Superconvergent Patch Recovery, error estimator, adaptive refinement

Lecture 31 - Solving eigenvalue problem in bar and beam, writing FEM code in MATLAB

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Solving eigenvalue problem of membrane, writing FEM code in MATLAB

Lecture 33 - Solving transient problems (parabolic type)

Lecture 34 - Solving transient problems (hyperbolic type)

Lecture 35 - Solving elasticity problems in 3D using FEM, Solvers

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Computational Continuum Mechanics (Mechanical Engineering)

Lecture 4 - Principle of Operation, Types of Laser Cutting, and Kerf Geometry

Lecture 5 - Types of Lasers in Material Removal, Process and Performance Parameters

Lecture 6 - A Case-study on Cutting a Circular Part using CO2 Laser Machine

Lecture 7 - Mechanisms of Laser Welding - Part I

Lecture 8 - Mechanisms of Laser Welding - Part II

Lecture 9 - Effects of Process Parameters during Laser Welding and Study of Defects in Weld Beads

Lecture 10 - A Case Study on Welding of Mild Steel Sheets using 2.5 kW CO2 Laser Machine

Lecture 11 - Material Forming and Fundamentals of Laser Forming

Lecture 12 - Mechanisms of Laser Forming

Lecture 13 - Process Parameters and their Effects on the Performance of Laser Forming

Lecture 14 - Surface Treatment and Application of Lasers

Lecture 15 - Laser Surface Hardening

Lecture 16 - Laser Surface Alloying

Lecture 17 - Laser Cladding

Lecture 18 - Additive Manufacturing Techniques

Lecture 19 - Laser Scanning Stereolithography

Lecture 20 - Selective Laser Sintering and Selective Laser Melting

Lecture 21 - Process and Performance Parameters of Laser Based Additive Manufacturing Techniques

Lecture 22 - Lasers in Manufacturing Automation

Lecture 23 - CNC for Laser Based Manufacturing

Lecture 24 - CAD for Laser Based Manufacturing

Lecture 25 - Laser-assisted Material Forming

Lecture 26 - Effect of Coatings, 3D Laser Forming and Micro-forming

Lecture 32 - Engine Combustion and Pollution

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Thermal Engineering: Basic and Applied (Mechanical Engineering)

Co-ordinators : Prof. Pranab K. Mondal

Lecture 1 - First law of Thermodynamics for control mass and control volume systems

Lecture 2 - First law of Thermodynamics for control volume system (Flow system)

Lecture 3 - Steady State Steady Flow Processes, combination of First and Second Laws

Lecture 4 - Second Law of Thermodynamics: A Brief Review

Lecture 5 - Combined First and Second Laws Applied to Processes

Lecture 6 - Combined First and Second Laws: Flow and Non-Flow Processes

Lecture 7 - Description of Steam Power Plant: Application of 1st and 2nd Laws to Different Processes

Lecture 8 - Second Law Applied to Processes of Power Plant and Ideal Cycle of Power Plant

Lecture 9 - Steam Power Plant: Thermodynamic aspects, Efficiency, Work ratio and Ideal Cycle

Lecture 10 - Ideal Power Cycle and its Limitations, Introduction to Actual Power Cycle

Lecture 11 - Limitations of Carnot Cycle, Simple Rankine Cycle and Analysis

Lecture 12 - Analysis of Simple Rankine Cycle and its Design Modifications

Lecture 13 - Reheat Cycle and Analysis

Lecture 14 - Reheat Cycle and Analysis (Continued...)

Lecture 15 - Regenerative Principle of Steam Power Cycles

Lecture 16 - Analysis of Regenerative Steam Power Cycles

Lecture 17 - Regenerative Steam Power Cycle with Closed Feed-Water Heater, Ideal Working Fluid

Lecture 18 - Multi-fluid Cycle and Analysis

Lecture 19 - Analysis of Multi-fluid Cycle; Second Law Analysis of Steam Power Cycle

Lecture 20 - Problems of Steam Power Cycle

Lecture 21 - Problems of Steam Power Cycle (Continued...)

Lecture 22 - Types of Boiler, Different Cycles in Boiler Operation, Boiler attachment

Lecture 23 - Cochran Boiler Operation, Boiler attachment

Lecture 24 - Boiler Attachments

Lecture 25 - Superheaters and their Arrangements, Steam Temperature Control

Lecture 26 - Characteristics of Convective and Radiant Superheaters; Steam Temperature Control

Lecture 27 - Problems on Boiler/Steam Generator

Lecture 28 - Use of nozzles in steam power plant, flow analysis of steam in nozzle

Lecture 29 - Flow analysis of steam in nozzle: Mass flow rate

Lecture 30 - Mass flow rate of steam in nozzle, Critical Pressure Ratio

Lecture 31 - Critical Pressure Ratio and its Physical Significance

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Nozzle efficiency and factors that affect the efficiency

Lecture 33 - Factors that affect the efficiency, problem on flow nozzle

Lecture 34 - Problem on flow nozzle

Lecture 35 - Steam Turbines: types and analysis using velocity triangles

Lecture 36 - Analysis of Impulse Steam Turbine

Lecture 37 - Compounding of Steam Turbine

Lecture 38 - Analysis of Reaction Steam Turbine

Lecture 39 - Problems on Steam Turbine

Lecture 40 - The Role of Condenser in Power Plant

Lecture 41 - Cooling Tower: Types and Analysis

Lecture 42 - Cooling Tower Performance

Lecture 43 - IC Engines, Classification, Different Parts, SI and CI Engines

Lecture 44 - Comparison of 2-stroke and 4-stroke Engines

Lecture 45 - Comparison of SI and CI Engines, Compression Ratio

Lecture 46 - Introduction to Carburettor and Regimes of Engine Operation

Lecture 47 - Regimes of Engine Operation and Simple Float Type Carburettor

Lecture 48 - Simple Float Type Carburettor and its Analysis

Lecture 49 - Mass Flow Rate of Fuel and limitations of Simple Float Type Carburettor

Lecture 50 - Limitations of Simple Float Type Carburettor, Problem on Carburettion

Lecture 51 - Engine Operating Characteristics: MEP and Indicator diagram

Lecture 52 - Performance Analysis parameters of IC Engine

Lecture 53 - Fuel of IC Engines

Lecture 54 - Alternative Fuels and Self Ignition Characteristics of Fuel: Octane Numner, Cetane Number

Lecture 55 - Thermodynamic Analysis of SI Engine

Lecture 56 - Thermodynamic Analysis of CI Engine

Lecture 57 - Numerical Problems on Engine Performance

Lecture 58 - Pressure-Crank angle diagram, Engine Efficiencies

Lecture 59 - Numerical Problems on SI and CI Engines

Lecture 60 - Vapour Compression Refrigeration Cycle and its analysis

Lecture 61 - Problems on Vapour Compression Refrigeration Cycle

Lecture 62 - Gas Turbine Units and Thermodynamic Cycles

Lecture 63 - Gas Compressor and Optimum Pressure Ratio

Lecture 64 - Compressor Efficiency and Multistage Compression with Intercooling

Lecture 65 - Gas Turbine Unit: Combined Cycle

Lecture 66 - Problems On Gas Turbine Cycle

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Mechanics of Sheet Metal Forming (Mechanical Engineering)

Co-ordinators : Prof. R Ganesh Narayanan

Lecture 1 - Introduction to sheet forming and tensile test of sheets

Lecture 2 - Tensile test, effect of properties, exercise problem

Lecture 3 - Sheet deformation processes

Lecture 4 - Sheet deformation processes (Continued...)

Lecture 5 - Sheet deformation processes (Continued...)

Lecture 6 - Sheet deformation in plane stress

Lecture 7 - Sheet deformation in plane stress (Continued...)

NPTEL : NOC:Heat Treatment and Surface Hardening - II (Mechanical Engineering)

Co-ordinators : Dr. Kallol Mondal

Lecture 1 - Recap - I

Lecture 2 - Recap - II

Lecture 3 - Recap - III

Lecture 4 - Determination of Phase Diagram (Experimentally) - I

Lecture 5 - Determination of Phase Diagram (Experimentally) - II

Lecture 6 - Determination of Phase Diagram (Thermodynamically)

Lecture 7 - Effect of pressure on phase transformation temperature and concept of equilibrium between condensed and vapor phase

Lecture 8 - Effect of different parameters on heat treatment and concept of saturation vapor pressure with examples

Lecture 9 - Title: Formation of ideal solid or liquid solution and (G-X) diagrams for ideal solutions (Part-I)

Lecture 10 - G-X diagrams (Part- II) and concept of chemical potential (Micro Sign) from G-X diagrams.

Lecture 11 - Concept of common tangent for equilibrium between two phases

Lecture 12 - Expressions for equilibrium of two phases - I

Lecture 13 - Expressions for equilibrium of two phases - II

Lecture 14 - Expressions for equilibrium of two phases - III

Lecture 15 - Determining nucleation of phases using G-X plot

Lecture 16 - Î”G for nucleation and overall transformation, concepts of solid state transformation including precipitation and Quasi-Chemical Model (QCM)

Lecture 17 - Introduction to real solutions and expression of Î”Hmix based on the Quasi-Chemical Model (QCM)

Lecture 18 - Expression for Î”Hmix as a function of interaction energy and mole fraction, based on the QCM - Part I

Lecture 19 - Expression for Î”Hmix as a function of interaction energy and mole fraction, based on the QCM - Part II

Lecture 20 - Graphical representation of Î”Gmix, Î”Hmix, and -TÎ”Smix for real solutions and evolution of eutectic phase diagram from the G-X plots

Lecture 21 - Effect of Î”Hmix on determination of phase diagrams (same crystal structure)

Lecture 22 - Effect of Î”Hmix on determination of phase diagrams (Continued...)

Lecture 23 - Importance of phase diagrams

Lecture 24 - Effect of heat treatment on microstructure evolution in steel - I

Lecture 25 - Effect of heat treatment on microstructure evolution in steel - II

Lecture 26 - Recap of homogeneous and heterogeneous nucleation for solid to solid transformation

Lecture 27 - Nucleation rate and its dependence on T (temp. of interest), Î”T, Î”G v and Î”G* and, introduction to growth kinetics

Lecture 28 - Growth kinetics (Continued...)

Lecture 29 - Growth rate variation with undercooling and kinetics of overall phase transformation

Lecture 30 - Implication of Avramiâ€™s equation with example on excel spreadsheet

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Experimental verification of Avrami Equation

Lecture 32 - Linear regression (least squares) method to find the value of n and k in Avrami equation

Lecture 33 - In this lecture, method to determine the goodness of fit has been explained. Procedure to estimate the values of n and k from experimental data have also been discussed.

Lecture 34 - Stereology and quantitative metallography - I

Lecture 35 - Stereology and quantitative metallography - II

Lecture 36 - Grain size measurements methods

Lecture 37 - Statistical tools for analysis and reporting of obtained data with examples

Lecture 38 - Evolution of TTT and CCT diagram from f vs. t plots

Lecture 39 - TTT, CCT continue and hardenability of steel

Lecture 40 - Importance of heat treatment practices in real life (with examples)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 40 - Laboratory demonstration; 3D printing - Part 2

Lecture 41 - Laboratory demonstration; 3D printing - Part 3

Lecture 42 - Plant Layout Planning - Part 1

Lecture 43 - Plant Layout Planning - Part 2

Lecture 44 - Laboratory demonstration; Plant Simulation - Part 1

Lecture 45 - Laboratory demonstration; Plant Simulation - Part 2

Lecture 46 - Laboratory demonstration; Plant Simulation - Part 3

Lecture 47 - Computer Integrated Manufacturing - Part 1

Lecture 48 - Computer Integrated Manufacturing - Part 2

Lecture 49 - Reverse Engineering

Lecture 50 - Managing Competitiveness

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Phase Equilibria in Materials - Nature and Properties of Materials-II (Mechanical Engineering)

Co-ordinators : Dr. Ashish Garg

Lecture 1 - Basic Thermodynamics: System, phase and components

Lecture 2 - Basic Thermodynamics: Gibbs Free Energy

Lecture 3 - Phase Stability in Materials

Lecture 4 - Effects of Temperature and Pressure on Single Components System

Lecture 5 - Clausisus-Clapeyron Equation and Binary Solution

Lecture 6 - Calculation of Configurational Entropy

Lecture 7 - Chemical Potential

Lecture 8 - Phase Stability in Binary Solution

Lecture 9 - Activity and Thermodynamics of Regular Solution

Lecture 10 - Thermodynamic of Real Solution

Lecture 11 - Free Energy Curves and Various Systems

Lecture 12 - Solubility Limits 2-phase Co-existence

Lecture 13 - Phase Diagram Formation: Binary Solution

Lecture 14 - Phase Diagram Construction: Partial Soluble Phases

Lecture 15 - Phase Diagram Construction: Eutectic Phase

Lecture 16 - Intermetallics and Phase Diagrams

Lecture 17 - Phase Rule

Lecture 18 - Gibb's Phase Rule: Unary and Binary System

Lecture 19 - Gibb's Phase Rule: Eutectic Point and Lever Rule

Lecture 20 - Phase Fraction Calculation in a Phase Diagram

Lecture 21 - Microstructure evolution in Cu-Ni binary system

Lecture 22 - Microstructure evolution (Continued...)

Lecture 23 - Phase evolution in hypoeutectic region

Lecture 24 - Phase evolution at Eutectic point

Lecture 25 - Phase Diagrams of Cu-Ni and Al-Si

Lecture 26 - Phase Diagrams of Pb-Sn and Fe-C

Lecture 27 - Phase Diagram of Fe-C (Continued...)

Lecture 28 - Fe-C Phase Diagram (Continued...)

Lecture 29 - Fe-C Phase Diagram (Continued...)

Lecture 30 - Phase Diagrams for non-Ferrous Alloys

Lecture 31 - Method of measuring Phase diagram

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Methods of measuring phase diagram (Continued...)

Lecture 33 - Methods of measuring phase diagram: PbMg2

Lecture 34 - Ternary Phase Diagram

Lecture 35 - Ternay Phase Diagram (Continued...)

Lecture 36 - Ternary system with two phases

Lecture 37 - Ternary system with three phases

Lecture 38 - Ternary phase diagram with 4 phases

Lecture 39 - Application of Phases diagrams

Lecture 40 - Summary of Course

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Advanced Composites (Mechanical Engineering)

Co-ordinators : Prof. Nachiketa Tiwari

Lecture 1 - Basics of composite materials

Lecture 2 - Different type of Fibers

Lecture 3 - Properties of single layer continuous fiber composites

Lecture 4 - Properties of single layer continuous fiber composites

Lecture 5 - Strength of single layer continuous fiber composites

Lecture 6 - Strength of single layer continuous fiber composites

Lecture 7 - Concept of Tensor

Lecture 8 - General Anisotropic Material

Lecture 9 - Specially Orthotropic Material

Lecture 10 - Specially Orthotropic Material Under Plane Stress

Lecture 11 - Stress and Strain Transformation

Lecture 12 - Transformation of Stiffness and Compliance Matrices

Lecture 13 - Strain - Displacement relations

Lecture 14 - Relations for stress and strain along thickness of laminate

Lecture 15 - Stress - Strain variation along Laminate thickness

Lecture 16 - Force and Moment resultant - Part 1

Lecture 17 - Force and Moment resultant - Part 2

Lecture 18 - Important observation related to [A], [B] and [D] matrices

Lecture 19 - Quasi-Isotropic Laminates

Lecture 20 - Maximum Stress Theory

Lecture 21 - Maximum Strain Theory

Lecture 22 - Importance of Sign of Shear Stress.

Lecture 23 - Failure Initiation in Composite Laminate.

Lecture 24 - Progressive Failure of Laminae in A Laminate

Lecture 25 - Governing equations for composite plates

Lecture 26 - Force equilibrium in Z-direction

Lecture 27 - Moment equilibrium equations

Lecture 28 - Equilibrium equations for composite plates

Lecture 29 - Boundary conditions associated with different edges of composite plate - Part 1

Lecture 30 - Boundary conditions associated with different edges of composite plate - Part 2

Lecture 31 - Generalized Solution for Semi-Infinite Plate - Part I

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Generalized Solution for Semi-Infinite Plate - Part II

Lecture 33 - Particular Solution for Semi-Infinite Plate: Case A

Lecture 33 - Concentric Tube Resonator: Partially Perforated Pipe or Airway (MATLAB)

Lecture 34 - Review of Perforate Impedance Expressions

Lecture 35 - MATLAB Demonstration for Fully and Partially Perforated CTR

Lecture 36 - Cross-Flow elements: Setting-up the Equations

Lecture 37 - Cross-Flow elements: MATLAB Demonstration for Simple Configurations

Lecture 38 - Plug Mufflers, Three-pass Perforated Element Muffler (Commercial Configurations) - MATLAB

Lecture 39 - Multiply-Connected Mufflers: HQ Tubes

Lecture 40 - TL Analysis of HQ Tubes (MATLAB): Network Analysis and Analytical Formula

Lecture 41 - Transmission Loss in terms of Scattering and Impedance Matrix Parameters

Lecture 42 - Rectangular Chamber Muffler: Characterization and TL Analysis using 3-D Piston-driven Model

Lecture 43 - Circular Chambers: Characterization and TL Analysis Using 3-D Piston-driven Model

Lecture 44 - Analytical Mode-Matching for Extended-Inlet and Outlet Muffler: Setting-up of the Equations

Lecture 45 - MATLAB Demonstration for Transmission Loss Calculations

Lecture 46 - Dissipative Mufflers (Lined Circular duct) - A Brief Discussion

Lecture 47 - Summary of the Topics Covered in This Course, Topics to be Covered in a Future Course

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Manufacturing Processes - Casting and Joining (Mechanical Engineering)

Co-ordinators : Prof. Sounak Kumar Choudhury

Lecture 1 - Casting: Introduction to Casting

Lecture 2 - Various aspects of Casting

Lecture 3 - Patterns and Moulds

Lecture 4 - Sand Mould and Gating System

Lecture 5 - Gating System Design

Lecture 6 - Aspiration Effects and Riser Design

Lecture 7 - Solidification of Metals and Alloys

Lecture 8 - Stress, Strain and Strain Rate and Shear Plane Angle

Lecture 9 - Steps in Sand Casting Processes

Lecture 10 - Expendable Mould Casting Processes

Lecture 11 - Permanent Mould Casting

Lecture 12 - Various Casting Processes and Cost Analysis

Lecture 13 - Cost analysis, Casting Defects and Product Design

Lecture 14 - Introduction to Joining Processes

Lecture 15 - Characteristic Features of Welding Processes

Lecture 16 - Various Welding Processes

Lecture 17 - Advanced Welding Processes

Lecture 18 - Characteristic Features of Arc Welding

Lecture 19 - Shielded metal arc welding, MIG and TIG Welding

Lecture 20 - Gas Welding, Brazing and Soldering, Welding Defects

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Computational Fluid Dynamics and Heat Transfer (Mechanical Engineering)

Co-ordinators : Prof. Gautam Biswas

Lecture 1 - Historical Perspectives and Introduction to the Course

Lecture 2 - Finite Difference Method - Basic Idea of Discretization

Lecture 3 - Explicit and Implicit Formulations, Stability Analysis - Part 1

Lecture 4 - Stability Analysis - Part 2

Lecture 5 - Important Aspects of Flow Modelling - Part 1

Lecture 6 - Important Aspects of Flow Modelling - Part 2

Lecture 7 - Important Aspects of Flow Modelling - Part 3

Lecture 8 - Applications of Our Knowledge to a Problem of Practical Interest and Setting up an Algorithm

Lecture 9 - Finite Volume Method - Part 1

Lecture 10 - Finite Volume Method - Part 2

Lecture 11 - Finite Volume Method - Part 3

Lecture 12 - Introduction to Finite Element Method (Preliminary Concepts)

Lecture 13 - Introduction to Finite Elelment Method (Galerkin Weighted Residual Method)

Lecture 14 - Introduction to Finite element Method (Elemental contributions and formation of Global Matrix)

Lecture 15 - Vorticity Stream Function Approach (Formulation and Algorithm)

Lecture 16 - Vorticity-Stream Function Approach For Solving Navier-Stokes Equations

Lecture 17 - Solving Navier-Stokes Equations For Incompressible Flows using SIMPLE Algorithm - Part 1

Lecture 18 - Solving Navier-Stokes Equations For Incompressible Flows using SIMPLE Algorithm - Part 2

Lecture 19 - Solving Navier-Stokes Equations For Incompressible Flows using MAC Algorithm - Part 2

Lecture 20 - MAC Algorithm (Pressure - Velocity Iteration and the Solution)

Lecture 21 - MAC Algorithm (Solution of Energy Equation)

Lecture 22 - A Finite Volume Method to solve NS Equations in 3D Complex Geometry - Part 1

Lecture 23 - A Finite Volume Method to solve NS Equations in 3D Complex Geometry - Part 2

Lecture 24 - A Finite Volume Method to solve NS Equations in 3D Complex Geometry - Part 3

Lecture 25 - Mathematical Approaches to Turbulent Flows (Preliminaries and Modeling Framework)

Lecture 26 - Mathematical Approaches to Turbulent Flows (Modeling on the basis of RANS)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Computational Fluid Dynamics (Prof. S. Chakraborty) (Mechanical Engineering)

Co-ordinators : Prof. S. Chakraborty

Lecture 1 - Introduction to Computational Fluid Dynamics and Principles of Conservation

Lecture 2 - Conservation of Mass and Momentum: Continuity and Navier Stokes Equation

Lecture 3 - Navier Stokes Equation (Continued.)

Lecture 4 - Energy Equation and General Structure of Conservation Equations

Lecture 5 - Classification of Partial Differential Equations and Physical Behaviour

Lecture 6 - Classification of Partial Differential Equations and Physical Behaviour (Continued.)

Lecture 7 - Approximate Solutions of Differential Equations: Error Minimization Principles

Lecture 8 - Approximate Solutions of Differential Equations: Variational Principles and Weighted Residual Approach

Lecture 9 - Weighted Residual Approach and Introduction to Discretization

Lecture 10 - Fundamentals of Discretization: Finite Element Method

Lecture 11 - Fundamentals of Discretization: Finite Difference and Finite Volume Method

Lecture 12 - Fundamentals of Discretization: Finite Volume Method (Continued.)

Lecture 13 - Finite Volume Method: Some Conceptual Basics and Illustrations through 1-D Steady State Diffusion Problems

Lecture 14 - Finite Volume Method: Boundary Condition Implementation and Discretization of Unsteady State Problems

Lecture 15 - Finite Volume Method: Discretization of Unsteady State Problems

Lecture 16 - Important Consequences of Discretization of Unsteady State Problems

Lecture 17 - Important Consequences of Discretization of Time Dependent Diffusion Type Problems (Continued.) and Stability Analysis

Lecture 18 - Discretization of Hyperbolic Equations: Stability Analysis

Lecture 19 - PART 1 : Stability of Second Order Hyperbolic Equations PART 2 : Mid-Semester Assessment Review (Questions and Answers)

Lecture 20 - PART 1: Mid-Semester Assessment Review (Questions and Answers) (Continued.) PART 2: Finite Volume Discretization of 2-D Unsteady State Diffusion Type

Lecture 21 - Solution of Systems of Linear Algebraic Equations

Lecture 22 - Solution of Systems of Linear Algebraic Equations: Elimination Methods

Lecture 23 - Solution of Systems of Linear Algebraic Equations: Elimination Methods (Continued.)

Lecture 24 - Elimination Methods: Error Analysis

Lecture 25 - Iterative Methods for Numerical Solution of Systems of Linear Algebraic Equations

Lecture 26 - Iterative Methods for Numerical Solution of Systems of Linear Algebraic Equations (Continued.)

Lecture 27 - Iterative Methods: Further Examples

Lecture 28 - PART 1: Combination of Iteration & Elimination Techniques PART 2: Introduction to Gradient Search Methods

Lecture 29 - Gradient Search Methods (Continued.)

Lecture 30 - Discretization of Convection-Diffusion Equations: A Finite Volume Approach

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Discretization of Convection-Diffusion Equations: A Finite Volume Approach (Continued.)

Lecture 32 - Discretization of Convection- Diffusion Equations: A Finite Volume Approach (Continued.)

Lecture 33 - Discretization of Convection -Diffusion Equations: A Finite Volume Approach (Continued.)

Lecture 34 - Discretization of Convection-Diffusion Equations: A Finite Volume Approach (Continued.)

Lecture 35 - Discretization of Navier Stokes Equations

Lecture 36 - Discretization of Navier Stokes Equations (Continued.)

Lecture 37 - Discretization of Navier Stokes Equations (Continued.)

Lecture 38 - PART 1 : Discretization of Navier Stokes Equations (Continued.) PART 2 : Fundamentals of Unstructured Grid Formulation

Lecture 39 - Unstructured Grid Formulation (Continued.)

Lecture 40 - What is there in implementing a CFD Code

Lecture 41 - Introduction to Turbulence Modeling

Lecture 42 - Introduction to Turbulence Modeling (Continued.)

Lecture 43 - End Semester Questions Review

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Fundamentals of Industrial Oil Hydraulics and Pneumatics (Mechanical Engineering)

Co-ordinators : Prof. R.N. Maiti

Lecture 1 - What is Hydraulic and Pneumatic System

Lecture 2 - Basic Components, Symbols and Circuits

Lecture 3 - Incompressible Fluids - Some Fundamental Properties

Lecture 4 - Incompressible Fluid Flow related to Fluid Drive

Lecture 5 - Capillary Fluid (incompressible) Flow and Hydrodynamic Lubrication

Lecture 6 - Basis for Calculating Hydraulic Systems

Lecture 7 - Different types of Valves - Features and Operations - I

Lecture 8 - Hydraulic Valves (General) Different types of Valves - Features and Operations - II

Lecture 9 - Hydraulic Circuits and Valves

Lecture 10 - Hydraulic Servomechanism and Servo and Proportional Control Valves

Lecture 11 - Basic Spool Valve Design Analysis

Lecture 12 - General Control Valve Analysis

Lecture 13 - Critical Centre Spool Valve Analysis

Lecture 14 - Critical Centre Spool Valve Analysis - Stroking Forces

Lecture 15 - Proportional Solenoid Pilot Operated Two Stage Pressure Relief Valve

Lecture 16 - Proportional Solenoid Pilot Operated Two Stage Pressure Relief Valve (Continued...)

Lecture 17 - Introduction to Positive Displacement Hydrostatic Units (Hydraulic Pumps and Motors)

Lecture 18 - Basic features of some Hydraulic Pumps and Motors

Lecture 19 - Analysis of an axial - Piston Swash Plate type Hydrostatic Pump (Discharge Flow Characteristics)

Lecture 20 - Analysis of an axial - Piston Swash Plate type Hydrostatic Pump (Estimation of Torque on Drive Shaft and Swash Plate)

Lecture 21 - Analysis of an Axial - Piston Swash Plate type Hydrostatic unit (Pressure Ripple and Swash Plate Torque)

Lecture 22 - Design Analysis of Gear Pumps - I

Lecture 23 - Design Analysis of Gear Pumps - II

Lecture 24 - Basic Concept of Hydrostatic Transmission (HST) System

Lecture 25 - Selection of HST units and components

Lecture 26 - Regenerative Circuits

Lecture 27 - Introduction to Fluid Logic

Lecture 28 - Basic Devices, Symbols and Circuits

Lecture 29 - Logic Circuits

Lecture 30 - Design Analysis of ORBIT Motor - I : Basic Design and Feature

Lecture 31 - Design Analysis of ORBIT Motor - II : Geometric Volume Displacement

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Design Analysis of ORBIT Motor - III : Output torque and stress, Deformation, Gap at Contacts

Lecture 33 - Application and Selection of Accumulators - Part I

Lecture 34 - Application and Selection of Accumulators - Part II

Lecture 35 - Hydraulic Circuits in Industrial Applications

Lecture 36 - Air preparation - Compressor and Accessories

Lecture 37 - Pneumatic Circuits

Lecture 38 - Analysis of Three - Way (Spool and Flapper Nozzle Valve)

Lecture 39 - Analysis of Flapper Nozzle Valves

Lecture 40 - Flow Force Compensation and Spool Design (Electro - hydraulic valves)

Lecture 41 - Premier and Guide to Oil - hydraulic fluids ; and Introduction to Fluid Power Symbols

Lecture 42 - Symbols in Oil Hydraulics

Lecture 43 - Appendices Tutorial on Basic Calculation on HST System and Hydraulic Fluids

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Machinery fault diagnosis and signal processing (Mechanical Engineering)

Co-ordinators : Prof. A.R. Mohanty

Lecture 1 - Introduction

Lecture 2 - Principles of Maintenance

Lecture 3 - Failure Modes Effects and Criticality Analysis

Lecture 4 - Fault Diagnostics and Prognostics

Lecture 5 - Basics of Machinery Vibration

Lecture 6 - Engineering Applications of Vibration

Lecture 7 - Rotordynamics

Lecture 8 - Time Domain Signal Analysis

Lecture 9 - Frequency Domain Signal Analysis

Lecture 10 - Computer Aided Data Acquisition

Lecture 11 - FFT Analysis

Lecture 12 - Modulation and Sidebands

Lecture 13 - Envelope Analysis

Lecture 14 - Cepstrum Analysis

Lecture 15 - Order Analysis

Lecture 16 - Basics of Instrumentation

Lecture 17 - Sensors and Transducers

Lecture 18 - Data Recording and Transmission

Lecture 19 - Vibration Transducers

Lecture 20 - Vibration Monitoring

Lecture 21 - Basics of Noise and Noise Monitoring

Lecture 22 - Numericals in Noise Vibration and Data Acquisition

Lecture 23 - Unbalance Detection

Lecture 24 - Field Balancing

Lecture 25 - Misalignment Detection

Lecture 26 - Cracked Shaft Detection

Lecture 27 - Looseness and Rub Detection

Lecture 28 - Ball and Journal Bearings

Lecture 29 - Gear Fault Detection

Lecture 30 - Fans, Blowers and Compressors

Lecture 31 - Pumps and Turbines

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Contaminant Analysis

Lecture 33 - Oil Analysis

Lecture 34 - Fault Detection in Motors and Transformers

Lecture 35 - Motor Current Signature Analysis

Lecture 36 - Thermography

Lecture 37 - Ultrasonics

Lecture 38 - Acoustic Emission and Eddy Current Testing

Lecture 39 - Radiography,Dye Penetrant Test and Visual Inspection

Lecture 40 - Case Studies

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Solar Energy Technology (Mechanical Engineering)

Co-ordinators : Prof. V.V. Satyamurty

Lecture 1 - Energy and Dependence on External Sources and Sun, Physical Descriptions and Reactions

Lecture 2 - Sun - Earth Geometry

Lecture 3 - Terminology Extra - Terrestrial Radiation Terrestria Radiation

Lecture 4 - Measuring Instruments

Lecture 5 - Estimation of Solar Radiation or Details

Lecture 6 - Radiation Processing - Long Term

Lecture 7 - Evaluation of the Apparent Sunrise and Sunset Angles

Lecture 8 - Estimation of Daily/Monthly Average daily Tilt Factor Under Terrestrial Conditions

Lecture 9 - Solar Colector Basics

Lecture 10 - Transmission - Absorptance Product

Lecture 11 - Daily (Or Monthly Average Daily) Transmittance - Absorptance Product Analytical Evaluation

Lecture 12 - Theory of Flat Plate Collectors - Liquid Based (A)

Lecture 13 - Theory of Flat Plate Collectors - Liquid Based (B)

Lecture 14 - Theory of Flat Plate Collectors - Liquid Based (C)

Lecture 15 - Mean temperature and Heat Capacity Effects

Lecture 16 - Theory of Air Based Solar Flat Plate Collectors

Lecture 17 - Theory of Air Based Solar Flat Plate Collectors (Continued.)

Lecture 18 - Other Collector Geometries

Lecture 19 - Concentrating Collectors

Lecture 20 - Concentrating Collectors (Continued.)

Lecture 21 - Concentrating Collectors (Continued.)

Lecture 22 - Compound Parabolic Collectors

Lecture 23 - Exercise - I

Lecture 24 - Exercise - I (Continued.)

Lecture 25 - Device and System Performance

Lecture 26 - Long Term Solar Energy System Performance

Lecture 27 - Exercise - I (Continued.)

Lecture 28 - Long Term Solar Energy System Performance Simplified Design Methods

Lecture 29 - Long Term Solar Energy System Performance Simplified Design Methods (Continued.)

Lecture 30 - Monthly Average Daily Utilizability

Lecture 31 - The phi(bar) - f chart method (Continued.)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - The phi(bar) - f chart method Tank Losses and Finite Heat Exchanger

Lecture 33 - Exercise - 2

Lecture 34 - Exercise - 2 (Continued.)

Lecture 35 - Exercise - 2 (Continued.)

Lecture 36 - Economic Analysis

Lecture 37 - Life Cycle Savings : The P1 and P2 Method

Lecture 38 - Passive Devices

Lecture 39 - Passive Architecture, Overhangs and Wing Walls

Lecture 40 - Passive Architecture, Overhangs and Wing Walls (Continued.)

Lecture 41 - Summary

Lecture 42 - Summary (Continued.)

Lecture 43 - Summary (Continued.)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Technology of Surface Coating (Mechanical Engineering)

Co-ordinators : Prof. A.K. Chattopadhyay

Lecture 1 - Introduction

Lecture 2 - CVD Reaction

Lecture 3 - Adhesion of Surface Coating

Lecture 4 - CVD System

Lecture 5 - CDV of Tic

Lecture 6 - Chemical Vapour Deposition of Nitride Coating

Lecture 7 - Chemical Vapour Deposition of Carbo-Nitride Coating

Lecture 8 - Chemical Vapour Deposition of Cromium

Lecture 9 - Chemical Vapour Deposition of Aluminium Oxide

Lecture 10 - Chemical Vapour Deposition of Diamond

Lecture 11 - Vacuum Evaporation Deposition

Lecture 12 - Reactive Evaporation Deposition

Lecture 13 - Cathodic Arc Evaporation Deposition

Lecture 14 - Sputtering

Lecture 15 - Magnetron Sputtering

Lecture 16 - Unbalanced Magnetron Sputtering

Lecture 17 - Radio frequency and pulsed DC sputtering

Lecture 18 - Sputter Deposition of Nitride Coating

Lecture 19 - Sputter Deposition of Molybdenum Di Sulphide Coating

Lecture 20 - Influence of Architecture of Sputter Deposited Molybdenum Di Sulphide Coating

Lecture 21 - Electro Plating,Anodizing and Electro-Less Plating

Lecture 22 - Coating of Monolayer Abrasive Grain by Electro Plating

Lecture 23 - Mechansim of Wetting

Lecture 24 - Coating on Ceramics by Wetting

Lecture 25 - Coating of Monolayer Abrasive Grain by Wetting

Lecture 26 - Coating on Abrasive Grain

Lecture 27 - Combustion Spray Process

Lecture 28 - Plasma Spray Process

Lecture 29 - Mechanical, Chemical and Ion-Assisted Method

Lecture 30 - Combustion Spray Process

Lecture 31 - Production of Low Vacuum

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Production of High Vacuum

Lecture 33 - Measurement of Low Pressure and Gas Flow in Coating Deposition System

Lecture 34 - Physical Characterization

Lecture 35 - Assessment of Coating Hardness

Lecture 36 - Assessment of Friction and Wear of Coating

Lecture 37 - Assessment of Surface Roughness and Thickness of Coating

Lecture 38 - Assessment of Adhesion of Coating

Lecture 39 - Performance Evaluation of TiN Coated Tool

Lecture 40 - Performance Evaluation of HFCVD Diamond Coated Tool

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Vibration of Structures (Mechanical Engineering)

Co-ordinators : Prof. A. Dasgupta

Lecture 1 - Transverse Vibrations of Strings - I

Lecture 2 - Transverse Vibrations of Strings - II

Lecture 3 - Axial and Torsional Vibrations of Bars

Lecture 4 - Variational Formulation - I

Lecture 5 - Variational Formulation - II

Lecture 6 - Modal Analysis - I

Lecture 7 - Modal Analysis - II

Lecture 8 - Properties of the Eigenvalue Problem

Lecture 9 - Modal Analysis: Approximate Methods - I

Lecture 10 - Modal Analysis: Approximate Methods - II

Lecture 11 - The Initial Value Problem

Lecture 12 - Forced Vibration Analysis - I

Lecture 13 - Forced Vibration Analysis - II

Lecture 14 - Forced Vibration Analysis - III

Lecture 15 - Damping in Structures

Lecture 16 - Axially Translating Strings

Lecture 17 - d' Alembert's Solution - I

Lecture 18 - d' Alembert's Solution - II

Lecture 19 - Harmonic Waves and Energetics of Wave Motion

Lecture 20 - Scattering of Waves

Lecture 21 - Applications of Wave Solution - I

Lecture 22 - Applications of Wave Solution - II

Lecture 23 - Beam Models - I

Lecture 24 - Beam Models - II

Lecture 25 - Modal Analysis of Beams

Lecture 26 - Applications of Modal Solution

Lecture 27 - Approximate Methods

Lecture 28 - Topic in Beam Vibration - I

Lecture 29 - Topic in Beam Vibration - II

Lecture 30 - Wave Propagation in Beams

Lecture 31 - Dynamics of Curved Beams

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Gear and Gear Unit Design - Theory and Practice (Mechanical Engineering)

Co-ordinators : Prof. Rathindranath Maiti

Lecture 1 - Introduction - Motivation and Theme of the Course

Lecture 2 - Laws of Gearing, Kinematics and Geometry - Part I

Lecture 3 - Laws of Gearing, Kinematics and Geometry - Part II

Lecture 4 - Involute Toothed Gear- Properties and Terminology

Lecture 5 - Tutorial

Lecture 6 - Involute Straight Tooth Spur Gear

Lecture 7 - Helical Tooth Spur Gear and Loads on Gear Shaft

Lecture 8 - Design of Bevel Gear

Lecture 9 - Crossed Helical Gear - I

Lecture 10 - Crossed Helical Gear - II and Worm Gear

Lecture 11 - Gear Unit Design - Selection of Stage Ratios, Pinion and Gear Teeth Numbers

Lecture 12 - Gear Unit Design - First Stage Pinion and Gear Design- I (Module on Beam Strength Basis)

Lecture 13 - Gear Unit Design - Failure of Gear Tooth (Probable Dynamic Load and Wear Load Capacity)

Lecture 14 - Gear Unit Design - 1st. Stage Pinion and Gear Design-II (Probable Dynamic Load and Wear Load Capacity and Finalizing 1st. Stage Pinion and Gear set)

Lecture 15 - Gear Unit Design - 1st. Layout (After Gear Design)

Lecture 16 - Bearing Arrangement - Gear Box Shafts

Lecture 17 - Bearing Load Calculation - Intermediate Shaft

Lecture 18 - Bearing Selection and Introduction to Shaft Design Verification

Lecture 19 - Design Verification of Gear Box Shafts

Lecture 20 - Development (Layout) of Intermediate Shaft

Lecture 21 - Development (Layout) of Input Shaft and Integral Pinion

Lecture 22 - Development (Layout) of Output Shaft and 2nd. Stage (Output) Gear

Lecture 23 - Development (Layout) of Output Shaft (Continued...), Loads on Shaft and Bearings

Lecture 24 - Output Shaft-Bearing Lives

Lecture 25 - Design Verification of Output Shaft

Lecture 26 - Design Verification of Input Shaft (including Bearing Life Estimation)

Lecture 27 - Finalizing Design including the Sizes of the Keys

Lecture 28 - Development of Plan and Elevation of Gear Reduction Unit - I

Lecture 29 - Development of Plan and Elevation of Gear Reduction Unit - II

Lecture 30 - Development of Plan and Elevation of Gear Reduction Unit - III

NPTEL : NOC:Heat Exchangers: Fundamentals and Design Analysis (Mechanical Engineering)

Co-ordinators : Prof. Prasanta Kr Das, Prof. Somnath Roy

Lecture 1 - Introduction

Lecture 2 - Applications of Heat Exchangers

Lecture 3 - Classification of Heat Exchangers

Lecture 4 - Classification of Heat Exchangers (Continued...)

Lecture 5 - Design and Simulation of Heat Exchangers

Lecture 6 - Design and Simulation

Lecture 7 - Design and Simulation of Heat Exchangers - Numerical Problem

Lecture 8 - Design and Simulation of Heat Exchangers - Numerical Problem (Continued...)

Lecture 9 - Design and Simulation of Heat Exchangers - Numerical Problem (Continued...)

Lecture 10 - Tubular Heat Exchanger Types

Lecture 11 - Tubular Heat Exchanger Types : Heat Transfer Co-efficient

Lecture 12 - Tubular Heat Exchanger : Double Pipe

Lecture 13 - Tubular Heat Exchanger : Shell - and - Tube

Lecture 14 - Tubular Heat Exchanger : Shell - and - Tube Design

Lecture 15 - Tubular Heat Exchanger : Shell - and - Tube Design (Continued...)

Lecture 16 - Enhancement of Heat Transfer compact Heat Exchangers

Lecture 17 - Extended Surface Heat Transfer

Lecture 18 - Extended Surface Heat Transfer: Some Example

Lecture 19 - Extended Surface Heat Exchangers: Some Example

Lecture 20 - Analysis of fin plates of finned tube heat exchanger

Lecture 21 - Finned tube heat exchanger

Lecture 22 - Finned tube heat exchanger (Continued...)

Lecture 23 - Finned tube heat exchanger (Continued...)

Lecture 24 - Plate fin heat exchanger

Lecture 25 - Plate fin heat exchanger (Continued...)

Lecture 26 - Plate fin heat exchanger (Continued...)

Lecture 27 - Plate fin heat exchanger : Analysis

Lecture 28 - Plate fin heat exchanger : Pressure drop

Lecture 29 - Plate fin heat exchanger : Numerical

Lecture 30 - Plate fin heat exchanger : Numerical (Continued...)

Lecture 31 - Plate fin heat exchanger : Numerical (Continued...)

Lecture 32 - Plate fin heat exchanger : Multistream

Lecture 33 - Plate fin heat exchanger : Multistream (Continued...)

Lecture 34 - Plate fin heat exchanger : Multistream Analysis

Lecture 35 - Plate fin heat exchanger : Layer Stacking

Lecture 36 - Phase change heat exchangers

Lecture 37 - Phase change heat exchangers (Continued...)

Lecture 38 - Surface Condenser

Lecture 39 - Surface Condenser (Continued...)

Lecture 40 - Surface Condenser (Continued...)

Lecture 41 - Surface Condenser (Continued...)

Lecture 42 - In tube condensation

Lecture 43 - Heat pipes and Heat pipe heat exchangers

Lecture 44 - Heat pipes and Heat pipe heat exchangers (Continued...)

Lecture 45 - Heat pipes and Heat exchangers

Lecture 46 - Heat pipes and Heat exchangers (Continued...)

Lecture 47 - Micro Heat Exchanger Introduction

Lecture 48 - Micro scale Heat Transfer

Lecture 49 - Micro scale Heat Transfer (Continued...)

Lecture 50 - Micro Channel

Lecture 51 - Micro Heat Exchanger

Lecture 52 - Regenerators

Lecture 53 - Fixed Bed Regenerator Analysis

Lecture 54 - Design and Simulation of Regenerator (Fixed Bed)

Lecture 55 - Fixed Bed Regenerator (Numerical)

Lecture 56 - Fixed Bed Regenerator (Numerical) (Continued...)

Lecture 57 - Fouling in Heat Exchangers

Lecture 58 - Fouling in Heat Exchangers (Continued...)

Lecture 59 - Fouling in Heat Exchangers (Continued...)

Lecture 60 - Direct Contact heat exchanger

Lecture 61 - Direct Contact heat exchanger (Continued...)

Lecture 62 - Heat exchanger network synthesis

Lecture 63 - Heat exchanger network

Lecture 64 - Heat exchanger network (Continued...)

Lecture 65 - Heat Exchanger Testing

Lecture 66 - Heat Exchanger Testing (Continued...)

NPTEL : NOC:Robotics (Mechanical Engineering)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Computational Fluid Dynamics (Mechanical Engineering)

Co-ordinators : Prof. S. Chakraborty

Lecture 1 - Intoduction to CFD

Lecture 2 - Classification of partial differential equations

Lecture 3 - Examples of partial differential equations

Lecture 4 - Examples of partial differential equations (Continued...)

Lecture 5 - Nature of the characteristics of partial differential equation

Lecture 6 - Euler-Lagrangian equation

Lecture 7 - Approximate Solutions of Differential Equations

Lecture 8 - Variational formulation

Lecture 9 - Example of variational formulation and introduction to weighted residual method

Lecture 10 - Weighted residual method (Continued...)

Lecture 11 - Point Collocation method, the Galerkin's method and the 'M' form

Lecture 12 - Finite element method (FEM) of discretization

Lecture 13 - Finite element method of discretization (Continued...)

Lecture 14 - Finite difference method (FDM) of discretization

Lecture 15 - Well posed boundary value problem

Lecture 16 - Finite volume method (FVM) of discretization

Lecture 17 - Illustrative examples of finite volume method

Lecture 18 - Illustrative examples of finite volume method (Continued...)

Lecture 19 - Basic rules of finite volume discretization

Lecture 20 - Implementation of boundary conditions in FVM

Lecture 21 - Implementation of boundary conditions in FVM (Continued...)

Lecture 22 - 1-D Unsteady state diffusion problem

Lecture 23 - 1-D Unsteady state diffusion problem (Continued...)

Lecture 24 - Consequences of Discretization of Unsteady State Problems

Lecture 25 - FTCS scheme

Lecture 26 - CTCS scheme (Leap frog scheme) and Dufort-Frankel scheme

Lecture 27 - Part 1: FV Discretization of 2-D Unsteady State Diffusion Type problems; Part 2: Solution to linear algebraic equations

Lecture 28 - Solution to linear algebraic equations (Continued...)

Lecture 29 - Elemination methods

Lecture 30 - Gaussian elemination and LU Decomposition methods

Lecture 31 - Illustrative example of elemination method

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Tri-Diagonal Matrix Algorithm (TDMA)

Lecture 33 - Elimination Methods: Error Analysis

Lecture 34 - Elimination Methods: Error Analysis (Continued...)

Lecture 35 - Iteration methods

Lecture 36 - Generalized analysis of Iteration method

Lecture 37 - Further discussion on Iterative methods

Lecture 38 - Illustrative examples of Iterative methods

Lecture 39 - Gradient Search based methods

Lecture 40 - Steepest descent method (Continued...)

Lecture 41 - Conjugate gradient method

Lecture 42 - Convection diffusion equation

Lecture 43 - Central difference scheme applied to convection-diffusion equation

Lecture 44 - Upwind scheme

Lecture 45 - Illustrative examples

Lecture 46 - Exact solution of 1-D steady state convection diffusion equation (Continued...)

Lecture 47 - Exponential scheme

Lecture 48 - Generalized convection diffusion formulation

Lecture 49 - 2-D convection diffusion problem

Lecture 50 - False (numerical) diffusion scheme and the QUICK scheme

Lecture 51 - Discretization of Navier Stokes equation

Lecture 52 - Discretization of Navier Stokes equation (Continued...)

Lecture 53 - Concept of staggered grid

Lecture 54 - SIMPLE algorithm

Lecture 55 - Salient features of SIMPLE algorithm

Lecture 56 - Illustrative examples on the use of SIMPLE algorithm

Lecture 57 - SIMPLER algorithm

Lecture 58 - Illustrative examples of SIMPLER algorithm

Lecture 59 - What is there in implementing a CFD Code

Lecture 60 - Some representative case studies

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Concepts of Thermodynamics (Mechanical Engineering)

Co-ordinators : Prof. Aditya Bandopadhyay, Prof. Suman Chakraborty

Lecture 1 - Introductory Concepts

Lecture 2 - Properties of Pure Substances

Lecture 3 - Properties of Pure Substances (Continued...)

Lecture 4 - Introduction to Property Tables

Lecture 5 - Properties of Pure Substances: Example problems (Continued...)

Lecture 6 - Properties of Pure Substances: Example problems (Continued...)

Lecture 7 - Use of Computer as Means of Learning Thermodynamics

Lecture 8 - Properties of Pure Substances (Continued...)

Lecture 9 - Properties of Pure Substances Spring - Piston Problem

Lecture 3 - Technical Specifications of an Industrial Robot

Lecture 4 - Classification of Robots

Lecture 5 - Fixed Installation Robots - Serial and Parallel Robots

Lecture 6 - Introduction to Industrial Controllers, Drives and Systems

Lecture 7 - DC Motors/Actuators and Drives

Lecture 8 - Stepper Motors

Lecture 9 - Brushless DC Motors/Actuators

Lecture 10 - AC Servo Motors

Lecture 11 - Introduction to Sensor and Transducers, Position Sensors

Lecture 12 - Position Sensors: Potentiometers, and Hall-effect. Velocity Sensors

Lecture 13 - Acceleration Sensors, AC Sensors (Resolvers and Synchros)

Lecture 14 - Non-contact (Inductive and Capacitive), Force/Torque Sensors

Lecture 15 - Limit Switches, Classification and Characteristics of Sensors

Lecture 16 - Degrees of Freedom and Kinematic Transformations : Translation

Lecture 17 - Pure Rotation, Arbitrary Axis Rotations, Euler Angles

Lecture 18 - Link and Joint Parameters (DH Notations), 2 and 3 DoF Robots

Lecture 19 - 3 DoF Cylindrical Robot (Spatial), SphericalWrist, Cylindrical Robot with Wrist

Lecture 20 - Forward Kinematics of 6-DoF Industrial Robot

Lecture 21 - Inverse Kinematics: 2 and 3 DoF Planar Manipulator

Lecture 22 - Spatial Robots - 3R, Cylindrical (RPP), 4-DoF SCARA Robot

Lecture 23 - Inverse Kinematics of a 6-DoF Industrial Robot

Lecture 24 - Differential Motion Analysis, Velocity, and Robot Jacobian

Lecture 25 - Jacobian (2R), Jacobian Inverse, Singularity, and Acceleration Analysis

Lecture 26 - Installing the Mechanical Arm and Test Run

Lecture 27 - Mastering an Industrial Robot

Lecture 28 - TCP Calibration using 4-Point method and External reference method

Lecture 29 - TCP Orientation Calibration using World Frame and Two-Point method

Lecture 30 - Worksurface Calibration

Lecture 31 - Fixed Tool Calibration: External TCP and Workpiece Calibration

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Base Linear Track and External Turn-Table Calibration

Lecture 33 - Link Forces and Moments

Lecture 34 - Gravity Compensation and External Forces/Torques

Lecture 35 - Kinetostatic Measures for Robot Design

Lecture 36 - Introduction to Dynamics, LE Approach, Dynamics of 1DoF System

Lecture 37 - Equation of Motion (EoM) for a Two-Link Manipulator using LE

Lecture 38 - Newton-Euler (NE) Approach

Lecture 39 - Equation of motion of a Two-Link manipulator using NE Approach

Lecture 40 - Payload and Supplementary Load Calibration

Lecture 41 - Identification Experiments

Lecture 42 - Repeatability Tests and ISO 9283:1998

Lecture 43 - Introduction to Control, Linear Control, Second Order System

Lecture 44 - Response of a Second Order Linear System

Lecture 45 - Transfer Function and State-space representation, ODE

Lecture 46 - A Robot Joint : DC Motor Model

Lecture 47 - Feedback control of a robot arm, PID Control, Gain Tuning

Lecture 48 - Workspace and Operator Safety

Lecture 49 - Industrial Robot Programming

Lecture 50 - Course Conclusion and Suggestions

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Cryogenic Hydrogen Technology (Mechanical Engineering)

Co-ordinators : Prof. Indranil Ghosh

Lecture 1 - Introduction

Lecture 2 - Hydrogen Properties

Lecture 3 - Slush Hydrogen, Ortho-Para H2

Lecture 4 - Ortho-Para H2 Conversion

Lecture 5 - Deuterium Production

Lecture 6 - Hydrogen Production - 1

Lecture 7 - Hydrogen Production - 2

Lecture 8 - Hydrogen Production - 3

Lecture 9 - Hydrogen Production

Lecture 10 - Hydrogen Production

Lecture 11 - Hydrogen Production (Electrolysis)

Lecture 12 - Electrolytic Hydrogen

Lecture 13 - Electrolytic Hydrogen

Lecture 14 - SPE Water Electrolyser

Lecture 15 - Thermochemical Process

Lecture 16 - Hydrogen Storage: Overview

Lecture 17 - Compressed Hydrogen Storage

Lecture 18 - Compressed Hydrogen Storage

Lecture 19 - Overview on Hydrogen Storage

Lecture 20 - Adsorption Storage of Hydrogen

Lecture 21 - Basics of Cryogenic Liquefaction

Lecture 22 - Coefficient of Expansion

Lecture 23 - Cryogenic Liquefaction Cycles

Lecture 24 - Cryogenic Liquefaction (Continued...)

Lecture 25 - Hydrogen Liquefaction

Lecture 26 - Cryogenic Liquefaction (Continued...)

Lecture 27 - Cryogenic Liquefaction - Numerical

Lecture 28 - Cryogenic Liquefaction - Numerical

Lecture 29 - Cryogenic Liquefaction (Continued...)

Lecture 30 - Cryogenic Liquefaction (Continued...)

Lecture 31 - Cryo Hydrogen Storage

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Cryo Hydrogen Storage

Lecture 33 - Cryo Hydrogen Storage

Lecture 34 - Cryogenic Liquid Level Measurement

Lecture 35 - Flow Rate/Fluid Quality Measurement

Lecture 36 - Temperature Measurement

Lecture 37 - Application: Fuel Cell

Lecture 38 - Fuel Cell (Continued...)

Lecture 39 - Cryogenic Rocket Propulsion

Lecture 40 - Hydrogen Safety

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Industrial Hydraulics and Automation (Mechanical Engineering)

Co-ordinators : Prof. Niranjan Kumar, Prof. Ajit Kumar

Lecture 1 - Introduction to power hydraulics

Lecture 2 - Fundamental theory of power hydraulics

Lecture 3 - Fundamental theory of power hydraulics (Continued...)

Lecture 4 - Hydraulic fluids

Lecture 5 - Hydraulic fluids (Continued...)

Lecture 6 - Introduction to hydraulic pumps

Lecture 7 - Introduction to hydraulic pumps (Continued...)

Lecture 8 - Construction, operation and application of hydraulic pumps

Lecture 9 - Construction, operation and application of hydraulic pumps (Continued...)

Lecture 10 - Construction, operation and application of hydraulic pumps (Continued...)

Lecture 11 - Performance characteristics of hydraulic pumps

Lecture 12 - Performance characteristics of hydraulic pumps (Continued...)

Lecture 13 - Performance characteristics of hydraulic pumps (Continued...)

Lecture 14 - Performance characteristics of hydraulic pumps (Continued...)

Lecture 15 - Performance characteristics of hydraulic pumps (Continued...)

Lecture 16 - Introduction to hydraulic actuators

Lecture 17 - Introduction to hydraulic actuators (Continued...)

Lecture 18 - Rotary actuators

Lecture 19 - Rotary actuators (Continued...)

Lecture 20 - Rotary actuators (Continued...)

Lecture 21 - Linear actuators

Lecture 22 - Linear actuators (Continued...)

Lecture 23 - Performance characteristics of hydraulic actuators

Lecture 24 - Performance characteristics of hydraulic actuators (Continued...)

Lecture 25 - Performance characteristics of hydraulic actuators (Continued...)

Lecture 26 - Introduction to hydraulic valves

Lecture 27 - Theory of control valves - I

Lecture 28 - Theory of control valves - I (Continued...)

Lecture 29 - Theory of control valves - II

Lecture 30 - Theory of control valves - III

Lecture 31 - Theory of control valves - IV

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Theory of control valves - IV (Continued...)

Lecture 60 - Digital hydraulics (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:COBOTS: Theory and Practice (Mechanical Engineering)

Co-ordinators : Prof. Arun Dayal Udai

Lecture 1 - COBOTS, Its Need and Evolution, Levels of Collaboration, Applications

Lecture 2 - Collaborative Modes, Contacts, Bio-Mechanical Limits, and ISO Standards

Lecture 3 - The Process of Risk Assessment

Lecture 4 - Evolution of Force Control, Technology Transition, and the Hardware

Lecture 5 - Constrained Motion Task and Distinguishing Features of a COBOT

Lecture 6 - DC Servo Motors, Position, Velocity and Torque Control

Lecture 7 - BLDC Motors and PMSM AC Servos

Lecture 8 - Sensors - Position, Velocity, and Acceleration Sensors

Lecture 9 - Force/Torque Sensor, Planetary Gearbox and Harmonic Drives

Lecture 10 - Industrial Field Bus, Drives and Devices, and Safe Workspaces

Lecture 11 - Degrees of Freedom, Matrix Representations, and Kinematic Transformations

Lecture 12 - Rotation Matrix, Arbitrary Axis Rotation, and Euler Angles

Lecture 13 - Robot Frames, DH Parameters, Link Transformation Matrix, and Forward Kinematics

Lecture 14 - Forward Kinematics of Industrial COBOTS

Lecture 15 - Inverse Kinematics, Analysis of 2R Planar, 3R Spatial and SCARA

Lecture 16 - Inverse Kinematic Analysis of a 6-DoF Wrist Partitioned Arm

Lecture 17 - Inverse Kinematic Analysis of UR Arms

Lecture 18 - Differential Motion Analysis: Robot Jacobian, Velocity and Acceleration Analysis

Lecture 19 - Inverse Kinematics of 7-DoF KUKA LBR iiwa Robot and Null Space

Lecture 20 - Link Forces and Moments

Lecture 21 - Gravity Compensation, and External Forces/Torques

Lecture 22 - Kinetostatic Measures for Robot Design

Lecture 23 - MATLAB Demonstrations

Lecture 24 - Introduction to Dynamics, LE Approach, Dynamics of 1 DoF System

Lecture 25 - Dynamic Equation of Motion of a Two-Link Manipulator using Lagrange-Euler (LE) Approach

Lecture 26 - Introduction to Newton-Euler (NE) and Recursive-NE Approach

Lecture 27 - Dynamic Equation of Motion of a Two-Link Manipulator using Newton-Euler (NE) Approach

Lecture 28 - Introduction to Control, Linear Control, Second Order System

Lecture 29 - Response of a Second Order Linear System

Lecture 30 - Transfer Function and State-space representation, ODE

Lecture 31 - A Robot Joint: DC Motor Model

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Feedback control of a robot arm, PID Control, Gain Tuning

Lecture 33 - External Force Control Loop and Admittance Control

Lecture 34 - MATLAB Demonstrations - Preparing the 3R Spatial Arm for Force Control

Lecture 35 - Hybrid and Stiffness Force Controller

Lecture 36 - Impedance Controller and its variants

Lecture 37 - Course Conclusion

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Advanced Gas Dynamics (Mechanical Engineering)

Co-ordinators : Dr. Rinku Mukherjee

Lecture 1 - Introduction to Gas Dynamics & Review of Basic Thermodynamics

Lecture 2 - Review of Basic Thermodynamics Continued

Lecture 3 - An introduction to Normal Shocks

Lecture 4 - The Mach Number and Compressible Flow

Lecture 5 - The relation of physical properties across a normal shock

Lecture 6 - Normal Shock in a duct: Throat and Reservoir conditions

Lecture 7 - Example Problems in Normal Shocks

Lecture 8 - An introduction to Oblique Shocks

Lecture 9 - The relation of physical properties across an oblique shock

Lecture 10 - Example Problems in Oblique Shocks

Lecture 11 - Pressure - Deflection relationship of Shocks

Lecture 12 - An introduction to Expansion waves

Lecture 13 - Area - Mach Relationship

Lecture 14 - Unsteady Shock Waves: The Shock Tube

Lecture 15 - The Shock Tube: Propagating Normal Shock and its reflection from end wall

Lecture 16 - A review of wave propagation

Lecture 17 - Wave propagation: Small Perturbation Theory

Lecture 18 - Finite Wave Theory: An introduction to the Method of Characteristics

Lecture 19 - The Shock Tube: Propagating Expansion Fan

Lecture 20 - The Method of Characteristics

Lecture 21 - Application of The Method of Characteristics: Design of a minimum length nozzle

Lecture 22 - Application of The Method of Characteristics: Flow through a diverging channel

Lecture 23 - Flow over a Wavy wall: Formulation using Perturbation Theory

Lecture 24 - Subsonic Flow over a Wavy wall

Lecture 25 - Supersonic Flow over a Wavy wall

Lecture 26 - Supersonic Flow past a 3D Cone: Axisymmetric/Quasi 2D Flow

Lecture 27 - Quasi 2D Flow - I

Lecture 28 - Quasi 2D Flow - II

Lecture 29 - Similarity Rules and Transformed Coordinate System

Lecture 30 - Critical Mach Number and Thin Airfoil Theory

Lecture 31 - Example Problem using Thin Airfoil Theory

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Spray Theory and Applications (Mechanical Engineering)

Co-ordinators : Prof. Mahesh Panchagnula, Dr. Paul E. Sojka

Lecture 1 - Introduction to sprays and their applications

Lecture 2 - Spatial versus Temporal Sampling

Lecture 3 - Spatial Vs Temporal Sampling example problem

Lecture 4 - Steady vs unsteady spray

Lecture 5 - Statistical measures on spray

Lecture 6 - Discussion on pdf and moments

Lecture 7 - Size velocity correlation

Lecture 8 - Discussion on Interfacial tension

Lecture 9 - Introduction to Atomizers and their design - 1

Lecture 10 - Introduction to Atomizers and their design - 2

Lecture 11 - Simple measurement techniques

Lecture 12 - Selection of atomizers

Lecture 13 - Spray measurement characteristics

Lecture 14 - Spray measurements techniques

Lecture 15 - Non-intrusive spray measurements techniques

Lecture 16 - Non-intrusive spray measurements techniques

Lecture 17 - Linear stability analysis â€“ Introduction

Lecture 18 - Linear stability analysis- Kelvin-Helmhotz instability - 1

Lecture 19 - Linear stability analysis- Kelvin-Helmhotz instability - 2

Lecture 20 - Linear stability analysis- Kelvin-Helmhotz instability - 3

Lecture 21 - Linear stability analysis procedure

Lecture 22 - Linear stability analysis - Cylindrial jet instability - 1

Lecture 23 - Linear stability analysis - Cylindrial jet instability - 2

Lecture 24 - Linear stability analysis - Planar Liquid Sheet instability - 1

Lecture 25 - Linear stability analysis - Planar Liquid Sheet instability - 2

Lecture 26 - Design of pressure swirl atomizer - 1

Lecture 27 - Design of pressure swirl atomizer - 2

Lecture 28 - Design of pressure swirl atomizer - 3

Lecture 29 - Design of pressure swirl atomizer - 4

Lecture 30 - Secondary atomization-Dimensionless parameters

Lecture 31 - Secondary atomization-Modes of breakup - 1

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Secondary atomization-Modes of breakup - 2

Lecture 33 - Multiphase modelling

Lecture 34 - Multiphase modelling

Lecture 35 - Multiphase flow modelling basics

Lecture 36 - Multiphase modelling â€“ Selection of model - 1

Lecture 37 - Multiphase modelling â€“ Selection of model - 2

Lecture 38 - Multiphase modelling - Governing equations

Lecture 39 - Droplet evaporation

Lecture 40 - Droplet combustion

Lecture 41 - Spray combustion

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Conduction And Radiation (Mechanical Engineering)

Co-ordinators : Prof. C. Balaji

Lecture 1 - Importance of Thermal Radiation

Lecture 2 - Blackbody definition

Lecture 3 - Solid angle, spectral radiation intensity

Lecture 4 - Radiation pressure and radiation energy density

Lecture 5 - Relationship between â€œIâ€ and â€œTâ€ and Candidate blackbody distribution functions

Lecture 6 - Candidate blackbody distribution functions (Continued...)

Lecture 7 - Planck's blackbody radiation distribution function

Lecture 8 - Planck's distribution and Wien's displacement law

Lecture 9 - Universal blackbody function

Lecture 10 - Emissivity

Lecture 11 - Emissivity (Continued...)

Lecture 12 - Emissivity (Continued...)

Lecture 13 - Kirchoff law, Absorptivity

Lecture 14 - Kirchoff law, Absorptivity (Continued...)

Lecture 15 - Problems on emissivity, absorptivity

Lecture 16 - Reflectivity

Lecture 17 - Transmissivity

Lecture 18 - Problems on reflectivity and transmissivity

Lecture 19 - Radiation heat transfer between surfaces

Lecture 20 - View factor

Lecture 21 - View factor (Continued...)

Lecture 22 - View factor (Continued...)

Lecture 23 - Enclosure analysis

Lecture 24 - Enclosure analysis (Continued...)

Lecture 25 - Enclosure analysis - Gray surface

Lecture 26 - Enclosure analysis - Non gray surfaces

Lecture 27 - Radiation in participating media

Lecture 28 - Solution to the RTE

Lecture 29 - Concept of mean beam length

Lecture 30 - Enclosure analysis in the presence of absorbing / emitting gas

Lecture 31 - Emissivities and absorptivities of Gas mixtures

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Conduction - Introduction

Lecture 33 - Conduction - Energy equation

Lecture 34 - Conduction - 1D, steady state

Lecture 35 - Conduction - 1D, heat generation

Lecture 36 - Fin heat transfer - I

Lecture 37 - Fin heat transfer - II

Lecture 38 - Conduction - Cylindrical and Spherical geometries

Lecture 39 - Transient conduction

Lecture 40 - Transient conduction (Continued...)

Lecture 41 - Two dimensional steady state conduction

Lecture 42 - Analytical solution for Laplace equation

Lecture 43 - Numerical methods in conduction

Lecture 44 - Numerical methods in conduction (Continued...)

Lecture 45 - Conduction with change of phase

Lecture 46 - Conduction with change of phase (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Gas Dynamics and Propulsion (Mechanical Engineering)

Co-ordinators : Prof. V. Babu

Lecture 1 - Introduction

Lecture 2 - Introduction / Fundamental Ideas

Lecture 3 - Fundamental Ideas

Lecture 4 - Fundamental Ideas

Lecture 5 - Fundamental Ideas / Normal Shock Waves

Lecture 6 - Normal Shock Waves

Lecture 7 - Normal Shock Waves / Rayleigh Flow

Lecture 8 - Rayleigh Flow

Lecture 9 - Rayleigh Flow

Lecture 10 - Rayleigh Flow / Fanno Flow

Lecture 11 - Fanno Flow

Lecture 12 - Fanno Flow

Lecture 13 - Fanno Flow / Quasi One Dimensional Flows

Lecture 14 - Quasi One Dimensional Flows

Lecture 15 - Quasi One Dimensional Flows

Lecture 16 - Quasi One Dimensional Flows

Lecture 17 - Quasi One Dimensional Flows

Lecture 18 - Quasi One Dimensional Flows

Lecture 19 - Quasi One Dimensional Flows

Lecture 20 - Oblique Shock Waves

Lecture 21 - Oblique Shock Waves

Lecture 22 - Oblique Shock Waves

Lecture 23 - Oblique Shock Waves / Prandtl Meyer Waves

Lecture 24 - Prandtl Meyer Waves

Lecture 25 - Prandtl Meyer Waves

Lecture 26 - Propulsion - an Introduction

Lecture 27 - Components of the Gas Turbine Engine

Lecture 28 - Components of the Gas Turbine Engine

Lecture 29 - Components of the Gas Turbine Engine

Lecture 30 - Components of the Gas Turbine Engine

Lecture 31 - Components of the Gas Turbine Engine / Thermodynamic Analysis of the Engine

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Thermodynamic Analysis of the Engine

Lecture 33 - Thermodynamic Analysis of the Engine

Lecture 34 - Calculations for Thrust and Fuel Consumption

Lecture 35 - Calculations for Thrust and Fuel Consumption

Lecture 36 - Calculations for Thrust and Fuel Consumption / Emerging Trends

Lecture 37 - Emerging Trends / Ramjets

Lecture 38 - Ramjets

Lecture 39 - Ramjets / Scramjets

Lecture 40 - Scramjets

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Microfluidics (Mechanical Engineering)

Co-ordinators : Dr. Ashis Kumar Sen

Lecture 1 - Introduction and Scaling

Lecture 2 - Scaling

Lecture 3 - Micro-scale fluid mechanics

Lecture 4 - Micro-scale fluid mechanics (Continued...)

Lecture 5 - Micro-scale fluid mechanics (Continued...)

Lecture 6 - Micro-scale fluid mechanics (Continued...)

Lecture 7 - Micro-scale fluid mechanics (Continued...)

Lecture 8 - Micro-scale fluid mechanics (Continued...)

Lecture 9 - Micro-scale fluid mechanics (Continued...)

Lecture 10 - Micro-scale fluid mechanics (Continued...)

Lecture 11 - Capillary Flows

Lecture 12 - Capillary Flows (Continued...)

Lecture 13 - Capillary Flows and Electrokinetics

Lecture 14 - Electrokinetics

Lecture 15 - Electrokinetics (Continued...)

Lecture 16 - Electrokinetics (Continued...)

Lecture 17 - Electrokinetics (Continued...)

Lecture 18 - Electrokinetics (Continued...)

Lecture 19 - Electrokinetics (Continued...)

Lecture 20 - Electrokinetics and Magnetophoresis

Lecture 21 - Microfabrication Techniques

Lecture 22 - Microfabrication Techniques (Continued...)

Lecture 23 - Microfabrication Techniques (Continued...)

Lecture 24 - Microfabrication Techniques (Continued...)

Lecture 25 - Microfabrication Techniques (Continued...)

Lecture 26 - Microfabrication Techniques (Continued...)

Lecture 27 - Microfabrication Techniques (Continued...)

Lecture 28 - Microfabrication Techniques (Continued...)

Lecture 29 - Micropump

Lecture 30 - Micropump (Continued...)

Lecture 31 - Microvalve

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Microvalve (Continued...)

Lecture 33 - Microvalve (Continued...)

Lecture 34 - Micro Flow Sensor and Micro mixers

Lecture 35 - Micro mixers

Lecture 36 - Micro mixers (Continued...)

Lecture 37 - Micro droplets

Lecture 38 - Micro reactors (Continued...)

Lecture 39 - Micro needles and Microparticle separation

Lecture 40 - Few applications of microfluidics

Lecture 41 - Lab Demo

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Convective Heat Transfer (Mechanical Engineering)

Co-ordinators : Dr. Arvind Pattamatta, Prof. Ajit K. Kolar

Lecture 1 - Introduction to convective heat transfer - Part 1

Lecture 2 - Introduction to convective heat transfer - Part 2

Lecture 3 - Continuity Equation

Lecture 4 - Momentum and Energy Equations

Lecture 5 - Energy Equation

Lecture 6 - Reynolds Transport Theorem

Lecture 7 - Entrophy Generation and streamfunction-vorticity formulation

Lecture 8 - Couette flow - Part 1

Lecture 9 - Couette flow - Part 2

Lecture 10 - Couette flow - Part 3

Lecture 11 - Boundary layer approximation

Lecture 12 - Laminar External flow past flat plate (Blasius Similarity Solution)

Lecture 13 - Numerical solution to the Blasius equation and similarity solution to heat transfer

Lecture 14 - Pohlhausen similarity solution and flows including pressure gradient (Falkner-Skan)

Lecture 15 - Falkner skan solutions for heat transfer

Lecture 16 - Similarity solution for flow and heat transfer with transpiration at walls

Lecture 17 - Thermal boundary layer in high speed flows

Lecture 18 - Approximate(Integral) methods for laminar external flow and heat transfer

Lecture 19 - Integral method for laminar external thermal boundary layer over isothermal surface

Lecture 20 - Integral method for flows with pressure gradient (von Karman-Pohlhausen method)

Lecture 21 - Integral method with pressure gradient: heat transfer

Lecture 22 - Heat transfer across a circular cylinder: Walz approximation

Lecture 23 - Duhamel's method for varying surface temperature

Lecture 24 - Laminar External heat transfer with non uniform surface temperature

Lecture 25 - Laminar internal forced convection - fundamentals

Lecture 26 - Hydrodynamically and thermally fully developed internal laminar flows

Lecture 27 - Fully developed laminar internal flow and heat transfer

Lecture 28 - Shooting method for fully developed heat transfer and thermal entry length problem

Lecture 29 - Thermal entry length problem with plug velocity profile: Graetz problem

Lecture 30 - Extended Graetz problem for parabolic velocity profile

Lecture 31 - Extended Graetz problem

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Extended Graetz problem with wall flux boundary condition

Lecture 33 - Approximate method for laminar internal flows

Lecture 34 - Integral method for thermal entry length problem

Lecture 35 - Introduction to Natural Convection Heat Transfer

Lecture 36 - Similarity Solution in Natural Convection for Vertical isothermal Plate - Part 1

Lecture 37 - Similarity Solution in Natural Convection for Vertical isothermal Plate - Part 2

Lecture 38 - Similarity Solution in Natural Convection for Vertical isoflux Plate

Lecture 39 - Approximate Method in Natural Convection Heat Transfer

Lecture 40 - Natural Convection in Other Configurations

Lecture 41 - Turbulent Convective Heat Transfer : RANS Equations - Part 1

Lecture 42 - Turbulent Convective Heat Transfer : RANS Equations - Part 2

Lecture 43 - Analogies in Turbulent Convective Heat Transfer - Part 1

Lecture 44 - Analogies in Turbulent Convective Heat Transfer - Part 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Introduction to Explosions and Explosion Safety (Mechanical Engineering)

Co-ordinators : Prof. K. Ramamurthi

Lecture 1 - Loud Bang and Disruption

Lecture 2 - Blast Wave in an Explosion: Predictions from Dimensional Considerations

Lecture 3 - Typical Examples of Explosions and Classification

Lecture 4 - Shock Hugoniot and Rayleigh Line

Lecture 5 - Properties behind a Constant Velocity Shock

Lecture 6 - Blast waves:Concentration of Mass at the Front,Snow Plow Approximation,Energy conservation ina Blast wave

Lecture 7 - Blast waves: Decay of a strong Blast wave,Explosion Length, Sach's Scaling,Over pressure,Cranz Hopkinson Scaling law of Overpressure

Lecture 8 - Blast Waves: Overpressure and Impulse in the Near and Far Field, Examples,Introduction to Impulse

Lecture 9 - Blast Waves: Non-dimensional Impulse, Cranz -Hopkinson Scaling, Missiles, Fragments and Shrapnel, Craters, Examples

Lecture 10 - Blast Waves: Interaction with Objects, Reflection and Transmission of Blast Waves, Impedance

Lecture 11 - Blast Waves: Amplification of Reflected Blast Waves; Role of Impedance, Spalling, Damage to Organs containing Air, Mushroom Cloud in an Explosion, Examples

Lecture 12 - Blast Waves: Damage from Blast Waves, Examples, Multiple Spikes in an Impulse, Iso-damage Curve on an Overpressure-Impulse Diagram, Complex Structures

Lecture 13 - Energy Release in a Chemical Reaction: Moles, Internal Chemical Energy, Standard Heats of Formation

Lecture 14 - Energy Release: Stoichiometry, Equivalence Ratio and Heat Release in Fuel Rich and Oxidizer Rich Compounds

Lecture 15 - Energy Release: Examples of Energy Release Calculations, Higher and Lower Calorific Values, Internal Energy of Formation

Lecture 16 - Rate of Energy Release: Concentration, Activation Energy, Energy Release Profile

Lecture 17 - Thermal Theory of Explosion

Lecture 18 - Thermal Theory

Lecture 19 - Role of Chain Carriers in an Explosion

Lecture 20 - Combustion - I

Lecture 21 - Combustion - II

Lecture 22 - Case Histories of Explosions involving Volatile Liquids

Lecture 23 - Detonation

Lecture 24 - Structure of Detonations

Lecture 25 - Realizable States in a Detonation

Lecture 26 - One Dimensional Model of Detonation

Lecture 27 - Case Histories of Explosions involving Detonation or Quasi-Detonation

Lecture 28 - Explosions in Confined and Unconfined Geometries

Lecture 29 - Dust Explosions - I

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fluid Dynamics and Turbomachines (Mechanical Engineering)

Co-ordinators : Prof. Dhiman Chatterjee, Prof. Shamit Bakshi

Lecture 1 - Introduction to Fluid Flow

Lecture 2 - Flow field, Stresses on fluid element, Newtonian fluid

Lecture 3 - Non Newtonian fluid, Classification of flow, Analysis of flow

Lecture 4 - Tutorial

Lecture 5 - Lecture 1 - Integral analysis, Control volume, Generalised conservation equation

Lecture 6 - Lecture 2 - Mass and linear momentum conservation in CV

Lecture 7 - Lecture 3 - Angular momentum conservation, Non-inertial frame of reference

Lecture 8 - Lecture 4 - Tutorial

Lecture 9 - Lecture 1 - Differential Analysis

Lecture 10 - Lecture 2 - Navier-Stokes equation for 2D incompressible flow

Lecture 11 - Lecture 3 - Vorticity, Stream function, Bernoulli's equation

Lecture 12 - Lecture 4 - Tutorial

Lecture 13 - Lecture 1 - External flows, Laminar and Turbulent Boundary Layer

Lecture 14 - Lecture 2 - Differential analysis of boundary layer, Blassius equation

Lecture 15 - Lecture 3 - Boundary Layer flow with pressure gradient, Flow separation

Lecture 16 - Lecture 4 - Internal flow, Pipe friction

Lecture 17 - Lecture 1 - Basic Thermodynamics

Lecture 18 - Lecture 2 - Turbomachines: Definition and classification

Lecture 19 - Lecture 3 - Dimensional Analysis

Lecture 20 - Lecture 4 - Tutorial

Lecture 21 - Lecture 1 - Representation of Turbomachines and Definition of velocity

Lecture 22 - Lecture 2 - Euler's energy equation

Lecture 23 - Lecture 3 - Real fluid flow and efficiency of turbomachine

Lecture 24 - Lecture 4 - Tutorial

Lecture 25 - Lecture 1 - Pumps

Lecture 26 - Lecture 2 - Pumping Systems

Lecture 27 - Lecture 3 - Hydraulic Turbines : Pelton Turbine

Lecture 28 - Lecture 4 - Hydraulic Turbines : Reaction Turbines

Lecture 29 - Lecture 5 - Cavitation in Hydroturbomachines

Lecture 30 - Lecture 6 - Tutorial

Lecture 31 - Lecture 1 - Introduction to compressible flow

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Lecture 2 - Steam and Gas Turbine : Introduction and classification

Lecture 33 - Lecture 3 - Steam and Gas Turbine : h-s Plots and velocity triangle

Lecture 34 - Lecture 4 - Tutorial

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Micro and Nano Scale Energy Transport (Mechanical Engineering)

Co-ordinators : Dr. Arvind Pattamatta

Lecture 1 - Overview to Micro/Nanoscale energy transport - Part 1

Lecture 2 - Overview to Micro/Nanoscale energy transport - Part 2

Lecture 3 - Some applications of Micro/Nanoscale energy transport

Lecture 4 - Continuum heat transfer and its limitation

Lecture 5 - Energy carriers at Micro/Nanoscale and their attributes

Lecture 6 - Microscopic contributes to Internal energy of a systems

Lecture 7 - Fundamentals of Quantum mechanics - Part 1

Lecture 8 - Fundamentals of Quantum mechanics - Part 2

Lecture 9 - Fundamentals of Quantum mechanics - Part 3

Lecture 10 - Fundamentals of Quantum mechanics - Part 4

Lecture 11 - Fundamentals of Quantum mechanics - Part 5

Lecture 12 - Fundamentals of solid state physics - Part 1

Lecture 13 - Fundamentals of solid state physics - Part 2

Lecture 14 - Fundamentals of solid state physics - Part 3

Lecture 15 - Fundamentals of solid state physics - Part 4

Lecture 16 - Fundamentals of statistical thermodynamics - Part 1

Lecture 17 - Fundamentals of statistical thermodynamics - Part 2

Lecture 18 - Fundamentals of statistical thermodynamics - Part 3

Lecture 19 - Fundamentals of statistical thermodynamics - Part 4

Lecture 20 - Kinetic theory of energy carriers - Part 1

Lecture 21 - Kinetic theory of energy carriers - Part 2

Lecture 22 - Non-equilibrium energy transport at Nanoscales: Boltzmann Transport Equation (BTE)

Lecture 23 - Boltzmann Transport Equation under the relaxation time approximation

Lecture 24 - Derivation of Continuum laws from Boltzmann Transport Equation - Part 1

Lecture 25 - Derivation of Continuum laws from Boltzmann Transport Equation - Part 2

Lecture 26 - Derivation of Continuum laws from Boltzmann Transport Equation - Part 3

Lecture 27 - Nanoscale Energy transport in a Thin Film - Part 1

Lecture 28 - Nanoscale Energy transport in a Thin Film - Part 2

Lecture 29 - Nanoscale Energy transport in a Thin Film - Part 3

Lecture 30 - Gas flow and Heat transport in Microchannels - Part 1

Lecture 31 - Gas flow and Heat transport in Microchannels - Part 2

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Single phase liquid flow and Heat transport in Microchannels - Part 1

Lecture 33 - Single phase liquid flow and Heat transport in Microchannels - Part 2

Lecture 34 - Fundamentals of Electro kinetics in Microchannels Part1

Lecture 35 - Fundamentals of Electro kinetics in Microchannels Part2

Lecture 36 - Fundamentals of Electro kinetics in Microchannels Part3

Lecture 37 - Two phase Heat transfer in Microchannels - Part 1

Lecture 38 - Two phase Heat transfer in Microchannels - Part 2

Lecture 39 - Nano fluid Heat transfer - Part 1

Lecture 40 - Nano fluid Heat transfer - Part 2

Lecture 41 - Measurement techniques in Micro and Nanoscale Heat transfer - Part 1

Lecture 42 - Measurement techniques in Micro and Nanoscale Heat transfer - Part 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Electron Diffraction and Imaging (Mechanical Engineering)

Co-ordinators : Prof. Sundararaman M

Lecture 1 - 1D-2D-3D lattice

Lecture 2 - Stereographic projection - 1

Lecture 3 - Stereographic Projection - 2

Lecture 4 - Symmetry in 1-D crystals

Lecture 5 - Symmetry in 2-D crystals

Lecture 6 - Symmetry in 3-D crystals

Lecture 7 - Understanding IUCr tables

Lecture 8 - Symmetry in 3-D Crystals

Lecture 9 - Reciprocal lattice

Lecture 10 - Directions Planes and zone axes

Lecture 11 - Interplanar distances and angles

Lecture 12 - Diffraction - 1

Lecture 13 - Diffraction - 2

Lecture 14 - Diffraction - Structure and Shape Factor

Lecture 15 - Transformation of Indices

Lecture 16 - Microscope - 1

Lecture 17 - Microscope - 2

Lecture 18 - Kikuchi Diffraction

Lecture 19 - Double Diffraction and CBED

Lecture 20 - CBED and Precession Electron Diffraction

Lecture 21 - Indexing Diffraction Pattern

Lecture 22 - Correlation of Diffraction Spots to Microstructure

Lecture 23 - 3-Index to 4-Index System

Lecture 24 - Kinematical and Dynamical Theory of Diffraction and Imaging

Lecture 25 - Contrast from Planar Defects

Lecture 26 - Contrast from Strain Fields

Lecture 27 - Atomic Scattering Factor

Lecture 28 - Coherence

Lecture 29 - Lens Aberrations

Lecture 30 - Phase Contrast Microscopy - 1

Lecture 31 - Phase Contrast Microscopy - 2

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Phase Contrast Microscopy - 3

Lecture 33 - STEM

Lecture 34 - ELES and EDS

Lecture 35 - Recent trends

Lecture 36 - Energy dispersive Spectroscopy

Lecture 37 - Revision - 1

Lecture 38 - Revision - 2

Lecture 39 - Revision of Recent trends in Microscopy

Lecture 40 - Crystallography Revision

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Acoustic and Noise Control (Mechanical Engineering)

Co-ordinators : Prof. Abijith Sarkar

Lecture 1 - Module 1 - Introduction - 1

Lecture 32 - Force Analysis of Mechanisms, Mechanical Advantage

Lecture 33 - Force Analysis of Mechanisms - II

Lecture 34 - Balancing of Mechanisms using Counterweights

Lecture 35 - Balancing of Mechanisms using Springs

Lecture 36 - Spatial Mechanisms

Lecture 37 - Introduction to the Kinematics of Spatial Mechanisms

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Engineering Mechanics (Mechanical Engineering)

Co-ordinators : Prof. K. Ramesh

Lecture 1 - Introduction to Engineering Mechanics - I

Lecture 2 - Introduction to Engineering Mechanics - II

Lecture 3 - Force Systems - I

Lecture 4 - Force Systems - II

Lecture 5 - Equilibrium of Rigid bodies - I

Lecture 6 - Equilibrium of Rigid bodies - II

Lecture 7 - Trusses - I

Lecture 8 - Trusses - II

Lecture 9 - Trusses - III

Lecture 10 - Beams - I

Lecture 11 - Beams - II

Lecture 12 - Beams - III

Lecture 13 - Beams - IV

Lecture 14 - Virtual Work - I

Lecture 15 - Virtual Work - II

Lecture 16 - Energy Relations

Lecture 17 - Review Before Quiz - I

Lecture 18 - Friction - I

Lecture 19 - Friction - II

Lecture 20 - Friction - III

Lecture 21 - Particle Dynamics

Lecture 22 - Circular Motion

Lecture 23 - Absolute Motion

Lecture 24 - Relative Motion - I

Lecture 25 - Relative Motion - II

Lecture 26 - Relative Motion - III and Instantaneous Center

Lecture 27 - Rotating frame of reference I - Velocity

Lecture 28 - Rotating frame of reference II - Acceleration

Lecture 29 - Rotating frame of reference III - Choice of rotating frame of reference

Lecture 30 - RFR- IV Crank and slotted bar

Lecture 31 - RFR-V Understanding Coriolis Acceleration

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Kinetics - I

Lecture 33 - Kinetics - II

Lecture 34 - Kinetics - III

Lecture 35 - 3D Kinematics - I

Lecture 36 - 3D Kinematics - II

Lecture 37 - 3D Kinematics - III

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Foundations of Computational Materials Modelling (Mechanical Engineering)

Co-ordinators : Dr.Narasimhan Swaminathan

Lecture 1 - Introduction to the course

Lecture 2 - Some applications of MD simulations

Lecture 3 - Introduction to Bravais lattices and constructing simple crystals with MATLAB

Lecture 4 - Introduction to symmetry - 1

Lecture 5 - Symmetry Elements - 1

Lecture 6 - Symmetry elements - 2

Lecture 7 - Plane groups and their Hermann-Maugin (HM) symbols

Lecture 8 - Glide reflection; Examples of writing point group symbols; Wyckoff positions

Lecture 9 - Generating 2D crystal with MATLAB using Bilbao crystallography website

Lecture 10 - Symmetry of space groups

Lecture 11 - Hernann maugin symbols of space groups

Lecture 12 - Translational symmetry operators

Lecture 13 - The Space groups

Lecture 14 - Generation of crystals

Lecture 15 - Generation of monoclinic lattice

Lecture 16 - Introduction to Statistical Mechanica - 1

Lecture 17 - Introduction to Statistical Mechanica - 2

Lecture 18 - Introduction to Statistical Mechanics - 3

Lecture 19 - Statistical mechanics - 1

Lecture 20 - Statistical mechanics - 2

Lecture 21 - Basic introduction to mechanics

Lecture 22 - Introduction to phase space

Lecture 23 - Introduction to phase average and time average

Lecture 24 - Canonical ensemble; Partition function

Lecture 25 - Basic introduction to MD

Lecture 26 - Input script for LAMMPS - 1

Lecture 27 - Input script for LAMMPS - 2

Lecture 28 - Input script for LAMMPS - 3

Lecture 29 - Input script for LAMMPS - 4

Lecture 30 - LAMMPS exercises - 1

Lecture 31 - LAMMPS exercises - 2

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - LAMMPS exercises - 3

Lecture 33 - LAMMPS exercises - 4

Lecture 34 - LAMMPS exercises - 5

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fundamentals of Combustion for Propulsion (Mechanical Engineering)

Co-ordinators : Prof. S Varunkumar, Prof. H S Mukunda

Lecture 1 - Introduction

Lecture 2 - Combustion processes in ICE and Gas turbine engines

Lecture 3 - Combustion in solid and liquid rocket motors

Lecture 4 - Equilibrium

Lecture 5 - Chemical kinetics, Equilibrium vs rate controlled

Lecture 6 - Demonstration of NASA-CEA

Lecture 7 - Premixed and diffusion flames: principal features and differences - Part I

Lecture 8 - Premixed and diffusion flames: principal features and differences - Part II

Lecture 9 - Quenching, flammability and other limit phenomena

Lecture 10 - Conservation equations

Lecture 11 - Integral Analysis of flame

Lecture 12 - Solid propellant combustion

Lecture 13 - Erosive burning

Lecture 14 - Instability in solid rockets

Lecture 15 - Analysis of p-t traces - Part II

Lecture 16 - Statistical representation of composite propellants in HeQu1D - geometry and thermochemistry

Lecture 17 - HeQu1D model - Parameter estimation

Lecture 18 - Effects of Al - extended HeQu1D model

Lecture 19 - Instability in solid rockets - II

Lecture 20 - Tutorial

Lecture 21 - Liquid propellant rockets - Part I

Lecture 22 - Liquid propellant rockets - Part II

Lecture 23 - Combustion in liquid rockets

Lecture 24 - Instabilities in liquid rockets and gas turbine after burners

Lecture 25 - CFD modeling aspects - Fundamentals

Lecture 26 - CFD modeling aspects - Modeling appraches

Lecture 27 - Effect of turbulence on flames

Lecture 28 - Scramjets - Part I

Lecture 29 - Scramjets - Part II

Lecture 30 - Summary - Premixed flames

Lecture 31 - Summary - Non-premixed flames

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Summary - Solid rocket propulsion

Lecture 33 - Additional Insights

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Basics of Materials Engineering (Mechanical Engineering)

Co-ordinators : Prof. Ratna Kumar Annabattula

Lecture 1 - Introduction

Lecture 2 - Material Property Landscape

Lecture 3 - Crystal Structure-1 (Platonic Solids)

Lecture 4 - Crystal Structure-2 (Unit Cell, Lattice, Crystal)

Lecture 5 - Crystal Structure-3 (Bravais lattice, Symmetry in Crystals)

Lecture 6 - Crystal Structure-4 (Miller Indices for Crystallographic Points and Directions)

Lecture 7 - Crystal Structure-5 (Miller-Brvais Indices, Linear and Planar Density)

Lecture 8 - Crystal Structure-6 (Planar desnity, Close-Packed Structures, Stacking Faults)

Lecture 9 - Crystal Structure-7 (Single Crystal and Polycrystalline Materials)

Lecture 10 - Crystal Structure-8 (X-Ray Diffraction and Determination of Structure)

Lecture 11 - Defects in Crystalline Materials-1 (Types of Crystalline Defects)

Lecture 12 - Defects in Crystalline Materials-1 (Point Defects)

Lecture 13 - Defects in Crystalline Materials-1 (Equilibrium Concentration of Vacancies)

Lecture 14 - Defects in Crystalline Materials-1 (Theoretical Shear Strength)

Lecture 15 - Defects in Crystalline Materials-2 (Effect of Point Defects)

Lecture 16 - Defects in Crystalline Materials-2 (Point Defects and Solid Solutions)

Lecture 17 - Defects in Crystalline Materials-3 (Line Defects, Types of Dislocations and their Characteristics)

Lecture 18 - Defects in Crystalline Materials-4 (Slip Systems, Burger's Vector and Dislocation Motion)

Lecture 19 - Defects in Crystalline Materials-4 (Slip in Single Crystals and Resolved Shear Stress)

Lecture 20 - Defects in Crystalline Materials-5 (Different Stages of Slip in Single Crystla Materials)

Lecture 21 - Defects in Crystalline Materials-5 (Geometry and Slip, Stress Field Around a Dislocation and Deformation Twinning)

Lecture 22 - Defects in Crystalline Materials-6 (Twinning, Interfacial Defects and Volume Defects)

Lecture 23 - Defects in Crystalline Materials-6 (Strengthening Mechanisms)

Lecture 24 - Defects in Crystalline Materials-7 (Plastic deformation in polycrystalline materials, Softening Mechanisms)

Lecture 25 - Mechanical Properties of Materials (Concept of Stress Tensor)

Lecture 26 - Mechanical Properties (Tension Test-Elastic Deformation)

Lecture 27 - Mechanical Properties (Tension Test - Plastic Deformation)

Lecture 28 - Mechanical Properties (Tension Test - Plastic Deformation)

Lecture 29 - Mechanical Properties (Hardness Test)

Lecture 30 - Static Failure Theories (Introduction, Definition of Failure)

Lecture 31 - Static Failure Theories (General form of failure theory, Stress tensor, Principal stress)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Static Failure Theories (Distortion Energy Theory)

Lecture 33 - Static Failure Theories (Maximum Shear Stress Theory)

Lecture 34 - Static Failure Theories (Design Problems)

Lecture 35 - Static Failure Theories (Failure of Brittle Materials)

Lecture 36 - Static Failure Theories (Coulomb-Mohr and Modified Coulomb-Mohr)

Lecture 37 - Static Failure Theories (Notches and Stress Concentration)

Lecture 38 - Introduction to Fracture Mechanics, Griffith's Analysis of a Cracked Body

Lecture 39 - Fracture Mechanics (Energy Release Rate)

Lecture 40 - Fracture Mechanics (Crack Resistance, Stress Intensity Factor, Fracture Toughness)

Lecture 41 - Fatigue Failure of Materials (Introduction, Historical Events, S-N Diagram)

Lecture 42 - Fatigue Failure of Materials (S-N Diagram, Types of Time Varying Loads)

Lecture 43 - Fatigue Failure of Materials (High Cycle Fatigue, Low Cycle Fatigue, Stress Ratio, Amplitude Ratio)

Lecture 44 - Fatigue Failure of Materials (Rotating Beam Bending Test, Estimated S-N diagram)

Lecture 45 - Fatigue Failure Theories (Fatigue strength correction factors)

Lecture 46 - Problems on Fatigue Failure-1 (S-N diagram and Corrected endurance strength)

Lecture 47 - Fatigue Failure of Materials (Features of Fatigue Failure; Factor of Safety in Life and Stress)

Lecture 48 - Fatigue Failure of Materials (Effect of Mean Stress)

Lecture 49 - Fatigue Failure of Materials (Multiaxial Fatigue and Variable Amplitude Loading)

Lecture 50 - Fatigue Failure of Materials (Fatigue Stress Concentration Factor)

Lecture 51 - Fatigue Failure of Materials (Fatigue Crack Growth, Paris' law)

Lecture 52 - Problems on Fatigue Failure-2 (Effect of mean stress, Fatigue crack growth)

Lecture 53 - Problems on Fatigue Failure-3 (Effect of Notch, Multiaxial Loading)

Lecture 54 - Phase Diagrams (Introduction)

Lecture 55 - Phase Diagrams (Language of Phase Diagrams, Types of Binary Phase Alloys)

Lecture 56 - Phase Diagrams (Tie line, Lever Rule, Indentifcation of compositions and weight fractions in two-phase regions)

Lecture 57 - Phase Diagrams (Type 1: Isomorphous Alloys, Microstructure evolution in Equilibrium and Noon equilibrium cooling)

Lecture 58 - Phase Diagrams (Conguent Melting Alloys, Type II Alloys, Eutectic Reaction)

Lecture 59 - Phase Diagrams (Type III Alloys with Partial Solubility in Solid State)

Lecture 60 - Phase Diagrams (Conguent melting alloys, Peritectic Reaction, Monotectic Reaction)

Lecture 61 - Phase Diagrams (Allotropy, Eutectoid and Peritectoid Reactions)

Lecture 62 - Phase Diagrams (Iron-Iron Carbide Phase Diagram)

Lecture 63 - Kinetics of Phase Transformations (Homogeneous Nucleation)

Lecture 64 - Kinetics of Phase Transformations (Heterogeneous Nucleation)

Lecture 65 - Isothermal Transformation Diagram

Lecture 66 - Martensite Transformation, C-C-T Diagram

Lecture 67 - Heat Treatment of Steels (Annealing and Normalizing)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Computational Fluid Dynamics using Finite Volume Method (Mechanical Engineering)

Co-ordinators : Prof. Kameswararao Anupindi

Lecture 1 - Review of governing equations: Conservation of mass

Lecture 2 - Review of governing equations: Conservation of momentum

Lecture 3 - Review of governing equations: Conservation of energy

Lecture 4 - Review of governing equations: Navier-Stokes equations and energy equation

Lecture 5 - Review of governing equations: General scalar transport equation

Lecture 6 - Review of governing equations: classification of PDEs

Lecture 7 - Overview of Numerical Methods: Finite Difference Method

Lecture 8 - Overview of Numerical Methods: Finite Volume Method

Lecture 9 - Overview of Numerical Methods: Solution of linear algebraic equations

Lecture 10 - Finite Volume Method for Diffusion Equation: Discretization of 1D diffusion equation

Lecture 11 - Finite Volume Method for Diffusion Equation: Discretization of 2D diffusion equation

Lecture 12 - Finite Volume Method for Diffusion Equation: Boundary conditions for 2D diffusion equation

Lecture 13 - Finite Volume Method for Diffusion Equation: Discretization of 3D diffusion equation, mixed boundary conditions

Lecture 14 - Finite Volume Method for Diffusion Equation: Tri-Diagonal Matrix Algorithm

Lecture 15 - Finite Volume Method for Diffusion Equation: Linearization of source term, line-by-line TDMA

Lecture 16 - Finite Volume Method for Diffusion Equation: Problem solving using TDMA

Lecture 17 - Finite Volume Method for Diffusion Equation: Problem solving using line-by-line TDMA

Lecture 18 - Finite Volume Method for Diffusion Equation: Steady diffusion in polar and axisymmetric coordinates

Lecture 19 - Finite Volume Method for Diffusion Equation: Discretization of unsteady diffusion equation

Lecture 20 - Finite Volume Method for Diffusion Equation: Unsteady diffusion time-stepping schemes

Lecture 21 - Finite Volume Method for Diffusion Equation: Unsteady diffusion time-stepping schemes and Truncation errors of the FV schemes

Lecture 22 - Finite Volume Method for Diffusion Equation: Truncation errors and stability analysis

Lecture 23 - Finite Volume Method for Diffusion Equation: Stability analysis and steady diffusion in unstructured meshes.

Lecture 24 - Finite Volume Method for Diffusion Equation: Steady diffusion in unstructured meshes - Part 1

Lecture 25 - Finite Volume Method for Diffusion Equation: Steady diffusion in unstructured meshes - Part 2

Lecture 26 - Finite Volume Method for Diffusion Equation: Steady diffusion in unstructured meshes - Part 3

Lecture 27 - Finite Volume Method for Diffusion Equation: Steady diffusion in unstructured meshes - Part 4

Lecture 28 - Finite Volume Method for Diffusion Equation: Steady diffusion in unstructured meshes - Part 5

Lecture 29 - Finite Volume Method for Convection and Diffusion: Discretization of steady convection equation

Lecture 30 - Finite Volume Method for Convection and Diffusion: Discretization of steady convection equation

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Finite Volume Method for Convection and Diffusion: Discretization of steady and unsteady convection equation

Lecture 32 - Finite Volume Method for Convection and Diffusion: Discretization of unsteady convection equation

Lecture 33 - Finite Volume Method for Convection and Diffusion: Discretization of convection-diffusion equation on unstructured mesh

Lecture 34 - Finite Volume Method for Convection-diffusion and fluid flow calculations

Lecture 35 - Finite Volume Method for Fluid Flow Calculations: The staggered grid approach

Lecture 36 - Finite Volume Method for Fluid Flow Calculations: SIMPLE algorithm - Part 1

Lecture 37 - Finite Volume Method for Fluid Flow Calculations: SIMPLE algorithm - Part 2

Lecture 38 - Finite Volume Method for Fluid Flow Calculations: SIMPLE algorithm - Part 3

Lecture 39 - Finite Volume Method for Fluid Flow Calculations: SIMPLE-Revised and SIMPLE-Corrected algorithm

Lecture 40 - Finite Volume Method for Fluid Flow Calculations: SIMPLE algorithm for Colocated mesh - Part 1

Lecture 41 - Finite Volume Method for Fluid Flow Calculations: SIMPLE algorithm for Colocated mesh - Part 2

Lecture 42 - Finite Volume Method for Fluid Flow Calculations: SIMPLE-Colocated algorithm for Unstructured mesh

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Wheeled Mobile Robots (Mechanical Engineering)

Co-ordinators : Prof. Asokan Thondiyath, Prof. Santhakumar Mohan

Lecture 1 - Introduction to Mobile Robots and Manipulators

Lecture 2 - Introduction to Locomotion and Types of Locomotion

Lecture 3 - Introduction to Mobile Robot Kinematics

Lecture 4 - Degree of Maneuverability and Types of Wheels

Lecture 5 - Kinematic Simulation of a Mobile Robot (Land-based)

Lecture 6 - Kinematic Simulation and Motion Animation of a Mobile Robot (Land-based)

Lecture 7 - A Generalized Wheel (Kinematic) Model

Lecture 8 - Examples related to the Generalized Wheel (Kinematic) Model

Lecture 9 - Holonomic and Non-holonomic Mobile Robots

Lecture 10 - Kinematic Simulation of Wheeled Mobile Robots - Part 1

Lecture 11 - Kinematic Simulation of Wheeled Mobile Robots - Part 2

Lecture 12 - Kinematic Simulation of Wheeled Mobile Robots - Part 3

Lecture 13 - Mobile Robot Dynamics - Part 1

Lecture 14 - Mobile Robot Dynamics - Part 2

Lecture 15 - Equation of Motion and Dynamic Simulation of a Mobile Robot

Lecture 16 - Dynamic Models of Wheeled Mobile Robots with Wheel Configurations

Lecture 17 - Kinematic and Dynamic Models of a Mobile base with Four-Independent Steerable Power Wheels

Lecture 18 - Sensing and Perception

Lecture 19 - Sensors and Sensing

Lecture 20 - Commonly used sensors - 1

Lecture 21 - Commonly used sensors - 2

Lecture 22 - Commonly used sensors - 3

Lecture 23 - Sensor Errors and Error modelling

Lecture 24 - Mobile Robot Localisation

Lecture 25 - Map based Localisation

Lecture 26 - Markov Localisation

Lecture 27 - Kalman Filter Localisation

Lecture 28 - SLAM

Lecture 29 - Mobile Robot Navigation

Lecture 30 - Path Planning: Graph Construction

Lecture 31 - Graph Search Methods

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Path Planning and Obstacle avoidance

Lecture 33 - Introduction to Motion Control of Mobile Robots - Part 1

Lecture 34 - Introduction to Motion Control of Mobile Robots - Part 2

Lecture 35 - Kinematic control of Land-based Mobile Robots

Lecture 36 - Simulation of Land-based Mobile Robots along with Kinematic Control - Part 1

Lecture 37 - Simulation of Land-based Mobile Robots along with Kinematic Control - Part 2

Lecture 38 - Simulation of Land-based Mobile Robots along with Kinematic Control - Part 3

Lecture 39 - Dynamic Control of Mobile Robots

Lecture 40 - Cascaded or Back-stepping Control of Mobile Robots

Lecture 41 - Modern Robotics and Challenges

Lecture 42 - Multiple Mobile Robotic Systems

Lecture 43 - Autonomous Mobile Robots and Mobile Manipulators

Lecture 44 - Legged and Hybrid Robots

Lecture 45 - Underwater and Aerial Robots

Lecture 46 - Healthcare Robots

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fundamentals of Combustion (Mechanical Engineering)

Co-ordinators : Prof. V. Raghavan

Lecture 1 - Fuel and their properties - Part 1

Lecture 2 - Fuel and their properties - Part 2 - Gaseous and Liquid fuels

Lecture 3 - Fuel and their properties - Part 3 - Liquid and Solid fuels

Lecture 4 - Review of basic thermodynamics of ideal gas mixtures - Part 1

Lecture 5 - Review of basic thermodynamics of ideal gas mixtures - Part 2

Lecture 6 - Stoichiometry - Part 1

Lecture 7 - Stoichiometry - Part 2 - Worked Examples

Lecture 8 - Stoichiometry - Part 3 - Worked Examples (Continued...)

Lecture 9 - First law and Second law of thermodynamics applied to combustion - Part 1 - Heat Calculation

Lecture 10 - First law and Second law of thermodynamics applied to combustion - Part 2 - Enthalpy Calculation

Lecture 11 - First law and Second law of thermodynamics applied to combustion - Part 3 - Calculation of flame temperature

Lecture 12 - First law and Second law of thermodynamics applied to combustion - Part 4 - Chemical equilibrium

Lecture 13 - First law and Second law of thermodynamics applied to combustion - Part 5 - Chemical equilibrium (Continued...)

Lecture 14 - First law and Second law of thermodynamics applied to combustion - Part 6 - Worked examples

Lecture 15 - First law and Second law of thermodynamics applied to combustion - Part 7 - Worked examples (Continued...)

Lecture 16 - Mass transfer basics - Part 1 - Fundamentals

Lecture 17 - Mass transfer basics - Part 2 - Calculation of diffusion velocity

Lecture 18 - Mass transfer basics - Part 3 - Steady evaporation (The Stefan Problem)

Lecture 19 - Mass transfer basics - Part 4 - Steady evaporation of liquid droplet and Worked examples

Lecture 20 - Fundamentals of combustion kinetics - Part 1 - Global and elementary reactions

Lecture 21 - Fundamentals of combustion kinetics - Part 2 - Reaction rates and equilibrium constant

Lecture 22 - Fundamentals of combustion kinetics - Part 3 - Steady state and partial equilibrium approximation

Lecture 23 - Fundamentals of combustion kinetics - Part 4 - Worked examples

Lecture 24 - Governing equations for reacting flow - Part 1 - Continuity, momentum and species conservation equations

Lecture 25 - Governing equations for reacting flow - Part 2 - The energy equation

Lecture 26 - Governing equations for reacting flow - Part 3 - Estimation of thermo-physical properties and control of combustion phenomena

Lecture 27 - Governing equations for reacting flow - Part 4 - Control of combustion phenomena and simplified chemically reacting system

Lecture 28 - Governing equations for reacting flow - Part 5 - Conserved scalars and mixture fraction approach

Lecture 29 - Characteristics of combustion flame and detonation - Part 1

Lecture 30 - Characteristics of combustion flame and detonation - Part 2

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Characteristics of combustion flame and detonation - Part 3 - Rankine-Hugoniot relation

Lecture 32 - Characteristics of combustion flame and detonation - Part 4 - Estimation of detonation velocity and Worked examples

Lecture 33 - Laminar Premixed Flames - Part 1 - Laminar flame propagation

Lecture 34 - Laminar Premixed Flames - Part 2 - Laminar flame speed variation and Structure of premixed flames

Lecture 35 - Laminar Premixed Flames - Part 3 - Flammability limits and Premixed flame theory

Lecture 36 - Laminar Premixed Flames - Part 4 - Estimation of laminar flame speed

Lecture 37 - Laminar Premixed Flames - Part 5 - Ignition of premixed mixture (Semenov's Analysis)

Lecture 38 - Laminar Premixed Flames - Part 6 - Piloted ignition and Flame quenching

Lecture 39 - Laminar Premixed Flames - Part 7 - Premixed flame stability

Lecture 40 - Laminar Premixed Flames - Part 8 - Stability Maps and Worked examples

Lecture 41 - Laminar Diffusion Flames - Part 1 - Theory of gas jets

Lecture 42 - Laminar Diffusion Flames - Part 2 - Analysis of gas jets and jet diffusion flames

Lecture 43 - Laminar Diffusion Flames - Part 3 - Diffusion flame characteristics and flame structure

Lecture 44 - Laminar Diffusion Flames - Part 4 - Diffusion flame structure and Flame regimes

Lecture 45 - Laminar Diffusion Flames - Part 5 - Diffusion flame regimes and Flame height correlations

Lecture 46 - Laminar Diffusion Flames - Part 6 - Diffusion flame control

Lecture 47 - Laminar Diffusion Flames - Part 7 - Diffusion flame configurations (coflow, crossflow and opposed flow flames)

Lecture 48 - Laminar Diffusion Flames - Part 8 - Diffusion flame stability and Worked examples

Lecture 49 - Turbulent Flames - Part 1 - Characteristics of turbulence

Lecture 50 - Turbulent Flames - Part 2 - Turbulent length scales and turbulent stresses

Lecture 51 - Turbulent Flames - Part 3 - Axisymmetric turbulent jet

Lecture 52 - Turbulent Flames - Part 4 - Turbulent premixed flames and flame regimes

Lecture 53 - Turbulent Flames - Part 5 - Turbulent diffusion flames

Lecture 54 - Droplet evaporation and combustion - Part 1 - Steady evaporation of liquid droplet

Lecture 55 - Droplet evaporation and combustion - Part 2 - Equilibrium under steady evaporation of liquid droplet and droplet combustion

Lecture 56 - Droplet evaporation and combustion - Part 3 - Droplet combustion (simplified analysis)

Lecture 57 - Droplet evaporation and combustion - Part 4 - Species and temperature profiles

Lecture 58 - Droplet evaporation and combustion - Part 5 - Evaluation of mass burning rate and worked examples

Lecture 59 - Combustion of carbon particle - Part 1 - Coal combustion

Lecture 60 - Combustion of carbon particle - Part 2 - One film model

Lecture 61 - Combustion of carbon particle - Part 3 - Two film model and worked examples

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Oil Hydraulics and Pneumatics (Mechanical Engineering)

Co-ordinators : Prof. Somashekhar S

Lecture 1 - Introduction, Learning Objectives, Course Content and References

Lecture 2 - Merits and Demerits of Fluid Power, Power Transmission Method

Lecture 3 - Brief History, Application Areas, Major Divisions of Fluid Power System

Lecture 4 - Introduction to Oil Hydraulics and its Basic Components

Lecture 5 - Introduction to Pneumatic and its Basic Components, Applications-Stationary and Mobile

Lecture 6 - Typical Application of Fluid Power System, Status and Development

Lecture 7 - Pascal's law and its application-Hydraulic jack, Hydraulic brake and Numerical

Lecture 8 - Pressure Intensifier, Numericals, Air-to-Hydraulic Booster and Bernoulli equation

Lecture 9 - Applications of Bernoulli equation-Venturi,Torricelli's theorem, Siphon, Continuity equation and flow configuration, Concept of pressures and Gas laws

Lecture 10 - Introduction to Fluid Power Symbols, Hydraulic lines and Color Coding

Lecture 11 - Symbols for Functional Units, Hydraulic Pumps, Hydraulic Motors, Cylinders, Air Compressors, Pneumatic Motors and Orifices

Lecture 12 - Symbols for Filters, Check Valves, DCVs, Spool Actuation methods, PCV, Miscellaneous, Port Configurations

Lecture 13 - Introduction to Hydraulic Pumps, Facts and Figures, Classifications

Lecture 14 - Positive Displacement pump and pumping theory

Lecture 15 - Ideal pump, pump losses, efficiency curve, Constructional features and Operations of External Gear pump

Lecture 16 - Construction features and operations of Internal Gear Pump, Gerotor Pump and Screw Pump

Lecture 17 - Numericals on Gear Pump, Tree Structure of Vane Pump

Lecture 18 - Vane Pump, Pumping theory, Construction and Operation of Unbalanced Vane Pump, Vane loading and solutions, Different Vanes

Lecture 19 - Variable Displacement Pressure Compensated Vane Pump, Balance Vane Pump, Kinematic Inversion of Vane pump and Numerical

Lecture 20 - Piston pump, Pumping theory, Constructional features and Operations of Hand Pump-Single acting, Twin single acting, Double acting, Two-stage

Lecture 21 - Axial Piston Pump- Construction and Operating principles of Bent axis and Swash plate type pump

Lecture 22 - Radial Piston Pumps- Construction and Operation, Pump failure and Cavitations, Important parameters while selecting Pump, Numerical

Lecture 23 - Pneumatic Control System-Introduction, Air preparation-Primary and Secondary Air Treatment

Lecture 24 - Pneumatic Power Source- Compressor, Classification, Air Receiver and Control Methods

Lecture 25 - Reciprocating Type Air Compressor-Single and Multi-stage Piston Pump, PV Diagram and Work Done

Lecture 26 - Construction and Operation of Two-stage Reciprocating type Air Compressor, Diaphragm Type Air Compressor, Rotary Vane Compressor, Twin Lobe Air compressor, Screw Compressor, Liquid Ring Compressor and Selection Criteria

Lecture 27 - Energy Loss and Cost Break Down in Air Preparation Process, Pressure Drop and its Effect

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 28 - What causes Pressure Drop ?, Minimising Pressure Drop, Air Distribution System- Sizing of Pipes, Tubes, Materials and Fittings, Important Air Flow Parameters

Lecture 29 - Pressure drop Predictions using Various Empirical Formulae and Nomogram, Best Practices for Compressed Air Piping System and Installation Tips

Lecture 30 - Need for Air Dryer, Analysis of Moisture Removal from Air, Typical Air Drying Methods, Basic Types of Air Dryers

Lecture 31 - Construction and Operation of Refrigerated Air dyers, Absorption Dryer, Adsorption Dryer, Membrane Dryer, How to Choose the Right Air Dryer?

Lecture 32 - Directional Control Valves

Lecture 33 - Directional Control Valves

Lecture 34 - Directional Control Valves

Lecture 35 - Directional Control Valves

Lecture 36 - Directional Control Valves

Lecture 37 - Pressure Control Valves

Lecture 38 - Pressure Control Valves

Lecture 39 - Pressure Control Valves

Lecture 40 - Flow Control Valves

Lecture 41 - Flow Control Valves

Lecture 42 - Flow Control Valves

Lecture 43 - Estimation of leakage through spool and housing bore and Numericals on DCV, PCV and FCV

Lecture 44 - Estimation of leakage through spool and housing bore and Numericals on DCV, PCV and FCV

Lecture 45 - Hydraulic Motors

Lecture 46 - Hydraulic Motors

Lecture 47 - Hydraulic Motors

Lecture 48 - Hydraulic Motors

Lecture 49 - Hydraulic Motors

Lecture 50 - Hydraulic Motors

Lecture 51 - Hydraulic Cylinders

Lecture 52 - Hydraulic Cylinders

Lecture 53 - Hydraulic Cylinders

Lecture 54 - Hydraulic Cylinders

Lecture 55 - Hydraulic Cylinders

Lecture 56 - Numericals on Fluid Power Actuators

Lecture 57 - Numericals on Fluid Power Actuators

Lecture 58 - Subsystems: Hydraulic Reservoir, Coolers and Filters

Lecture 59 - Subsystems: Hydraulic Reservoir, Coolers and Filters

Lecture 60 - Subsystems: Hydraulic Reservoir, Coolers and Filters

Lecture 61 - Subsystems: Hydraulic Fluids, Conduits and Simple Numericals

Lecture 62 - Subsystems: Hydraulic Fluids, Conduits and Simple Numericals

Lecture 3 - Free and Forced Vibrations of Two Degree of Systems

Lecture 4 - Multi Degree of Freedom Systems

Lecture 5 - Reduction at source - 1

Lecture 6 - Reduction at source - 2

Lecture 7 - Reduction at source - 3

Lecture 8 - Feedback Control System - 1

Lecture 9 - Shunt Damping

Lecture 10 - Vibration Isolation - 1

Lecture 11 - Vibration Isolation - 2

Lecture 12 - Vibration Isolation - 3

Lecture 13 - Source Classification

Lecture 14 - Self Excitation Vibration

Lecture 15 - Flow Induction Vibration

Lecture 16 - Field Balancing of Rigid / Flexible Rotors

Lecture 17 - Damping: Models and Measures - I

Lecture 18 - Damping: Models and Measures - II

Lecture 19 - Numerical Problems

Lecture 20 - Design Sensitivity - I

Lecture 21 - Design Specification

Lecture 22 - Design for Enhanced Material Damping

Lecture 23 - Basics of Passive Vibration Control

Lecture 24 - Design of Absorber

Lecture 25 - Shock Absorber

Lecture 26 - Isolators with Stiffness and Damping

Lecture 27 - Basics of Active Vibration Control

Lecture 28 - Piezoelectric Material - I

Lecture 29 - Piezoelectric Material - II: Applications

Lecture 30 - Piezoelectric Accelerometers

Lecture 31 - Electro-rheological (ER) Fluids

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Magneto-rheological (MR) Fluids

Lecture 33 - Magneto and Electrostrictive Materials

Lecture 34 - Shape Memory Alloy

Lecture 35 - Electro-Magnetics

Lecture 36 - Numerical Problems

Lecture 37 - Basics of Vibration Measurement System

Lecture 38 - Data Acquisition

Lecture 39 - Fourier Transformation

Lecture 40 - Filters

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Welding Engineering (Mechanical Engineering)

Co-ordinators : Dr. D.K. Dwivedi

Lecture 1 - Introduction to Welding Engineering

Lecture 2 - Classification of Welding Processes - I

Lecture 3 - Classification of Welding Processes - II

Lecture 4 - Sources of Heat and Protection of Weld pool

Lecture 5 - Protection of Weld Pool

Lecture 6 - Introduction

Lecture 7 - Fundamentals of Arc Initiation

Lecture 8 - Arc Maintenance & Arc Characteristics

Lecture 9 - Arc Forces

Lecture 10 - Arc Efficiency

Lecture 11 - Melting Rate in Different Welding Processes

Lecture 12 - Types of power sources and their characteristics - I

Lecture 13 - Types of power sources and their characteristics - II

Lecture 14 - SMAW - I

Lecture 15 - SMAW - II

Lecture 16 - GTAW - I

Lecture 17 - GTAW - II

Lecture 18 - PAW & SAW

Lecture 19 - SAW

Lecture 20 - GMAW

Lecture 21 - Brazing, Soldering & Braze Welding

Lecture 22 - Braze welding and Electroslag welding

Lecture 23 - Weld Thermal Cycle

Lecture 24 - Effect of WTC and Cooling rate in welding

Lecture 25 - Cooling rate

Lecture 26 - Peak temperature & Solidification rate

Lecture 27 - Residual stress - I

Lecture 28 - Residual stress - II

Lecture 29 - Introduction

Lecture 30 - Type of joints and welds

Lecture 31 - Edge preparation

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Design for static and fatigue loading

Lecture 33 - Fatigue fracture of weld joints - I

Lecture 34 - Fatigue fracture of weld joints - II

Lecture 35 - Introduction-

Lecture 36 - DT & NDT

Lecture 37 - Understanding Weldability

Lecture 38 - Reactions in weldment

Lecture 39 - Weldability of Al alloys

Lecture 40 - Failure analysis and prevention

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Industrial Engineering (Mechanical Engineering)

Co-ordinators : Prof. P.K. Jain, Dr. Pradeep Kumar, Dr. Inderdeep Singh, Dr. D.K. Dwivedi

Lecture 1 - Production Planning and Control

Lecture 2 - Product Design and Development

Lecture 3 - Statistical Process Control - Part I

Lecture 4 - Statistical Process Control - Part II

Lecture 5 - Statistical Process Control - Part III

Lecture 6 - Productivity

Lecture 7 - Factors Affecting the Productivity

Lecture 8 - Improving the Productivity Introduction to Work Study

Lecture 9 - Work Study Human Component and Method Study

Lecture 10 - Recording Techniques for Method Study - Part I

Lecture 11 - Recording Techniques for Method Study - Part II

Lecture 12 - Recording Techniques Critical Examination

Lecture 13 - Principles of Motion Economy

Lecture 14 - Work Measurement Time Study - Part I

Lecture 15 - Work Measurement Time Study - Part II

Lecture 16 - Performance Rating Allowances

Lecture 17 - Work Measurement: Work Sampling

Lecture 18 - PMT System Standard Data Method

Lecture 19 - Ergonomics

Lecture 20 - Metabolism and Organization at Work

Lecture 21 - Working Conditions Lights Vibrations

Lecture 22 - Materials Management - Part I

Lecture 23 - Materials Management - Part II

Lecture 24 - Materials Requirement Planning

Lecture 25 - Sales Forecasting - Part I

Lecture 26 - Sales Forecasting - Part II

Lecture 27 - Capacity Planning - Part I

Lecture 28 - Capacity Planning - Part II

Lecture 29 - Network Analysis - Part I

Lecture 30 - Network Analysis - Part II

Lecture 31 - Facility Design Part - Part I

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Facility Design Part - Part II

Lecture 33 - Facility Design Part - Part III

Lecture 34 - Facility Design Part - Part IV

Lecture 35 - Product Design Development

Lecture 36 - Materials Handling

Lecture 37 - Quality Concepts

Lecture 38 - Value Engineering

Lecture 39 - Reliability

Lecture 40 - Industrial Safety

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Manufacturing Processes I (Mechanical Engineering)

Co-ordinators : Dr. D.B. Karunakar, Dr. Inderdeep Singh. Dr. D.K. Dwivedi

Lecture 1 - Powder Metallurgy - Part I

Lecture 2 - Powder Metallurgy - Part II

Lecture 3 - Powder Metallurgy - Part III

Lecture 4 - Metal Forming - Fundamentals

Lecture 5 - Forging

Lecture 6 - Swaging and Wire Drawing

Lecture 7 - Sheet Metal Operations - Part I

Lecture 8 - Sheet Metal Operations - Part II

Lecture 9 - Sheet Metal Operations - Part III

Lecture 10 - Sheet Metal Working - Presses

Lecture 11 - Sheet Metal Working - Equipment

Lecture 12 - High Energy Rate Forming Processes

Lecture 13 - Machining Fundamentals

Lecture 14 - Machining - Part I

Lecture 15 - Machining - Part II

Lecture 16 - Machining - Part III

Lecture 17 - Metal casting - Part I

Lecture 18 - Metal casting - Part II

Lecture 19 - Metal Casting - Part III

Lecture 20 - Metal Casting - Part IV

Lecture 21 - Metal Casting - Part V

Lecture 22 - Metal Casting - Part VI

Lecture 23 - Metal Casting - Part VII

Lecture 24 - Metal Casting - Part VIII

Lecture 25 - Metal Casting - Part IX

Lecture 26 - Metal Casting - Part X

Lecture 27 - Introduction

Lecture 28 - Welding Process Classification

Lecture 29 - Brazing Soldering Braze Welding

Lecture 30 - Arc Welding Power Source - Part I

Lecture 31 - Arc Welding Power Source - Part II

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Shielded Metal Arc Welding - Part I

Lecture 33 - Shielded Metal Arc Welding - Part II

Lecture 34 - Submerged Arc Welding

Lecture 35 - Gas Metal Arc Welding - Part I

Lecture 36 - Gas Metal Arc Welding - Part II

Lecture 37 - Tungsten Inert Gas Welding - Part I

Lecture 38 - Tungsten Inert Gas Welding - Part II

Lecture 39 - Resistance Welding Process

Lecture 40 - Reaction in Weld Region Welding Defects

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Strength of Materials (Mechanical Engineering)

Co-ordinators : Dr. S.P. Harsha

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Engineering Economic Analysis (Mechanical Engineering)

Co-ordinators : Dr. Pradeep K. Jha

Lecture 1 - Introduction to Engineering Economy, Physical and Economic Environment, Phases in Engg. process

Lecture 2 - Some economic concepts, Value and utility, Interest and Interest rate, Time value of money

Lecture 3 - Interest formulas: Simple and compound interest, Cash flow diagrams

Lecture 4 - Interest formulas for discrete compounding and discrete payments: Single payment (CAF and PWF)

Lecture 5 - Interest formulas for discrete compounding and discrete payments: Equal payment series (CAF, CRF and PWF)

Lecture 6 - Problem solving on discrete compounding, discrete payment

Lecture 7 - Interest formulas for Uniform gradient series

Lecture 8 - Interest formulas for geometric gradient series

Lecture 9 - Compounding frequency of Interest: Nominal and Effective interest rates

Lecture 10 - Problem solving on frequency compounding of interest and gradient series factors

Lecture 11 - Economic equivalence: Meaning and principles of equivalence

Lecture 12 - Equivalence calculations involving cash flows

Lecture 13 - Methods of comparison of alternatives: Present worth, Annual equivalent, Future worth, Internal rate of return

Lecture 14 - comparison of alternatives: Capitalized equivalent amount, Capital recovery with return

Lecture 15 - Problem solving on equivalence and comparison of alternatives

Lecture 16 - Replacement analysis: Reason, Concept of defender and challenger

Lecture 17 - Proper treatment of sunk cost in replacement

Lecture 18 - Replacement because of improved efficiency, inadequacy, demand etc.

Lecture 19 - Problem solving on replacement analysis

Lecture 20 - Economic life of the asset

Lecture 21 - Depreciation: Definition, Reasons, Types of property, Value time function and book value

Lecture 22 - Basic depreciation methods:S-L method, Declining balance method

Lecture 23 - Depreciation: Declining balance switching to S-L, SOYD Method

Lecture 24 - Modified accelerated cost recovery system (MACRS) method of depreciation, Depletion

Lecture 25 - Depreciation: Units of production method, Depletion

Lecture 26 - Problem solving based on Depreciation and Depletion

Lecture 27 - Elements of cost: types of cost

Lecture 28 - Breakeven analysis, Effect of fixed and variable cost on BEP.

Lecture 29 - Economic order quantity

Lecture 30 - Problem solving based on Breakeven analysis and EOQ

Lecture 31 - Cost estimation: Methods of cost estimation, Adjustment of data, Learning

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - cost estimating relationships

Lecture 33 - Introduction to decision under risk Criteria for decision under risk

Lecture 34 - Expected value decision making under risk

Lecture 35 - Expected variance decision making under risk

Lecture 36 - Problem solving based on decision under risk

Lecture 37 - Income taxes: Principles and calculation of effective income tax rates

Lecture 38 - Effect of method of depreciation on income taxes

Lecture 39 - After tax economic analysis

Lecture 40 - Problem solving based on Income tax analysis

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Convective Heat Transfer (Mechanical Engineering)

Co-ordinators : Dr. Arup Kumar Das

Lecture 1 - Introduction

Lecture 2 - Balance of Total Energy

Lecture 3 - Different Forms of Thermal Energy Equation

Lecture 4 - Thermal Boundary Layer

Lecture 5 - Forced Convection : Low Prandtl Number over a Flat Plate

Lecture 6 - Forced Convection : High Prandtl Number over a Flat Plate

Lecture 7 - Forced Convection over a Flat Plate : Uniform Heat Flux

Lecture 8 - Natural Convection : Uniform Wall Temperature

Lecture 9 - Natural Convection : Uniform Heat Flux

Lecture 10 - Tutorial : Convection over Flat Plate

Lecture 11 - Forced Convection in Ducts

Lecture 12 - Thermally Developed Slug Flow in a Duct

Lecture 13 - Thermally and Hydrodynamically Developed Flow : Uniform Heat Flux

Lecture 14 - Thermally and Hydrodynamically Developed Flow : Uniform Wall Temperature

Lecture 15 - Thermal Entrance Region : Uniform Wall Temperature

Lecture 16 - Thermal Entrance Region : Uniform Heat Flux

Lecture 17 - Rayleigh Benard Convection

Lecture 18 - Heat Transfer with Phase Change

Lecture 19 - Mass Transfer

Lecture 20 - Tutorial : Convection inside Duct and Mass Transfer

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

NPTEL : NOC:Introduction to Mechanical Vibration (Mechanical Engineering)

Co-ordinators : Prof. Anil Kumar

Lecture 1 - Lesson 1 - Introduction

Lecture 2 - Lesson 2 - Addition of two harmonic motions and beat phenomenon

Lecture 3 - Lesson 3 - Fourier series and harmonic analysis

Lecture 4 - Lesson 4 - Vibration analysis procedure

Lecture 5 - Lesson 5 - Numerical problems

Lecture 6 - Lesson 1 - Undamped free vibration

Lecture 7 - Lesson 2 - Energy method

Lecture 8 - Lesson 3 - Damped free vibration

Lecture 9 - Lesson 4 - Viscous damped systems and logarithmic decrement

Lecture 10 - Lesson 5 - Coulomb damping

Lecture 11 - Lesson 1 - Harmonic excitations

Lecture 12 - Lesson 2 - Magnification factor and frequency response curve

Lecture 13 - Lesson 3 - Rotating unbalance

Lecture 14 - Lesson 4 - Excitation of the support

Lecture 15 - Lesson 5 - Energy input and dissipation by viscous damping

Lecture 16 - Lesson 1 - Coulomb damping and equivalent viscous damping

Lecture 17 - Lesson 2 - Structural damping and equivalent viscous damping

Lecture 18 - Lesson 3 - Vibration isolation and force transmissibility

Lecture 19 - Lesson 4 - Motion transmissibility

Lecture 20 - Lesson 5 - Numerical problems

Lecture 21 - Lesson 1 - Transducers and vibration pickup

Lecture 22 - Lesson 2 - Vibrometer

Lecture 23 - Lesson 3 - Accelerometer

Lecture 24 - Lesson 4 - Velocity pickup or Velometer

Lecture 25 - Lesson 5 - Phase distortion and frequency measurement

Lecture 26 - Lesson 1 - Undamped free vibration

Lecture 27 - Lesson 2 - Principal modes of vibration

Lecture 28 - Lesson 3 - Combined rectilinear and angular modes

Lecture 29 - Lesson 4 - Damped free vibration

Lecture 30 - Lesson 5 - Undamped forced vibration with harmonic excitation

Lecture 31 - Lesson 1 - Undamped dynamic vibration absorber

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Lesson 2 - Tuned absorber

Lecture 33 - Lesson 3 - Numerical problems

Lecture 34 - Lesson 4 - Damped dynamic vibration absorber

Lecture 35 - Lesson 5 - Optimally tuned vibration absorber

Lecture 36 - Lesson 1 - Undamped free vibration

Lecture 37 - Lesson 2 - Eigen values and eigen vectors

Lecture 38 - Lesson 3 - Flexibility influence coefficients

Lecture 39 - Lesson 4 - Stiffness influence coefficients

Lecture 40 - Lesson 5 - Static and dynamic coupling

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Joining Technologies for Metals (Mechanical Engineering)

Co-ordinators : Prof. Dheerendra Kumar Dwivedi

Lecture 1 - Introduction: Manufacturing and Joining

Lecture 2 - Fundamental mechanisms of Joining

Lecture 3 - Classification of Joining Processes

Lecture 4 - Heat Generation in Welding

Lecture 5 - Protection of Weld Metal

Lecture 6 - Principle of Fusion Welding Processes: Gas Welding

Lecture 7 - Fundamentals of Welding

Lecture 8 - Physics of Welding Arc

Lecture 9 - Shielded Metal Arc Welding

Lecture 10 - Gas Tungsten Arc Welding

Lecture 11 - Newer variants of Gas tungsten arc welding

Lecture 12 - Gas metal arc welding

Lecture 13 - Submerged arc welding

Lecture 14 - Electro-slag and Electro-gas welding

Lecture 15 - Laser beam welding

Lecture 16 - Brazing

Lecture 17 - Soldering and braze welding

Lecture 18 - Fundamentals of resistance welding

Lecture 19 - Resistance welding processes: spot and seam welding

Lecture 20 - Flash butt welding

Lecture 21 - Adhesive joining

Lecture 22 - Weld bonding

Lecture 23 - Solid state joining technologies: Fundamentals

Lecture 24 - Ultrasonic welding

Lecture 25 - Diffusion welding

Lecture 26 - Explosive welding

Lecture 27 - Magnetic pulse welding

Lecture 28 - Weld thermal cycle

Lecture 29 - Heat affected zone and weld thermal cycle - I

Lecture 30 - Heat affected zone and weld thermal cycle - II

Lecture 31 - Solidification of weld metal

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Metallurgical transformations in weld and heat affected zone of steels

Lecture 33 - Residual Stresses in Weld Joints

Lecture 12 - Casting: Terminology

Lecture 13 - The Pattern Allowances - I

Lecture 14 - The Pattern Allowances - II

Lecture 15 - Casting: Sand Moulding - l

Lecture 16 - Sand Moulding - II

Lecture 17 - Casting: Core and Core Prints

Lecture 18 - Casting: Gating System

Lecture 19 - Casting: Yield and Riser Design

Lecture 20 - Casting: Riser Design

Lecture 21 - Casting: Cleaning of Castings

Lecture 22 - Casting: Casting Defects and their Preventions

Lecture 23 - Casting: Shell Mould Casting

Lecture 24 - Casting: Investment and Permanent Mould Casting

Lecture 25 - Metal Working Processes: Hot and Cold Working

Lecture 26 - Metal Working Processes: Rolling

Lecture 27 - Metal Working Processes: Forging

Lecture 28 - Metal Working Processes: Extrusion

Lecture 29 - Metal Working Processes: Wire Drawing

Lecture 30 - Metal Working Processes: Press

Lecture 31 - Sheet Metal Operations: Shearing

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Metal Working Processes: Sheet Metal Operations - II

Lecture 33 - Metal Working Processes: Sheet Metal Operations - III

Lecture 34 - Metal Working Processes: Dies and Die sets

Lecture 35 - Material Removal Processes: Machining

Lecture 36 - Material Removal Processes: Mechanism of Metal Cutting

Lecture 37 - Material Removal Processes: Chip Formation

Lecture 38 - Material Removal Processes: Types of Chips and Power Consumption

Lecture 39 - Material Removal Processes: Heat Generation

Lecture 40 - Material Removal Processes: Tool Failure and Tool Life

Lecture 41 - Material Removal Processes: Tool materials

Lecture 42 - Material removal processes: Cutting fluids

Lecture 43 - Material removal processes: Grinding - I

Lecture 44 - Material removal Processes: Grinding - II

Lecture 45 - Material removal Processes: Grinding - III

Lecture 46 - Material removal processes: Grinding operations

Lecture 47 - Joining of metals: Fundamentals - I

Lecture 48 - Joining of metals: Fundamentals - II

Lecture 49 - Joining of metals: Welding processes - I

Lecture 50 - Brazing, soldering and weldability

Lecture 51 - Weldability and welding defects

Lecture 52 - Heat treatment: Fundamentals - I

Lecture 53 - Heat treatment: Fundamentals - II

Lecture 54 - Heat treatment: Fundamentals - III

Lecture 55 - Heat treatment: Normalizing and hardening

Lecture 56 - Heat treatment: Tempering

Lecture 57 - Improving surface properties: Introduction

Lecture 58 - Improving surface properties: Surface modification processes I

Lecture 59 - Improving surface properties: Changing chemical composition

Lecture 60 - Improving surface properties: Coating

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Modelling and Simulation of Discrete Event System (Mechanical Engineering)

Co-ordinators : Dr. Pradeep K. Jha

Lecture 1 - Introduction to Simulation

Lecture 2 - Concept of System, Model and Simulation

Lecture 3 - Time advance mechanism, Components of a simulation model

Lecture 4 - Program organization and logic, Steps in a simulation study

Lecture 5 - Simulation examples

Lecture 6 - Statistical Models in Simulation

Lecture 7 - Input probability distribution functions for discrete systems

Lecture 8 - Continuous distribution functions

Lecture 9 - Continuous distribution functions and empirical distribution functions

Lecture 10 - Problem solving on statistical models in simulation

Lecture 11 - Characteristics of a queueing system

Lecture 12 - Performance measures of queueing system

Lecture 13 - Analysis of a single server queueing system

Lecture 14 - Simulation of a single server queueing system

Lecture 15 - Computer representation of simulation of single server queuing system

Lecture 16 - Generation of Random Numbers

Lecture 17 - Issues and Challenges in Congruential Generators

Lecture 18 - Testing of random numbers

Lecture 19 - Generation of Random Variates

Lecture 20 - Problem Solving on Random Number and Random Variate Generation

Lecture 21 - Input modeling: Identifying distributions with data

Lecture 22 - Input modeling: Estimation of parameters

Lecture 23 - Input modeling: Goodness-of-fit tests and assessing sample dependence

Lecture 24 - Input modeling: Multivariate input models

Lecture 25 - Problem Solving on input modeling

Lecture 26 - Output analysis of a single system: Introduction

Lecture 27 - Obtaining a specified precision

Lecture 28 - Comparison of alternative system configurations

Lecture 29 - Confidence Intervals for comparing more than two systems

Lecture 30 - Problem Solving on output analysis of single and alternative systems

Lecture 31 - Introduction to simulation of manufacturing and material handling system

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Issues in material handling system

Lecture 33 - Modeling of system randomness: Machine downtime

Lecture 34 - Verification of simulation models

Lecture 35 - Model validity and credibility

Lecture 36 - Problem solving and case studies on simulation of manufacturing system

Lecture 37 - Introduction to Monte Carlo Simulation

Lecture 38 - Inventory Control Simulation using Monte Carlo Technique

Lecture 39 - In this lecture, Monte Carlo technique was used to solve inventory system problems

Lecture 40 - Problem solving on Monte Carlo Simulation

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Processing of Polymers and Polymer Composites (Mechanical Engineering)

Co-ordinators : Dr. Inderdeep Singh

Lecture 1 - Introduction to course

Lecture 2 - Engineering materials and processing techniques

Lecture 3 - Thermoplastics and thermosets

Lecture 4 - Processing of polymers

Lecture 5 - Thermoforming processes

Lecture 6 - Extrusion - I

Lecture 7 - Extrusion - II

Lecture 8 - Compression molding

Lecture 9 - Injection molding - I

Lecture 10 - injection molding - II

Lecture 11 - Transfer molding

Lecture 12 - Rotational molding

Lecture 13 - Blow molding

Lecture 18 - Solution of Radiative Transfer Equation

Lecture 19 - Radiative Heat Transfer in Cylindrical Media

Lecture 20 - Approximate Methods-I

Lecture 21 - Approximate Methods-II

Lecture 22 - The Method of Spherical Harmonics (PN Approximation) - I

Lecture 23 - The Method of Spherical Harmonics (PN Approximation) - II

Lecture 24 - Discrete Ordinate Method (DOM)

Lecture 25 - Zone Method

Lecture 26 - Exchange Areas

Lecture 27 - Monte Carlo Method for Thermal Radiation - I

Lecture 28 - Monte Carlo Method for Thermal Radiation - II

Lecture 29 - Radiative Properties of Gases

Lecture 30 - Atomic and Molecular Spectra

Lecture 31 - Line Radiation

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Spectral Modelling

Lecture 33 - Wide Band Models

Lecture 34 - WSGG Model

Lecture 35 - k-Distribution Model

Lecture 36 - Radiative Properties of Particulate Media

Lecture 37 - Combustion and Flame

Lecture 38 - Solar and Atmospheric Radiation

Lecture 39 - Concentrated Solar Collector

Lecture 40 - Experimental Methods

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Weldability of Metals (Mechanical Engineering)

Co-ordinators : Dr. D. K. Dwivedi

Lecture 1 - Understanding Weldability: Introduction - I

Lecture 2 - Understanding Weldability: Introduction - II

Lecture 3 - Metal Properties and Weldability - I

Lecture 4 - Metal Properties and Weldability - II

Lecture 5 - Weldability of Work Hardenable Metals

Lecture 6 - Weldability of Work Hardenable and Precipitation Strengthened Metals

Lecture 7 - Weldability of Precipitation Strengthened Metals

Lecture 8 - Weldability of Metals Strengthened by Grain Refinement, dispersion Hardening and Transformation Hardening

Lecture 9 - Weldability of Transformation Hardening Metals

Lecture 10 - Weldability of Metals: Combination of Strengthening Mechanisms

Lecture 11 - Weldability Consideration

Lecture 12 - Weldability of Carbon and Alloy Steel - I

Lecture 13 - Weldability of Carbon and Alloy Steel - II

Lecture 14 - Weldability of Carbon and Alloy Steel - III

Lecture 15 - Weldability of Low Carbon Steel and Mild Steel

Lecture 16 - Weldability of Medium Carbon Steel and High Carbon Steel

Lecture 17 - Weldability of Carbon and Welding Processes - I

Lecture 18 - Weldability of Carbon and Welding Processes - II

Lecture 19 - Weldability of Carbon Steel and Welding Processes - III

Lecture 20 - Weldability of Carbon Steel and Radiation Welding and Thermal Cutting

Lecture 21 - Weldability of High Strength Low Alloy Steels

Lecture 22 - Weldability of Q&T Steels - I

Lecture 23 - Weldability of Q&T Steels - II

Lecture 24 - Weldability of Q&T Steels - III

Lecture 25 - Weldability of Q&T Steels - IV

Lecture 26 - Weldability of HTLA Steel - I

Lecture 27 - Weldability of HTLA Steel - II

Lecture 28 - Weldability of Cr-Mo Steel - I

Lecture 29 - Weldability of Cr-Mo Steel - II

Lecture 30 - Weldability of Cr-Mo Steel - III

Lecture 31 - Weldability of Pre-Coated Steel - I

NPTEL : NOC:Financial Mathematics (Mechanical Engineering)

Co-ordinators : Dr. Pradeep K. Jha

Lecture 1 - Introduction to Financial Mathematics

Lecture 2 - Important Mathematical Functions and its Characteristics

Lecture 3 - Progressions and Series, Growth and Decay Curves

Lecture 4 - Statistical Measures

Lecture 5 - Problem Solving on Mathematical Functions and Statistical Measures

Lecture 6 - Interest and Interest Rate, Time Value of Money

Lecture 7 - Simple Discount, Focal Date and Equation of Value

Lecture 8 - Introduction to Bank Discount

Lecture 9 - Introduction to Compound Interest

Lecture 10 - Problem Solving on Simple Interest and Bank Discount

Lecture 11 - Introduction to Discrete Compounding and Discrete Payments

Lecture 12 - Equal Payment Series and Gradient Series Factors

Lecture 13 - Geometric Gradient Series Factors

Lecture 14 - Annuities Due and Annuities Deferred

Lecture 15 - Problem Solving on Compounding Factors

Lecture 16 - Compounding Frequency of Interest

Lecture 17 - Interest Factors for Continuous Compounding

Lecture 18 - Introduction to Economic Equivalence

Lecture 19 - Principles of Equivalence

Lecture 20 - Problem Solving on Compounding Frequency and Economic Equivalence

Lecture 21 - Methods of Comparison of Alternatives

Lecture 22 - Payback Period

Lecture 23 - Capitalized Equivalent and Capital Recovery with Return

Lecture 24 - Project Balance

Lecture 25 - Problem Solving on Alternatives Comparison and Project Balance

Lecture 26 - Analysis of Credit and Loans

Lecture 27 - Assessing Interest and Structured Payments in Loans

Lecture 28 - Introduction to Cost of Credit and Amortization

Lecture 29 - Analysis of Amortization Schedule

Lecture 30 - Graduated Payment Mortgage, Sinking Funds

Lecture 31 - Introduction to Depreciation and Depletion

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Types of Depreciation: SL Method and Declining Balance Method

Lecture 33 - Tax Depreciation Methods

Lecture 34 - SOD and UOP Method of Depreciation, Depletion

Lecture 35 - Problem Solving on Depreciation and Depletion

Lecture 36 - Introduction to Break-Even Analysis

Lecture 37 - Analysis of Break-Even Time and Dual Break-Even Points

Lecture 38 - Economic Order Quantity

Lecture 39 - Introduction to Leverage

Lecture 40 - Financial Leverage and Total Leverage

Lecture 41 - Introduction to Stocks

Lecture 42 - Stock Valuation

Lecture 43 - Two Stage Dividend Growth and Preferred Stocks

Lecture 44 - Introduction to Bonds

Lecture 45 - Bond Premium and Discount, Bond Purchase

Lecture 46 - Introduction to Mutual funds

Lecture 47 - Performance Measures

Lecture 48 - Options

Lecture 49 - Option Valuation

Lecture 50 - Introduction to Cost of Capital and Ratio Analysis

Lecture 51 - Introduction to Risk Measurement

Lecture 52 - Decision-Making Under Risk

Lecture 53 - Decision Under Uncertainty

Lecture 54 - Risk Premium, Portfolio Return and Risk

Lecture 55 - Portfolio Diversification

Lecture 56 - Introduction to Insurance, Mortality Table

Lecture 57 - Pure Endowment and Life Annuities

Lecture 58 - Introduction to Life Insurance

Lecture 59 - Types of Life Insurance Policies

Lecture 60 - Reserve Funds, Property and Casualty Insurance

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 13 - Light Matter Interaction - II (Lab Demostration)

Lecture 14 - Tracer Particles for Flow Visualisation

Lecture 15 - Particle Tracking Velocimetry

Lecture 16 - Particle Image Velocimetry - I

Lecture 17 - Particle Image Velocimetry - II

Lecture 18 - Particle Image Velocimetry - III

Lecture 19 - Particle Image Velocimetry - IV

Lecture 20 - Particle Image Velocimetry - V

Lecture 21 - Particle Image Velocimetry - VI

Lecture 22 - Schlieren and Shadowgraphy

Lecture 23 - Lab Demo III: PIV and Schlieren

Lecture 24 - Introduction to optical methods for solids

Lecture 25 - Basics of Digital Image Correlation

Lecture 26 - Iterative implementation of DIC

Lecture 27 - Example implementations

Lecture 28 - How is a DIC experiment set up ?

Lecture 29 - DIY(C)!

Lecture 30 - Introduction to Photoelasticity

Lecture 31 - Why do we see fringes ?

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - How does light interact with matter ?

Lecture 33 - Origin of Birefringence

Lecture 34 - Loaded sample in a polarizer

Lecture 35 - Stress-induced birefringence

Lecture 36 - Analyses of optical paths using matrix methods

Lecture 37 - Putting it all together

Lecture 38 - What is tomography ?

Lecture 39 - Signal processing and Fourier methods

Lecture 40 - Rays and the Radon transforms

Lecture 41 - Geometric interpretations

Lecture 42 - The inverse problem: From Radon transform to 2D cross-section

Lecture 43 - Cone beams, parallel beams and the Feldkamp algorithm

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Statistical Thermodynamics for Engineers (Mechanical Engineering)

Co-ordinators : Prof. Saptarshi Basu

Lecture 1 - Introduction to Statistical Thermodynamics

Lecture 2 - Basic Probability Theory and Statistics

Lecture 3 - Important Probability Distributions

Lecture 4 - Combinatorial Analysis for Statistical Thermodynamics

Lecture 5 - Basic Concepts

Lecture 6 - Macrostates and Microstates

Lecture 7 - Bose Einstein and Fermi Dirac Statistics

Lecture 8 - Entropy and the equilibrium particle distribution

Lecture 9 - Operator Theory - 1

Lecture 10 - Stirling Approximation and Lagrange Multipliers

Lecture 11 - Equilibrium particle distribution

Lecture 12 - The Dilute Limit and Concept of Molecular Partition Function

Lecture 13 - The Molecular Partition Function and its relationship with Classical Thermodynamics

Lecture 14 - Historical Survey of Quantum Mechanics

Lecture 15 - Operator Theory - 2

Lecture 16 - Operator Theory - 3

Lecture 17 - Bohr Model for the Spectrum of Atomic Hydrogen

Lecture 18 - Heuristic Introduction to the Schrodinger Equation

Lecture 19 - The postulates of Quantum Mechanics

Lecture 20 - The Steady State Schrodinger Equation: Single Particle Analysis

Lecture 21 - Coordinate System - 1

Lecture 22 - Coordinate System - 2

Lecture 23 - Coordinate System - 3

Lecture 24 - The Steady State Schrodinger Equation: Multiparticle analysis

Lecture 25 - The Particle in a Box

Lecture 26 - The Uncertainity Principle

Lecture 27 - The Pauli Exclusion and the Correspondence Principle

Lecture 28 - Problem Solving - 1

Lecture 29 - Problem Solving - 2

Lecture 30 - The Internal Motion for a two particle system

Lecture 31 - The rotational and vibrational energy mode for a diatomic molecule

Lecture 1 - The vibrating spring-mass-damper system

Lecture 2 - Power calculations in a vibrating spring-mass-damper system

Lecture 3 - Wave propagation on a string

Lecture 4 - Examples of waves on strings: finite and semi-infinite cases

Lecture 5 - General solution to 1-D wave equation: physical insights

Lecture 6 - Wave solution: real notation vs complex notation

Lecture 7 - The vibrating string with a general mechanical impedance

Lecture 8 - The forced finite string with an end mass

Lecture 9 - The one-D wave solution: physical insights

Lecture 10 - Longitudinal wave propagation in a rod

Lecture 11 - Forced semi-infinite and finite rods

Lecture 12 - The derivation of the acoustic wave equation

Lecture 13 - The derivation of the acoustic wave equation (Continued...)

Lecture 14 - The derivation of the acoustic wave equation (Continued...)

Lecture 15 - The derivation of the acoustic wave equation (Continued...)

Lecture 16 - Sound propagation in piston driven semi-infinite and finite ducts

Lecture 17 - Acoustics inside a piston driven finite duct with a general end impedance

Lecture 18 - Time averaged power in a 1-D acoustic wave

Lecture 19 - The Free Space Green Function in acoustics

Lecture 20 - The Free Space Green Function (Continued...)

Lecture 21 - Various Green Functions and their uses

Lecture 22 - Derivation of the interior Kirchhoff Helmholtz Integral Equation

Lecture 23 - Derivation of the exterior Kirchhoff Helmholtz Integral Equation

Lecture 24 - Acoustic wave equation in spherical coordinates

Lecture 25 - Legendre polynomials, spherical harmonics, orthogonality relations

Lecture 26 - Spherical harmonics, Legendre polynomials and their orthogonality relations (Continued...)

Lecture 27 - Interior Neumann Green function

Lecture 28 - Exterior Neumann and Dirichlet Green functions

Lecture 29 - Pulsating sphere using the exterior Neumann Green function

Lecture 30 - Equivalence of Neumann Green function and separation of variables solution

Lecture 31 - Sound from a pulsating sphere using boundary matching technique

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Sound from a pulsating sphere using boundary matching technique (Continued...)

Lecture 33 - Sound radiation from a spherical cap on a rigid sphere using the Neumann Green function

Lecture 34 - Scattering of a plane acoustic wave from a rigid sphere

Lecture 35 - Example to show that the surface in the KHIE is notional (not actual)

Lecture 36 - The Rayleigh Integral

Lecture 37 - Sound field of an oscillating piston in a rigid baffle

Lecture 38 - Sound field of an oscillating piston in a rigid baffle (Continued...)

Lecture 39 - Physics of the sound field of an oscillating piston in a rigid baffle

Lecture 40 - Physics of the sound field of an oscillating piston in a rigid baffle (Continued...)

Lecture 41 - Physics of the sound field of the oscillating piston (cap) on a rigid sphere

Lecture 42 - The Sommerfeld radiation condition

Lecture 43 - Sound field inside a rigid walled box due to initial conditions

Lecture 44 - Sound field inside a rigid walled box due to a harmonic source

Lecture 45 - Sound field inside a rigid walled hollow cylinder due to initial conditions

Lecture 46 - Modeshape visualization inside a rigid walled cylinder

Lecture 47 - Sound field inside a rigid walled hollow cylinder due to initial conditions (Continued...)

Lecture 48 - Green function inside a rigid walled cylinder

Lecture 49 - Measures of sound

Lecture 50 - Measures of sound (Continued...)

Lecture 51 - Average mean square value of different frequency sinusoids

Lecture 52 - Frequency analysis of sounds in terms of third octave bands

Lecture 53 - Transient solution of the wave equation using Fourier series

Lecture 54 - Total soln of harmonically forced wave equation with initial conditions using Fourier series

Lecture 55 - Total soln of forced wave eqn with initial conditns using Laplace transform and Fourierseries

Lecture 56 - Branched systems, Helmholtz resonator

Lecture 57 - The radiation impedance and acoustic power

Lecture 58 - Acoustic potential, combined systems, special techniques for solving acoustic wave equation

Lecture 59 - Why do we take the real value of the solution in acoustic wave problems

Lecture 60 - Course summary - Part 1

Lecture 61 - Course summary - Part 2

Lecture 58 - Dislocation motion

Lecture 59 - 2D defects: Surfaces or interfaces

Lecture 60 - Free surface or external surface of the crystal

Lecture 61 - Stacking faults

Lecture 62 - Twin boundary

Lecture 63 - Grain boundary

Lecture 64 - Small angle symmetric tilt boundary

Lecture 65 - Ball bearing model

Lecture 66 - Phase diagrams: Introduction

Lecture 67 - Phases and components

Lecture 68 - Uses of phase diagrams

Lecture 69 - Phases present in the system

Lecture 70 - Composition of phases present in the system

Lecture 71 - Proportion of phases present in the system

Lecture 72 - Microstructure evolution during solidification in isomorphous systems

Lecture 73 - Eutectic system

Lecture 74 - Eutectic reaction

Lecture 75 - Eutectic, hypoeutectic and hypereutectic alloys

Lecture 76 - Gibbsâ€™ phase rule

Lecture 77 - Fe-C phase diagram

Lecture 78 - Eutectoid, hypoeutectoid and hypereutectoid steels

Lecture 79 - Microstructure of a hypoeutectoid steel

Lecture 80 - Microstructure of a hypereutectoid steel

Lecture 81 - Diffusion: Introduction

Lecture 82 - Fickâ€™s first law

Lecture 83 - Fickâ€™s second law

Lecture 84 - Error function solution of Fickâ€™s second law

Lecture 85 - Atomic mechanisms of diffusion

Lecture 86 - Substitutional diffusion revisited

Lecture 87 - Diffusion paths

Lecture 88 - Steady and unsteady state diffusion

Lecture 89 - Phase Transformation

Lecture 90 - Nucleation

Lecture 91 - Nucleation and capillary rise

Lecture 92 - Nucleation, growth and overall transformation

Lecture 93 - Time-temperature-transformation (TTT) diagram

Lecture 94 - Homogeneus and heterogeneous nucleation

Lecture 95 - Heat treatment of steels

Lecture 96 - TTT diagram of Eutectoid Steels

Lecture 97 - Quenching and martensite

Lecture 98 - Austempering and bainite

Lecture 99 - Tempering

Lecture 100 - Residual stresses and Quench cracks

Lecture 101 - Marquenching and martempering

Lecture 102 - TTT diagram of hypoeutectoid and hypereutectoid steels

Lecture 103 - TTT diagram of alloy steel

Lecture 104 - hardenability of steels

Lecture 105 - Glass Ceramics

Lecture 106 - Tensile test

Lecture 107 - Plastic deformation and crystal structure

Lecture 108 - Shape change

Lecture 109 - Slip

Lecture 110 - Resolved shear stress

Lecture 111 - CRSS

Lecture 112 - Schmid's law

Lecture 113 - CRSS:Theory vs experiment

Lecture 114 - Why is experimental CRSS less than theoretical CRSS

Lecture 115 - Strengthening mechaniksms

Lecture 116 - Dislocation density

Lecture 117 - Frank-Read source

Lecture 118 - strain hardening

Lecture 119 - Dislocation interaction leading to strain hardening - I

Lecture 120 - Dislocation interaction leading to strain hardening - II

Lecture 121 - Solid solution hardening

Lecture 122 - Grain size hardening

Lecture 123 - Age hardening - I

Lecture 124 - Age hardening - II

Lecture 125 - Metastable precipitates

Lecture 126 - Annealing of cold-worked metals

Lecture 127 - Recovery

Lecture 128 - Recrystallization

Lecture 129 - Grain Growth

Lecture 130 - True stress and true strain

Lecture 131 - Creep

Lecture 132 - Effect of stress and temperature on creep

Lecture 133 - Creep Mechanisms

Lecture 134 - Composites

Lecture 135 - Isostrain modulus

Lecture 136 - Isostress modulus

Lecture 137 - Fracture

Lecture 138 - Ductile and Brittle Fracture

Lecture 139 - Role of crack size

Lecture 140 - Griffith's Criterion

Lecture 141 - Stress Concentration

Lecture 142 - Ductile to brittle transition

Lecture 143 - Enhancing fracture resistance

Lecture 144 - Toughening of glass: Tempering

Lecture 145 - Toughening of glass: Ion-Exchange

Lecture 146 - Fatigue

Lecture 147 - Sub-Critical crack growth

Lecture 20 - Microstructural Evolution of Monotectic Phase Diagram

Lecture 21 - Free Energy Composition diagrams for Monotectic systems and Syntactic phase diagram

Lecture 22 - Quasichemical theory - I

Lecture 23 - Quasichemical theory - II

Lecture 24 - Quasichemical theory Free enegy formalism

Lecture 25 - Solid state reaction

Lecture 26 - Introduction to Iron-Carbon phase diagram

Lecture 27 - Eutectoid transformation in Iron-Carbon phase diagram

Lecture 28 - Austenite to pearlite transformation in Iron-Carbon phase diagram

Lecture 29 - Hypo-eutectoid steels

Lecture 30 - Pearlite Transformation

Lecture 31 - Martensite Transformation - I

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Martensite Transformation - II

Lecture 33 - Tempering of Martensite

Lecture 34 - Bainite Transformation

Lecture 35 - TTT curves for Steel

Lecture 36 - Cast Iron - I

Lecture 37 - Cast Iron - II

Lecture 38 - Ductile Iron and Nodular Iron

Lecture 39 - Malleable Iron

Lecture 40 - Alloyed Cast Iron

Lecture 41 - Phase Diagram for different Solid State Reaction

Lecture 42 - Phase Diagram of Ceramic

Lecture 43 - Ternary Phase Diagram - I

Lecture 44 - Ternary Phase Diagram - II

Lecture 45 - Ternary Phase Diagram and Tie Line Construction - I

Lecture 46 - Ternary Phase Diagram and Tie Line Construction - II

Lecture 47 - Ternary Phase Diagram and Tie Line Construction - III

Lecture 48 - Ternary Isomorphous Phase Diagram

Lecture 49 - Ternary Three Phase Equilibria

Lecture 50 - Three Phase Equilibria in Ternary Systems - I

Lecture 51 - Three Phase Equilibria in Ternary Systems - II

Lecture 52 - Solidification Behaviour of Ternary Alloy

Lecture 53 - Three Phase Equilibria

Lecture 54 - Ternary Four Phase Equilibria - I

Lecture 55 - Ternary Four Phase Equilibria - II

Lecture 56 - Solidification Behaviour of Ternary Eutectic Alloys

Lecture 57 - Phase Diagram of Ternary Eutectic with Terminal Solid Solution

Lecture 58 - Ternary Peritectic Reaction

Lecture 59 - Quasi-peritectic Reaction

Lecture 60 - Case Studies on Ternary Phase Diagrams - I

Lecture 61 - Case Studies on Ternary Phase Diagrams - II

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fundamentals of Material Processing - I (Metallurgy and Material Science)

Co-ordinators : Prof. Shashank Shekhar

Lecture 1 - Introduction

Lecture 2 - Solidification (Casting)

Lecture 3 - Solidification (Welding)

Lecture 4 - Thermodynamics of Solidification

Lecture 5 - Kinetics of Solidification (Homogeneous)

Lecture 6 - Kinetics of Solidification (Heterogeneous)

Lecture 7 - Heat Flow

Lecture 8 - Heat Flow (Continued...)

Lecture 9 - Heat Flow (Insulating Mold Condition)

Lecture 10 - Heat Flow (Insulating Mold Condition) (Continued...)

Lecture 11 - Heat Flow (Interface Resistance Controlled Solidification)

Lecture 12 - Heat Flow (Effect of Superheat)

Lecture 13 - Heat Flow (Solidification of Alloys)

Lecture 14 - Composition Variation

Lecture 15 - Composition Variation (Continued...)

Lecture 16 - Complete and Limited Liquid Diffusion

Lecture 17 - Mixed Mode Solidification

Lecture 18 - Mixed Mode Solidification and Zone Refining

Lecture 19 - Zone Refining (Continued...)

Lecture 20 - Cellular Solidification of Single Phase Alloy

Lecture 21 - Cellular Solidification of Single Phase Alloy (Continued...)

Lecture 22 - Cellular Solidification of Single Phase Alloy (Continued...)

Lecture 23 - Plane Front Solidification of Multiphase Alloy

Lecture 24 - Plane Front Solidification of Multiphase Alloy (Continued...)

Lecture 25 - Fluid Flow Considerations

Lecture 26 - Introduction to Powder Processing

Lecture 27 - Introduction to Powder Processing (Continued...)

Lecture 28 - Powder characterization

Lecture 29 - Powder Characterization Techniques

Lecture 30 - Powder Characterization using Surface Area

Lecture 31 - Powder Characterization using Gas Permeability Method

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Powder Manufacturing

Lecture 33 - Powder Manufacturing (Continued...)

Lecture 36 - Diffusion in Solids - I

Lecture 37 - Diffusion in Solids - II

Lecture 38 - Diffusion in Solids - III

Lecture 39 - Diffusion in Solids - IV

Lecture 40 - Applications of heat treatment

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fundamentals of Material Processing - Part 2 (Metallurgy and Material Science)

Co-ordinators : Prof. Shashank Shekhar, Prof. Jitesh J Thakkar

Lecture 1 - Introduction to Metal Working

Lecture 2 - Continuum Mechanics

Lecture 3 - Stress Invariants

Lecture 4 - Strain Tensors and Mohr circle for strains

Lecture 5 - Yield Stress Criterion

Lecture 6 - Effective Stress and Strain

Lecture 7 - Work Hardening and Flow Behaviour

Lecture 8 - Effect of Strain Rate

Lecture 9 - Combined Effect of Strain, Strain Rate and Temperature

Lecture 10 - Effect of Temperature

Lecture 11 - Cold, Warm and Hot Working

Lecture 12 - Mechanics of Metal Working

Lecture 13 - Wire Drawing

Lecture 14 - Wire Drawing (Continued...)

Lecture 15 - Hodographs

Lecture 16 - Upper-Bound Analysis

Lecture 17 - Plane Strain Indentation

Lecture 18 - Strain Calculation Models and Friction

Lecture 19 - Types of Friction

Lecture 20 - Effect of Friction in Rolling

Lecture 21 - Vacuum Technology

Lecture 22 - Vacuum Technology (Continued...)

Lecture 23 - Thermal Evaporation

Lecture 24 - Thermal Evaporation (Continued...)

Lecture 25 - Thermal Evaporation (Continued...)

Lecture 26 - Plasma Physics

Lecture 27 - Plasma Physics (Continued...)

Lecture 28 - Sputtering

Lecture 29 - Sputtering (Continued...)

Lecture 30 - Sputtering (Continued...)

Lecture 31 - Chemical Vapor Deposition

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Chemical Vapor Deposition (Continued...)

Lecture 33 - Chemical Vapor Deposition (Continued...)

Lecture 34 - Chemical Vapor Deposition (Continued...)

Lecture 35 - Epitaxy, Molecular Beam Epitaxy and Atomic Layer Deposition

Lecture 36 - Adsorption and Nucleation

Lecture 37 - Thin Film Growth

Lecture 38 - Kinetics of Thin Film Growth

Lecture 39 - Thin Film Morphology- Zone Structure Model

Lecture 40 - Thin Film Characterization

Lecture 41 - Thin Film Characterization

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Nature and Properties of Materials - An Introductory Course (Metallurgy and Material Science)

Co-ordinators : Dr. Ashish Garg

Lecture 1 - Material Evolution

Lecture 2 - Bonding in Materials

Lecture 3 - Correlation between bond and physical properties

Lecture 4 - Crystal Structure: Lattice and Basis

Lecture 5 - Unit Cell (Primitive and Non-primitive)

Lecture 6 - Crystal Systems and Bravais Lattices

Lecture 7 - Bravais Lattice and Symmetry in Crystals

Lecture 8 - Symmetry in Crystals

Lecture 9 - Symmetry and Correlation with the Bravais Lattice

Lecture 10 - Miller Indices (Planes and Directions)

Lecture 11 - Miller Indices - Part 2

Lecture 12 - Miller Indices - Part 3

Lecture 13 - Miller Indices and Weiss Zone Law

Lecture 14 - Structure of Metals and Alloys

Lecture 15 - Structure of Metals, Packing, Co-ordination and Interstices

Lecture 16 - Interstices, Solid Solutions and Alloys

Lecture 17 - Solid Solutions: Alloys

Lecture 18 - Solid Solutions: Alloy (Continued...)

Lecture 19 - Covalent Solids

Lecture 20 - Covalent Solids (Continued...) and Ionic Solids

Lecture 21 - Ionic Solids: Stability and Rules of Formation

Lecture 22 - Ionic solids (Continued...) : Formation of structure

Lecture 23 - ionic Solids (Continued...) : Close Packing of anions

Lecture 24 - Ionic Solids (Continued...) : Other cubic structures

Lecture 25 - Ionic Solids (Ceramics) : Remaining cubic and non-cubic structures

Lecture 26 - HCP based Structure

Lecture 27 - Structure of Non-crystalline Solids (glasses)

Lecture 28 - Structure of Non-Crystalline Solids:Glasses (Continued...)

Lecture 29 - Structure of Non-Crystalline Solids (Polymers)

Lecture 30 - Structure of Polymers

Lecture 31 - Structure of Polymers (Continued...)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Corrosion Failures and Analysis (Metallurgy and Material Science)

Co-ordinators : Prof. Kallol Mondal

Lecture 1 - An introduction to corrosion failure and analysis

Lecture 2 - Various forms of corrosion

Lecture 3 - Discussion of various factors affecting corrosion

Lecture 4 - Forms of corrosion: Uniform corrosion - Part 1

Lecture 5 - Forms of corrosion: Uniform corrosion - Part 2

Lecture 6 - Galvanic corrosion - I

Lecture 7 - Galvanic corrosion - II

Lecture 8 - Galvanic corrosion - III

Lecture 9 - Galvanic corrosion - IV

Lecture 10 - Importance of galvanic series

Lecture 11 - Factors associated with galvanic corrosion: Case study 1

Lecture 12 - Factors associated with galvanic corrosion: Case study 2

Lecture 13 - Factors associated with galvanic corrosion: Case study 3

Lecture 14 - Preventive measures and advantages of galvanic corrosion

Lecture 15 - Dealloying/Selective leaching

Lecture 16 - Dealloying or selective leaching: Mechanism

Lecture 17 - Dealloying or selective leaching: Applications and protection methods

Lecture 18 - Graphitic corrosion and protection from dezincification

Lecture 19 - Intergranular Corrosion

Lecture 20 - Intergranular corrosion in case of 304, 321 and 347 stainless steel

Lecture 21 - Intergranular Corrosion: Sensitization and Weld Decay

Lecture 22 - Intergranular Corrosion: Control of Sensitization - Weld Decay

Lecture 23 - Intergranular Corrosion: Knife Line Attack and Prevention Methods

Lecture 24 - Crevice Corrosion: Introduction

Lecture 25 - Crevice Corrosion: Mechanism

Lecture 26 - Crevice corrosion: Mechanism and Various stages

Lecture 27 - Crevice corrosion: Case studies and Protection methods

Lecture 28 - Pitting corrosion: Introduction and Case studies

Lecture 29 - Various conditions favouring pitting corrosion - I

Lecture 30 - Various conditions favouring pitting corrosion - II

Lecture 31 - Various conditions favouring pitting corrosion - III

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Pitting Corrosion: Mechanism and Protection

Lecture 33 - Erosion Corrosion: Introduction

Lecture 34 - Erosion Corrosion: Characteristics

Lecture 35 - Erosion Corrosion: Protection methods and cavitation corrosion

Lecture 36 - Cavitation corrosion and its case studies

Lecture 37 - Cavitation corrosion, Fretting corrosion and their preventive measures

Lecture 38 - Environmental cracking or stress assisted corrosion failures

Lecture 39 - Stress corrosion cracking: Mechanism - I

Lecture 40 - Stress corrosion cracking: Mechanism - II

Lecture 41 - Stress corrosion cracking: Mechanism - III

Lecture 42 - Stress corrosion cracking: Corrosion fatigue and protection methods

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Nanomaterials and their Properties (Metallurgy and Material Science)

Co-ordinators : Prof. Krishanu Biswas

Lecture 1 - Nanomaterials: An Overview - Part I

Lecture 2 - Nanomaterials: An Overview - Part II

Lecture 3 - Nanomaterials: Hierarchial Nanostructures - I

Lecture 4 - Nanomaterials: Hierarchial Nanostructures - II

Lecture 5 - Nanomaterials: Surfaces and Interfaces - I

Lecture 6 - Nanomaterials: Surfaces and Interfaces - I (Continued...)

Lecture 7 - Nanomaterials: Surfaces - I

Lecture 8 - Nanomaterials: Magic Numbers

Lecture 9 - Thermodynamics of Nanomaterials

Lecture 10 - Surfaces and Interfaces - II

Lecture 11 - Thermodynamics of Nanomaterials

Lecture 12 - Surfaces and Interfaces - II (Continued...)

Lecture 13 - Nanophase Diagrams

Lecture 14 - Effect of Size on Phase Diagrams

Lecture 15 - Synthesis of Nanomaterials

Lecture 16 - Synthesis Routes of Nanomaterials - II

Lecture 17 - Mechanical Properties of Nanomaterials - I

Lecture 18 - Mechanical Properties of Nanomaterials - II

Lecture 19 - Thermal Properties of Nanomaterials - I

Lecture 20 - Thermal Properties of Nanomaterials - II

Lecture 21 - Thermal Properties of Nanomaterials - III

Lecture 22 - Thermal Properties of Nanomaterials - III (Continued...)

Lecture 23 - Electrical Property of Nanomaterials

Lecture 24 - Magnetic Properties of Nanomaterials - I

Lecture 25 - Magnetic Properties of Nanomaterials - II

Lecture 26 - Optical Properties of Nanomaterials - I

Lecture 27 - Optical Properties of Nanomaterials - II

Lecture 28 - Special Cases: Carbon-Based Nanomaterials

Lecture 29 - Special Cases: Polymer-Based Nanomaterials

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Mechanical Behaviour of Materials - Part I (Metallurgy and Material Science)

Co-ordinators : Prof. Shashank Shekhar, Prof. Sudhanshu Shekhar Singh

Lecture 1 - Introduction

Lecture 2 - Origin of Elasticity

Lecture 3 - Stress as a Tensor

Lecture 4 - Principal Stress

Lecture 5 - Mohr's Circle

Lecture 6 - Stress-Strain Relation

Lecture 7 - Viscoelasticity

Lecture 8 - Tensile Testing

Lecture 9 - Universal Testing Machine

Lecture 10 - Flow Stress

Lecture 11 - Yield Criterions: Basics

Lecture 12 - Yield Criterions: Tresca, Von-Mises

Lecture 13 - Effective Stress_Effective Strain

Lecture 14 - Plastic Instability

Lecture 15 - Effect of Strain-rate and Temperature

Lecture 16 - Dislocations: Discovery

Lecture 17 - Dislocations: Fundamentals

Lecture 18 - Dislocations: Characteristics

Lecture 19 - Stress and Strain Fields of Dislocations

Lecture 20 - Energy of Dislocations

Lecture 21 - Dislocation Motion Glide

Lecture 22 - Cross-slip of Dislocations

Lecture 23 - Climb motion of Dislocations

Lecture 24 - Steps in Dislocations

Lecture 25 - Slip Systems

Lecture 26 - More on Slip Systems

Lecture 27 - Critical Resolved Shear Stress

Lecture 28 - Dislocation Interactions

Lecture 29 - Image Forces

Lecture 30 - Partial Dislocations

Lecture 31 - Strengthening Mechanisms

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Precipitation Strengthening: Basic Criteria

Lecture 33 - Precipitation Strengthening: Precipitate Characteristics

Lecture 34 - Precipitation Strengthening: Mechanisms

Lecture 35 - Effect of Temperature: Dispersion Strengthening

Lecture 36 - Solid Solution Strengthening: Basics

Lecture 37 - Solid Solution Strengthening: Interaction with Dislocations

Lecture 38 - Solid Solution Strengthening: Yield Point Phenomenon

Lecture 39 - Grain Boundary Strengthening

Lecture 40 - Strain Hardening: Single Xtal and Poly Crystal Deformation, Tylor Hardening

Lecture 41 - Strain Hardening: Dislocation Multiplication, Intersection and Locks

Lecture 42 - Summary of Strengthening Mechanisms

Lecture 43 - Hardness Testing

Lecture 44 - Impact Testing

Lecture 45 - Mechanical Behaviour of Composites

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Mechanical Behaviour of Materials - Part II (Metallurgy and Material Science)

Co-ordinators : Prof. Sudhanshu Shekhar Singh, Prof. Shashank Shekhar

Lecture 1 - Theoretical Strength

Lecture 2 - Stress Based Approach (Inglis)

Lecture 3 - Energy Based Approach (Griifith)

Lecture 4 - Mode of Deformation and Stress Distribution Ahead of Crack Tip

Lecture 5 - Stress Triaxiality

Lecture 6 - Plastic Zone Size

Lecture 7 - Plastic Zone Size and Shape (Continued...)

Lecture 8 - Stress Intensity Factors for Different Geometries

Lecture 9 - Fracture Toughness

Lecture 10 - Fracture Toughness Measurement

Lecture 11 - Fracture Mechanisms

Lecture 12 - Ductile Fracture Mechanisms

Lecture 13 - Ductile Fracture Mechanisms_Tunneling

Lecture 14 - Cleavage Fracture

Lecture 15 - Fracture Mechanisms (Images)

Lecture 16 - Fatigue (Stress Parameters)

Lecture 17 - Fatigue Testing (S-N curve)

Lecture 18 - Low and High Cycle Fatigue

Lecture 19 - Fatigue Crack Initiation

Lecture 20 - Fatigue Crack Propagation

Lecture 21 - Fatigue Striations, Beachmarks and Images

Lecture 22 - Deformation of Composites

Lecture 23 - Deformation of Composites (Continued...)

Lecture 24 - Toughening of Ceramics

Lecture 25 - Fracture in Polymers

Lecture 56 - Intensity of diffracted beam (Continued...) and X-ray diffraction profile and analysis

Lecture 57 - X-ray diffraction profile and analysis

Lecture 58 - X-ray diffraction profile and analysis (Continued...)

Lecture 59 - X-ray diffraction profile and analysis (Continued...)

Lecture 60 - Electron backscatter diffraction (EBSD)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Electrochemical Energy Storage (Metallurgy and Material Science)

Co-ordinators : Prof. Subhasish Basu Majumder

Lecture 1 - Fundamentals of electrochemistry, definition of primary and secondary batteries

Lecture 2 - Primary batteries and Secondary batteries

Lecture 3 - Supercapacitors

Lecture 4 - Concepts of thermodynamics pertinent to electrochemical cells

Lecture 5 - Kinetics of electrochemical cells and structural characteristics of electrodes

Lecture 6 - Introduction to EMF, redox potential, Faraday law and Nernstâ€™s law

Lecture 7 - Terminology related to secondary battery : half-cell,full-cell, redox couple,positive

Lecture 8 - Measurements: Cyclic voltammetry, nominal voltage, capacity, rate performance

Lecture 9 - Impedance spectroscopy measurement and analyses

Lecture 10 - Measurement of rechargeable cell: Case study

Lecture 11 - History and categories of lithium batteries

Lecture 12 - Operational mechanisms for lithium batteries: Intercalation materials, alloys

Lecture 13 - Differences of voltage profiles between intercalation materials, alloys, and conversion

Lecture 14 - Properties of electrode materials (Case study: alloy as anode)

Lecture 15 - Properties of electrode materials (conversion type oxide as case study)

Lecture 16 - Positive electrodes: Lithiated transition metal oxides, lithiated iron oxyphosphates etc

Lecture 17 - Negative electrodes: Carbonaceous materials, lithium titanium oxides etc

Lecture 18 - Electrolyte :Liquid Electrolyte, Polymer Electrolyte

Lecture 19 - Current Collector, Conductive Agents, Separator and Other Accessories

Lecture 20 - Novel materials for lithium ion rechargeable cells

Lecture 21 - Principle of Operation of Commerical Cells : viz. C - NMC, C - NCA etc

Lecture 22 - Principle of operation of commercial cells

Lecture 23 - Major characteristics of commercial Li ion cells: Cell performance,degradation phenomena

Lecture 24 - Fabrication of Li ion cell: Cylindrical configuration

Lecture 25 - Fabrication of Li ion cell: Pouch and prismatic cell

Lecture 26 - Positive electrodes: Layered oxide, polyanionic compounds (phosphates, sulphates etc)

Lecture 27 - Negative electrodes: Carbonaceous materials, alloy based and other materials

Lecture 28 - Electrolytes: Roles and requirements, organic electrolyte, ionic liquid electrolyte

Lecture 29 - Performance of Na ion rechargeable cell

Lecture 30 - Future perspective of Na ion cells

Lecture 31 - Introduction to battery module, BMS, thermal management and pack design

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Degradation and safety issues of Li ion rechargeable cells

Lecture 33 - Introduction to battery management system: BMS topologies, hardware, concept of active

Lecture 34 - Introduction to thermal management: Active thermal management system, passive thermal

Lecture 35 - Packaging of battery pack and battery testing: Material selection, sealing of enclosure

Lecture 36 - Classification of supercapacitors: EDLC and pseudocapacitative type

Lecture 37 - Pseudocapacitor

Lecture 38 - Asymmetric supercapacitor and BATCAP: Battery supercapacitor hybrid electrochemical

Lecture 39 - Electrolytes for supercapacitors: Aqueous/organic liquid electrolytes/ionic liquid

Lecture 40 - Current collectors, separators etc. and their effect on performance

Lecture 41 - Operational principles of aqueous and Li - O2 batteries

Lecture 42 - Electrolytes for Li - O2 batteries

Lecture 43 - Limitations of Li - Air batteries

Lecture 44 - State of the art Li - Air batteries : Carbonaceous materials

Lecture 45 - State of the art Li - Air batteries: Case study

Lecture 46 - The element sulfur, principle of operation

Lecture 47 - Advantages and disadvantages of Li - S batteries, positive electrodes

Lecture 48 - Electrolyte and negative electrode for Li - S battery

Lecture 49 - State of the art Li - S batteries : Case study - I

Lecture 50 - State of the art Li - S batteries : Case study - II

Lecture 51 - Global Geographic Distribution of Raw Lithium Resources

Lecture 52 - Nature and geological origin of all potential lithium resources

Lecture 53 - State of the art extraction techniques and known production reserves

Lecture 54 - Recycling of lithium and other battery constituents from used battery

Lecture 55 - Recycling of lithium and other battery constituents from used battery (Continued...)

Lecture 56 - Lead Acid Batteries: Operational principles, main characteristics and applications

Lecture 57 - Lead Acid Batteries: Operational principles, main characteristics and applications (Continued...)

Lecture 58 - Ni-Cd and Ni-MeH Batteries: Operational principles, main characteristics and applications

Lecture 59 - Redox flow battery vanadium redox battery,operational principle, and main characteristics

Lecture 60 - Other Redox Flow Battery Technologies

NPTEL : NOC:Texture in Materials (Metallurgy and Material Science)

Co-ordinators : Prof. Somjeet Biswas

Lecture 1 - Introduction

Lecture 2 - Texture and Anisotropy

Lecture 3 - Processing - Texture - Anisotropic Properties

Lecture 4 - Crystal Structure and Stereographic Projections

Lecture 5 - Utilization of Stereographic Projections

Lecture 6 - Diffraction and Bragg's Law

Lecture 7 - Structure Factor and Diffraction Extinction Criteria

Lecture 8 - Structure factor and diffraction extinction criteria (Continued...)

Lecture 9 - Pole figures

Lecture 10 - Pole figures (Continued...)

Lecture 11 - Inverse Pole Figures

Lecture 12 - Three Dimensional Texture Analysis

Lecture 13 - Euler Angles and ODFs

Lecture 14 - Euler Angles and ODFs (Continued...)

Lecture 15 - Euler Angles and ODFs (Continued...)

Lecture 16 - Euler Angles and ODFs (Continued...)

Lecture 17 - Symmetry Effects on Orientation Matrix

Lecture 18 - Euler Space and Orientation Matrices

Lecture 19 - Texture Fibre, Periodicity in Euler Space, Incomplete Pole Figures

Lecture 20 - Crystal Structures and Symmetry

Lecture 21 - Size of Euler Space in Relation to Crystal and Sample Symmetry

Lecture 22 - Macrotexture and Microtexture Measurements

Lecture 23 - Penetration Depth of X-ray, Neutron, e-1 and Basics of X-ray Generation

Lecture 24 - Characteristic X-ray, Absorption and Filters

Lecture 25 - Principles of pole figure measurements by X-ray diffraction

Lecture 26 - Texture Goniometer Components

Lecture 27 - Limitations and Errors in X-ray Texture Measurement and Corrections

Lecture 28 - Basics of Electron Microscopy - I

Lecture 29 - Basics of Electron Microscopy - II

Lecture 30 - Kikuchi Diffraction Pattern - I

Lecture 31 - Kikuchi Diffraction Pattern - II

Lecture 32 - Quantitative Evaluation of Kikuchi Diffraction Pattern - I

Lecture 33 - Quantitative evaluation of Kikuchi Diffraction Pattern - II

Lecture 34 - Quantitative evaluation of Kikuchi Diffraction Pattern - III

Lecture 35 - Analysis using the TSL-OIM software

Lecture 36 - Analysis using the AZtec Crystal software

Lecture 37 - Analysis using the ATEX software

Lecture 38 - Introduction to solidification texture

Lecture 39 - Solidification texture in Alloys

Lecture 40 - Solidification texture in FCC, BCC, and HCP structures

Lecture 41 - Phase Transformation Texture and Bain Strain

Lecture 42 - Orientation Relationships between FCC and BCC / BCT

Lecture 43 - Various Orientation Relationships and Variants

Lecture 44 - Basic Mechanics of Polycrystal Plasticity

Lecture 45 - Basic Mechanics of Polycrystal Plasticity (Continued...)

Lecture 46 - A Metallurgist Point of View

Lecture 47 - A Metallurgist Point of View (Continued...)

Lecture 48 - Texture in FCC polycrystals

Lecture 49 - Texture in BCC polycrystals - I

Lecture 50 - Texture in BCC polycrystals - II

Lecture 51 - Texture in HCP polycrystals - I

Lecture 52 - Texture in HCP polycrystals - II

Lecture 53 - Texture in HCP polycrystals - III

Lecture 54 - Static recrystallization

Lecture 55 - Dynamic recrystallization and recrystallization texture

Lecture 56 - Dynamic recrystallization and grain refinement during hot large strain shear

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Bulk Material Transport and Handling Systems (Metallurgy and Material Science)

Co-ordinators : Prof. Khanindra Pathak

Lecture 1 - Classification of Mining and Bulk Sold Handling Systems

Lecture 2 - Properties of bulk material vis-a-vis different bulk handling operations

Lecture 3 - Fundamentals of BMH and Transport: Capacity and Productivity Concepts

Lecture 4 - Bulk material handling in Processing plants: Crushing and Screening Flow Charts

Lecture 5 - Introduction to Bulk Material Transport and Autonomous Vehicles

Lecture 6 - Constructional Components: Trends of Developments

Lecture 7 - Belt Conveyor Construction: Belting for Bulk Material Conveyor

Lecture 8 - Idlers and Belt Cleaners

Lecture 9 - Feeding and Discharging Devices

Lecture 10 - Safety and Troubleshooting

Lecture 11 - Size Selection and Power Calculation

Lecture 12 - Principle of operations and applicability

Lecture 13 - Basic Design Calculations

Lecture 14 - Introduction to Pneumatic Conveying systems

Lecture 15 - Design Calculations for Pneumatic Conveying

Lecture 16 - Exercise with Basic Design Calculations

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Advanced Metallurgical Thermodynamics (Metallurgy and Material Science)

Co-ordinators : Prof. B.S. Murty

Lecture 1 - Basic definitions

Lecture 2 - Free energy, Stability, equilibrium in a unary system

Lecture 3 - Effect of Pressure on equilibrium transformations: Clausius Clapeyron equation, phase diagram for unary system

Lecture 4 - Free energy of solutions, free energy-composition diagrams

Lecture 5 - Solution models, chemical potential

Lecture 6 - Phase rule, free energy-composition diagrams and phase diagrams

Lecture 7 - Evolution of phase diagrams

Lecture 8 - Evolution of phase diagrams, miscibility gap

Lecture 9 - To concept, partition less solidification

Lecture 10 - To concept, partition less solidification (Continued...)

Lecture 11 - Eutectic solidification, glass formation

Lecture 12 - Kauzmann paradox, order of a transformation, glass forming ability

Lecture 13 - Eutectic solidification, coupled growth, heterogeneous nucleation

Lecture 14 - Peritectic solidification, metastable phase diagrams

Lecture 15 - Errors in drawing phase diagrams, Fe-C vs. Fe-Fe3C phase diagram

Lecture 16 - Free energy of undercooled liquid, shape of nucleus

Lecture 17 - Solid state phase transformations - Precipitation

Lecture 18 - Precipitation

Lecture 19 - Precipitation - quasicrystals

Lecture 20 - Precipitate coarsening, stability of a phase, spinodal decomposition

Lecture 21 - Spinodal decomposition

Lecture 22 - Eutectioid reaction

Lecture 23 - Eutectioid reaction (Continued...)

Lecture 24 - Bainitic transformation

Lecture 25 - Kinetics of eutectoid transformations

Lecture 26 - Martensitic Transformation

Lecture 27 - Martensitic transformation, order-disorder transformation

Lecture 28 - Miscibility gap in phase diagrams

Lecture 29 - Phase diagram calculations

Lecture 30 - Thermodynamics of heterogeneous systems

Lecture 31 - Thermodynamics of heterogeneous systems (Continued...)

Lecture 9 - Carbon Equivalent, Schaeffler Diagrams

Lecture 10 - Problem solving on Phase Diagrams

Lecture 11 - Introduction to strengthening mechanism in metals

Lecture 12 - Solid solution strengthening and grain refinement

Lecture 13 - Precipitation Hardening and Martensite Strengthening

Lecture 14 - Strain Hardening and Strain Ageing

Lecture 15 - Problem solving on strengthening mechanism in metals

Lecture 16 - Introduction to Heat treatment Processes in Welding

Lecture 17 - Hardening and Hardenability

Lecture 18 - Martempering and Austempering

Lecture 19 - Case Hardening methods

Lecture 20 - Heat treatment of Non-Ferrous metals and alloys

Lecture 21 - Heat Sources in Welding

Lecture 22 - Heat Flow in Welding

Lecture 23 - Temperature Distribution in Welding

Lecture 24 - Effect of Welding Parameters

Lecture 25 - Metallurgical effect of Heat Flow on Welding

Lecture 26 - Principles of Solidification in Welding

Lecture 27 - Solute redistribution during Solidification

Lecture 28 - Constitutional Supercooling

Lecture 29 - Microsegregation and Banding

Lecture 30 - Grain Structure during Solidification in Welding

Lecture 31 - Distinct Zones in Fusion Welded Specimen

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Heat Affected Zone

Lecture 33 - Properties of Heat Affect Zone

Lecture 34 - Microstructural Products in Weldments

Lecture 35 - Introduction to Preheat and Postweld Heat Treatment

Lecture 36 - Preheat and Postweld Heat Treatment of Different Materials

Lecture 37 - Residual Stresses in Welding

Lecture 38 - Causes of Residual Stress Development in Welding

Lecture 39 - Measurement of Residual Stresses in Weldments

Lecture 40 - Controlling Residual Stresses in Weldments

Lecture 41 - Introduction to Welding Distortion

Lecture 42 - Types of Welding Distortions

Lecture 43 - Angular Distortions in Welds

Lecture 44 - Bowing, Buckling and Twisting in Welds

Lecture 45 - Control of Distortion in Welds

Lecture 46 - Introduction to Cracks in Welds

Lecture 47 - Types of Weld Cracks

Lecture 48 - Specific Weld Cracks

Lecture 49 - Chevron Cracks and Reheat Cracks

Lecture 50 - Lamellar Cracks and Stress Corrosion Cracking

Lecture 51 - Introduction to Weldability of Metals

Lecture 52 - Weldability of Carbon Steels

Lecture 53 - Weldability of Alloy Steels

Lecture 54 - Weldability of Cast Iron

Lecture 55 - Weldability of Non Ferrous Metals and Alloys

Lecture 56 - Introduction to Welding Defects

Lecture 57 - Surface and Subsurface Welding Defects

Lecture 58 - Issues in Welding: Design for Static Loading

Lecture 59 - Considerations for Fatigue Loading in Welding

Lecture 60 - Design Features for Fatigue and Static Loading in Welding

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Modeling of Tundish Steelmaking Process in Continuous Casting (Metallurgy and Material Science)

Co-ordinators : Dr. Pradeep K. Jha

Lecture 1 - Introduction to Continuous Casting Process

Lecture 2 - Role of Tundish in Continuous Casting

Lecture 3 - Types of Continuous Casting Machine

Lecture 4 - Components of Continuous Casting Unit

Lecture 5 - Tundish Metallurgy

Lecture 6 - Introduction to Physical Modeling

Lecture 7 - Concept of Similarity in Physical Modeling

Lecture 8 - Dimensional analysis

Lecture 9 - Physical Modeling of Isothermal and Non-Isothermal system

Lecture 10 - Consideration in Aqueous Modeling

Lecture 11 - Introduction to Stimulus Response Techniques

Lecture 51 - Basics of Air Pollution Issues - Global and Local

Lecture 52 - Air Pollutants and Air Pollution Index

Lecture 53 - Global Warming and Climate Change

Lecture 54 - Air Pollution Models

Lecture 55 - SDGs, Noise and Soil Pollution

Lecture 56 - Present Issues and Few Case Studies

Lecture 57 - Case Study - Solid Waste Management

Lecture 58 - Case Study - Industrial Pollution and Disasters

Lecture 59 - Case Study - Global Food Waste Initiatives

Lecture 60 - Case Study - Global Food Waste and Resource Recovery

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Biophotonics (Multi-Disciplinary)

Co-ordinators : Prof. Basudev Lahiri

Lecture 1 - Introduction to Biophotonics - Part I

Lecture 2 - Introduction to Biophotonics - Part II

Lecture 3 - Introduction to Biophotonics - Part III

Lecture 4 - Nature of Light - Part I (As Wave)

Lecture 5 - Nature of Light - Part II (As Particle)

Lecture 6 - Fact of Matter - Part I

Lecture 7 - Fact of Matter - Part II

Lecture 8 - Basic of Light-Matter Interaction

Lecture 9 - Molecular Materials

Lecture 10 - Introduction to Fluorescence

Lecture 11 - The Cell

Lecture 12 - The Central Dogma

Lecture 13 - Genetic Code

Lecture 14 - Building Blocks

Lecture 15 - Remaining Topics

Lecture 16 - Light-Matter Interactions in Molecules (Basic of Spectroscopy)

Lecture 17 - Light-Matter Interactions in Molecules (Basic of Spectroscopy) (Continued...)

Lecture 18 - Interaction of Light with Cells

Lecture 19 - Interaction of Light with Tissues

Lecture 20 - Photoprocesses in Biopolymers

Lecture 21 - Laser Principles and Operation

Lecture 22 - Types of Lasers

Lecture 23 - Nonlinear Optical Processes

Lecture 24 - In Vivo Photoexcitation

Lecture 25 - Examples and Applications

Lecture 26 - Introduction

Lecture 27 - Microscopy Techniques

Lecture 28 - Near Field Microscopy and Optical Coherence Tomography

Lecture 29 - Fluorophores and Fluorescence Microscopy Techniques

Lecture 30 - The Future: AFM-IR

Lecture 31 - Biosensing Background

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Optical Fiber Sensors

Lecture 33 - Metamaterials

Lecture 34 - Metamaterials as Biosensors

Lecture 35 - Biosensing with Optical Nano-antennas

Lecture 36 - Introduction to Photodynamic Therapy (PDT)

Lecture 37 - Application of Photodynamic Therapy (PDT)

Lecture 38 - Light Irradiation for Photodynamic Therapy (PDT)

Lecture 39 - Real Life Examples of Photodynamic Therapy (PDT)

Lecture 40 - Future of PDT and Photothermal Therapy (PTT)

Lecture 41 - Laser Based Tissue Engineering

Lecture 42 - Laser Tissue Contouring: Dermatological Application

Lecture 43 - Laser Tissue Welding and Tissue Regeneration

Lecture 44 - Laser Tissue Contouring: Ophthalmic Application

Lecture 45 - Laser in Dentistry

Lecture 46 - Tools for Micromanipulation

Lecture 47 - The Optical/Laser Tweezer

Lecture 48 - Design of Optical Tweezers

Lecture 49 - Optical Scissors

Lecture 50 - Selected Examples of Application

Lecture 51 - Introduction to nanotechnology

Lecture 52 - Processes of Nanotechnology

Lecture 53 - Nano-Lithography: The Art of Small

Lecture 54 - Thin Film Deposition

Lecture 55 - Bionanophotonics Applications

Lecture 56 - Introduction to Optogenetics

Lecture 57 - Controlling the Brain with Light

Lecture 58 - Optical Neuroimaging and Tomography

Lecture 59 - Functional Near Infrared Spectroscopy (fNIRS) of the Brain

Lecture 60 - Summary and Revisiting Few topics

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Vacuum Technology and Process Application (Multi-Disciplinary)

Co-ordinators : Prof. V. Vasudeva Rao

Lecture 1 - Introduction to Vacuum, Natural Vacuum

Lecture 2 - History of Vacuum Technology

Lecture 3 - Kinetic Theory of Gases, Physical Parameters of Vacuum and Regions of Vacuum

Lecture 4 - Vacuum Process Applications - I

Lecture 5 - Vacuum Process Applications - II

Lecture 6 - Pumping Speed and Throughput Concepts

Lecture 7 - Rotary Vacuum Pump

Lecture 8 - Diffusion Pump

Lecture 9 - Roots Vacuum Pump

Lecture 10 - Rotary Piston Pump

Lecture 11 - Liquid Ring Pump

Lecture 12 - Steam Jet Ejector

Lecture 13 - Diaphragm Pump

Lecture 14 - Claw Pump

Lecture 15 - Screw Pump

Lecture 16 - Scroll Pump, Sorption Concepts and Pumps

Lecture 17 - Ion Pumping-Sputter Ion Pump

Lecture 18 - Turbomolecular Pump

Lecture 19 - Cryopumps

Lecture 20 - Selection Criteria of Vacuum Pumps

Lecture 21 - Primary vs Secondary Gauges, U Tube/McLeod gauges (Primary)

Lecture 22 - Bourdon/Capacitance Gauges (Mechanical Deflection)

Lecture 23 - Thermo-couple/Pirani gauges (Thermal Conductivity)

Lecture 24 - Spinning Rotor/Ionization/Bayard Alpert Gauges

Lecture 25 - Penning/ Inverted Magnetron gauges, Gauge calibration

Lecture 26 - Vacuum Materials (Metals, Glasses, Ceramics, Greases and Oils)

Lecture 27 - Vacuum Components (Flanges, Couplings, Seals, Valves)

Lecture 28 - Vacuum Chamber Design

Lecture 29 - Fabrication Techniques for Vacuum Systems

Lecture 30 - Testing of Vacuum Systems for Mechanical Failures, Gas Leaks and Outgassing

Lecture 31 - Gas Flow at Low Pressures, Conductance and Effective Pumping Speed Concepts

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 19 - Basic latent factor models

Lecture 20 - Other advanced models

Lecture 21 - Introduction to content based recommender system: Foundations

Lecture 22 - Feature Engineering - I

Lecture 23 - Feature Engineering - II

Lecture 24 - Feature Engineering - III

Lecture 25 - Feature Engineering - IV

Lecture 26 - Decision Trees for content based recommendation

Lecture 27 - NaÃƒÂ¯ve Bayes classifier for content based recommendation

Lecture 28 - kNN Classifier for Recommender System

Lecture 29 - Rule based classification

Lecture 30 - Regression methods and conclusions

Lecture 31 - Introduction to evaluation ofrecommender system

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Resampling methods

Lecture 33 - Evaluation metrics for accuracy

Lecture 34 - Drawing reliable conclusions - I

Lecture 35 - Drawing reliable conclusions - II

Lecture 36 - Hybrid recommender systems

Lecture 37 - Knowledge based recommender systems

Lecture 38 - Context-Sensitive recommender systems

Lecture 39 - Structural Recommendations in Networks

Lecture 40 - Trust aware recommender systems

NPTEL : NOC:Comprehensive Molecular Diagnostics and Advanced Gene Expression Analysis (Multi-Disciplinary)

Co-ordinators : Prof. Arindam Ghosh, Prof. Aritri Bir

Lecture 1 - Foundation of Molecular Biology

Lecture 2 - DNA Replication and Repair Mechanism

Lecture 3 - Transcription (RNA Synthesis)

Lecture 4 - Protein Synthesis (Translation)

Lecture 5 - Nucleic Acid Isolation and Detection Methods

Lecture 6 - PCR (Polymerase Chain Reaction) Fundamentals

Lecture 7 - Realtime PCR - Part 1

Lecture 8 - Realtime PCR - Part 2

Lecture 9 - Variations of the PCR - Part 1

Lecture 10 - Variations of the PCR - Part 2

Lecture 11 - DNA Cloning and Recombinant DNA technology - I

Lecture 12 - DNA Cloning and Recombinant DNA technology - II

Lecture 13 - DNA Cloning and Recombinant DNA technology - III

Lecture 14 - Genome Editing Technologies - I

Lecture 15 - Genome Editing Technologies - II

Lecture 16 - DNA Microarray

Lecture 17 - FISH (Fluorescence in situ Hybridization)

Lecture 18 - Methods to study DNA-protein interaction - I

Lecture 19 - Methods to study DNA-protein interaction - II

Lecture 20 - Epigenetics and DNA methylation analysis

Lecture 21 - DNA Sequencing - Part 1 - Maxam Gilbert Sequencing

Lecture 22 - DNA Sequencing - Part 2 - Sanger Sequencing

Lecture 23 - Next Generation Sequencing - Part 1

Lecture 24 - Next Generation Sequencing - Part 2

Lecture 25 - Next Generation Sequencing - Part 3

Lecture 26 - Overview, Importance, Methods in Proteomics

Lecture 27 - Proteomic Techniques - High performance liquid chromatography (HPLC)

Lecture 28 - Proteomic Techniques - Mass Spectrometry

Lecture 29 - Proteomic Techniques - Differential in-gel electrophoresis

Lecture 30 - Proteomic Techniques - Protein Microarray

Lecture 31 - Label-based Protein Quantification Technologies - Part 1

Lecture 32 - Label-based Protein Quantification Technologies - Part 2

Lecture 33 - Label free methods of protein quantification

Lecture 34 - Next Generation Proteomics

Lecture 35 - Proteomic Data Analysis and Bioinformatic Tools

Lecture 36 - Syndromic Panels and Multiplex Assay : Molecular identification of Microorganism

Lecture 37 - Molecular Diagnostics in Antimicrobial Resistance Testing

Lecture 38 - RNA Sequencing: Role in Infectious diseases - I

Lecture 39 - RNA Sequencing: Role in Infectious diseases - II

Lecture 40 - Point of Care (POC) diagnostics in Infectious diseases

Lecture 41 - Molecular genetics in tumorogenesis

Lecture 42 - Liquid biopsies in cancer detection

Lecture 43 - Digital PCR in Cancer detection

Lecture 44 - Mutation Detection Methods

Lecture 45 - Isothermal Nucleic Acid Amplification

Lecture 46 - Genetic Testing and Inherited Disorders - Part 1

Lecture 47 - Genetic Testing and Inherited Disorders - Part 2

Lecture 48 - Prenatal diagnostics and NIPT

Lecture 49 - Reproductive genetics and genetic counselling

Lecture 50 - Genetic counselling and patient education

Lecture 51 - Serial Analysis of Gene Expression

Lecture 52 - Metabolomics in Molecular Diagnostics

Lecture 53 - Immunoassay and Luminex Multiplex Assay

Lecture 54 - Molecular diagnostics in Metabolic, Cardiovascular and Gastrointestinal disorders

Lecture 55 - Molecular diagnostics in Endocrine, Neurodegenerative and Transplantation disorders

Lecture 56 - Pharmacogenomics and Personalized Medicine

Lecture 57 - Quality control (QC) in molecular diagnostics

Lecture 58 - Ethical concerns in molecular diagnostics

Lecture 59 - Artificial Intelligence and Machine learning in Genomics

Lecture 60 - Integration of Multiomics Data in Molecular Diagnostics

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Thin Film Technology (Multi-Disciplinary)

Co-ordinators : Prof. Samit K Ray

Lecture 1 - General Introduction

Lecture 2 - Thin Film Materials and Components

Lecture 3 - Semiconductor Films and Heterostructures

Lecture 4 - Chemical Methods

Lecture 5 - Physical Vapor Deposition (PVD) : Thermal Evaporation

Lecture 6 - Thermal Evaporation

Lecture 7 - Sources of Thermal Evaporation

Lecture 8 - Evaporation of Elements and Compounds

Lecture 9 - Compound Evaporation and Thickness Uniformity

Lecture 10 - Film Thickness Monitoring and Control

Lecture 11 - Pulsed Laser Deposition

Lecture 12 - Sputtering Process and Mechanism

Lecture 13 - Plasma Discharge and DC Sputtering

Lecture 14 - RF Sputtering Process

Lecture 15 - Magnetron Sputtering

Lecture 16 - Sputtering of Binary Alloys and Compounds

Lecture 17 - Ion Beam and Hybrid Deposition

Lecture 18 - Introduction to CVD Process

Lecture 19 - Thermal CVD Process

Lecture 20 - Gas Transport and Growth Kinetics

Lecture 21 - CVD Processes and Systems

Lecture 22 - Plasma Enhanced CVD (PECVD)

Lecture 23 - Liquid Phase Epitaxy

Lecture 24 - Vapor Phase Epitaxy - Compound Semiconductors

Lecture 25 - Metal-Organic CVD (MOCVD)

Lecture 26 - Introduction and Film Purity

Lecture 27 - MBE System and Growth Mechanism

Lecture 28 - Effusion Source and Growth Rate

Lecture 29 - Insitu Growth Monitoring - RHEED Oscillation

Lecture 30 - Atomic Layer Deposition / Atomic Layer Epitaxy

Lecture 31 - Thin Film Growth Modes

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Homogeneous Nucleation

Lecture 33 - Heterogenous Nucleation

Lecture 34 - Stranski-Krastanov (2D-3D) Growth Mode

Lecture 35 - SiGe Strained Layer Epitaxy (2D) and Ge Islands (3D)

Lecture 36 - Thickness Measurement

Lecture 37 - Thickness Measurement - Interference Method

Lecture 38 - Thickness and Optical Constants - Ellipsometry

Lecture 39 - Mechanical Properties - Film Porosity and Adhesion

Lecture 40 - Mechanical Properties â€“ Residual Stress

Lecture 41 - Electron Beam Techniques - SEM

Lecture 42 - Scanning Electron Microscopy

Lecture 43 - Microprobe and Transmission Electron Microscopy

Lecture 44 - Transmission Electron Microscopy

Lecture 45 - Scanning Probe Microscopy

Lecture 46 - X-ray Photoelectron Spectroscopy

Lecture 47 - Auger Electron Spectroscopy

Lecture 48 - Secondary Ion Mass Spectrometry (SIMS)

Lecture 49 - Different SIMS Techniques and Depth Profile Analysis

Lecture 50 - Rutherford Backscattering Spectrometry (RBS)

Lecture 51 - Basic Device Fabrication Techniques

Lecture 52 - Metal-Oxide-Semiconductor (MOS) Capacitor

Lecture 53 - n-MOSFET and CMOS FET Devices

Lecture 54 - Scaled Si MOSFET Devices

Lecture 55 - Heterostructure FET and Bipolar Transistors

Lecture 56 - Optoelectronic Materials and Devices

Lecture 57 - Light Emitting Devices

Lecture 58 - Photodetector Devices

Lecture 59 - Photovoltaic Devices

Lecture 60 - Nanotechnology and Photonic Devices

NPTEL : NOC:An Integrated Approach to Common Childhood Diseases and Developmental Disorders in India (Multi-Disciplinary)

Co-ordinators : Prof. Nabarun Karmakar, Prof. Soumi Kundu, Prof. Parama Banerjee

Lecture 51 - Recap: Formula for Linear Regression

Lecture 52 - Bonus: Linear Regression using MS-Excel

Lecture 53 - Linear Regression in Multiple Variables

Lecture 54 - Matrix Method for Multi-Linear Regression

Lecture 55 - Polynomial Regression

Lecture 56 - Functional Regression

Lecture 57 - Bonus: X-Y versus Y-X data (Using MS Excel)

Lecture 58 - Interpolation: Introduction and A NaÃ¯ve Extension

Lecture 59 - Bonus: MS-Excel for NaÃ¯ve Interpolation

Lecture 60 - Lagrange Interpolating Polynomials

Lecture 61 - Newton's Forward Difference Polynomial

Lecture 62 - Newton's Divided Differences: Derivation

Lecture 63 - Interpolation Examples

Lecture 64 - Bonus: MS-Excel for Newton's Polynomial

Lecture 65 - Summary: Regression and Interpolation

Lecture 66 - Numerical Differentiation: Introduction

Lecture 67 - Numerical Differentiation Formula and Analysis

Lecture 68 - Derivation using Method of undetermined coefficients

Lecture 69 - Three-point differentiation formulae

Lecture 70 - Bonus: Differentiation using MS-Excel

Lecture 71 - Truncation vs. Round-Off Errors

Lecture 72 - Numerical Differentiation Examples

Lecture 73 - Summary of Numerical Differentiation

Lecture 74 - Numerical Integration: Introduction

Lecture 75 - Trapezoidal rule and Derivation

Lecture 76 - Simpson's Rules for Integration

Lecture 77 - Bonus: MS-Excel for Numerical Integration

Lecture 78 - Error Analysis for Simpson's Rules

Lecture 79 - Numerical Integration Examples

Lecture 80 - Bonus: Integration using MS-Excel

Lecture 81 - Summary of Newton Cotes Formulae

Lecture 82 - Richardson's Extrapolation

Lecture 83 - Gauss Quadrature

Lecture 84 - Summary of Numerical Integration

Lecture 85 - Introduction to ODE-IVP

Lecture 86 - Motivation using an Example (Bonus)

Lecture 87 - Euler's Methods and Second-Order Methods

Lecture 88 - Second-Order Runge-Kutta Methods

Lecture 89 - Summary of RK-2

Lecture 90 - Higher order RK Methods

Lecture 91 - Bonus: ODE-IVP using MS-Excel

Lecture 92 - Bonus: RK-2 and RK-4 Methods using MS-Excel

Lecture 93 - Summary and Recap

Lecture 94 - Introduction to Predictor-Corrector Methods

Lecture 95 - Stability of Implicit Methods: Overview

Lecture 96 - Stability Analysis of Euler's Methods

Lecture 97 - Extension to multiple variables

Lecture 98 - Local vs. Global Truncation Errors

Lecture 99 - Richardson's Extrapolation

Lecture 100 - Stiff System of ODEs: Introduction

Lecture 101 - Adaptive Step-sizing

Lecture 102 - Adaptive step-sizing and Embedded Methods

Lecture 103 - Bonus: Errors and Extrapolation using MS-Excel

Lecture 104 - Summary and Recap (Weeks 10 and 11)

Lecture 105 - Introduction to ODE-BVP

Lecture 106 - Shooting Method: An Overview

Lecture 107 - Finite Difference Method: An Overview

Lecture 108 - Solution using Shooting Method

Lecture 109 - Algorithm for Shooting Method

Lecture 110 - Problems with Shooting Method

Lecture 111 - Solving ODE-BVP using Finite Difference Method

Lecture 112 - Microsoft Excel based Solution

Lecture 113 - Recap of Week-12 (ODE-BVP)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Basic Course in Biomedical Research (Multi-Disciplinary)

Co-ordinators : Dr. Sanjay Mehendale

Lecture 1 - Introduction to health research

Lecture 2 - Formulating research question

Lecture 3 - Literature review

Lecture 4 - Measures of disease frequency

Lecture 5 - Descriptive study designs

Lecture 6 - Analytical study designs

Lecture 7 - Experimental study designs: Clinical trials

Lecture 8 - Validity of epidemiological studies

Lecture 9 - Qualitative research methods: An overview

Lecture 10 - Measurement of study variables

Lecture 11 - Sampling methods

Lecture 12 - Calculating sample size and power

Lecture 13 - Selection of study population

Lecture 14 - Study plan and project management

Lecture 15 - Designing data collection tools

Lecture 16 - Principles of data collection

Lecture 17 - Data management

Lecture 18 - Overview of data analysis

Lecture 19 - Ethical framework for health research

Lecture 20 - Conducting clinical trails

Lecture 21 - Preparing a concept paper for research projects

Lecture 22 - Elements of a protocol for research studies

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Current Regulatory Requirements for Conducting Clinical Trials in India for Investigational New Drugs (Version 2.0) (Multi-Disciplinary)

Co-ordinators : Prof. Nandini K Kumar, Prof. Y. K. Gupta, Prof. D. K. Sable, Prof. Arun B. Ramteke, Prof. Rubina Bose, Prof. Sucheta Banerjee Kurundkar, Prof. Vishnu Rao

Lecture 1 - Courses Overview

Lecture 2 - Overview of Indian regulatory system

Lecture 3 - Overview of Drugs and Cosmetics Act and Rules thereunder

Lecture 4 - Overview of New Drugs and Clinical Trials Rules, 2019

Lecture 5 - Pre-Clinical Data Requirements

Lecture 6 - Rules Governing Clinical Trials

Lecture 7 - Phases of clinical trial, forms, and fees

Lecture 8 - Regulatory pathway and data requirements for NDCT, 2019

Lecture 9 - BA/BE study and study centers: Legal provisions

Lecture 10 - Guidelines to conduct BA/BE studies

Lecture 11 - Ethics Committee registration and re-registration

Lecture 12 - Ethical Considerations

Lecture 13 - Good Clinical Practice

Lecture 14 - Requirements for import/manufacture of new drug/IND for conducting clinical trials in India

Lecture 15 - Requirements for import/manufacture of new drug/IND for sale/ distribution and unapproved new drug for patients

Lecture 16 - Important issues

Lecture 17 - Special concern

Lecture 18 - Clinical trial related guidelines (NDCT Rules)

Lecture 19 - Content of Proposed Clinical Trial Protocol

Lecture 20 - Content of a Clinical Trial Report

Lecture 21 - Post Marketing Assessment and Clinical Trial Compensation

Lecture 22 - Common observations during submission of CT/BA/BE protocol

Lecture 23 - Common observations during CT/BA/BE centre inspections

Lecture 24 - Drug development process: Overview

Lecture 25 - Salient feature of NDCT 2019 - what's new in NDCT?

Lecture 26 - Online Submission 23A: Sugam

Lecture 27 - Online Submission (CTRI)

Lecture 28 - Tables Given in NDCT 2019 and its Content

NPTEL : NOC:Model Predictive Control: Theory and Applications (Multi-Disciplinary)

Co-ordinators : Dr. Niket S.Kaisare

Lecture 1 - Course Background: Model Predictive Control

Lecture 2 - Course Outline

Lecture 3 - Additional MATLAB Video - Array Operations

Lecture 4 - Additional MATLAB Video - Array Operations

Lecture 5 - Recap: Linear Algebra

Lecture 6 - Recap: Differential and Difference Equations

Lecture 7 - Recap: Process Control Basics

Lecture 8 - Introduction to Model Predictive Control

Lecture 9 - MPC: Salient Features

Lecture 10 - MPC: Historical Perspective

Lecture 11 - Vectors and Matrices

Lecture 12 - Vector Spaces

Lecture 13 - Linear Operation

Lecture 14 - Null and Image Spaces

Lecture 15 - Eigenvalues and Eigenvectors

Lecture 16 - Eigenvalue Decomposition and Tutorial

Lecture 17 - Recap of Week-2

Lecture 18 - Model Classification

Lecture 19 - Discrete-Time Models Overview

Lecture 20 - Discrete-Time Models

Lecture 21 - Finite Impulse Response Models

Lecture 22 - Finite Step Response Models

Lecture 23 - Recap and Plan for Week-4

Lecture 24 - State Space and Step Response Models

Lecture 25 - Nonlinear Models and Model Linearization

Lecture 26 - Model Types and Model Conversion

Lecture 27 - Model Conversion - 2

Lecture 28 - Model Conversion: TF to SS

Lecture 29 - How to handle MIMO systems

Lecture 30 - Discretization of State-Space Models

Lecture 31 - Introduction to Dynamic Matrix Control (DMC)

Lecture 32 - The DMC Algorithm: Future Predictions

Lecture 33 - The DMC Algorithm: Objective and Constraints

Lecture 34 - The DMC Algorithm: Optimization

Lecture 35 - Coding for DMC Algorithm: Setup

Lecture 36 - Coding for DMC Algorithm: Populate Matrices

Lecture 37 - Recap of DMC Algorithm

Lecture 38 - Extensions of DMC Algorithm

Lecture 39 - LTI Models and Coordinate Transform

Lecture 40 - LTI Models: Stability

Lecture 41 - LTI Models: Controllability

Lecture 42 - LTI Models: Conditions for controllability

Lecture 43 - Tutorial by Arvind (Recap of Controllability)

Lecture 44 - LTI Models: Observability

Lecture 45 - Linear Control: Introduction

Lecture 46 - Pole Placement Controller

Lecture 47 - Linear Quadratic Regulator: Batch Solution

Lecture 48 - LQR: Dynamic Programming Solution

Lecture 49 - State Estimation: Introduction

Lecture 50 - Stochastic Processes and Random Variables

Lecture 51 - State Estimation: Pole Placement Observer

Lecture 52 - Kalman Filter: Terminology

Lecture 53 - Kalman Filter: Derivation

Lecture 54 - Recap of Modules 7-9

Lecture 55 - Recap and Plan for this week

Lecture 56 - Linear Quadratic Gaussian

Lecture 57 - LQG Derivation and Separation Principle

Lecture 58 - Setpoint Tracking in LQ Control

Lecture 59 - Disturbance Rejection in LQ Control

Lecture 60 - Disturbance Modeling for Estimation

Lecture 61 - Estimation with Disturbance Modeling

Lecture 62 - Recap and Plan for this week

Lecture 63 - State-Space MPC: Deterministic case

Lecture 64 - Extension to Measured Disturbances

Lecture 65 - Offset-Free State Space MPC

Lecture 66 - Comparison of State-Space MPC with DMC

Lecture 67 - State-Space MPC: Disturbance Modeling

Lecture 68 - Disturbance Modeling: Background and Setup

Lecture 69 - Stochastic Output-Feedback State-Space MPC

Lecture 70 - Bonus Video: Disturbance Modeling for State Space MPC

Lecture 71 - Self-Guided Tutorial of MPC Toolbox

Lecture 72 - Help Session: Using MPC Toolbox

Lecture 73 - Recap of LQ Control and Linear MPC

Lecture 74 - Linear MPC - Key Features and Results

Lecture 75 - Practical Issues: Inferential Control

Lecture 76 - Practical Issues: Measurement Delay

Lecture 77 - Other Practical Issues

Lecture 78 - Some Classical Examples of MPC

Lecture 2 - Global Health vs One Health

Lecture 3 - Basics of Research Ethics

Lecture 4 - Integrated human and animal disease surveillance systems

Lecture 5 - Emerging infectious diseases

Lecture 6 - Process of disease emergence and assessment of the risk factors

Lecture 7 - Mechanisms of pathogen cross over across species boundaries

Lecture 8 - Importance of disease detection, Identification and monitoring in public health

Lecture 9 - Introduction to disease vectors and basics of Medical Entomology

Lecture 10 - The factors influencing an emerging disease

Lecture 11 - Antimicrobial resistance a global threat and Importance of antibiotic stewardship program

Lecture 12 - Introduction of Food safety and food borne diseases

Lecture 13 - What are zoonotic diseases and its role in our changing world

Lecture 14 - The integration of human, animal and ecosystem health in control and prevention of these diseases

Lecture 15 - Community engagement for zoonotic disease control in humans and animals through One Health

Lecture 16 - Basics of Epidemiological Studies

Lecture 17 - Rapid Response system, Disaster Management and Outbreak Investigation Plans

Lecture 18 - Basic statistical methods and their application and the measurement of disease frequency

Lecture 19 - Principles of survey design and the concepts of sampling and Mixed method research

Lecture 20 - Introduction to health policy

Lecture 21 - Risk Communication and Pandemic Preparedness

Lecture 22 - Role of community in disease control and ways for community engagement

Lecture 23 - Uses of different types of media for communication

NPTEL : NOC:Canning Technology, Value Addition of Seafood (Fish Processing) (Multi-Disciplinary)

Co-ordinators : Dr. Abhilash Sasidharan, Dr. Maya Raman

Lecture 1 - Course overview Canning technology and Value addition of sea food

Lecture 2 - Introduction and the concept of canning technology

Lecture 3 - History of canning technology - Part 1

Lecture 4 - History of canning technology - Part 2

Lecture 5 - Canning Technology and Value Addition Containers and their Properties - Part 1

Lecture 6 - Canning Technology and Value Addition Containers and their Properties - Part 2

Lecture 7 - Canning Technology and Value Addition Containers and their Properties - Part 3

Lecture 8 - Canning Technology and Value Addition Containers and their Properties - Part 4

Lecture 9 - Canning Technology and Value Addition - Canning process - Part 1

Lecture 10 - Canning Technology and Value Addition - Canning process - Part 2

Lecture 11 - Canning Technology and Value Addition - Thermal process calculations - Part 1

Lecture 12 - Canning Technology and Value Addition - Thermal process calculations - Part 2

Lecture 13 - Microbiology and spoilage of canned food - Part 1

Lecture 14 - Microbiology and spoilage of canned food - Part 2

Lecture 15 - Process of seafood canning - Part 1

Lecture 16 - Process of seafood canning - Part 2

Lecture 17 - Seafood pre-processing - Part 1

Lecture 18 - Seafood pre-processing - Part 2

Lecture 19 - Additives - Part 1

Lecture 20 - Additives - Part 2

Lecture 21 - SOP for seafood canning - Part 1

Lecture 22 - SOP for seafood canning - Part 2

Lecture 23 - SOP for seafood canning - Part 3

Lecture 24 - Nutritional quality of seafood

Lecture 25 - Muscle structure of seafood

Lecture 26 - Spoilage in seafood

Lecture 27 - Preservation methods

Lecture 28 - Value addition in thermally processed foods

Lecture 29 - Quality standards for seafood value added products - Part 1

Lecture 30 - Quality standards for seafood value added products - Part 2

Lecture 31 - Quality standards for seafood value added products - Part 3

NPTEL : NOC:Vulnerability Studies: An Introduction (Multi-Disciplinary)

Co-ordinators : Prof. Pramod K Nayar

Lecture 1 - Introduction

Lecture 2 - Fragility

Lecture 3 - Resilience

Lecture 4 - Interpreting Vulnerability, precarity of work and Access Equality for Equal Opportunity - Part I

Lecture 5 - Interpreting Vulnerability, precarity of work and Access Equality for Equal Opportunity - Part II

Lecture 6 - Social Vulnerability and Group Vulnerability

Lecture 7 - Willed Vulnerability - Endurance Sports

Lecture 8 - Illness, Storytelling and Embodiment

Lecture 9 - Illness, Storytelling and Embodiment Reading - Audre Lordeâ€™s : The Cancer Journals

Lecture 10 - Group Discussion - Vulnerable Bodies

Lecture 11 - The Aesthetics of Vulnerability - I

Lecture 12 - The Aesthetics of Vulnerability - II Traumatic Materialism

Lecture 13 - The Aesthetics of Vulnerability - III Melodrama

Lecture 14 - Vulnerability Aesthetics The Sublime

Lecture 15 - The Aesthetics of Vulnerability - Discussion

Lecture 16 - Biopolitics, biopower and vulnerability - I

Lecture 17 - Biopolitics, biopower and vulnerability - II

Lecture 18 - Pandemics and Biopolitics

Lecture 19 - Biopolitics and vulnerable populations in Contemporary Literature

Lecture 20 - Discussion on Biopolitics

Lecture 21 - Ecoprecarity

Lecture 22 - Ecodystopia - I

Lecture 23 - Ecodystopia - II

Lecture 24 - Discussion on Ecoprecarity and Ecodystopias - I

Lecture 25 - Discussion on Ecoprecarity and Ecodystopias - II

Lecture 26 - Aging and Vulnerability in Literature

Lecture 27 - Aging and Vulnerability - 2

Lecture 28 - Aging and Vulnerability - 3

Lecture 29 - Discussion on Vulnerability and Aging - 1

Lecture 30 - Discussion on Vulnerability and Aging - 2

Lecture 31 - Childhood and Vulnerability - 1

Lecture 32 - Childhood and Vulnerability - 2

Lecture 33 - Childhood and Vulnerability - 3

Lecture 34 - Discussion on Childhood and Vulnerability - I

Lecture 35 - Discussion on Childhood and Vulnerability - II

Lecture 36 - Imperial Vulnerability - I

Lecture 37 - Imperial Vulnerability - II

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Pulmonary Function Tests - Interpretation and Application in Clinical Practice (Multi-Disciplinary)

Co-ordinators : Multi-Faculty

Lecture 1 - Functional Anatomy of the Respiratory Tract

Lecture 2 - Mechanics of Respiration - Section 1

Lecture 3 - Mechanics of Respiration - Section 2

Lecture 4 - Ventilation, Perfusion Ventilation Perfusion Relationship

Lecture 5 - Essential Principles of Spirometer

Lecture 6 - Types of Pulmonary function tests

Lecture 7 - Obstructive Lung Diseases: Pathophysiology

Lecture 8 - Restrictive lung Diseases: Pathophysiology

Lecture 9 - Drug Effects on Pulmonary Function

Lecture 10 - Lung Disorders in Children

Lecture 11 - Assessment of Lung Functions in Children

Lecture 12 - Static and Dynamic lung function tests

Lecture 13 - Interpretation of Normal Pulmonary Function Tests

Lecture 14 - Indications for Pulmonary Function Testing

Lecture 15 - Obstructive Airway Diseases - Approach

Lecture 16 - Clinical Diagnosis of Restrictive Lung Disease - Part 1

Lecture 17 - Clinical Diagnosis of Restrictive Lung Disease - Part 1

Lecture 18 - Essential Criteria For a Good Pulmonary Function Testing

Lecture 19 - Interpretation of pulmonary function tests in Restrictive lung disease

Lecture 20 - Interpretation of PFT in Obstructive lung diseases

Lecture 21 - Diffusion Capacity of Lungs for Carbon Monoxide DLCO

Lecture 22 - Radiological assessment of obstructive and restrictive lung disorders

Lecture 23 - Laboratory Video - Pulmonary Function tests - Interpretation and application in clinical practice

NPTEL : Foundation for Offshore Structures (Ocean Engineering)

Co-ordinators : Dr. S. Nallayarasu

Lecture 1 - Basics of Soil Mechanics - I

Lecture 2 - Basics of Soil Mechanics - II

Lecture 3 - Basics of Soil Mechanics - III

Lecture 4 - Basics of Soil Mechanics - IV

Lecture 5 - Basics of Soil Mechanics - V

Lecture 6 - Basics of Soil Mechanics - VI

Lecture 7 - Basics of Soil Mechanics - VII

Lecture 8 - Bearing Capacity of Foundations - I

Lecture 9 - Bearing Capacity of Foundations - II

Lecture 10 - Pile Foundation - I

Lecture 11 - Pile Foundation - II

Lecture 12 - Pile Foundation - III

Lecture 13 - Pile Foundation - IV

Lecture 14 - Pile Foundation - V

Lecture 15 - Pile Foundation - VI

Lecture 16 - Pile Installation - I

Lecture 17 - Pile Installation - II

Lecture 18 - Pile Driveability Analysis - I

Lecture 19 - Pile Driveability Analysis - II

Lecture 20 - Pile Driveability Analysis - III

Lecture 21 - Pile Driveability Analysis - IV

Lecture 22 - Pile Driveability Analysis - V

Lecture 23 - Onbottom Stability of Jackets - I

Lecture 24 - Onbottom Stability of Jackets - II

Lecture 25 - Pile Load Test - I

Lecture 26 - Pile Load Test - II

Lecture 27 - Pile Load Test - III

Lecture 28 - Special Topics

Lecture 29 - Special Foundations - I

Lecture 30 - Special Foundations - II

Lecture 31 - Special Foundations - III

Lecture 32 - Pile Group Effects

Lecture 33 - Two Pile Group Effect For Axial Load

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Health,Safety and Environmental Management in Petroleum and Offshore Engineering (Ocean Engineering)

Co-ordinators : Dr. Srinivasan Chandrasekaran

Lecture 1 - Introduction and Terminologies

Lecture 2 - Introduction to HSE

Lecture 3 - Safety assurance and assessment

Lecture 4 - Safety assurance and assessment (Continued...)

Lecture 5 - Safety in design and operations

Lecture 6 - Organizing for safety

Lecture 7 - Hazard classification and assessment, Hazard evaluation and hazard control

Lecture 8 - HaZOP

Lecture 9 - HaZOP (Continued...)

Lecture 10 - Hazard evaluation and hazard control

Lecture 11 - Hazard Identification and Management in Oil & Gas Industry using HAZOP

Lecture 12 - FMEA

Lecture 13 - FMEA (Continued...)

Lecture 14 - Environmental Issues and Management

Lecture 15 - Impact of Oil and Gas Industry on Marine Environment

Lecture 16 - Oil Hydrocarbon in Marine Environment

Lecture 17 - Chemicals and Wastes from Offshore and Oil Industry

Lecture 18 - Dispersion Models â€“ Atmospheric Pollution

Lecture 19 - Atmospheric Pollution (Continued...)

Lecture 20 - Hazard Assessment and Accident Scenario

Lecture 21 - Dose Assessment, Safety Regulation

Lecture 22 - Toxic Release and Dispersion Modeling

Lecture 23 - Chemical Exposure Index (CEI)

Lecture 24 - Chemical Exposure Index (Continued.)

Lecture 25 - Quantitative Risk Assessment

Lecture 26 - Quantitative Risk Assessment (Liquid Release Models Case Study - Continued...)

Lecture 27 - Fire and Explosion Modeling

Lecture 28 - Fire and Explosion Modeling Flammability Diagrams

Lecture 29 - Explosion Modeling

Lecture 30 - Fire and Explosion Preventive Measures

Lecture 31 - Probabilistic Risk Analysis

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 33 - Case Studies

Lecture 34 - Case Studies (Continued...)

Lecture 35 - Software Used in HSE â€“ an Over View

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Port and Harbour Structures (Ocean Engineering)

Co-ordinators : Prof. R. Sundaravadivelu

Lecture 1 - Layout of ports

Lecture 2 - Continuation of layout of ports

Lecture 3 - Visakhapatnam port

Lecture 4 - Ships and size of ships

Lecture 5 - Port planning

Lecture 6 - Harbour layout

Lecture 7 - Site characteristics & navigation channel

Lecture 8 - Bathymetric survey

Lecture 9 - Tide, surge, tsunami and wave

Lecture 10 - Wave rose diagram

Lecture 11 - Breakwater

Lecture 12 - Design of breakwater - Part-1

Lecture 13 - Design of breakwater - Part-2

Lecture 14 - Berm breakwater

Lecture 15 - Dredging & methods of disposal

Lecture 16 - Berthing structures modelling

Lecture 17 - Berthing structures - analyses

Lecture 18 - Loads

Lecture 19 - Types of berthing structures

Lecture 20 - Design of berthing, structures-1

Lecture 21 - Design of offshore berthing, structures-1

Lecture 22 - Estimation of mooring, berthing and seismic forces

Lecture 23 - Estimation seismic forces

Lecture 24 - Active and passive earth pressure and differential water pressure

Lecture 25 - Load combinations and design

Lecture 26 - Fenders

Lecture 27 - Mechanical handling system

Lecture 28 - Single buoy mooring and open sea jetty - Part 1

Lecture 29 - Single buoy mooring and open sea jetty - Part 2

Lecture 30 - Slipway, drydock,floating dock, shiplift

Lecture 31 - Soil structure interaction

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Calulation of fixity depth

Lecture 33 - Pile load test

Lecture 34 - Ground improvement techniques

Lecture 35 - Analysis of pile with spring support

Lecture 36 - UPV,Half cell potential, Low high Integrity Test

Lecture 37 - Mooring Dolphin at KPT

Lecture 38 - Coastal structures and environmental management

Lecture 39 - BOQ and Cost Estimate

Lecture 40 - Proposed Mega Terminal Chennai

Lecture 41 - Preliminary Project Report on Shipyard

Lecture 42 - Procedures & clearances before implementation of a project

Lecture 43 - Detailed project report

Lecture 44 - Environmental studies of a project

Lecture 45 - Design of pile

Lecture 46 - Design and construction of diaphragm wall

Lecture 47 - Emprical relationship between spt and several soil properties

Lecture 48 - Model studies for a deep water port_case study

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Ship Resistance and Propulsion (Ocean Engineering)

Co-ordinators : Dr. P. Krishnankutty, Prof. V. Anantha Subramanian

Lecture 1 - Syllabus and Introduction

Lecture 2 - Seaway Effects on Resistance

Lecture 3 - Ship Types and Powering Aspects

Lecture 4 - Frictional Resistance and Turbulence Stimulation

Lecture 5 - Wave Making Resistance

Lecture 6 - Bulbous Bow on Ship Resistance

Lecture 7 - Air and Wind Resistance Dimensional Analysis - I

Lecture 8 - Dimensional Analysis - II, Model Tests and Ship Resistance Prediction Methods - I

Lecture 9 - Model Tests and Ship Resistance Prediction Methods - II

Lecture 10 - Model Tests and Ship Resistance Prediction Methods - III

Lecture 11 - Resistance in Shallow Water

Lecture 12 - Canal Effects on Resistance Holtrap-Mennen Method for Ship Resistance Prediction

Lecture 13 - Ship Resistance Prediction Methods - I

Lecture 14 - Ship Resistance Prediction Methods - II

Lecture 15 - Resistance of Advanced Marine Vehicles - I

Lecture 16 - Resistance of Advanced Marine Vehicles - II

Lecture 17 - Resistance of Advanced Marine Vehicles - III

Lecture 32 - SO(3) And Matrix Exponent - II

Lecture 33 - Generators, Discussion Of Lie's Theorems - I

Lecture 34 - Generators, Discussion Of Lie's Theorems - II

Lecture 35 - Group Algebras; SO(3)-SU(2) Correspondence - I

Lecture 36 - Group Algebras; SO(3)-SU(2) Correspondence - II

Lecture 37 - SO(3), SU(2) Representations - I

Lecture 38 - SO(3), SU(2) Representations - II

Lecture 39 - Representation On Function Spaces - I

Lecture 40 - Representation On Function Spaces - II

Lecture 41 - Lorentz Boosts, SO(3,1) Algebra - I

Lecture 42 - Lorentz Boosts, SO(3,1) Algebra - II

Lecture 43 - Representation Of Lorentz Group And Clifford Algebra - I

Lecture 44 - Representation Of Lorentz Group And Clifford Algebra - II

Lecture 45 - SU(3) And Lie's Classification - I

Lecture 46 - SU(3) And Lie's Classification - II

Lecture 47 - Fundamental Symmetries Of Physics - I

Lecture 48 - Fundamental Symmetries Of Physics - II

NPTEL : NOC:Quantum Mechanics-I (Physics)

Co-ordinators : Prof. Ramadevi

Lecture 1 - Introduction to Quantum Mechanics - I

Lecture 2 - Introduction to Quantum Mechanics - II

Lecture 3 - Review of Particle in Box, Potential Well, Barrier, Harmonic Oscillator - I

Lecture 4 - Review of Particle in Box, Potential Well, Barrier, Harmonic Oscillator - II

Lecture 5 - Tutorial 1 - Part I

Lecture 6 - Tutorial 1 - Part II

Lecture 7 - Bound States - I

Lecture 8 - Bound States - II

Lecture 9 - Conditions and Solutions for one Dimensional Bound States - I

Lecture 10 - Conditions and Solutions for one Dimensional Bound States - II

Lecture 11 - Tutorial 2

Lecture 12 - Linear Vector Space (LVS) - I

Lecture 13 - Linear Vector Space (LVS) - II

Lecture 14 - Linear Vector Space (LVS) - III

Lecture 15 - Basis for Operators and States in LVS - I

Lecture 16 - Basis for Operators and States in LVS - II

Lecture 17 - Tutorial 3 - Part I

Lecture 18 - Tutorial 3 - Part II

Lecture 19 - Function Spaces - I

Lecture 20 - Function Spaces - II

Lecture 21 - Postulates of Quantum Mechanics - I

Lecture 22 - Postulates of Quantum Mechanics - II

Lecture 23 - Tutorial 4 - Part I

Lecture 24 - Tutorial 4 - Part II

Lecture 25 - Classical vs Quantum Mechanics - I

Lecture 26 - Classical vs Quantum Mechanics - II

Lecture 27 - Compatible vs Incompatible Observable - I

Lecture 28 - Compatible vs Incompatible Observable - II

Lecture 29 - Tutorial 5 - Part I

Lecture 30 - Tutorial 5 - Part II

Lecture 31 - Tutorial 5 - Part III

Lecture 32 - Schrodinger and Heisenberg Pictures - I

Lecture 33 - Schrodinger and Heisenberg Pictures - II

Lecture 34 - Solutions to other Coupled Potential Energies - I

Lecture 35 - Solutions to other Coupled Potential Energies - II

Lecture 36 - Tutorial 6 - Part I

Lecture 37 - Tutorial 6 - Part II

Lecture 38 - Hydrogen Atom and Wave Functions, Angular Momentum Operators, Identical Particles - I

Lecture 39 - Hydrogen Atom and Wave Functions, Angular Momentum Operators, Identical Particles - II

Lecture 40 - Identical Particles and Quantum Computer - I

Lecture 41 - Identical Particles and Quantum Computer - II

Lecture 42 - Tutorial 7 - Part I

Lecture 43 - Tutorial 7 - Part II

Lecture 44 - Harmonic Oscillator - I

Lecture 45 - Harmonic Oscillator - II

Lecture 46 - Ladder Operators - I

Lecture 47 - Ladder Operators - II

Lecture 48 - Tutorial 8 - Part I

Lecture 49 - Tutorial 8 - Part II

Lecture 50 - Stern-Gerlach Experiment - I

Lecture 51 - Stern-Gerlach Experiment - II

Lecture 52 - Oscillator Algebra

Lecture 53 - Tutorial 9 - Part I

Lecture 54 - Tutorial 9 - Part II

Lecture 55 - Angular Momentum - I

Lecture 56 - Angular Momentum - II

Lecture 57 - Rotations Groups - I

Lecture 58 - Rotations Groups - II

Lecture 59 - Tutorial 10 - Part I

Lecture 60 - Tutorial 10 - Part II

Lecture 61 - Addition of Angular Momentum - I

Lecture 62 - Addition of Angular Momentum - II

Lecture 63 - Clebsch-Gordan Coe cients - I

Lecture 64 - Clebsch-Gordan Coe cients - II

Lecture 65 - Tutorial 11 - Part I

Lecture 66 - Tutorial 11 - Part II

Lecture 67 - Clebsch-Gordan Coe cients - III

Lecture 68 - Tensor Operators and Wigner-Eckart Theorem - I

Lecture 69 - Tensor Operators and Wigner-Eckart Theorem - II

Lecture 70 - Tensor Operators and Wigner-Eckart Theorem - III

Lecture 71 - Tutorial 12

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Path Integral and Functional Methods in Quantum Field Theory (Physics)

Co-ordinators : Prof. Urjit A. Yajnik

Lecture 1 - Quantum Theory Fundamental Quantisation - I

Lecture 2 - Quantum Theory Fundamental Quantisation - II

Lecture 3 - Path Integral Formulation - I

Lecture 4 - Path Integral Formulation - II

Lecture 5 - Path Integral Formulation - III

Lecture 6 - Path Integral Formulation - IV

Lecture 7 - Correlation Functions - I

Lecture 8 - Correlation Functions - II

Lecture 9 - Generating Functional, Forced Harmonic Oscillator - I

Lecture 10 - Generating Functional, Forced Harmonic Oscillator - II

Lecture 11 - Generating Function in Field Theory - I

Lecture 12 - Generating Function in Field Theory - II

Lecture 13 - Effective Potential - I

Lecture 14 - Effective Potential - II

Lecture 15 - Effective Potential - III

Lecture 16 - Effective Potential - IV

Lecture 17 - Asymptotic Theory - I

Lecture 18 - Asymptotic Theory - II

Lecture 19 - Asymptotic Condition Kallen-Lehmann representation - I

Lecture 20 - Asymptotic Condition Kallen-Lehmann representation - II

Lecture 21 - Gauge Invariance - Minimal Coupling

Lecture 22 - Gauge Invariance - Geometric Picture

Lecture 23 - Gauge Invariance - Abelian Case

Lecture 24 - Gauge Invariance - Non-abelian case

Lecture 25 - Yang Mills Theory - Coupling to Matter

Lecture 26 - Yang Mills Theory - Physical Content

Lecture 27 - Yang Mills Theory Constraint Dynamics - I

Lecture 28 - Yang Mills Theory Constraint Dynamics - II

Lecture 29 - Gauge Fixing and Faddeev Popov Ghosts - I

Lecture 30 - Gauge Fixing and Faddeev Popov Ghosts - II

Lecture 31 - Topological Vacuum of Yang Mills Theories - I

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Topological Vacuum of Yang Mills Theories - II

NPTEL : NOC:Physics of Biological Systems (Physics)

Co-ordinators : Prof. Mithun Mitra

Lecture 1 - Introduction

Lecture 2 - DNA packing and structure

Lecture 3 - Shape and function

Lecture 4 - Numbers and sizes

Lecture 5 - Spatial scales and System variation

Lecture 6 - Timescales in Biology

Lecture 7 - Random walks and Passive diffusion

Lecture 8 - Random walks to model Biology

Lecture 9 - Derivation of FRAP equations

Lecture 10 - Drift-diffusion equations

Lecture 11 - Solutions of the drift-diffusion equations

Lecture 12 - The cell signaling problem

Lecture 13 - Cell Signalling and Capture Probability of absorbing sphere

Lecture 14 - Capture probability of reflecting sphere

Lecture 15 - Mean capture time

Lecture 16 - Introduction to fluids, viscosity and reynolds number

Lecture 17 - Introduction to the navier stokes equation

Lecture 18 - Understanding reynolds number

Lecture 19 - Life at low reynolds number

Lecture 20 - Various phenomena at low reynolds number

Lecture 21 - Bacterial flagellar motion

Lecture 22 - Rotating flagellum

Lecture 23 - Energy and equilibrium

Lecture 24 - Binding problems

Lecture 25 - Transcription and translation

Lecture 26 - Internal states of macromolecules

Lecture 27 - Protein modification problem

Lecture 28 - Haemoglobin-Oxygen binding problem

Lecture 29 - Freely jointed polymer model

Lecture 30 - Entropic springs and persistence length

Lecture 31 - Freely rotating chain model and radius of gyration

Lecture 32 - The hierarchical chromatin packing model

Lecture 33 - FISH and DNA looping

Lecture 34 - Nucleosomes as barriers, Hi-C, and contact probabilities

Lecture 35 - Deriving the full force extension curve

Lecture 36 - Random walk models for proteins

Lecture 37 - Hydrophobic polar protein model

Lecture 38 - Diffusion in crowded environments

Lecture 39 - Depletion interactions

Lecture 40 - Examples and implications of depletion interactions

Lecture 41 - Introduction to Biological dynamics

Lecture 42 - Introduction to rate equations

Lecture 43 - Separation of timescales in enzyme kinetics

Lecture 44 - Structure and treadmilling of actins and microtubules

Lecture 45 - Average length of polymers in equilibrium

Lecture 46 - Growth rate of polymers

Lecture 47 - Dynamic treadmilling in microtubules

Lecture 48 - Introduction to molecular motors

Lecture 49 - Force generation by molecular motors

Lecture 50 - Models of motor motion

Lecture 51 - molecular motors

Lecture 52 - Free energies of motor for stepping

Lecture 53 - Two state models

Lecture 54 - cooperative transport of cargo

Lecture 55 - Cytoskeleton as a motor

Lecture 56 - translocation ratchet

Lecture 57 - Spatial pattern in biology

Lecture 58 - Some common spatial patterns in biology

Lecture 59 - reaction diffusion and spatial pattern

Lecture 60 - Pattern formation in reaction diffusion system with stability

Lecture 61 - Condition for destablization in pattern formation

Lecture 62 - Schnakenberg kinetics

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Group Theory Methods in Physics (Physics)

Co-ordinators : Prof. Ramadevi

Lecture 1 - Introduction - I

Lecture 2 - Introduction - II

Lecture 3 - Normal subgroup, Coset, Conjugate group

Lecture 4 - Factor group, Homomorphism, Isomorphism

Lecture 5 - Factor group, Homomorphism, Isomorphism

Lecture 6 - Conjugacy Classes

Lecture 7 - Permutation Groups

Lecture 8 - Cycle Structure

Lecture 9 - Cycle Structure (Continued...)

Lecture 10 - Young Diagram and Molecular Symmetry

Lecture 11 - Point Groups

Lecture 12 - Symmetries of Molecules, Schoenflies Notation

Lecture 13 - Symmetries of Molecules, Stereographic Projection

Lecture 14 - Examples of Molecular Symmetries and Proof of Cayley Theorem

Lecture 15 - Matrix Representation of Groups - I

Lecture 16 - Matrix Representation of Groups - II

Lecture 17 - Reducible and Irreducible Representation - I

Lecture 18 - Reducible and Irreducible Representation - II

Lecture 19 - Great Orthogonality Theorem and Character Table - I

Lecture 20 - Great Orthogonality Theorem and Character Table - II

Lecture 21 - Mulliken Notation, Character Table and Basis

Lecture 22 - Tensor Product of Representation

Lecture 23 - Tensor Product and Projection Operator - I

Lecture 24 - Tensor Product and Projection Operator - II

Lecture 25 - Tensor Product and Projection Operator with an example

Lecture 26 - Binary Basis and Observables

Lecture 27 - Selection Rules

Lecture 28 - Selection Rules and Molecular Vibrations

Lecture 29 - Molecular vibration normal modes: Classical Mechanics approach

Lecture 30 - Molecular vibration normal modes: Group Theory approach

Lecture 31 - Molecular vibration modes using projection operator

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Vibrational representation of character

Lecture 33 - Infrared Spectra and Raman Spectra

Lecture 34 - Introduction to continuous group

Lecture 35 - Generators of translational and rotational transformation

Lecture 36 - Generators of Lorentz transformation

Lecture 37 - Introduction to O(3) and SO(3) group

Lecture 38 - SO(n) and Lorentz group

Lecture 39 - Generalised orthogonal group and Lie algebra

Lecture 40 - Subalgebra of Lie algebra

Lecture 41 - gl(2,C) and sl(2,C) group

Lecture 42 - U(n) and SU(n) group

Lecture 43 - Symplectic group

Lecture 44 - SU(2) and SU(3) groups

Lecture 45 - Rank, weight and weight vector

Lecture 46 - Weight vector, root vector, comparison between SU(2) and SU(3) algebra

Lecture 47 - Root diagram, simple roots, adjoint representation

Lecture 48 - SU(2) sub-algebra, Dynkin diagrams

Lecture 49 - Fundamental weights, Young diagrams, dimension of irreducible representation

Lecture 50 - Young diagrams and tensor products

Lecture 51 - Tensor product, Wigner - Eckart theorem

Lecture 52 - Tensor product of irreducible representation 1: Composite objects from fundamental particles

Lecture 53 - Tensor product of irreducible representation 2: Decimet and octet diagrams in the Quark Model

Lecture 54 - Clebsch - Gordan coefficients

Lecture 55 - 1) Quadrupole moment tensor (Wigner-Eckart theorem) 2) Decimet Baryon wavefunction

Lecture 56 - Higher dimensional multiplets in the quark model

Lecture 57 - Symmetry breaking in continuous groups

Lecture 58 - Dynamical symmetry in hydrogen atom: SO(4) algebra

Lecture 59 - Hydrogen atom energy spectrum and degeneracy using Runge-Lenz vector

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Neutron Scattering for Condensed Matter Studies (Physics)

Co-ordinators : Prof. Saibal Basu

Lecture 1 - Neutrons as Probe of Condensed Matter

Lecture 2 - Sources for thermal neutrons used in neutron scattering

Lecture 3

Lecture 4 - Calculating Neutron Scattering cross-section

Lecture 5

Lecture 6 - Scattering theory and introducing dynamics in the formalism

Lecture 7 - Scattering theory and introducing dynamics in the formalism

Lecture 8 - Scattering theory and introducing dynamics in the formalism

Lecture 9 - Scattering law's correlation with double-Fourier transform of real space correlation function

Lecture 10 - Scattering law's correlation with double-Fourier transform of real space correlation function

Lecture 11 - Correlation function to resolution and accessible(Q,Ãâ€°). Introducing experimental facilities

Lecture 12 - Correlation function to resolution and accessible(Q,Ãâ€°). Introducing experimental facilities

Lecture 13 - Correlation function to resolution and accessible(Q,Ãâ€°). Introducing experimental facilities

Lecture 14 - Correlation function to resolution and accessible(Q,Ãâ€°). Introducing experimental facilities

Lecture 15 - Introducing resolution and components of neutron scattering facilities.

Lecture 16 - Introducing resolution and components of neutron scattering facilities.

Lecture 17 - Continue with neutron scattering set up and its components like collimators, filters, detectors etc

Lecture 18 - Continue with neutron scattering set up and its components like collimators, filters, detectors etc

Lecture 19 - Describe the operation of various kinds of neutron detectors

Lecture 20 - Describe the operation of various kinds of neutron detectors

Lecture 21 - Introducing neutron choppers, velocity selectors and polarizers, some important components of beam tailoring devices

Lecture 22 - Introducing neutron choppers, velocity selectors and polarizers, some important components of beam tailoring devices

Lecture 23 - Neutron polarizers and spin-flippers

Lecture 24 - Neutron polarizers and spin-flippers

Lecture 25 - Diffraction at various length scales at a reactor and at a spallation neutron source

Lecture 26 - Diffraction at various length scales at a reactor and at a spallation neutron source

Lecture 27 - Application of neutron crystallography

Lecture 28 - Application of neutron crystallography

Lecture 29 - Magnetism in solids

Lecture 30 - Magnetism in solids

Lecture 31 - Magnetic interaction in solids and magnetic neutron diffarction

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Magnetic interaction in solids and magnetic neutron diffarction

Lecture 33 - Magnetic interaction in solids and magnetic neutron diffarction

Lecture 34 - Magnetic neutron diffraction

Lecture 35 - Magnetic neutron diffraction

Lecture 36 - Neutron diffraction from liquid and amorphous systems

Lecture 37 - Neutron diffraction from liquid and amorphous systems

Lecture 38 - Small Angle Neutron Scattering (SANS) for mesoscopic structure

Lecture 39 - Small Angle Neutron Scattering (SANS) for mesoscopic structure

Lecture 40 - Small Angle Neutron Scattering (SANS) for mesoscopic structure

Lecture 41 - Small Angle Neutron Scattering (SANS) for mesoscopic structure

Lecture 42 - SANS for soft condensed matter

Lecture 43 - SANS for soft condensed matter

Lecture 44 - SANS for polymers, biological systems, nanoparticle aggregates, rocks, Superconducting vortex lattice

Lecture 45 - SANS for polymers, biological systems, nanoparticle aggregates, rocks, Superconducting vortex lattice

Lecture 46 - Neutron reflectometry for thin films

Lecture 47 - Neutron reflectometry for thin films

Lecture 48 - Neutron reflectometry for thin films

Lecture 49 - Details formalism to evaluate specular neutron reflectivity and comparison with x-ray reflectometry

Lecture 50 - Details formalism to evaluate specular neutron reflectivity and comparison with x-ray reflectometry

Lecture 51 - Neutron reflectometry data analysis and reflectometers at various sources

Lecture 52 - Neutron reflectometry data analysis and reflectometers at various sources

Lecture 53 - Neutron reflectometry data analysis and reflectometers at various sources

Lecture 54 - Examples of PNR with and without spin analysis and introduction to off-specular reflectometry

Lecture 55 - Examples of PNR with and without spin analysis and introduction to off-specular reflectometry

Lecture 56 - Examples of PNR with and without spin analysis and introduction to off-specular reflectometry

Lecture 57 - Off-specular neutron reflectometry and introduction to inelastic neutron scattering

Lecture 58 - Off-specular neutron reflectometry and introduction to inelastic neutron scattering

Lecture 59 - Off-specular neutron reflectometry and introduction to inelastic neutron scattering

Lecture 60 - Phonon measurements with neutrons

Lecture 61 - Phonon measurements with neutrons

Lecture 62 - Phonon measurements; single crystals

Lecture 63

Lecture 64 - Phonon: Density of States measurements

Lecture 65 - Stochastic dynamics with neutrons

Lecture 66 - Stochastic motion and various types of diffusion

Lecture 67 - Stochastic motion and various types of diffusion

Lecture 68 - Spin echo spectrometer, Summary of the course

Lecture 69 - Spin echo spectrometer, Summary of the course

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Accelerator Physics (Physics)

Co-ordinators : Prof. Rajni Pande, Prof. Amalendu Sharma, Prof. Pitamber Singh

Lecture 1 - Why accelerators

Lecture 2 - Accelerator as a microscope

Lecture 3 - Charging and Discharging of capacitors

Lecture 4 - Charging and Discharging of capacitors (Continued...)

Lecture 5 - Introduction to DC accelerators

Lecture 6 - Cockcroft Walton Accelerator (1929)

Lecture 7 - Van-de-Graaff accelerator and Tandem and Pelletron accelerators

Lecture 8 - Van-de-Graaff accelerator and Tandem and Pelletron accelerators

Lecture 9 - Voltage measurement and stabilisation

Lecture 10 - Voltage measurement and stabilisation

Lecture 11 - Beam energy calibration/measurement

Lecture 12 - Beam energy calibration/measurement

Lecture 13 - Beam focussing using electrostatic and magnetic lenses and beam optics

Lecture 14 - Beam focussing using electrostatic and magnetic lenses and beam optics

Lecture 15 - Beam focussing using electrostatic and magnetic lenses and beam optics

Lecture 16 - Ion Sources

Lecture 17 - Ion Sources

Lecture 18 - Introduction and Basic concepts of linear accelerators

Lecture 19 - Introduction and Basic concepts of linear accelerators

Lecture 20 - RF Acceleration - 1

Lecture 21 - RF Acceleration - 1

Lecture 22 - RF Acceleration - 2

Lecture 23 - RF Acceleration - 2

Lecture 24 - RF Acceleration - 3 - Waveguides and cavities

Lecture 25 - RF Acceleration - 3 - Waveguides and cavities

Lecture 26 - Accelerating structures - Pillbox cavity and DTL

Lecture 27 - Accelerating structures - Pillbox cavity and DTL

Lecture 28 - Accelerating structures - Travelling wave linacs and periodic accelerating structures

Lecture 29 - Accelerating structures - Travelling wave linacs and periodic accelerating structures

Lecture 30 - Superconducting cavities

Lecture 31 - Superconducting cavities

Lecture 40 - Frequency response of an intigration

Lecture 41 - Filters

Lecture 42 - Specification of OP Amplifiers

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Plasma Physics: Fundamentals and Applications (Physics)

Co-ordinators : Prof. Vijayshri, Prof. V.K. Tripathi

Lecture 1 - Introduction to Plasmas

Lecture 2 - Plasma Response to fields: Fluid Equations

Lecture 3 - DC Conductivity and Negative Differential Conductivity

Lecture 4 - RF Conductivity of Plasma

Lecture 5 - RF Conductivity of Plasma (Continued...)

Lecture 6 - Hall Effect, Cowling Effect and Cyclotron Resonance Heating

Lecture 7 - Electromagnetic Wave Propagation in Plasma

Lecture 8 - Electromagnetic Wave Propagation in Plasma (Continued...)

Lecture 9 - Electromagnetic Wave Propagation Inhomogeneous Plasma

Lecture 10 - Electrostatic Waves in Plasmas

Lecture 11 - Energy Flow with an Electrostatic Wave

Lecture 12 - Two Stream Instability

Lecture 13 - Relativistic electron Beam- Plasma Interaction

Lecture 14 - Cerenkov Free Electron Laser

Lecture 15 - Free Electron Laser

Lecture 16 - Free Electron Laser: Energy gain

Lecture 17 - Free Electron Laser: Wiggler Tapering and Compton Regime Operation

Lecture 18 - Weibel Instability

Lecture 19 - Rayleigh Taylor Instability

Lecture 20 - Single Particle Motion in Static Magnetic and Electric Fields

Lecture 21 - Plasma Physics Grad B and Curvature Drifts

Lecture 22 - Adiabatic Invariance of Magnetic Moment and Mirror confinement

Lecture 23 - Mirror machine

Lecture 24 - Thermonuclear fusion

Lecture 25 - Tokamak

Lecture 26 - Tokamak operation

Lecture 27 - Auxiliary heating and current drive in tokamak

Lecture 28 - Electromagnetic waves propagation in magnetise plasma

Lecture 29 - Longitudinal electromagnetic wave propagation cutoffs, resonances and faraday rotation

Lecture 30 - Electromagnetic propagation at oblique angles to magnetic field in a plasma

Lecture 31 - Low frequency EM waves magnetized plasma

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Electrostatic waves in magnetized plasma

Lecture 33 - Ion acoustic, ion cyclotron and magneto sonic waves in magnetized plasma

Lecture 34 - VIasov theory of plasma waves

Lecture 35 - Landau damping and growth of waves

Lecture 36 - Landau damping and growth of waves (Continued...)

Lecture 37 - Anomalous resistivity in a plasma

Lecture 38 - Diffusion in plasma

Lecture 39 - Diffusion in magnetized plasma

Lecture 40 - Surface plasma wave

Lecture 41 - Laser interaction with plasmas embedded with clusters

Lecture 42 - Current trends and epilogue

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Quantum Electronics (Physics)

Co-ordinators : Prof. K. Thyagarajan

Lecture 1 - Introduction

Lecture 2 - Anisotropic Media

Lecture 3 - Anisotropic Media (Continued...)

Lecture 4 - Anisotropic Media (Continued...)

Lecture 5 - Nonlinear optical effects and nonlinear polarization

Lecture 6 - Non - Linear Optics (Continued...)

Lecture 7 - Non - Linear Optics (Continued...)

Co-ordinators : Prof. Girish S. Setlur

Lecture 1 - Introduction

Lecture 2 - Lagrangian Formalism

Lecture 3 - Hamiltonian Mechanics

Lecture 4 - Flows and Symmetries

Lecture 5 - Examples of Continuum Systems

Lecture 6 - Symmetries and Noether's Theorem

Lecture 7 - Dynamical Symmetries

Lecture 8 - Symmetries in Field Theories

Lecture 9 - The Relativistic Electromagnetic Field

Lecture 10 - Stress-Energy (Energy-Momentum) Tensor

Lecture 11 - Green's Theorem and Green's Functions

Lecture 12 - Diffraction Theory

Lecture 13 - Introduction to Elasticity Theory

Lecture 14 - Solution of the rubber band problem

Lecture 15 - The Stress Function Method

Lecture 16 - Strain Energy

Lecture 17 - The Euler Equation

Lecture 18 - Bernoulli's Principle

Lecture 19 - Matter, Momentum and Energy Transport

Lecture 20 - Stokes' Drag - I

Lecture 21 - Stokes' Drag - II

Lecture 22 - Towards Quantum Fields

Lecture 23 - Right and Left Movers

Lecture 24 - Functional Integration - I

Lecture 25 - Functional Integration - II

Lecture 26 - Perturbation theory

Lecture 27 - Quantum Mechanics using Lagrangians

Lecture 28 - Path Integrals - Formalism

Lecture 29 - Path Integrals - Free particles

Lecture 30 - Path Integrals - Harmonic oscillator

Lecture 31 - Creation and annihilation operators - Excitations

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Creation and annihilation operators - Photons

Lecture 33 - Creation and annihilation operators - Many-body physics

Lecture 34 - Particle and Hole Green functions

Lecture 35 - Current Algebra

Lecture 36 - Tight Binding Models - I

Lecture 37 - Tight Binding Models - II

Lecture 38 - Order Parameters

Lecture 39 - Schrieffer Wolff Transformation

Lecture 40 - Matsubara Green functions - I

Lecture 41 - Matsubara Green functions - II

Lecture 42 - Self Energy and Spectral Functions

Lecture 43 - S-Matrix Perturbation Theory

Lecture 44 - Keldysh Contour

Lecture 45 - Bosonic Coherent States

Lecture 46 - Fermionic Coherent States

Lecture 47 - Nonlocal particle hole operators - Bosons

Lecture 48 - Nonlocal particle hole operators - Fermions

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Quantum Hall Effects (Physics)

Co-ordinators : Prof. Saurabh Basu

Lecture 1 - Conductance in Nanostructures

Lecture 2 - S-Matrix, Reflection and Transmission

Lecture 3 - Introduction to Classical and Quantum Hall Effect

Lecture 4 - Quantum Hall Effect

Lecture 5 - Landau Levels

Lecture 6 - Degenracy of Landau levels

Lecture 7 - Shubnikov de Haas Oscillations

Lecture 8 - Kubo Formula

Lecture 9 - Symmetric gauge

Lecture 10 - Tight binding model, Hofstadter Butterfly

Lecture 11 - Topological Invariant, Chern number

Lecture 12 - Electronic structure of Graphene

Lecture 13 - Low energy Dispersion

Lecture 14 - Dirac Hamiltonian, Hofstadter Butterfly

Lecture 15 - QHE, Landau Levels

Lecture 16 - Properties of Spin angular Momentum, Spin Hall Effect

Lecture 17 - Quantum spin Hall insulator, Kene-Mele Model

Lecture 18 - Kene-Mele Model

Lecture 19 - Landau gauge in fractional quantum Hall effect

Lecture 20 - Laughlin States, Properties

Lecture 21 - Plasma analogy

Lecture 22 - Composite Fermions, Hierarchy

Lecture 15 - Low energy n-p scattering

Lecture 16 - Theories of nuclear forces

Lecture 17 - Shell model

Lecture 18 - Shell model (Continued...)

Lecture 19 - Shell model (Continued...)

Lecture 20 - Shell model (Continued...)

Lecture 21 - Shell model (Continued...)

Lecture 22 - Collective models

Lecture 23 - Vibrational and Rotational levels

Lecture 24 - Radioactivity, Alpha Decay

Lecture 25 - Alpha decay (Continued...)

Lecture 26 - Beta decay

Lecture 27 - Beta decay (Continued...)

Lecture 28 - Beta decay (Continued...)

Lecture 29 - Gamma decay

Lecture 30 - Nuclear Reactions

Lecture 31 - Nuclear reaction (Continued...)

Lecture 32 - Nuclear reaction (Continued...)

Lecture 33 - Nuclear Fission basics

Lecture 34 - Nuclear fission of uranium

Lecture 35 - Nuclear Fission Reactor

Lecture 36 - Nuclear Energy Programme of India

Lecture 37 - Nuclear Fusion

Lecture 38 - Nuclear fusion (Continued...)

Lecture 39 - Thermonuclear fusion reactors

Lecture 40 - Fusion reactions in Stars and stellar neutrinos

Lecture 41 - Nucleosynthesis of elements in Stars

Lecture 42 - Mossbauer Spectroscopy

Lecture 43 - RBS, PIXE, NAA, Summary

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Electromagnetism (Physics)

Co-ordinators : Prof. Manoj K Harbola

Lecture 1 - Coloumb's Law

Lecture 2 - Coloumb's Force due to several Point charges

Lecture 3 - Force due to distribution of Charges

Lecture 4 - What is an Electric Field?

Lecture 5 - Electric Field due to a Charged Distribution

Lecture 6 - Helmholtz's Theorem for Electric Field

Lecture 7 - Divergence of a Field

Lecture 8 - Divergence of Electric Field & Gauss's Law

Lecture 9 - Curl Of a Field - I

Lecture 10 - Curl of a Field - II & Stokes' Theorem

Lecture 11 - Line surface area & volume elements in Cartesian & Cylindrical Coordinates

Lecture 12 - Line surface area & volume elements in Spherical Polar Coordinates

Lecture 13 - Examples of application of the divergence and stokes' theorems

Lecture 14 - Electrostatic Potential

Lecture 15 - Electric field as the gradient of electrostatic potential

Lecture 16 - Laplace's and Poisson's equations for electrostatic potential

Lecture 17 - Elecrostatic potential due to a charge distribution - I; a line charge of finite length

Lecture 18 - Elecrostatic potential due to a charge distribution - II;a ring and a spherical shell of charge

Lecture 19 - Uniqueness of the solution of Laplace's and Poisson's equations

Lecture 20 - Method of images I: point charge in front of a grounded metallic plane - I

Lecture 21 - Method of imagesII: point charge in front of a grounded metallic plane and grounded metal sphere

Lecture 22 - Laplaces equations in some other physical phenomena

Lecture 23 - Energy of a charge distribution - I

Lecture 24 - Energy of a charge distribution - II An example

Lecture 25 - Energy of a charge distribution - III Energy density in terms of electric field

Lecture 26 - Electric field and potential in a conductor

Lecture 27 - Reciprocity theorem for conductors - I

Lecture 28 - Reciprocity theorem for conductors - II

Lecture 29 - Electric polarization and bound charges - I

Lecture 30 - Electric polarization and bound charges - II

Lecture 31 - Electric Displacement

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Engineering Mechanics (Physics)

Co-ordinators : Prof. Manoj K Harbola

Lecture 1 - Introduction to Vectors

Lecture 2 - Addition and subtraction of vectors

Lecture 3 - Multiplying vectors

Lecture 4 - Introduction to vectors: solved examples - I

Lecture 5 - Transformation of vectors under rotation

Lecture 6 - Vector products and their geometric interpretation

Lecture 7 - Vector Product: Kronecker Delta and Levi-Civita symbols - I

Lecture 8 - Vector Product: Kronecker Delta and Levi-Civita symbols - II

Lecture 9 - Introduction to vectors: solved examples - II

Lecture 10 - Equilibrium of rigid bodies Â– Forces and torques

Lecture 11 - Calculating torques and couple moments - I

Lecture 12 - Calculating torques and couple moments - II

Lecture 13 - Finding a force and a couple equivalent to an applied force

Lecture 14 - Different elements and associated forces and torques - I

Lecture 15 - Different elements and associated forces and torques - II

Lecture 16 - Solved examples; equilibrium of bodies Â– I

Lecture 17 - Solved examples; equilibrium of bodies Â– II

Lecture 18 - Forces in different geometric configuration

Lecture 19 - Plane trusses I - building a truss and condition for it to be statically determinate

Lecture 20 - Plane trusses II - calculating forces in a simple truss and different types of trusses

Lecture 21 - Plane trusses III - calculating forces in a simple truss by method of joints

Lecture 22 - Plane trusses IV- Solved examples for calculating forces in a simple truss by method of joints

Lecture 23 - Plane trusses V - Solved examples for calculating forces in a simple truss by method of joints

Lecture 24 - Plane trusses VI - method of sections for calculating forces in a simple truss

Lecture 25 - Dry friction I - introduction with an example

Lecture 26 - Dry friction II - a solved example

Lecture 27 - Dry friction III - Dry thrust bearing and belt friction with demonstration

Lecture 28 - Dry friction IV - Screw friction and rolling friction

Lecture 29 - Dry friction V - Solved examples

Lecture 30 - Properties of plane surfaces I - First moment and centroid of an area

Lecture 31 - Properties of plane surfaces II - Centroid of an area made by joining several plane surfaces

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Properties of plane surfaces III - Centroid of a distributed force and its relation with centre of gravity

Lecture 33 - Properties of plane surfaces IV - solved examples of calculation of first moment and centroid of distributed forces

Lecture 34 - Properties of plane surfaces V- Second moment and product of an area and radius of gyration

Lecture 35 - Properties of plane surfaces VI - Parallel axis transfer theorem for second moment and product of an area

Lecture 36 - Properties of plane surfaces VII - transformation of second moment and product of an area under rotation of coordinate axes

Lecture 37 - Properties of plane surfaces VIII - second moment and product of an area, solved examples

Lecture 38 - Method of virtual work I - degrees of freedom, constraints and constraint forces

Lecture 39 - Method of virtual work II - virtual displacement, virtual work and equilibrium condition in terms of virtual work

Lecture 40 - Method of virtual work III - solved examples

Lecture 41 - Motion of a particle in a plane in terms of planar polar coordinates

Lecture 42 - Planar polar coordinates: solved examples

Lecture 43 - Description of motion in cylindrical and spherical coordinate systems

Lecture 44 - Using planar polar, cylindrical and spherical coordinate systems: solved examples

Lecture 45 - Motion with constraints, constraint forces and free body diagram

Lecture 46 - Motion with constraints Â– solved examples

Lecture 47 - Motion with dry friction Â– solved examples

Lecture 48 - Motion with drag Â– solved examples

Lecture 49 - Equation of motion in terms of linear momentum and the principle of conservation of linear momentum

Lecture 50 - Linear momentum and centre of mass

Lecture 51 - Momentum transfer, impulse and force due to a stream of particles hitting an object

Lecture 52 - Momentum and the variable mass problem

Lecture 53 - Linear momentum Â– solved examples

Lecture 54 - Work and energy I - work energy theorem; conservative and non-conservative force fields

Lecture 55 - Work and energy II - Definition of potential energy for conservative forces; total mechanical energy and the principle of conservation of energy

Lecture 56 - Work and energy III - Two solved examples using conservation principles

Lecture 57 - Work and energy IV Â– Further discussion on potential energy

Lecture 58 - Work and energy V - Solved examples

Lecture 59 - Work and energy VI Â– Applying conservation principles to solve a collision problem

Lecture 60 - Work and energy VII - Solved examples

Lecture 61 - Rigid body motion I - degrees of freedom and number of variables required to describe motion of a rigid body

Lecture 62 - Rigid body motion II - Equation of motion for a single particle in terms of angular momentum and torque; motion of a conical pendulum

Lecture 63 - Rigid body motion III - Conservation of angular momentum; angular momentum for a collection of particles

Lecture 64 - Rigid body motion IV - applying angular momentum conservation, a solved example

Lecture 65 - Rigid body motion V (fixed axis rotation) - some demonstrations of conservation of angular momentum about fixed axis

Lecture 66 - Rigid body motion VI (fixed axis rotation) - Some more demonstrations and related problems

Lecture 67 - Rigid body motion VII (fixed axis rotation) - Kinetic energy and moment of inertia for fixed axis rotation and some solved examples

Lecture 68 - Rigid body motion VIII (fixed axis rotation) - solved examples for calculating moment of inertia and conservation of angular momentum

Lecture 69 - Rigid body motion IX (fixed axis rotation) - solved examples

Lecture 70 - Rigid body motion X - rotation and translation with axis moving parallel to itself

Lecture 71 - Rigid body motion XI - solved examples for rotation and translation with axis moving parallel to itself

Lecture 72 - Rigid-body dynamics XII - Some demonstrations on general motion of rigid bodies

Lecture 73 - Rigid-body dynamics XIII - Infinitesimal angles as vector quantities and change of a vector when rotated by an infinitesimal angle

Lecture 74 - Rigid-body dynamics XIV - Angular velocity and the rate of change of a rotating vector; relating change in angular velocity to an applied torque

Lecture 75 - Rigid-body dynamics XV - Relationship between angular momentum and angular velocity Â– the moment of inertia tensor and the principal axes

Lecture 76 - Rigid-body dynamics XVI - Solved examples

Lecture 77 - Rigid body motion XVII Â– A review of the relation between angular momentum and angular velocity, moment of inertia tensor and the principal axes Edit Lesson

Lecture 78 - Rigid body motion XVIII- Solved examples for calculating rate of change of angular momentum and torque when angular velocity and angular momentum are not parallel

Lecture 79 - Rigid body dynamics XIX - understanding demonstrations shown earlier using equation of motion

Lecture 80 - Rigid body dynamics XX - understanding demonstrations shown earlier using equation of motion (Euler equations)

Lecture 81 - Rigid body dynamics XXI - Euler equations, solved examples

Lecture 82 - Simple harmonic motion I - expanding potential energy about the equilibrium point and the corresponding force

Lecture 83 - Simple harmonic motion II - solving the equation of motion with given initial conditions

Lecture 84 - Simple harmonic motion III - solved examples

Lecture 85 - Simple harmonic motion IV - representing simple harmonic motion on a phasor diagram; energy of an oscillator

Lecture 86 - Simple harmonic motion V - solved examples

Lecture 87 - Simple harmonic motion VI - solving the equation of motion with constant friction in the system

Lecture 88 - Simple harmonic motion VII - harmonic oscillator with velocity-dependent damping (heavy damping)

Lecture 89 - Simple harmonic motion VIII - harmonic oscillator with velocity-dependent damping (critical damping)

Lecture 90 - Simple harmonic motion IX - solved examples

Lecture 91 - Simple harmonic motion X - harmonic oscillator with velocity-dependent damping (light damping)

Lecture 92 - Simple harmonic motion XI - solved examples

Lecture 93 - Simple harmonic motion XII - oscillations of an un-damped harmonic oscillator subjected to an oscillatory force

Lecture 94 - Simple harmonic motion XIII - oscillations of a forced damped harmonic oscillator - I

Lecture 95 - Simple harmonic oscillator XIV - oscillations of a forced damped harmonic oscillator - II

Lecture 96 - Simple harmonic oscillator XV - Energy and power in a forced damped harmonic oscillator

Lecture 97 - Simple harmonic oscillator XVI - Solved examples

Lecture 98 - Equation of motion in a uniformly accelerating frame

Lecture 99 - Motion described in a uniformly accelerating frame; solved examples - I

Lecture 100 - Motion described in a uniformly accelerating frame; solved examples - II

Lecture 16

Lecture 17

Lecture 18

Lecture 19 - Electronic Contribution to the Specific heat of a Solid - Part 1

Lecture 20 - Electronic Contribution to the Specific heat of a Solid - Part 2

Lecture 21 - Electronic Contribution to the Specific heat of a Solid - Part 3

Lecture 22 - Electronic Contribution to the Specific heat of a Solid - Part 4

Lecture 23 - Understanding Thermal conductivity of Metals

Lecture 24 - Introduction to Magnetism in Metal - Part 1

Lecture 25 - Introduction to Magnetism in Metal - Part 2

Lecture 26

Lecture 27 - Introduction to crystals and bonding in crystals

Lecture 28 - Understanding crystal structure using Bravais Lattice

Lecture 29 - Bravais Lattice Types - Part 1

Lecture 30 - Bravais Lattice Types - Part 2

Lecture 31 - Introduction to different crystal types - Part 1

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Introduction to different crystal types - Part 2

Lecture 33 - Indexing crystal planes

Lecture 34 - Scattering of X rays from crystals - Part 1

Lecture 35 - Scattering of X rays from crystals - Part 2

Lecture 36 - Reciprocal lattice vectors - Part 1

Lecture 37 - Reciprocal lattice vectors - Part 2

Lecture 38 - Reciprocal lattice vectors and Laue's condition for diffraction of waves in crystals - Part 1

Lecture 39 - Reciprocal lattice vectors and Laue's condition for diffraction of waves in crystals - Part 2

Lecture 40 - Reciprocal lattice vectors, Laue's condition and Bragg's law for diffraction of waves by a crystal

Lecture 41 - Wave equation in a continuous medium and generalization to a discrete medium

Lecture 42 - Derivation of wave equation for motion of atoms in a crystal

Lecture 43 - Solution of the wave equation for a crystal and the relation between frequency Ãâ€° and wavevector k

Lecture 44 - Group velocity of waves and speed of sound in a crystal

Lecture 45 - Waves in a crystal considering interaction among atoms beyond their nearest neighbours

Lecture 46 - Normal modes in a crystal : Phonons and their momenta and energy

Lecture 47 - Experimental determination of Phonon dispersion curves

Lecture 48 - Lattice with two atom basis: Optical Phonons

Lecture 49 - Displacement of the atoms for the acoustic and optical Phonons

Lecture 50 - Density of states of phonons

Lecture 51 - Calculating the density of states of Phonons: The Einstein's and the Debye's Models

Lecture 52 - Average energy of Phonons at Temperature T

Lecture 53 - Debye's Model of specific heat of crystals

Lecture 54 - Anharmonic effects in crystals: thermal expansion and Umkclapp processes

Lecture 55 - Going beyond free electron model: Periodic crystal potential and Bloch's theorem for the wavefunction

Lecture 56 - Applying perturbation theory to free electron wavefunctions and nearly free electron model

Lecture 57 - Applying perturbation theory to free electron wavefunctions and creation of energy gap at zone boundaries

Lecture 58 - Mixing of plane waves to get Bloch Wavefunction - I

Lecture 59 - Mixing of plane waves to get Bloch Wavefunction - II

Lecture 60 - Equivalence of wave vectors k and k+G and reduced zone scheme

Lecture 61 - Applying periodic boundary condition to Bloch wavefunction and counting the number of states

Lecture 62 - Band theory of metals, insulators and semiconductors

Lecture 63 - Kronig- Penney model

Lecture 64 - Bloch wavefunction as a linear combination of atomic orbitals: Tight Binding Model- I

Lecture 65 - Tight Binding Model - II

Lecture 66 - Semiclassical dynamics of a particle in a band and Bloch oscillations

Lecture 67 - Experimental observations of Bloch oscillations

Lecture 68 - Concept of hole as a current carrier in semiconductors - I

Lecture 69 - Concept of hole as a current carrier in semiconductors - II

Lecture 70 - Calculating carrier density in semiconductors - I

Lecture 71 - Calculating carrier density in semiconductors - II

Lecture 72 - Donor and acceptor energy levels in a semiconductor

Lecture 73 - charge carrier density in n-type and p-type semiconductors

Lecture 74 - Electrical conductivity and hall coefficient in semiconductors

Lecture 75 - Paramagnetism in solids I - Magnetic moment and Lande g factor for atoms

Lecture 76 - Paramagnetism in solids II - temperature dependence of paramagnetic susceptibility and Curie's Law

Lecture 77 - Hund's rule for calculating the total angular momentum J, orbital angular momentum L and spin angular momentum S for an atom

Lecture 78 - Examples of performing paramagnetic susceptibility calculations

Lecture 79 - Diamagnetism in Solids

Lecture 80 - Understanding quenching of orbital angular momentum in transition metal ions

Lecture 81 - Ferromagnetism in solids

Lecture 82 - Introduction to Meissner state of superconductors and levitation

Lecture 83 - Superconducting materials and Type-I and Type-II superconductors

Lecture 84 - London's equation for superconductors

Lecture 85 - Application of London's equation, behavior

Lecture 86 - A qualitative introduction to BCS theory of superconductivity

Lecture 87 - Josephson's effect in superconductors and tunneling current across barriers

Lecture 58 - X-Ray Diffraction and Crystal Structure

Lecture 59 - X-Ray Diffraction and Crystal Structure (Continued...)

Lecture 60 - X-Ray Diffraction and Crystal Structure (Continued...)

Lecture 61 - X-Ray Diffraction and Crystal Structure (Continued...)

Lecture 62

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Electronic Theory of Solids (Physics)

Co-ordinators : Prof. Arghya Taraphder

Lecture 1 - Free electrons: Drude Theory

Lecture 2 - Weidemann Franz Law

Lecture 3 - Drude Model continued: Hall Effect

Lecture 4 - Schrodinger Equation: Boundary Conditions

Lecture 5 - Density of States

Lecture 6 - Properties of Degenerate Fermi Gas

Lecture 7 - Statistics Fermi-Dirac distribution and Maxwell-Boltzmann Distribution: comparison and Specific Heat

Lecture 8 - Sommerfeld Expansion and Band Formation: Temperature dependent densities, Chemical Potential, Specific Heat

Lecture 9 - Bonding and Band Formation: N=2 solid Molecular Orbitals, Linear combinations of Atomic Orbitals (LCAO)

Lecture 10 - Variational Method: Molecular Orbitals, Bonding and anti-bonding Orbitals

Lecture 11 - Bonding and Band Formation (LCAO)

Lecture 12 - Bonding and Band Formation (LCAO) (Continued...)

Lecture 13 - Bloch's Theorem

Lecture 14 - Proof of Bloch's Theorem

Lecture 15 - N atoms Solid

Lecture 16 - Brillouin Zones

Lecture 17 - Tight binding: lattice with a basis

Lecture 18 - Fermi Surfaces

Lecture 19 - Lattice with basis:Energy Spectrum

Lecture 20 - Energy spectrum (Continued...)

Lecture 21 - Graphene and Fermi Surfaces

Lecture 22 - Fermi Surfaces Instabilities

Lecture 23 - Low Dimensional Systems

Lecture 24 - Integer Quantum Hall Effect (IQHE)

Lecture 25 - Integer Quantum Hall Effect (Continued...)

Lecture 26 - Electron in a Strong Magnetic Field and IQHE

Lecture 27 - Spintronics: Introduction and Applications

Lecture 28 - Magnetism

Lecture 29 - Magnetism: Quantum Theory

Lecture 30 - Hund's Rule

Lecture 31 - Curie's Law and Van Vleck Paramagnetism

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Curie's law for any J, Susceptibility

Lecture 33 - Susceptibility and Thermal Properties

Lecture 34 - Adiabatic Demagnetisation

Lecture 35 - Pauli Paramagnetism

Lecture 36 - Paramagnetism of metals

Lecture 37 - Exchange interaction for 2 electrons

Lecture 38 - Exchange interactions of different types

Lecture 39 - Magnetic Order

Lecture 40 - Magnetic Order of different types and Heisenberg model

Lecture 41 - Ising Model

Lecture 42 - Mean Field Theory

Lecture 43 - Spontaneous magnetisation and 1D Ising Model

Lecture 44 - Symmetries of Ising model, Exact Solution

Lecture 45 - Ferromagnetic Heisenberg Model

Lecture 46 - Ground State and Magnons/Excitations

Lecture 47 - Superconductivity

Lecture 48 - London Equation

Lecture 49 - Meisner Effect from London Equation

Lecture 50 - Cooper problem

Lecture 51 - Instability of the Fermi Surface

Lecture 52 - BCS Theory Introduction

Lecture 53 - BCS Theory, Excitation Spectrum

Lecture 54 - BCS

Lecture 55 - Tunneling and Ginzberg Landau Theory

Lecture 56 - Electrodynamics of Superconductivity

Lecture 57 - Type II superconductors

Lecture 58 - Josephson junction

Lecture 59 - Vortices, SQUID, Quantum Supremacy and Qubits

Lecture 60 - Topological state of matter, XY Model, Topological Insulators

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Physics of Linear and Nonlinear Optical Waveguides (Physics)

Co-ordinators : Prof. Samudra Roy

Lecture 1 - Wave Equation, Maxwellâ€™s equation, Plane wave

Lecture 2 - EM wave in vacuum, Poynting vector, Maxwellâ€™s equation in Dielectric Medium

Lecture 3 - Poynting Vector, Maxwellâ€™s equation in dielectric medium (Continued...)

Lecture 4 - Total Internal reflection, Evanescent wave

Lecture 5 - Step-index fiber (SIF), Light guidance in SIF

Lecture 6 - Light guidance in SIF (Skew Ray), V-Parameter, Discrete Ray

Lecture 7 - Cutoff wavelength, Fiber characteristics

Lecture 8 - Fiber Loss, dB units, Dispersion

Lecture 9 - Dispersion, Ray Path constant

Lecture 10 - Ray path constant, Ray equation

Lecture 11 - Ray equation (Continued...)

Lecture 12 - Ray transit time

Lecture 13 - Ray transit time (Continued...)

Lecture 14 - Material dispersion

Lecture 15 - Material dispersion (Continued...)

Lecture 16 - Material Dispersion (Continued...), Dispersion Coefficient

Lecture 17 - Pulse Broadening

Lecture 18 - Pulse Propagation in Dispersive Medium

Lecture 19 - Pulse Propagation in Dispersive Medium (Continued...)

Lecture 20 - Concept of Modes

Lecture 21 - TE and TM Modes

Lecture 22 - TE and TM Modes (Continued...)

Lecture 23 - Modes in Slab waveguide

Lecture 24 - Modes in Slab waveguide (Continued...)

Lecture 25 - Modes in Slab waveguide (Continued...)

Lecture 26 - Modes in Slab Waveguide (Continued...)

Lecture 27 - Waveguide Dispersion

Lecture 28 - Physical Understanding of Modes

Lecture 29 - Power Associated with a Modes

Lecture 30 - Modes in an Optical Fiber

Lecture 31 - Modes in an optical fiber (Continued...)

Lecture 33 - Electrochemical Techniques for Supercapacitors and Batteries

Lecture 34 - From material to a supercapacitor device

Lecture 35 - Effect of temperature on supercapacitor performance

Lecture 36 - Effect of external magnetic field and frequency on supercapacitors

Lecture 37 - Introduction to Fuel Cells

Lecture 38 - Explanation of Fuel cell systems

Lecture 39 - Microbial Fuel Cells

Lecture 40 - Nanotechnology and Nanomaterials for Energy Applications

Lecture 41 - Synthesis of nanomaterials

Lecture 42 - Carbon- and metal-oxide based nanomaterials

Lecture 43 - Nanocatalysts

Lecture 44 - Characterization techniques for solid materials

Lecture 45 - X-ray diffraction method

Lecture 46 - UV-Visible Spectroscopy

Lecture 47 - Fourier Transform Infrared Spectroscopy

Lecture 48 - SEM, TEM and XPS

Lecture 49 - Particle size and zeta potential analysis

Lecture 50 - BET analysis

Lecture 51 - Electrochemical Impedance Spectroscopy

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Thermal Physics (Physics)

Co-ordinators : Prof. Debamalya Banerjee

Lecture 1 - Foundation of kinetic theory of gasses

Lecture 2 - Maxwell's law for speed distribution of gas molecules

Lecture 3 - Average speeds in an ideal gas assembly

Lecture 4 - Principle of equipartition of energy

Lecture 5 - Maxwell's law for energy distribution of gas molecules

Lecture 6 - The mean free path of a gas assembly

Lecture 7 - Expression for mean free path

Lecture 8 - Experimental determination of mean free path

Lecture 9 - Pressure an molecular flux from mean free path

Lecture 10 - Problems on mean free path

Lecture 11 - Transport in fluids: introduction

Lecture 12 - Viscosity: transport of momentum

Lecture 13 - Thermal conductivity: trasnport of thermal energy

Lecture 14 - Diffusion coefficient: transport of mass

Lecture 15 - Molecular effusion: theory and applications

Lecture 16 - Brownian motion: concept, features, theory of fluctuation

Lecture 17 - Brownian motion: mean square displacement and vertical distribution of particles

Lecture 18 - Perrin's experiment on Brownian motion - Part 1

Lecture 19 - Perrin's experiment on Brownian motion - Part 2

Lecture 20 - Problems on Brownian motion, Rotational brownian motion

Lecture 21 - Specific heat of solids: Dulong-Petit law and Einstein theory

Lecture 22 - Limitaion of Einstein theory of specific heat

Lecture 23 - Debye theory of specific heat

Lecture 24 - Behavior of real gasses

Lecture 25 - Van der Waals equation of state

Lecture 26 - Critical parameters from Van der Waal's equation

Lecture 27 - Determination of Van der Waals' constants and Boyle temperature

Lecture 28 - Other equations of state

Lecture 29 - Measurement of temperature: Celcius scale, ideal gas scale, absolute zero

Lecture 30 - The platinum resistance thermometer

Lecture 31 - Basic concepts of classical thermodynamics

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Basic concepts of classical thermodynamics (Continued...)

Lecture 33 - First law of thermodynamics

Lecture 34 - General description of work done and specific heat

Lecture 35 - General discussion on Heat conduction and elastic properties

Lecture 36 - Cyclic processes

Lecture 37 - The reversible heat engine: Carnot cycle

Lecture 38 - Refrigarator and Carnot Theorem

Lecture 39 - 2nd law and Clausius theorem

Lecture 40 - Concept of Entropy and mathematical form of 2nd law

Lecture 41 - The entropy principle

Lecture 42 - Efficiency of a cycle from T-S diagram

Lecture 43 - The Otto cycle

Lecture 44 - The Diesel cycle

Lecture 45 - Entropy and available energy

Lecture 46 - Thermodynamic relations

Lecture 47 - Application of thermodynamic relation

Lecture 48 - The free energy functions

Lecture 49 - Condition for thermodynamic equilibri

Lecture 50 - Thermodynamics of chemical reaction

Lecture 51 - Equilibruim between phases: The Clapeyron equation

Lecture 52 - 1st order phase transion along liquid-vapor equilibrium

Lecture 53 - Phase diagram and triple point

Lecture 54 - The 2nd latent heat equation

Lecture 55 - Gibbs phase rule and basics of second order phase transion

Lecture 56 - Basic concepts of radiation

Lecture 57 - Diffused radiation and Kirchhoff's law

Lecture 58 - Cavity radiation as a thermodynamic system: Stefan-Boltzmann law

Lecture 59 - Thermodynamics of cavity radiation

Lecture 60 - 3rd law of thermodynamics

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Concepts in Magnetism and Superconductivity (Physics)

Co-ordinators : Prof. A Taraphder

Lecture 1 - Introduction: Magnetism and superconductivity as macroscopic quantum phenomena

Lecture 2 - Bohr magneton, BvL theorem

Lecture 3 - An electron in a magnetic field, magnetism of isolated atoms

Lecture 4 - Magnetism of isolated atoms (Continued...), Diamagnetism

Lecture 5 - Magnetism of atoms-dia and paramagnetic susceptibilities. Hund's rules,Van Vleck paramagnetism

Lecture 6 - Van Vleck paramagnetism (Continued...), Paramagnetism

Lecture 7 - Curie's law for arbitrary J, adiabatic demagnetization

Lecture 8 - Paramagnetism of conduction electrons - Pauli paramagnetism

Lecture 9 - Ions in a solid: crystal field, orbital quenching, Jahn-Teller effect

Lecture 10 - Jahn-Teller effect (Continued...), Magnetic resonance techniques NMR, ESR

Lecture 11 - Resonance techniques (Continued...), Recapitulation and overview

Lecture 12 - Recapitulation, interacting moments and long range order, dipolar exchange

Lecture 13 - Interacting moments, 2-electron system, origin of exchange and spin Hamiltonian

Lecture 14 - Spin Hamiltonian, Heisenberg model, Exchange interactions: direct

Lecture 15 - GMR, spin model and mean-field theory, Ising model

Lecture 16 - Ising model and its properties

Lecture 17 - Ising model and its properties (Continued...), absence of LRO in d=1, mean-field theory

Lecture 18 - Ising model recap, applications, exact solutions

Lecture 19 - Exact solution of Ising model in d=1, exact results in d=2. Mermin-Wagner theorem

Lecture 20 - Recap - Exact solution of Ising model. Mermin-Wagner theorem on the absence

Lecture 21 - Ferromagnetic Heisenberg model ground state

Lecture 22 - Ferromagnetic Heisenberg model, spin-waves and magnons

Lecture 23 - Antiferromagnetic Heisenberg model, AF magnetic structures

Lecture 24 - AF magnetic structures, susceptibility and excitations

Lecture 25 - Antiferromagnets and frustration, spin glass

Lecture 26 - Superconductivity: discovery, properties

Lecture 27 - Superconductivity: Meissner effect, London Equation

Lecture 28 - Electron-phonon interaction, Cooper problem

Lecture 29 - Cooper problem, setting up the BCS theory

Lecture 30 - BCS wave function, the Superconducting state and calculations of various properties

Lecture 31 - BCS theory (Continued...), energy gap, transition temperature

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Consequences of BCS theory, gap vs T, Transition temperature, specific heat, tunnelling

Lecture 33 - Transition temperature, specific heat, tunnelling

Lecture 34 - Andreev reflection, Ginzburg-Landau Theory and electrodynamics of superconductors

Lecture 35 - Ginzburg-Landau theory, coherence length and Type I and II superconductors

Lecture 36 - Flux lattice, Flux quantization, Josephson junctions

Lecture 37 - Josephson effect and Josephson junctions

Lecture 38 - SQUID, Quantum computers and Josephson junction Qubits

Lecture 39 - High-Temperature Superconductivity: an enduring enigma

Lecture 40 - Overview and conclusion

Lecture 3 - Elementary vector algebra - I (unit vector, dot product)

Lecture 4 - Elementary vector algebra - II (cross product, triple product)

Lecture 5 - Review of Newtonâ€™s laws of motion - tools for analysis

Lecture 6 - Newtonâ€™s laws of motion - third and second law

Lecture 7 - Newtonâ€™s laws of motion - first law

Lecture 8 - Solving mechanics problems - how to draw free body diagram correctly

Lecture 9 - Mechanical equilibrium (statics) using force and torque balance

Lecture 10 - Mechanical equilibrium (statics) using force and torque balance - more examples

Lecture 11 - Mechanical equilibrium of rope like structures, nature of tension force

Lecture 12 - Massless, flexible suspension cable in mechanical equilibrium

Lecture 13 - Massive flexible suspension cable in mechanical equilibrium

Lecture 14 - Mechanical equilibrium of truss (framework) - nature of internal forces

Lecture 15 - Mechanical equilibrium of truss (framework) - examples

Lecture 16 - Mechanical equilibrium of truss - uniqueness of solution, beam with distributed load

Lecture 17 - Mechanical equilibrium of truss - more on beam with distributed load

Lecture 18 - Mechanical equilibrium - more examples, principle of virtual work, constrained motion

Lecture 19 - Mechanical equilibrium: constraints, degrees of freedom, work done by constrained force

Lecture 20 - d'Alembert - Lagrange principle of virtual work - statement and examples

Lecture 21 - Equivalence of principles of force, torque balance and virtual work, stability analysis

Lecture 22 - Mechanical equilibrium: stability analysis, energy diagram technique

Lecture 23 - Friction between solids - Amonton-Coulomb laws, common misconceptions

Lecture 24 - Friction between solids - worked out examples

Lecture 25 - Friction between solid and fluid - drag force

Lecture 26 - Friction examples - projectile motion with drag force, tying a rope

Lecture 27 - Work-energy theorem in one dimension, importance of conservation laws

Lecture 28 - Work-energy theorem in higher dimensions, conservative forces

Lecture 29 - Momentum balance principle, critical review: projectile motion in real-life

Lecture 30 - Projectile motion - effect of lift and thrust force by examples

Lecture 31 - More on rocket motion - comparing effect of thrust in deep space and at lift off

Lecture 32 - Collisions in daily life - application of energy and momentum balance principles

Lecture 33 - Collision at micro-meter, atomic and sub-atomic scales - Brownian motion, Compton effect

Lecture 34 - Concepts necessary for translation and rotation of rigid bodies - centre of mass

Lecture 35 - Centre of mass of composite objects

Lecture 36 - Concepts necessary for translation and rotation of rigid bodies - moment of inertia

Lecture 37 - More on moment of inertia - 3D objects, composite objects, engineering applications

Lecture 38 - Symmetry of mass distribution - product of inertia

Lecture 39 - Determining the principal axes of rotation and moment of inertia about them

Lecture 40 - Example of finding principal axes, introduction to rotation, the angular velocity vector

Lecture 41 - Rotation of rigid bodies - the angular momentum vector

Lecture 42 - Rotation of rigid bodies - torque

Lecture 43 - Translation and rotation of rigid bodies - computing rules

Lecture 44 - Translation and rotation of rigid bodies - examples (rolling, collision with rotation)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Plasma Physics and Applications (Physics)

Co-ordinators : Prof. M.V. Sunil Krishna

Lecture 1 - Introduction to Plasma - I

Lecture 2 - Introduction to Plasma - II

Lecture 3 - Plasma Oscillations

Lecture 4 - Debye Shielding

Lecture 5 - Debye Potential - I

Lecture 6 - Debye Potential - II

Lecture 7 - Debye Length and Plasma Criteria

Lecture 8 - More Aspects of Debye Shielding

Lecture 9 - Numerical Problems on Debye Shielding - I

Lecture 10 - Plasma as a Gas and Distribution of Velocities

Lecture 11 - Numerical Problems on Debye Shielding - II

Lecture 12 - Single-Particle Motion in Uniform Electric Field

Lecture 13 - Single-Particle Motion in Uniform Magnetic Field - I

Lecture 14 - Single-Particle Motion in Uniform Magnetic Field - II

Lecture 15 - Single-Particle Motion in Uniform Magnetic Field - III

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Relativistic Quantum Mechanics (Physics)

Co-ordinators : Prof. Apoorva D Patel

Lecture 1 - Introduction, The Klein-Gordon equation

Lecture 2 - Particles and antiparticles, Two component framework

Lecture 3 - Coupling to electromagnetism, Solution of the Coulomb problem

Lecture 4 - Bohr-Sommerfeld semiclassical solution of the Coulomb problem, The Dirac equation and the Clifford algebra

Lecture 5 - Dirac matrices, Covariant form of the Dirac equation, Equations of motion, Spin, Free particle solutions

Lecture 6 - Electromagnetic interactions, Gyromagnetic ratio

Lecture 7 - The Hydrogen atom problem, Symmetries, Parity, Separation of variables

Lecture 8 - The Frobenius method solution, Energy levels and wavefunctions

Lecture 9 - Non-relativistic reduction, The Foldy-Wouthuysen transformation

Lecture 10 - Interpretation of relativistic corrections, Reflection from a potential barrier

Lecture 11 - The Klein paradox, Pair creation process and examples

Lecture 12 - Zitterbewegung, Hole theory and antiparticles

Lecture 13 - Charge conjugation symmetry, Chirality, Projection operators, The Weyl equation

Lecture 14 - Weyl and Majorana representations of the Dirac equation, Unitary and antiunitary symmetries

Lecture 15 - Time reversal symmetry, The PCT invariance

Lecture 16 - Arrow of time and particle-antiparticle asymmetry, Band theory for graphene

Lecture 17 - Dirac equation structure of low energy graphene states, Relativistic signatures in graphene properties

Lecture 18 - Groups and symmetries, The Lorentz and Poincare groups

Lecture 19 - Group representations, generators and algebra, Translations, rotations and boosts

Lecture 20 - The spinor representation of SL(2,C), The spin-statistics theorem

Lecture 21 - Finite dimensional representations of the Lorentz group, Euclidean and Galilean groups

Lecture 22 - Classification of one particle states, The little group, Mass, spin and helicity

Lecture 23 - Massive and massless one particle states

Lecture 24 - P and T transformations, Lorentz covariance of spinors

Lecture 25 - Lorentz group classification of Dirac operators, Orthogonality and completeness of Dirac spinors, Projection operators

Lecture 26 - Propagator theory, Non-relativistic case and causality

Lecture 27 - Relativistic case, Particle and antiparticle contributions, Feynman prescription and the propagator

Lecture 28 - Interactions and formal perturbative theory, The S-matrix and Feynman diagrams

Lecture 29 - Trace theorems for products of Dirac matrices

Lecture 30 - Photons and the gauge symmetry

Lecture 31 - Abelian local gauge symmetry, The covariant derivative and invariants

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Charge quantisation, Photon propagator, Current conservation and polarisations

Lecture 33 - Feynman rules for Quantum Electrodynamics, Nature of perturbative expansion

Lecture 34 - Dyson's analysis of the perturbation series, Singularities of the S-matrix, Elementary QED processes

Lecture 35 - The T-matrix, Coulomb scattering

Lecture 36 - Mott cross-section, Compton scattering

Lecture 37 - Klein-Nishina result for cross-section

Lecture 38 - Photon polarisation sums, Pair production through annihilation

Lecture 39 - Unpolarised and polarised cross-sections

Lecture 40 - Helicity properties, Bound state formation

Lecture 41 - Bound state decay, Non-relativistic potentials

Lecture 42 - Lagrangian formulation of QED, Divergences in Green's functions, Superficially divergent 1-loop diagrams and regularisation

Lecture 43 - Infrared divergences due to massless particles, Renormalisation and finite physical results

Lecture 44 - Symmetry constraints on Green's functions, Furry's theorem, Ward-Takahashi identity, Spontaneous breaking of gauge symmetry and superconductivity

Lecture 45 - Status of QED, Organisation of perturbative expansion, Precision tests

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Researching Anglo-Indians in India and the Diaspora (Special Lecture Series)

Co-ordinators : Prof. Merin Simi Raj

Lecture 1 - Keynote Address

Lecture 2 - A Synopsis of 'Two Cheers'

Lecture 3 - Higher Education Among Anglo-Indians

Lecture 4 - Perception of trust, risk and intimacy among elderly Anglo-Indians living in Tollygunge home in Kolkata

Lecture 5 - The Daunting Spirit and the Empowering Voice of Eunice De Souza

Lecture 6 - Origin Myth and Anglo-Indian Identity: Exploring the Representation of the History of the Origin of Anglo-Indian community in Hugh and Colleen Gantzers Lyndsale Raj

Lecture 7 - Keynote Address

Lecture 8 - Shame and Guilt in Alison McQueens The Secret Children

Lecture 9 - Re-visiting McCluskieganj: De-hyphenating the Anglo-Indian Consciousness through Vikas Kumar Jhas Novel

Lecture 10 - The Imaging of the Anglo-Indian Woman in Colonialist Literature

Lecture 11 - Expostulating Celluloid Stereotypes: Researching Anglo-Indian Representation in Malayalam Cinema

Lecture 12 - Chutney Mary: Rethinking AI Identity through their Culinary Consumption Culture

Lecture 13 - In Search of a New Home: Anglo-Indians in the Darjeeling Hills, 1900-1947

Lecture 14 - (Re)discovering Anglo-Indians of Visakhapatnam - An Overview

Lecture 15 - Genealogy of Sporting Culture through a Study of Anglo-Indian Institutions of Asansol

Lecture 16 - Keynote Address

Lecture 17 - Crowdsourcing as a Research Tool

Lecture 18 - Researching Community, Writing Cultures: Challenges and Opportunities

Lecture 19 - Revisiting the Anglo-Indian Community: Making and Unmaking of Anglo-Indian Identity in India

Lecture 20 - Minoritizing English: Anglo-Indians as a Linguistic Minority in India

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

NPTEL : ACM India Summer School on Programming Language Analysis and Optimizations (Special Lecture Series)

Co-ordinators : Girish Bharambe

Lecture 1 - Panel Discussion Q and A - Part 1

Lecture 2 - Panel Discussion Q and A - Part 2

Lecture 3 - Runtime and Linkers - Discussion - 1

Lecture 4 - Runtime and Linkers - Discussion - 2

Lecture 5 - Runtime and Linkers - Linkers

Lecture 6 - Runtime and Linkers - Program Execution - Loader

Lecture 7 - Runtime and Linkers - Static Libraries - Dynamic Linking

Lecture 8 - Code Generation and Backend - An Introduction to LLVM Backend

Lecture 9 - Code Generation and Backend - An Introduction to Loop Backend

Lecture 10 - Code Generation and Backend - Code Generation with LLVM - Part 1

Lecture 11 - Code Generation and Backend - Code Generation with LLVM - Part 2

Lecture 12 - Machine Independent Optimizations - High Level Optimizations - 1

Lecture 13 - Machine Independent optimizations - High Level Optimizations - 2

Lecture 14 - Machine Independent optimizations - High Level Optimizations - 3

Lecture 15 - Machine Independent optimizations - High Level Optimizations - 4

Lecture 16 - Machine Independent optimizations - High Level Optimizations - 5

Lecture 17 - Machine Independent optimizations - High Level Optimizations - 6

Lecture 18 - Machine Architecture and Machine Dependent Optimizations - Machine Architecture - 1

Lecture 19 - Machine Architecture and Machine Dependent Optimizations - Machine Architecture - 2

Lecture 20 - Machine Architecture and Machine Dependent Optimizations - Machine Architecture - 3

Lecture 21 - Machine Architecture and Machine Dependent Optimizations - Register Allocation - 1

Lecture 22 - Machine Architecture and Machine Dependent Optimizations - Register Allocation - 2

Lecture 23 - Machine Architecture and Machine Dependent Optimizations - Register Allocation - 3

Lecture 24 - Machine Architecture and Machine Dependent Optimizations - Instruction Scheduling - 1

Lecture 25 - Machine Architecture and Machine Dependent Optimizations - Instruction Scheduling - 2

Lecture 26 - Machine Dependent Optimizations - Dependence Analysis and Loop transformations - 1

Lecture 27 - Machine Dependent Optimizations - Dependence Analysis and Loop transformations - 2

Lecture 28 - Control-Flow Analyses and Static Single Assignment form - Control Flow Analysis - 1

Lecture 29 - Control-Flow Analyses and Static Single Assignment form - Control Flow Analysis - 2

Lecture 30 - Control-Flow Analyses and Static Single Assignment form - Depth First Analysis of Flow Graphs

Lecture 31 - Control-Flow Analyses and Static Single Assignment form - Dominators

Lecture 32 - Control-Flow Analyses and Static Single Assignment form - Natural Loops (for Reducible Flow-Graphs)

Lecture 33 - Control-Flow Analyses and Static Single Assignment form - The Static Single Assignment SSA Form - 1

Lecture 34 - Control-Flow Analyses and Static Single Assignment form - The Static Single Assignment SSA Form - 2

Lecture 35 - Polyhedral Compilation and Loop Optimizations - Polyhedral Compilation I Part 1

Lecture 36 - Polyhedral Compilation and Loop Optimizations - Polyhedral Compilation I Part 2

Lecture 37 - Polyhedral Compilation and Loop Optimizations - Polyhedral Compilation I - Part 3

Lecture 38 - Polyhedral Compilation and Loop Optimizations - Polyhedral Compilation I - Part 4

Lecture 39 - Polyhedral Compilation and Loop Optimizations - Polyhedral Compilation I - Part 5

Lecture 40 - Polyhedral Compilation and Loop Optimizations - Polyhedral Compilation I - Part 6

Lecture 41 - Polyhedral Compilation and Loop Optimizations - Polyhedral Compilation I - Part 7

Lecture 42 - Polyhedral Compilation and Loop Optimizations - Affine Control Loops

Lecture 43 - Polyhedral Compilation and Loop Optimizations - Siplifying Reductions Revised - 1

Lecture 44 - Polyhedral Compilation and Loop Optimizations - Siplifying Reductions Revised - 2

Lecture 45 - Polyhedral Compilation and Loop Optimizations - Siplifying Reductions Revised - 3

Lecture 46 - Polyhedral Compilation and Loop Optimizations - Classical Optimization

Lecture 47 - Polyhedral Compilation and Loop Optimizations - What is Program Analysis

Lecture 48 - Polyhedral Compilation and Loop Optimizations - Live Variable Analysis - 1

Lecture 49 - Polyhedral Compilation and Loop Optimizations - Live Variable Analysis - 2

Lecture 50 - Polyhedral Compilation and Loop Optimizations - Available Expression Analysis

Lecture 51 - Polyhedral Compilation and Loop Optimizations - Common Features of Bit Vector Frameworks

Lecture 52 - Polyhedral Compilation and Loop Optimizations - The Birth of a Compiler - 1

Lecture 53 - Polyhedral Compilation and Loop Optimizations - The Birth of a Compiler - 2

Lecture 54 - Polyhedral Compilation and Loop Optimizations - The Structure of Modern Compiler Modern Challenges

Lecture 55 - Polyhedral Compilation and Loop Optimizations - Conclusion

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : ACM Summer School on Shape Modelling (Special Lecture Series)

Co-ordinators : Aditya Tatu

Lecture 1 - Linear Algebra and Optimization - 1

Lecture 2 - Linear Algebra and Optimization - 2

Lecture 3 - Linear Algebra and Optimization - 3

Lecture 4 - Linear Algebra and Optimization - 4

Lecture 5 - Curvature - Part 1

Lecture 6 - Curvature - Part 2

Lecture 7 - Curvature - Part 3

Lecture 8 - Introduction To Parametric Curves and Surfaces - 1

Lecture 9 - Introduction To Parametric Curves and Surfaces - 2

Lecture 10 - Introduction To Parametric Curves and Surfaces - 3

Lecture 11 - Introduction To Parametric Curves and Surfaces - 4

Lecture 12 - Introduction To Parametric Curves and Surfaces - 5

Lecture 13 - Introduction To Parametric Curves and Surfaces - 6

Lecture 14 - Introduction To Parametric Curves and Surfaces - 7

Lecture 15 - Introduction To Parametric Curves and Surfaces - 8

Lecture 16 - Introduction To Parametric Curves and Surfaces - 9

Lecture 17 - Implicit Surfaces - Part 1

Lecture 18 - Implicit Surfaces - Part 2

Lecture 19 - Implicit Surfaces - Part 3

Lecture 20 - MeshLab - Part 1

Lecture 21 - MeshLab - Part 2

Lecture 22 - MeshLab - Part 3

NPTEL : ACM India Summer School on Algorithms for Data Science (2023) (Special Lecture Series)

Co-ordinators : Multi-Faculty

Lecture 1 - Introduction - ACM India Summer School on Algorithms for Data Science

Lecture 2 - Introducation to Probability

Lecture 3 - Selection Problems

Lecture 4 - Median from Read-Only Memory

Lecture 5 - Majority and Heavy Hitters

Lecture 6 - Introducation to ProbabilityTail inequalities

Lecture 7 - Chernoff Bounds

Lecture 8 - Quickselect and Quicksort

Lecture 9 - Introduction to Randomized Algorithms: Graph Minimum Cut

Lecture 10 - Introduction to Streaming Algorithm and Reservoir Sampling

Lecture 11 - Approximate Counting in Streaming: MORRIS Counter

Lecture 12 - Median of Means Technique Applied to Approximate Counting

Lecture 13 - Counting Distinct Elements in Streaming

Lecture 14 - 2-Universal Hashing and Applications for Derandomizing

Lecture 15 - Approximate Heavy Hitters

Lecture 16 - Frequency Moments

Lecture 17 - Graph Streaming Algorithms

Lecture 18 - Locality Sensitive Hashing - Part 1

Lecture 19 - Locality Sensitive Hashing - Part 2

Lecture 20 - Locality Sensitive Hashing - Part 3

Lecture 21 - Graph Streaming Lower Bounds

Lecture 22 - Bloom Filters

Lecture 23 - Frequent Pattern Mining - Part 1

Lecture 24 - Frequent Pattern Mining - Part 2

Lecture 25 - Is AI ready for The real world?

Lecture 26 - Online Learning and Multiarmed Bandits - Part 1

Lecture 27 - Online Learning and Multiarmed Bandits - Part 2

Lecture 28 - Reinforcement Learning - Part 1

Lecture 29 - Reinforcement Learning - Part 2

Lecture 30 - Singular Value Decomposition - Part 1

Lecture 31 - Singular Value Decomposition - Part 2

Lecture 32 - Graph Centralities

Lecture 33 - Johnson Lindenstrauss Lemma

Lecture 34 - Graph Centralities Clustering and Partition

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : ACM India Summer School on Cybersecurity for Women (Special Lecture Series)

Co-ordinators : Multi-Faculty

Lecture 1 - Mathamatical Foundation for Cryptography - Part 1

Lecture 2 - Mathamatical Foundation for Cryptography - Part 2

Lecture 3 - Modern Cryptography

Lecture 4 - Modern Cryptography

Lecture 5 - Modern Cryptography - Asymmetric Cryptography

Lecture 6 - Network Security protocols and mechanisms - Part 1

Lecture 7 - Network Security protocols and mechanisms - Part 2

Lecture 8 - IOT Security Protocols - Part 1

Lecture 9 - IOT Security Protocols - Part 2

Lecture 10 - Introduction to Ethical Hacking - Part 1

Lecture 11 - Introduction to Ethical Hacking - Part 2

Lecture 12 - DevSecOps Embedding Security into DevOps - Part 1

Lecture 13 - Web App Security

Lecture 14 - Navigating the privacy landscape

Lecture 15 - Hardware security

Lecture 16 - Introduction to Blockchain

Lecture 17 - Social Engineering and OSINT - Part 1

Lecture 18 - Social Engineering and OSINT - Part 2

Lecture 19 - Cloud Security and Secure Coding Practices - Part 1

Lecture 20 - Cloud Security and Secure Coding Practices - Part 2

Lecture 21 - Career Opportunities, Challenges and Support

Lecture 22 - Quantum Cryptography - Part 1

Lecture 23 - Quantum Cryptography - Part 2

Lecture 24 - AI in cybersecurity

NPTEL : ACM INDIA Winter School - Full-Stack Networking (FSN) (Special Lecture Series)

Co-ordinators : Multi-Faculty

Lecture 1 - Introduction to Full-Stack Networking School

Lecture 2 - Linux Netwoking Stack, Evolution of NICs, Evolution of Network packet processors

Lecture 3 - Demo Session 1: Hands on with basic Linux networking commands

Lecture 4 - Demo Session 2: Netfilter and iptables

Lecture 5 - Intro to virtualization containers

Lecture 6 - Demo session 1: Hands on with Docker

Lecture 7 - Demo session 1: Hands on with Containers

Lecture 8 - Demo session 1: Hands on with Kubernetes

Lecture 9 - Container Networking : CNI service mesh, L7 Proxies, Overlay networks

Lecture 10 - Container Networking : AWS, VPC, NAT, gateways

Lecture 11 - Demo Session 1

Lecture 12 - Multicloud

Lecture 13 - Invited talk- Research Career

Lecture 14 - eBPF

Lecture 15 - eBPF for Networking

Lecture 16 - Invited talks: Application Connectivity for the Multi-Cloud Era

Lecture 17 - Application layer networking

Lecture 18 - Invited talk: Performance Measurement and Optimization

Lecture 19 - Invited talk: Chaos Engineering

Lecture 20 - Websockets

Lecture 21 - RPC: Remote Procedure Calls

Lecture 22 - Invited talk: TiHAN Edge cloud testbed with WiFi/5G

Lecture 23 - Demo Session: Application Layer Networking

Lecture 24 - Message Queues

Lecture 25 - Invited talks: Towards Expressive and Performant Service Meshes

Lecture 26 - Advanced HTTP

Lecture 27 - WiFi Tuned

Lecture 28 - Multipath Networking

Lecture 29 - Demo Session - Multipath networking

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Theory of Yarn Structures (Textile Engineering)

Co-ordinators : Prof. Bohuslav Neckar

Lecture 1 - Fibers and Yarns : Terms, Definitions and Relations

Lecture 2 - Fibers and Yarns : Terms, Definitions and Relations

Lecture 3 - Compression of Fibrous Assemblies

Lecture 4 - Compression of Fibrous Assemblies (Continued...)

Lecture 5 - Pores Among Fibers

Lecture 6 - Pores Among Fibers (Continued...)

Lecture 7 - Orientation of Fibers

Lecture 8 - Orientation of Fibers (Continued...)

Lecture 9 - Mechanics of Parallel Fiber Bundles

Lecture 10 - Mechanics of Parallel Fiber Bundles (Continued...)

Lecture 11 - Modelling of Internal Yarn Geometry

Lecture 12 - Modelling of Internal Yarn Geometry

Lecture 13 - Relations Among Yarn Count T, Twist Z, Packing Density, And Diameter D

Lecture 14 - Relations Among Yarn Count T, Twist Z, Packing Density, And Diameter D (Continued...)

Lecture 15 - Relations Among Yarn Count T, Twist Z, Packing Density, And Diameter D (Continued...)

Lecture 16 - Relations Among Yarn Count T, Twist Z, Packing Density, And Diameter D (Continued...)

Lecture 17 - Bundle Theory of Yarn Unevenness

Lecture 18 - Bundle Theory of Yarn Unevenness (Continued...)

Lecture 19 - Yarn Strength as a Stochastic Process

Lecture 20 - Yarn Strength as a Stochastic Process (Continued...)

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

NPTEL : NOC:Science of Clothing Comfort (Textile Engineering)

Co-ordinators : Dr. Apurba Das

Lecture 1 - Science of Clothing Comfort-Outline

Lecture 2 - Understanding Clothing and Clothing Comfort

Lecture 3 - Understanding Clothing and Clothing Comfort (Continued...)

Lecture 4 - Understanding Clothing and Clothing Comfort (Continued...)

Lecture 5 - Psychology and Comfort

Lecture 6 - Psychology and Comfort (Continued...)

Lecture 7 - Psychology and Comfort (Continued...)

Lecture 8 - Psychology and Comfort (Continued...)

Lecture 9 - Neurophysiological Processes in Clothing Comfort

Lecture 10 - Neurophysiological Processes in Clothing Comfort (Continued...)

Lecture 11 - Neurophysiological Processes in Clothing Comfort (Continued...)

Lecture 12 - Neurophysiological Processes in Clothing Comfort (Continued...)

Lecture 13 - Neurophysiological Processes in Clothing Comfort (Continued...)

Lecture 14 - Neurophysiological Processes in Clothing Comfort (Continued...)

Lecture 15 - Tactile Aspects of Clothing Comfort

Lecture 16 - Tactile Aspects of Clothing Comfort (Continued...)

Lecture 17 - Tactile Aspects of Clothing Comfort (Continued...)

Lecture 18 - Tactile Aspects of Clothing Comfort (Continued...)

Lecture 19 - Understanding Clothing and Clothing Comfort (Continued...)

Lecture 20 - Tactile Aspects of Clothing Comfort (Continued...)

Lecture 21 - Tactile Aspects of Clothing Comfort (Continued...)

Lecture 22 - Clothing Comfort Related to Thermal Transmission

Lecture 23 - Clothing Comfort Related to Thermal Transmission (Continued...)

Lecture 24 - Clothing Comfort Related to Thermal Transmission (Continued...)

Lecture 25 - Clothing Comfort Related to Thermal Transmission (Continued...)

Lecture 26 - Clothing Comfort Related to Thermal Transmission (Continued...)

Lecture 27 - Clothing Comfort Related to Thermal Transmission (Continued...)

Lecture 28 - Clothing Comfort Related to Thermal Transmission (Continued...)

Lecture 29 - Moisture Transmission and Clothing Comfort

Lecture 30 - Moisture Transmission and Clothing Comfort (Continued...)

Lecture 31 - Moisture Transmission and Clothing Comfort (Continued...)

Lecture 32 - Moisture Transmission and Clothing Comfort (Continued...)

Lecture 33 - Moisture Transmission and Clothing Comfort (Continued...)

Lecture 34 - Moisture Transmission and Clothing Comfort (Continued...)

Lecture 35 - Moisture Transmission and Clothing Comfort (Continued...)

Lecture 36 - Combined Heat and Mass Transmission and Clothing Comfort

Lecture 37 - Combined Heat and Mass Transmission and Clothing Comfort (Continued...)

Lecture 38 - Thermo-Physiological Comfort of Functional Clothing

Lecture 39 - Garment Fit and Comfort

Lecture 40 - Garment Fit and Comfort (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Yarn Manufacture-I: Principle of Carding and Drawing (Textile Engineering)

Co-ordinators : Prof. Ravi Chattopadhyay

Lecture 1 - Impurities and Contaminants in Cotton

Lecture 2 - Opening Principle and Opening Devices

Lecture 3 - Cleaning Principle

Lecture 4 - Machines and their Layout

Lecture 5 - Bale Opening Machines

Lecture 6 - Machines in Blow Room - Part II

Lecture 7 - Opening Cleaning Machines - Part II

Lecture 8 - Mixing/Blending

Lecture 9 - Transportation of Tuft

Lecture 10 - Lap formation and Material Flow Regulation

Lecture 11 - Process Performance

Lecture 12 - Introduction

Lecture 13 - Card Feed Zone

Lecture 14 - Carding Zone

Lecture 15 - Analysis of flat action

Lecture 16 - Sliver Formation

Lecture 17 - Package Formation

Lecture 18 - Card Clothing

Lecture 19 - Card Setting, Draft, Production

Lecture 20 - Fibre Configuration and Neps in Card sliver

Lecture 21 - Carding Process

Lecture 22 - Numerical Problems and Solution

Lecture 23 - Introduction and Drafting principle

Lecture 24 - Design Features and operating principle of drawframe

Lecture 25 - Drafting Rolles,Web Condensation and Packaging

Lecture 26 - Drafting Roller Arranegement

Lecture 27 - Drafting Theory,Wave Fromation and Control

Lecture 28 - Drafting Force and Roller Slip

Lecture 29 - Significance of Process Parameters

Lecture 30 - Draft and production Calculation

Lecture 31 - Blending on Drawframe

HTML Links for 1,24,600+ NPTEL PDF Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Process Monitoring and Control

Lecture 33 - Drawframe Autoleveller

Lecture 34 - Card Autoleveller

Lecture 35 - Numericals on Drawing

NPTEL : NOC:Evaluations of Textile Materials (Textile Engineering)

Co-ordinators : Dr. Apurba Das

Lecture 1 - Evaluation of Textile Materials - Outline

Lecture 2 - Evaluation of Textile Materials - Outline (Continued...)

Lecture 3 - Sampling Methods and Sample Size

Lecture 4 - Sampling Methods and Sample Size (Continued...)

Lecture 5 - Sampling Methods and Sample Size (Continued....)

Lecture 6 - Sampling Methods and Sample Size: Practical Statistics

Lecture 7 - Sampling Methods and Sample Size: Practical Statistics (Continued...)

Lecture 8 - Sampling Methods and Sample Size: Practical Statistics (Continued...)

Lecture 9 - Evaluation of Fibre Length

Lecture 10 - Evaluation of Fibre Length (Continued...)

Lecture 11 - Evaluation of Fibre Length (Continued...)

Lecture 12 - Evaluation of Fibre Fineness

Lecture 13 - Evaluation of Fibre Fineness - 1

Lecture 14 - Evaluation of Cotton Fibre Maturity

Lecture 15 - Evaluation of Cotton Fibre Properties: (HVI and AFIS)

Lecture 16 - Evaluation of Linear Density of Textile Materials

Lecture 17 - Evaluation of Linear Density of Textile Materials (Continued...)

Lecture 18 - Evaluation of Tensile Properties of Textile Materials

Lecture 19 - Evaluation of Tensile Properties of Textile Materials (Continued...)

Lecture 20 - Evaluation of Tensile Properties of Textile Materials-1 (Continued...)

Lecture 21 - Evaluation of Tensile Properties of Textile Materials-2 (Continued...)

Lecture 22 - Evaluation of Tensile Properties of Textile Materials-3 (Continued...)

Lecture 23 - Evaluation of Tensile Properties of Textile Materials-4 (Continued...)

Lecture 24 - Evaluation of Tensile Properties of Textile Materials-5 (Continued...)

Lecture 25 - Evaluation of Yarn and Fabric Hairiness

Lecture 26 - Evaluation of Yarn and Fabric Hairiness (Continued...)

Lecture 27 - Evaluation of Yarn Twist

Lecture 28 - Evaluation of Yarn Twist (Continued...)

Lecture 29 - Evaluation of Moisture in Textiles

Lecture 30 - Evaluation of Moisture in Textiles (Continued...)

Lecture 31 - Evaluation of Yarn Evenness

Lecture 32 - Evaluation of Yarn Evenness-1 (Continued...)

Lecture 33 - Evaluation of Yarn Evenness-2 (Continued...)

Lecture 34 - Evaluation of Yarn Evenness-3 (Continued...)

Lecture 35 - Evaluation of Yarn Evenness-3 (Continued...)

Lecture 36 - Evaluation of Yarn Evenness-4 (Continued...)

Lecture 37 - Evaluation of Bursting and Tear Strength of Fabrics

Lecture 38 - Evaluation of Pilling and Abrasion Properties of Fabrics

Lecture 39 - Evaluation of Low Stress Mechanical Properties of Textile Materials

Lecture 40 - Evaluation of Low Stress Mechanical Properties of Textile Materials (Continued...)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Testing of Functional and Technical Textiles (Textile Engineering)

Co-ordinators : Dr. Apurba Das

Lecture 1 - Testing of Low Stress mechanical Properties of Textile Fabrics

Lecture 2 - Testing of Low Stress mechanical Properties of Textile Fabrics (Continued...)

Lecture 3 - Testing of Low Stress mechanical Properties of Textile Fabrics (Continued...)

Lecture 4 - Testing of Transmission Characteristics of Textile Fabrics

Lecture 5 - Testing of Transmission Characteristics of Textile Fabrics (Continued...)

Lecture 6 - Testing of Transmission Characteristics of Textile Fabrics (Continued...)

Lecture 7 - Testing of Transmission Characteristics of Textile Fabrics (Continued...)

Lecture 8 - Testing of Transmission Characteristics of Textile Fabrics (Continued...)

Lecture 9 - Testing of Transmission Characteristics of Textile Fabrics (Continued...)

Lecture 10 - Testing of Fibre Reinforced Composite Materials

Lecture 11 - Testing of Fibre Reinforced Composite Materials (Continued...)

Lecture 12 - Testing of Fibre Reinforced Composite Materials (Continued...)

Lecture 13 - Testing of Fibre Reinforced Composite Materials (Continued...)

Lecture 14 - Testing of Fibre Reinforced Composite Materials (Continued...)

Lecture 15 - Testing of Fibre Fabrics

Lecture 16 - Testing of Fibre Fabrics (Continued...)

Lecture 17 - Testing of Fibre Fabrics (Continued...)

Lecture 18 - Testing of Geotextiles

Lecture 19 - Testing of Geotextiles (Continued...)

Lecture 20 - Testing of Geotextiles (Continued...)

Lecture 21 - Testing of Ballistics Protective Clothing

Lecture 22 - Testing of UV Radiation Protective Textiles

Lecture 23 - Testing of Compression Bandages

Lecture 24 - Testing of Electromagnetic Shielding Textiles
